

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Aberdeen Global - Emerging Markets Corporate Bond Fund I2 Acc USD Acc LU0566481197

A sub-fund of Aberdeen Global which is a Société d'Investissement à Capital Variable (SICAV). Aberdeen Global Services S.A. is the Management Company and Aberdeen International Fund Managers Limited is the Investment Manager.

Objectives and investment policy

To achieve a combination of income and growth by investing mostly in bonds (which are like loans that pay a fixed or variable rate of interest) issued by companies, governments or other bodies in emerging markets countries. These are typically countries that are still developing their economies. The bonds may be of any credit quality and typically in the currencies of the countries where they are issued; the value of your investment will therefore be affected by the movements, up or down, of those currencies. The Fund is intended for investors who are willing to accept a high level of risk.

We may use investment techniques (including derivatives) to seek to protect and enhance the value of the Fund and to manage the Fund's risks. Derivatives, such as futures, options and swaps, are linked to the rise and fall of other assets. In other words, they "derive" their price from another asset. They can generate returns when share prices and/or indices fall. Performance may be strongly influenced by movements in currency rates because the Fund can use derivatives to adjust the influence of currencies.

Recommendation: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

You can buy and sell shares in the Fund on any working day in Luxembourg, by 13:00 hours CET.

Income from investments in the Fund will be rolled up into the value of your shares.

Further information on the Fund's investment objective and policy can be found in the Fund's Prospectus.

Risk and reward profile

The Risk and Reward Indicator table demonstrates where the Fund ranks in terms of its potential risk and reward. The higher the rank the greater the potential reward but the greater the risk of losing money. It is based on past data, may change over time and may not be a reliable indication of the future risk profile of the Fund. The shaded area in the table below shows the Fund's ranking on the Risk and Reward Indicator.

- This Fund is ranked at 5 because funds of this type have experienced medium to high rises and falls in value in the past.
- Please note that even the lowest risk class can lose you money and that extreme market circumstances can mean you suffer severe losses in all cases. The indicator does not take into account the following risks of investing in this Fund:
 - Investing globally can bring additional returns and diversify risk. However, currency exchange rate fluctuations may have a positive or negative impact on the value of your investment.
 - Bonds are affected by changes in interest rates, inflation and any decline in creditworthiness of the bond issuer. Bonds that produce a higher level of income usually also carry greater risk as such bond issuers may not be able to pay the bond income as promised or could fail to repay the capital amount used to purchase the bond.
 - Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. This may mean your money is at greater risk.
 - This Fund can use derivatives in order to meet its investment objectives or to protect from price and currency movements. This may result in gains or losses that are greater than the original amount invested.

Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest	
Entry charge	6.38%
Exit charge	0.00%

These are the maximum charges that we might take out of your money before it is invested and before we pay out the sale proceeds of your investment. In some cases, you might pay less and you should speak to your financial adviser about this.

Charges taken from the Fund over a year	
Ongoing charges	1.23%

Charges taken from the Fund under specific conditions	
Performance fee	Nil

- Switching charge (for switching into the Fund from another fund) 1.00%.

The ongoing charges figure is estimated because the share/unit class is relatively new and has insufficient track record for us to calculate it exactly. The ongoing charges figure may vary from year to year and will exclude the costs of buying or selling assets for the Fund (unless these assets are shares of another fund).

In respect of the Switching Charge, this is the current maximum charge that may be applied under the terms of the Prospectus. In some cases, you may pay less; you should speak to your financial adviser about this. For more information about charges, please refer to the Fund's Prospectus. The ongoing charge figure is as at 31st March 2012.

Past Performance

There is insufficient data to provide a useful indication of past performance to investors.

- The Fund was launched on 30/12/2010.
- The share/unit class was launched on 11/04/2011.
- Performance is calculated in USD.
