Investment strategy

The Fund will seek to achieve this by investing primarily in interest-bearing debt securities or equivalent securities and debt instruments issued by borrowers worldwide to raise short-term funds (money market instruments). Investments may also be made in forward contracts (contracting and settlement do not take place at the same time) or term deposits (deposits with a pre-agreed term and a fixed interest rate) with banks as well as in other similar funds. The Investments have a weighted average remaining time to maturity of max. 6 months resp. final maturity of max. 12 months. Investments may only be made in securities with a remaining time to maturity before payout of the nominal value of not more than 2 years whose next interest rate adjustment date must not be later than 397 days after the time of the investment. The Fund may invest in derivatives (financial instruments derived from other securities or assets) for hedging purposes.

Investment goal

The Fund is a standard variable net asset value money market fund. The objective of this Fund is to achieve reasonable capital growth.
