BGF Global Allocation Fund D2 Hedged AUD / LU0827880187 / A1J4MW / BlackRock (LU)

Investment strategy

The IA may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets). The Fund is actively managed, and the IA has discretion to select the Fund's investments. In doing so, the IA will refer to a composite benchmark comprising the S&P 500 (36%), FTSE World (ex-US) (24%), 5 Yr US Treasury Note (24%) and FTSE Non-USD World Government Bond Index (16%) (the "Index") when constructing the Fund's portfolio, and also for performance comparison and risk management purposes, as further described in the prospectus. The IA is not bound by the components or weighting of the Index and may also use its discretion to invest in securities not included in the Index. In addition, given the fund's ability to invest in global stocks and global bonds, investors may use the FTSE World Index to compare the performance of the Fund vs. global equities and the FTSE World Government Bond Index to compare the performance of the Fund vs. global bonds (and the IA intends to include these comparisons in its reports on the Fund from time to time).

Investment goal

The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets. The Fund invests globally at least 70% of its total assets in equity securities (e.g. shares) and fixed income (FI) securities in normal market conditions. FI securities include bonds and money market instruments (i.e. debt securities with short term maturities). It may also hold deposits and cash. Subject to the above, the asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions. The FI securities may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development) and may include securities with a relatively low credit rating or which are unrated. The Fund may also invest in companies that are small in size and are at a relatively early stage in their development. The Fund will generally aim to invest in securities of undervalued companies (i.e. their market price does not reflect their underlying worth).
