Investment strategy

In the context of pursuing the SRI Strategy, certain companies are excluded on the basis of applying minimum exclusion criteria. Furthermore, investments are not made in companies that fail to apply good corporate governance practices. Companies that perform better based on an assessment of sustainability factors in their sector will be selected from the remaining investment universe. This rating is an internal rating ("SRI rating") that is assigned to the individual companies. The SRI rating has five different grades from Class 0 (insufficient) to Class 4 (very good). We invest primarily in interest-bearing securities, the majority of which have a good credit rating and come from issuers in industrialised countries. These securities have an average duration (remaining term) of between zero and nine years. In addition, we invest up to 30% of the Fund's assets directly or via derivatives in equities and comparable securities of large companies that come mainly from the eurozone. The foreign currency risk against the euro is limited to a maximum of 5.00% of the Fund's assets. A maximum of 10% of the Fund's assets may be invested in target funds (UCITS and/or UCI).

Investment goal

Applying the strategy for sustainable and responsible investment ("SRI Strategy"), the objective of the Fund's investment policy is to earn a return on the bond portion of the portfolio that is in line with the return on the euro bond markets and to generate long-term capital growth in the equity portion of the portfolio. The Fund follows the SRI Strategy and promotes a wide range of sustainability factors (environmental, human rights, governance and/or business conduct characteristics - the characteristic of business conduct does not apply to government bonds issued by a government entity).
