This Fund is managed by AllianceBernstein (Luxembourg) S.à r.l., part of the AB Group

OBJECTIVES AND INVESTMENT POLICY

Investment objective

The Fund seeks to increase the value of your investment over time through a combination of income and capital growth (total return).

Investment policy

Under normal market conditions, the Fund typically invests in equity and debt securities from issuers anywhere in the world, including emerging market countries. The Fund is not limited in its exposure to equities or debt securities but expects higher exposure to equities than to debt securities.

The Fund may invest in, or be exposed up to (i) 20% in below Investment Grade debt securities rated above Caa1/CCC+/ CCC and (ii) 20% in structured products such as asset-backed and mortgage-back securities.

The Investment Manager invests in securities or issuers that it believes are positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN Sustainable Development Goals (UNSDGs).

The Investment Manager emphasizes positive selection criteria, in particular by analyzing the exposure to environmental, social and governance (ESG) factors of each security or issuer, over broad-based negative screens in assessing an issuer's exposure to such ESG factors.

The Fund may be exposed to any currency.

The Fund uses derivatives to a significant extent for hedging (reducing risks), efficient portfolio management and other investment purposes.

RISK AND REWARD PROFILE

What does this risk indicator mean?

This synthetic risk and reward indicator (SRRRI) scale rating indicates how the Fund may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also means a larger risk of losses. The lowest category does not mean a risk free investment.

The above rating is an estimate, not a guarantee. It is calculated using industry-standard methods and is based on medium-term volatility (how sharply the Fund's actual or estimated share price has gone up and down over five years).

Historical data may not be a reliable indication of the future risk profile of this Fund. The risk and reward category for this Fund is not guaranteed to remain unchanged and may shift over time.

Why is this Fund in this category?

The Fund is not guaranteed in capital. The Fund is invested in both equities and debt securities which are subject to variations up or down that can generate gains or losses.

Risks materially relevant to the Fund but not adequately captured by the SRRRI:

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

Allocation risk: The Fund's allocation to various asset classes may change over time and this could impact the performance of the Fund positively or negatively.

Counterparty risk: If an entity with which the Fund does business becomes insolvent, payments owed to the Fund could be delayed, reduced, or eliminated.

Liquidity risk: Certain securities could become hard to buy or to sell at a desired time or price.
