AB SICAV I International Technology Portfolio Class C / LU0252218937 / A0PADM / AllianceBernstein LU

Investment strategy

Under normal market conditions, the Portfolio typically invests at least 80%, and not less than two thirds, of its assets in equity securities of companies that are expected to profit from technological advances and innovations. These companies may be of any market capitalisation and any country, including emerging market countries. The Investment Manager seeks to select securities that it believes offer superior long-term growth characteristics. The Portfolio may be exposed to any currency. The Portfolio uses derivatives for hedging (reducing risks) and efficient portfolio management.

Investment goal

The Portfolio seeks to increase the value of your investment over time through capital growth.
