Investment strategy

The Sub-Fund is actively managed. The Sub-Fund invests primarily (meaning not less than 75% of its Net Asset Value) in shares of smaller companies listed on the stock exchanges of developed countries in the world. The fund manager uses a proprietary systematic stock selection model to identify shares of companies that it believes to be attractive investment opportunities, relative to their industry peers, based on analysis of their valuation and earnings prospects. From these shares, the fund manager seeks to construct a well-diversified portfolio with the best expected return-to-risk trade off to meet the Fund's investment objective.

Investment goal

The aim of the Sub-Fund is to provide long-term capital growth with a total annual return on investment (generated through an increase in the value of the shares held by the Sub-Fund and/or income received from those shares) of approximately 4% gross of all fees/expenses above the annual return of the MSCI World Small Cap Index on a rolling three year basis. The MSCI World Small Cap Index is designed to measure the performance of the shares of smaller companies listed on the stock exchanges of developed countries in the world.
