OBJECTIVES AND INVESTMENT POLICY

The Fund typically invests in equity and debt securities of issuers anywhere in the world, including emerging market countries.

The Fund may be exposed to any currency.

The Fund uses derivatives to a significant extent for hedging (reducing risks), efficient portfolio management, and other investment purposes (including to gain additional exposure and to take synthetic short positions).

Secured Overnight Financing Rate (SOFR) + 4% used for performance comparison.

The Fund is actively managed and the Investment Manager is not constrained by its benchmark. Please see the Fund's prospectus for more information.

Lower risk

Higher risk

Potentially lower reward

Potentially higher reward

1	2	3	4	5	6	7
---	---	---	---	---	---	---

What does this risk indicator mean?

This synthetic risk and reward indicator (SRRI) scale rating indicates how the Fund may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also means a larger risk of losses. The lowest category does not mean a risk free investment.

The above rating is an estimate, not a guarantee. It is calculated using industry-standard methods and is based on medium-term volatility (how sharply the Fund's actual or estimated share price has gone up and down over five years).

Historical data may not be a reliable indication of the future risk profile of this Fund. The risk and reward category for this Fund is not guaranteed to remain unchanged and may shift over time.

Why is this Fund in this category?

The Fund is not guaranteed in capital. The Fund is invested in both equities and debt securities which are subject to variations up or down that can generate gains or losses.

Risks materially relevant to the Fund but not adequately captured by the SRRI:

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

Counterparty risk: If an entity with which the Fund does business becomes insolvent, payments owed to the Fund could be delayed, reduced, or eliminated.

Liquidity risk: Certain securities could become hard to buy or to sell at a desired time or price.
