March 20, 2023

Dear Shareholders,

This report provides an update of AB FCPI (the “Fund”) for the semi-annual reporting period ended February 28, 2023.

US and international stocks rose, while emerging-market stocks declined during the six-month period ended February 28, 2023. In response to persistently high inflation, central banks—led by the US Federal Reserve (the “Fed”)—continued to rapidly tighten monetary policy, which elevated investor concern about slowing economic growth and the likelihood of a recession. Following a series of aggressive rate hikes, the Fed downshifted to a 0.25% increase but reiterated its higher-for-longer conviction, which dampened investor sentiment.

Toward the end of the period, easing supply chain pressures and more favorable economic data indicated that inflation was cooling, and markets rallied on optimism that a recession might be avoided. But stocks gave back some gains after unexpectedly strong global economic data created uncertainty around the strength of the disinflationary process and raised concern that key central banks would keep interest rates higher for longer than expected. Within large-cap markets, value-oriented stocks rose and significantly outperformed growth-oriented stocks, which declined as rising interest rates had pressured growth stocks more throughout most of the period. Small-cap stocks outperformed large-cap stocks on a relative basis, but both rose in absolute terms.

Fixed-income government bond market yields varied during the period as investors adjusted their expectations for inflation,

growth and central bank tightening announcements. Most major developed-market central banks continued to aggressively tighten monetary policy by raising short-term interest rates and ending bond purchases to combat high and persistent inflation.

Developed-market government bond returns fell the most in the UK and Germany, declined the least in Japan, and rose in Australia and Canada. Securitized assets generally outperformed treasury markets. In credit-risk sectors, investment-grade corporate bonds fell, but they outperformed global treasuries by a wide margin and outperformed respective treasury markets in the eurozone and the US. Global developed-market high-yield corporate bonds had positive returns and significantly outperformed developed-market treasuries.

Emerging-market local-currency bonds led credit sector returns with strong results, as the US dollar was mixed against developed- and emerging-market currencies. Emerging-market hard-currency sovereign bonds and corporate bonds hedged to the US dollar had positive returns and materially outperformed developed-market treasuries. Hard-currency high-yield emerging-market bonds had positive returns and outperformed investment-grade emerging-market debt, which declined. Brent crude oil prices fell sharply on global growth concerns and reduced demand.

We appreciate your investment in the Fund.

Sincerely,

AllianceBernstein (Luxembourg) S.à r.l., the management company of the Fund (the “Management Company”)

**NOTE A: General Information**

AB FCP I (the “Fund”) is a mutual investment fund (*fonds commun de placement*) organized under the laws of the Grand Duchy of Luxembourg and registered under Part I of the Law of December 17, 2010 on undertakings for collective investment, as amended (the “Law of 2010”). The Fund is managed in the interest of its co-owners (the “Shareholders”) by AllianceBernstein (Luxembourg) S.à r.l. (the “Management Company”), a company organized under the laws of the Grand Duchy of Luxembourg and having its registered office in Luxembourg. The Fund qualifies as an Undertaking for Collective Investment in Transferable Securities (“UCITS”) within the meaning of Article 1(2) of the EC Directive 2009/65 of July 13, 2009, as amended.

The Fund comprises separate pools of assets currently consisting of 13 active portfolios (each, a “Portfolio”, and, collectively, the “Portfolios”). Each Class of Shares represents an interest in each relevant Portfolio’s investment securities and other net assets. All Shares of a Class have equal rights to distributions and redemptions.

Beginning late in 2019 and continuing through 2023, the outbreak of a novel coronavirus, which causes the disease known as COVID-19, expanded into a global pandemic. Growing turmoil from the spread of this coronavirus, and the potential for enduring and significant adverse impacts on global economies, have driven bouts of increased market volatility, which may recur as the pandemic and its results continue to unfold.

The Management Company’s board of managers (the “Board of Managers”) will continue to monitor the evolving situation and its impact on the financial position of the Portfolios and will adjust operational plans accordingly as the situation warrants.

The portfolio AB FCP I – Global Bond II Portfolio was fully redeemed. The last Net Asset Value (“NAV”) was calculated on October 18, 2022. As of February 28, 2023, cash balance for the Portfolio amounted to \$51,462.

**NOTE B: Significant Accounting Policies**

The Financial Statements have been prepared in accordance with Luxembourg legal and regulatory requirements and on a going concern basis. The following is a summary of significant accounting policies followed by the Portfolios.

**1. Valuation**

**1.1 Investments in Securities**

Securities listed on a stock exchange or traded on any other regulated market are valued at the last available price on such exchange or market or, if no such price is available, at the mean of the closing bid and asked price quoted on such day. If a security is listed on several stock exchanges or markets, the last available price on the stock exchange or market which constitutes the main market for such security is used.

Securities traded in the over-the-counter market, including securities listed on an exchange whose primary market is believed to be over-the-counter (but excluding securities traded on The Nasdaq Stock Market, Inc. (“NASDAQ”)) are valued at the mean of the current bid and asked prices. Securities traded on

NASDAQ are valued in accordance with the NASDAQ Official Closing Price.

Securities are valued at their current market value determined on the basis of market quotations or, if market quotations are not readily available or are deemed unreliable, at “fair value” as determined in accordance with procedures established by, and under the general supervision of, the Board of Managers. Fair valuation procedures are designed to adjust closing market prices of Portfolio securities to reflect what is believed to be the fair value of those securities at the Portfolio’s Valuation Point.

When fair valuation procedures are employed with respect to a particular Portfolio security, various objective and subjective factors may be considered, including, among other things, developments affecting the security or involving an entire market since the security’s latest reported price, current valuations of relevant stock indices or pronouncements of certain governmental authorities. Fair value prices based on third party vendor modeling tools may be utilized to the extent available. Therefore, when fair valuation procedures are employed, the prices of individual Portfolio securities utilized to calculate the Portfolio’s Net Asset

Value (“NAV”) may differ from quoted or published prices for the same securities. Currently, fair value adjustments are only applicable to certain equity securities and futures contracts.

Accordingly, as may also be the case with a previously reported stock exchange price, the price of any Portfolio security determined utilizing fair value pricing procedures may be materially different from the price to be realized upon the sale of such security.

For Portfolio securities primarily traded on U.S. exchanges, it is expected that fair value pricing procedures are employed only under very limited circumstances such as, for example, the early closing of an exchange on which a particular security is traded or the suspension of trading in a particular security. However, it is anticipated that fair value pricing procedures will be utilized frequently for securities traded on non-U.S. exchanges or other markets, particularly European and Asian markets excluding India, because, among other reasons, these markets close well before the Portfolio’s Valuation Point. Between the close of these markets and the relevant Portfolio’s Valuation Point, significant events including broad market moves may occur. In particular events in the U.S. market on a trading day after the close of these other markets may affect the value of the Portfolio’s securities. Japan Strategic Value Portfolio has adopted a policy to only fair value securities when deemed relevant based on the performance of a benchmark and relative capstock flows.

Fixed income securities (i), securities not listed on any stock exchange or traded on any regulated market (ii), and securities, trading of which on a stock exchange or a regulated market is thin (iii), are valued at the most recent bid price provided by the principal market makers. If there is no such market price, or if such market price is not representative of a security’s fair market value, then the security is valued in a manner determined to reflect its fair value in accordance with procedures established by, and under the general supervision of, the Board of Managers.

U.S. Government securities and any other debt instruments having 60 days or less remaining until maturity are generally valued at market by an independent pricing vendor, if a market price is available. If a market price is not available, the securities are valued at amortized cost. This methodology is commonly used for short-term securities that have an original maturity of 60 days or less, as well as short-term securities that had an original term to maturity that exceeded 60 days. In instances when amortized cost is utilized, the valuation committee (the “Committee”) must reasonably conclude that the utilization of amortized cost is approximately the same as the fair value of the security. Such factors the Committee will consider include, but are not limited to, an impairment of the creditworthiness of the issuer or material changes in interest rates. The Committee decisions are made in accordance with procedures established by, and under general supervision of, the Board of Managers.

Over-the-counter (“OTC”) swaps and other derivatives are valued daily, primarily using independent pricing services, independent pricing models using market inputs, as well as third party broker-dealers or counterparties.

## 1.2 Warrant Valuation

A listed warrant is valued at the last traded price provided by approved vendors. If there has been no sale on the relevant business day, the warrant is valued at the last traded price from the previous day. On the following days, the security is valued

in good faith at fair value. All unlisted warrants are valued in good faith at fair value. Once a warrant has expired, it will no longer be valued.

## 1.3 Financial Futures Contracts

Initial margin deposits are made upon entering into futures contracts. During the period the futures contract is open, changes in the value of the contract are recognized as unrealized gains or losses by “marking-to-market” on a daily basis to reflect the market value of the contract at the end of each day’s trading. Variation margin payments are made or received, depending upon whether unrealized losses or gains are incurred. When the contract is closed, a realized gain or loss is recorded. This realized gain or loss is equal to the difference between the proceeds from (or cost of) the closing transaction and the Portfolio’s basis in the contract.

Open futures contracts are valued using the closing settlement price or, in the absence of such a price, the most recent quoted bid price. If there are no quotations available for the day of valuations, the last available closing settlement price is used.

## 1.4 Forward Foreign Currency Contracts

The unrealized gain or loss on open forward foreign currency contracts is calculated as the difference between the contracted rate and the rate to close out the contract. Realized profit or loss includes net gains or losses on forward foreign currency contracts which have been settled or offset by other contracts with the same counterparty.

## 1.5 Options Purchased and Options Written

When an option is purchased, an amount equal to the premium paid is recorded as an investment and is subsequently adjusted to the current market value of the option purchased. Premiums paid for the purchase of options which expire unexercised are treated on the expiration date as realized losses. If a purchased put option is exercised, the premium is subtracted from the proceeds of the sale of the underlying security or foreign currency in determining whether the relevant Portfolio has realized a gain or loss. If a purchased call option is exercised, the premium increases the cost basis of the security or foreign currency purchased by the relevant Portfolio. When an option is written, an amount equal to the premium received by the relevant Portfolio is recorded as a liability and is subsequently adjusted to the current market value of the option written. Premiums received from written options which expire unexercised are treated by the relevant Portfolio on the expiration date as realized gains. If a written call option is exercised, the premium is added to the proceeds from the sale of the underlying security or foreign currency in determining whether the relevant Portfolio has realized a gain or a loss. If a written put option is exercised, the premium reduces the cost basis of the security or foreign currency purchased by the relevant Portfolio. Listed put or call options by a portfolio are valued at the last sale price. If there has been no sale on that day, such securities are valued at the closing bid prices on that day.

## 1.6 Investments in other Undertakings for Collective Investment (“UCIs”)

Investments in other UCIs are valued at the last available NAV for the UCI in question.

## 1.7 Swap Agreements

The Portfolios accrue for interim payments on swap contracts on a daily basis, within income and expenses. Swap contracts are marked to market on a daily basis with fluctuations in

value recorded in “Unrealized appreciation (depreciation) on swaps” in the Statement of Assets and Liabilities and “Changes in unrealized gains and (losses) on swaps” in the Statement of Operations and Changes in Net Assets. Once a swap contract has matured or is sold, the net amount is recorded as “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency” in the Statement of Operations and Changes in Net Assets. The upfront premiums paid or received are recognized as cost or proceeds in the Statement of Assets and Liabilities and are amortized on a straight line basis over the life of the contract. Accruals of amortized upfront premiums on credit default swaps are included in “Swap income” until the position is sold, thereafter the amortized upfront premiums are included in “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency”. On all other swap types the amortized upfront premiums are included within “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency”. Fluctuations in the value of swap contracts are recorded as a component of “Changes in unrealized gains and (losses) on swaps” in the Statement of Operations and Changes in Net Assets.

“Upfront premiums paid (received) on swap contracts” disclosed in the Statement of Assets and Liabilities include premiums paid (received) on the OTC credit default swaps and a margin that is yet to be settled on the centrally cleared credit default swaps.

## 2. Organization Expenses

The organization expenses of all existing Portfolios have been fully amortized in prior years.

## 3. Allocation Method

Income and expenses (except for class-specific management and distribution fees) for the “fixed income” and “balanced” Portfolios are allocated on a daily basis utilizing a hybrid allocation model. This model allocates based upon each class’ proportionate percentage of the combined value of settled shares for those classes which accrue a daily dividend and the value of the shares outstanding for those classes which accrue a monthly dividend or no dividend at all. Income and expenses for the “equity” Portfolios are allocated on a daily basis by each class’ value of their proportionate shares outstanding. For all of the Portfolios, realized and unrealized gains and losses are allocated on a daily basis by each class’ value of their proportionate shares outstanding. Class-specific management, management company, distribution fees and realized and unrealized gains and losses on forward foreign currency contracts related to the Currency Hedged Share Classes are charged /allocated directly to the respective class.

Due to the distinct institutional nature of all types of Class S shares of the Portfolios, certain fund expenses, where applicable, are allocated to the respective Class S shares based upon minimum shareholder activity and account level requirements.

## 4. Currency Translation

Values expressed in a currency other than the currency in which a Portfolio is denominated as determined by the Management Regulations are translated at the average of the last available buying and selling price. Transactions in foreign currencies are translated into the currency of each Portfolio at the exchange rate ruling at the date of the transactions.

The Combined Statement of Assets and Liabilities is presented in U.S. Dollars at the exchange rates ruling at the date of the combined Statement of Assets and Liabilities, while the Combined Statement of Operations and Changes in Net Assets is presented in U.S. Dollars at the average exchange rates ruling during the period.

Exchange rates applied in the financial statements are: spot rate 1.0577 and average rate 1.0332 for EUR to USD, spot rate 0.0073 and average rate 0.0072 for JPY to USD.

The “Currency translation adjustment” presented in the Combined Statement of Operations and Changes in Net Assets is the result of the difference in exchange rates used to translate combined net assets at the beginning of the year, the Statement of Assets and Liabilities and the Statement of Operations and Changes in Net Assets.

## 5. Investment Income and Investment Transactions

Dividend income is recorded on the ex-dividend date. Interest income is accrued daily. Investment gains and losses for the Portfolios are determined on an average cost basis.

The Fund accretes discounts and amortizes premiums as adjustments, if applicable, to interest income. Investment transactions are recorded on trade date plus one day.

## 6. Estimates

The preparation of the Financial Statements in conformity with accounting principles generally accepted in Luxembourg requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the Financial Statements and the reported amounts of income and expenses during the reporting period. Actual results may differ from those estimates.

## 7. Swing Pricing Adjustment

(The following applies to all Portfolios except Global Equity Blend Portfolio, Global Value Portfolio, Short Duration Bond Portfolio and Global Bond II Portfolio)

The Management Company has communicated to all shareholders of the Fund to implement a NAV adjustment Policy, also known as “swing pricing” policy effective from November 2, 2015. Under this policy, a Portfolio’s NAV may be adjusted to reflect the impact of estimated transaction costs, deal spreads and charges generated by shareholders’ purchase and redemption activity. Swing pricing is automatically applied when daily net subscriptions or redemptions exceed a threshold specified by the Swing Pricing Committee under the supervision of the Board of Managers. When swing pricing is applied, the NAV of the relevant Portfolio’s shares will be adjusted up or down, in an amount generally not to exceed 2% of the relevant NAV, so that the transaction costs incurred due to the purchase and redemption activity are borne by the investors transacting in the Portfolio’s shares, rather than the Portfolio itself. This adjustment is intended to minimize dilution of the value of shareholders’ investment in shares of a Portfolio brought on by transactions in the Portfolio’s shares.

The recent and unprecedented financial market conditions linked to the COVID-19 crisis led to a widening of bid/offer spreads of certain securities and consequently higher transaction costs for the Fund. The Swing Pricing Committee

believes that the current swing pricing thresholds of generally up to 2% for the Fund may not adequately reflect the expected costs associated with trade execution prices and therefore may not fully protect the interests of the Fund's Shareholders in the event of redemption and subscription activity. It was resolved by the Board of Managers, in line with "FAQ CSSF on Swing Pricing Mechanism", to allow the Swing Pricing Committee to go beyond the Swing Pricing threshold as it deems appropriate for any relevant Portfolio in order to ensure that the remaining Shareholders of the Fund are not impacted by the current transaction costs linked to the COVID-19 crisis.

**NOTE F: Soft Commission Arrangements and Transaction Costs**

During the period ended February 28, 2023, where permitted under applicable law, the Investment Manager and any Affiliated Sub- Investment Manager, if applicable, received and entered into soft-dollar commissions arrangements with brokers relating to Portfolios of the Fund that invest in equity securities, in respect of which certain goods and services used to support the investment decision making process were received. The soft commission arrangements were entered into on the basis that the execution of transactions on behalf of the Fund will be consistent with best execution standard and the Investment Manager considers many factors regarding best execution standards when entering into soft commission arrangements such as the size and nature of brokerage fees.

Additionally, due to the nature of the investment strategy of certain Portfolios, including where the Investment Manager

delegates investment management services to AllianceBernstein Limited, all costs associated with soft commission arrangements may be “unbundled” and borne by the Investment Manager or its sub-delegates, if required by applicable law.

The goods and services received include specialist industry, company and consumer research, portfolio and market analysis and computer software used for the delivery of such services.

The nature of the goods and services received is such that the benefits provided under the arrangement must be those which assist in the provision of investment services to the Fund and may contribute to an improvement in the Fund’s performance.

For the avoidance of doubt, such goods and services do not include travel, accommodations, entertainment, general administrative goods or services, general office equipment or premises, membership fees, employees’ salaries or direct money payments.

Transaction costs are costs incurred in the acquisition, issue or disposal of transferable securities, money market instruments, derivatives or other eligible assets. They can include bid-ask spread, fees and commissions paid to agents, advisers, brokers and dealers, transaction related taxes and other market charges. They do not include debt premiums or discounts, financing costs or internal administrative or holding costs. Transaction costs are included within the cost of investments in the Portfolio of Investments as well as in the “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency” and “Changes in unrealized gains and (losses) on investments” in the Statement of Operations and Changes in Net Assets. Transaction costs are excluded from the Total Expense Ratio and/or expense reimbursement calculation.

**NOTE G: Forward Foreign Currency Contracts**

A forward foreign currency contract is a commitment to purchase or sell a foreign currency at a future date at a negotiated forward rate. The gain or loss arising from the difference between the original contract and the closing of such contract is included in “Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency” in the Statement of Operations and Changes in Net Assets.

Fluctuations in the value of open forward foreign currency contracts are reflected for financial reporting purposes as a component of “Unrealized appreciation/(depreciation) on forward foreign currency contracts” in the Statement of Assets and Liabilities.

One or more of a Portfolio’s share classes offered in a particular currency (each, an “Offered Currency”) may be hedged to such Offered Currency. Any such share class will constitute a “Currency Hedged Share Class”. Currency Hedged Share Classes aim to provide investors a return more closely correlated to the Portfolio’s base currency return by reducing

the effect of exchange rate fluctuations between the Portfolio’s base currency and the relevant Offered Currency, taking into account practical considerations such as transaction costs.

The hedging strategy employed is designed to reduce, but may not eliminate, currency exposure between the Portfolio’s base currency and the relevant Offered Currency.

Risks may arise from the potential inability of a counterparty to meet the terms of a contract and from unanticipated movements in the value of a foreign currency relative to the hedged currency.

Given that there is no segregation of liabilities between the various share classes within a Portfolio, there is a remote risk that, under certain circumstances, currency hedging transactions in relation to a Currency Hedged Share Class could result in liabilities which might affect the NAV of the other share classes of the same Portfolio, in which case assets of the other share classes of the Portfolio may be used to cover the liabilities incurred by such Currency Hedged Share Class.

The securities in the Fund are used as collateral for forward foreign currency contracts.

**NOTE H: Repurchase Agreements**

Repurchase agreements are collateralized by obligations of the United States, its agencies or instrumentalities thereof. The securities underlying the repurchase agreement will be held by the Depository at all times in an amount at least equal to the repurchase price, including accrued interest.

At February 28, 2023, there were no repurchase agreements.

There was no interest income arising from repurchase agreements during the period ended February 28, 2023.

**NOTE I: Reverse Repurchase Agreements**

Reverse repurchase agreements are identical to repurchase agreements except that rather than buying securities for cash subject to their repurchase by the seller, a Fund sells portfolio assets concurrently with an agreement by the Fund to repurchase the same assets at a later date at a fixed price slightly higher than the sale price. During the reverse repurchase agreement period, the Fund continues to receive principal and interest payments on these securities. Generally, the effect of a reverse repurchase agreement is that the Fund can recover all or most of the cash invested in the portfolio securities involved during the term of the reverse repurchase agreement, while it will be able to keep the interest income associated with those portfolio securities.

Such transactions are advantageous only if the “interest cost” to the Fund of the reverse repurchase transaction, *i.e.*, the difference between the sale and repurchase price for the securities, is less than the cost of otherwise obtaining the cash invested in portfolio securities.

At February 28, 2023, there were no reverse repurchase agreements.

There was no interest income arising from reverse repurchase agreements during the period ended February 28, 2023.

**NOTE J: Financial Futures Contracts**

The Fund may buy or sell financial futures contracts. The Fund bears the market risk that arises from changes in the value of these financial instruments. The Fund's activities in financial futures contracts are conducted through regulated exchanges, which do not result in counterparty credit risk.

At the time the Fund enters into a financial futures contract the Fund deposits and maintains with the broker as collateral an initial margin as required by the exchange on which the transaction is effected.

**NOTE K: Swap Transactions**

A swap is an agreement that obliges two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset or otherwise determined notional amount. Realized gains and (losses) and changes in unrealized gains and (losses) on swaps are included in the Statement of Operations and Changes in Net Assets respectively under "Realized gains and (losses) on investments, forward foreign currency contracts, swaps, financial futures contracts, options and currency" and as a component of "Changes in unrealized gains and (losses) on swaps".

**Centrally Cleared Credit Default Swaps**

The buyer in a centrally cleared credit default swap agreement is obliged to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

**Centrally Cleared Interest Rate Swaps**

A centrally cleared interest rate swap is a bilateral agreement in which each of the parties agree to exchange a series of fixed or floating interest rate payments based on a notional amount that serves as a computation basis.

**NOTE L: Option Transactions**

The Fund may purchase and write (sell) put and call options on securities. The risk associated with purchasing an option is that the Fund pays a premium whether or not the option is exercised. Additionally, the Fund bears the risk of loss of the premium and a change in market value should the counterparty not perform under the contract. Put and call options purchased are accounted for in the same manner as Portfolio securities. The cost of securities acquired through the exercise of call options is increased by the premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid.

When the Fund writes an option, the premium received by the Fund is recorded as a liability and is subsequently adjusted to the current market value of the option written.

Premiums received from written options which expire unexercised are recorded by the Fund on the expiration date as realized gains from options written. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is also treated as a realized gain, or if the premium received is less than the amount paid for the closing purchase transaction, as a realized loss.

Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments are known as the variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or (loss) equal to the difference between the value of the contract at the time it was opened and the time it was closed.

**Total Return Swaps**

A total return swap is a bilateral agreement in which each of the parties agree to exchange the total performance of an underlying asset for a series of interest payments based on a notional amount that serves as a computation basis.

**Credit Default Swaps**

The buyer in a credit default swap agreement is obliged to pay the seller a periodic stream of payments over the term of the contract in return for a contingent payment upon the occurrence of a credit event with respect to an underlying reference obligation.

**Interest Rate Swaps**

An interest rate swap is a bilateral agreement in which each of the parties agree to exchange a series of fixed or floating interest rate payments based on a notional amount that serves as a computation basis.

**Inflation Swaps**

An inflation swap is a bilateral agreement in which each of the parties agree to exchange fixed rate payments for floating, inflation index linked payments based on a notional amount that serves as a computation basis.

If a call option is exercised, the premium received is added to the proceeds from the sale of the underlying security or currency in determining whether the Fund has realized a gain or loss. If a put option is exercised, the premium received reduces the cost basis of the security or currency purchased by the Fund. In writing an option, the Fund bears the market risk of an unfavorable change in the price of the security or currency underlying the written option. Exercise of an option written by the Fund could result in the Fund selling or buying a security or currency at a price different from the current market value.

The Fund may also invest in options on swap agreements, also called swaptions. A swaption is an option that gives the buyer the right, but not the obligation, to enter into a swap on a future date in exchange for paying a market-based premium. A receiver swaption gives the owner the right to receive the total return of a specified asset, reference rate, or index. A payer swaption gives the owner the right to pay the total return of a specified asset, reference rate, or index. Swaptions also include options that allow an existing swap to be terminated or extended by one of the counterparties.

**NOTE N: Loans of Portfolio Securities**

A Portfolio may make secured loans of its securities. The risk in lending securities, as with other extensions of credit, consists of possible loss of rights in the collateral should the borrower fail financially. In addition, a Portfolio will be exposed to the risk that the sale of any collateral realized upon the borrower’s

default will not yield proceeds sufficient to replace the loaned securities.

In determining whether to lend securities to a particular borrower, the Investment Manager will consider all relevant facts and circumstances, including the creditworthiness of the borrower.

While securities are on loan, the borrower may pay a Portfolio concerned any income from the securities. A Portfolio may invest any cash collateral in money market instruments, thereby earning additional income, or receive an agreed upon amount of income from a borrower who has delivered equivalent collateral.

A Portfolio may have the right to regain record ownership of loaned securities or equivalent securities in order to exercise ownership rights such as voting rights, subscription rights and rights to dividends, interest or distributions. The Portfolio may pay reasonable finders', administrative and other fees in connection with a loan.

For making secured loans of its securities, a Portfolio receives gross fee income, of which 20% is paid to the securities lending agent for providing securities lending services.

For the period ended February 28, 2023, the Portfolios earned a net fee income, which is presented in Statement of Operations and Changes in Net Assets under "Securities lending income, net".

For the period ended February 28, 2023, Brown Brothers Harriman & Co. (acting as securities lending agent) earned a fee of \$54,741 for providing securities lending services. This is included in the Statement of Operations and Changes in Net Assets under "Securities lending income, net". The value of loaned securities and related collateral outstanding as of February 28, 2023, are as below. The collateral relates to securities held on the Portfolios.

**NOTE O: Bank Facility**

The Fund has access to an overdraft facility (the "Facility"), established with the Depository, intended to provide for short-term/temporary financing if necessary, subject to certain restrictions, in connection with abnormal redemption activity.

Each Portfolio of the Fund is limited to borrowing 10% of its respective net assets. Borrowings pursuant to the Facility are subject to interest at a mutually agreed upon rate and security by the underlying assets of each Portfolio.

**NOTE P: Co-Management of Assets**

For the purpose of effective management, where the investment policies of a Portfolio so permit, the Management Company may choose to co-manage assets of certain Portfolios within or outside the Fund. In such cases, assets of different Portfolios will be managed in common. The assets which are co-managed shall be referred to as a "pool". These pooling arrangements are an administrative device designed to reduce operational and other expenses and do not change the legal rights and obligations of Shareholders. The pools do not constitute separate entities and are not directly accessible to investors. Each of the co-managed Portfolios shall remain entitled to its specific assets.

of the Asset Pool which is attributable to each respective participating Portfolio, with a reference to the Portfolio's original participation in this Pool and will change in the event of additional allocation or withdrawals. The entitlements of each participating Portfolio to the co-managed assets apply to each and every line of investments of such pool.

Additional investments made on behalf of the co-managed Portfolios shall be allotted to such Portfolios in accordance with their respective entitlement, whereas assets sold shall be levied similarly on the assets attributable to each participating Portfolio.
