## AB SICAV I Sustainable Global Thematic Portfolio Class IX / LU0232558980 / A0JMG8 / AllianceBernstein LU

#### Investment strategy

The Investment Manager invests in securities that it believes are positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN Sustainable Development Goals (UN SDGs). The Investment Manager emphasises positive selection criteria, in particular by analysing the exposure to environmental, social and governance (ESG) factors of each security or issuer, over broad-based negative screens in assessing an issuer's exposure to such ESG factors.

## Investment goal

The Portfolio seeks to increase the value of your investment over time through capital growth. Under normal market conditions, the Portfolio typically invests at least 80% of its assets in equity securities of issuers that the Investment Manager believes are positively aligned with sustainable investment themes. These companies may be of any market capitalisation and from any country, including emerging market countries. The Portfolio usually invests in at least three different countries and at least 40% in equity securities of non-US companies
