### ACATIS Value Event Fonds - Anteilklasse X (TF) / DE000A2H7NC9 / A2H7NC / ACATIS Investment

# Investment strategy

Various types of events and different holding periods for individual investments should diversify the portfolio. Interest-bearing securities and bonds may be added, whereby 35% of the Fund's value may be invested in debentures and bonded loans issued by the Federal Republic of Germany. This Fund promotes environmental and/or social characteristics under Article 8 of the Disclosure Regulation (Regulation (EU) 2019/2088). Further information can be found in the section "Investment Principles and Policies" of the Fund's Prospectus. The fund may perform derivative trades in order to hedge positions or to increase its returns. The benchmark for the fund is: 50% ESTR TR (EUR), 50% MSCI World GR (EUR). The benchmark index for the fund is determined by the Manufacturer and may be changed if necessary. The fund does not aim to reproduce the benchmark. The portfolio manager may invest at their own discretion in securities or industries not included in the benchmark in order to capitalise on specific investment opportunities. The investment strategy will restrict the extent to which the portfolio holdings may deviate from the benchmark.

# Investment goal

The Fund is actively managed. The investment objective of the Fund is to achieve the greatest possible capital appreciation. To achieve this aim, the Fund invests in various investment classes. With "value investing", company-specific events ("event-driven value") such as changes to the capital or shareholder structure should be taken into consideration when selecting fund positions. Focusing on companies with high business quality (companies that stand out owing to their sustainability, willingness to safeguard a competitive advantage and their ability to generate high and free cash flows) should reduce fundamental risks when selecting fund positions.
