2 The Mountain-View Data Fund Rating calculates a comparative ranking for funds using yield, volatility and trend data. For more information visit [MVD Funds Rating](#)

### Investment strategy

To achieve the aim, the fund will attempt to replicate the index, before fees and expenses, by buying all or a substantial number of the securities in the index. The fund may employ techniques and instruments in order to manage risk, reduce costs and improve results. These techniques and instruments may include the use of financial contracts (derivatives). The fund may also engage in secured lending of its investments to certain eligible third parties to generate additional income to offset the costs of the fund.

### Investment goal

The fund is passively managed. The aim is for your investment to reflect the performance of the DAX® Index (index) which is designed to reflect the performance of the shares of 40 of the largest companies on the Frankfurt Stock Exchange which meet the applicable eligibility criteria. To be included in the index, a company's readily available shares must be listed and continuously traded on the Frankfurt Stock Exchange, show a free float portion of at least 10% and meet order book turnover requirements on the Frankfurt Stock Exchange within the preceding 12 months.
