

Key Investor Information

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

1618 Investment Funds - Bond Dollar - Class USD

(ISIN: LU0041780841) Bond Dollar (the 'Fund') is a Sub-Fund of 1618 Investment Funds (the 'Company'). Lemanik Asset Management S.A. is the Management Company (the 'Management Company') to the Fund.

Objectives and Investment Policy

- The objective of the Fund is to achieve capital growth and generate income by investing mainly in bond and money market instruments. At least 50% of its assets shall be invested in issues denominated in USD.
- The Fund invests mainly in bonds (traditional and non-traditional), funds, bond indices, certificates, ETFs and derivatives. The Fund will also be exposed via eligible currency investments. At least 50% of its assets will be invested in instruments with an investment grade rating. Investments in emerging countries shall not be excluded.
- Derivatives are used with the aim of ensuring good portfolio management as well as for hedging purposes.
- The investment currencies are not necessarily identical to the reference currency of the Fund. The resulting monetary exposure will not be systematically hedged but will be actively managed by the Manager.
- The Fund is actively managed in a rigorous risk monitoring environment. The portfolio is managed on a discretionary basis without using a reference benchmark.
- The share class price is calculated every week. The investor may obtain on simple request a redemption with a weekly frequency.
- The share class does not distribute dividends.
- Recommendation: the Fund may not be appropriate for investors who plan to withdraw their money within five years.

Risk and Reward Profile

- The lowest category does not mean a risk free investment.
- The risk and reward profile may change over time.
- Historical data may not be a reliable indication for the future.
- This Fund is in category 3, since the share price has a moderate volatility and therefore the risk of loss as well as the expected reward is generally small to medium.

The following risks may not be fully captured by the risk and reward indicator:

- Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
- Credit Risk: The Fund can invest a material part of its assets in bonds. Their issuers can become insolvent, thus their bonds can either partly or entirely diminish in value.
- Liquidity Risk: The Fund may invest a material part of its assets in other funds. With these funds there can be a risk of suspension of redemption and therefore their liquidity can be constrained.
- Operational Risk: Failures or delays in operational processes may negatively affect the Fund.

A complete description of risk factors is set out in the Prospectus in the section entitled 'Facteurs de risques généraux'.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distribution. These charges reduce the potential growth of your investment.
