Investment strategy

The IA may use financial derivative instruments (FDIs) (i.e. investments the prices of which are based on one or more underlying assets) for investment purposes in order to achieve the investment objective of the Fund, and/or to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).

Investment goal

The Fund aims to maximise the return on your investment through a combination of capital growth and income on the Fund's assets and invest in a manner consistent with the principles of environmental, social and governance (ESG) investing. The Fund invests at least 70% of its total assets in the equity securities (e.g. shares) of companies domiciled in, or the main business of which is in, Europe excluding the United Kingdom.
