Wellington Global Bond Fund GBP N Acch / IE00BH487969 / A2N7U6 / Wellington M.Fd.(IE)

Investment strategy

The Index is comprised of bonds from a broad array of geographies and sectors with a maturity of over one year. The Fund will generally be diversified across country and issuer. The Fund will invest, either directly or via derivatives, in bonds (fixed or floating rate) issued by government, agency, supranational or corporate issuers, mortgage and other asset-backed securities. Investments will represent a broad credit spectrum, including issues rated below investment-grade. There are no limitations on the credit quality of individual securities or currencies. Derivatives will be used to hedge (manage) risk and/or volatility and for investment purposes (such as gaining exposure to a security). Derivatives will form a significant part of the strategy and will impact performance.

Investment goal

The Fund will be actively managed seeking to outperform the Bloomberg Global Aggregate Index (the "Index"), primarily investing globally in a diversified portfolio of fixed income securities. The Fund's investment approach seeks to identify a diversified set of independent investment ideas, to efficiently allocate capital to those investment ideas and aims to manage Fund risk across a team of multiple internal portfolio managers.
