#### Investment strategy

The assets of the Sub-Fund are mainly invested either directly (min. 67%) or indirectly in worldwide equity securities. Investments are made across sectors and market capitalizations and without any restriction as to the issuer's domicile. This also includes investments in the emerging markets. Emerging markets generally mean the markets of countries which are in the process of becoming modern industrial markets and therefore show higher potential, but also carry a higher risk. Investments in the securities mentioned above may also be made through Global Depository Receipts (GDRs) and American Depository Receipts (ADRs) listed on recognized exchanges and markets issued by international financial institutions.

### Investment goal

The investment objective of JSS Sustainable Equity - Global Climate 2035 (the "Sub-Fund") is to achieve long-term capital appreciation by investing worldwide in equities and focusing on companies contributing to a net- zero carbon future.
