OBJECTIVES AND INVESTMENT POLICY

Investment objective

The Fund seeks to increase the value of your investment over time through total return, using a combination of income and capital growth through sustainable investments.

Investment policy

Under normal market conditions, the Fund typically invests at least 80% of its assets in debt securities, including sovereign debt, of issuers that the Investment Manager believes are positively aligned with sustainable investment themes and at least 70% of its assets in debt securities that are rated below Investment Grade. These securities are from issuers that are organised, have substantial business activities, or are impacted by developments, in Europe. These securities may be from issuers anywhere in the world, including emerging market countries.

The Investment Manager invests in securities that it believes are positively exposed to environmentally- or socially-oriented sustainable investment themes derived from the UN Sustainable Development Goals (UNSDGs).

The Fund may invest in, or be exposed up to (i) 20% in emerging market sovereign debt securities (ii) 20% in structured products such as asset-backed and mortgage-back securities and (iii) 10% in contingent convertible bonds (CoCos).

The Investment Manager emphasizes positive selection criteria, in particular by analyzing the exposure to environmental, social and governance (ESG) factors of each security or issuer, over broad-based negative screens in assessing an issuer's exposure to such ESG factors.

The Fund's exposure to ESG bond structures is at least 15%.

The Fund's exposure to EUR is at least 90%.

The Fund uses derivatives for hedging (reducing risks), efficient portfolio management and other investment purposes.

RISK AND REWARD PROFILE

What does this risk indicator mean?

This synthetic risk and reward indicator (SRRI) scale rating indicates how the Fund may perform and the risk of losing some or all of your capital. Generally the potential for higher gains also means a larger risk of losses. The lowest category does not mean a risk free investment.

The above rating is an estimate, not a guarantee. It is calculated using industry-standard methods and is based on medium-term volatility (how sharply the Fund's actual or estimated share price has gone up and down over five years).

Historical data may not be a reliable indication of the future risk profile of this Fund. The risk and reward category for this Fund is not guaranteed to remain unchanged and may shift over time.

Why is this Fund in this category?

The Fund is not guaranteed in capital. The Fund is invested in debt securities that are subject to variations up or down and that can generate gains or losses.

Risks materially relevant to the Fund but not adequately captured by the SRRI:

The rating does not reflect the possible effects of unusual market conditions or large unpredictable events, which could amplify everyday risks and could trigger other risks, such as:

Counterparty risk: If an entity with which the Fund does business becomes insolvent, payments owed to the Fund could be delayed, reduced, or eliminated.

Liquidity risk: Certain securities could become hard to buy or to sell at a desired time or price.
