**Invesco Balanced-Risk Allocation Fund A accumulation - EUR / LU0432616737 / A0N9Z0 / Invesco Management**

**Investment strategy**

The Fund intends to gain exposure primarily to shares of companies, debt instruments (issued by governments or companies with a minimum rating of B- by Standard and Poor's rating agency or equivalent) and commodities worldwide. The Fund intends to gain exposure to assets that are expected to perform differently across the three stages of the market cycle, namely recession, non-inflationary growth and inflationary growth. The Fund may use securities lending for efficient portfolio management purposes. The Fund may make significant use of derivatives (complex instruments) in order to (i) reduce the risk and/or generate additional capital or income and/or (ii) meet the Fund's investment objectives by generating varying amounts of leverage (i.e. where the Fund gains market exposure in excess of the net asset value of the Fund).

**Investment goal**

The objective of the Fund is to achieve a positive total return over a market cycle with a low to moderate correlation to traditional financial market indices.
