What is this product?

Type

Global Income Bond Fund (the "Fund") is a US Dollar denominated sub-fund of a SICAV (société d'investissement à capital variable), abrdn SICAV II, incorporated in Luxembourg.

Term

abrdn SICAV II (the "Company") has no maturity date. The Fund and the Company may not be unilaterally terminated by abrdn Investments Luxembourg S.A.

Objective

The Fund aims to provide a combination of income and growth by investing in a diversified portfolio of debt and debt-related securities that are listed or traded anywhere in the world (including in Emerging Markets).

The Fund aims to outperform the Bloomberg Global Aggregate Corporate BBB Index (USD) with a yield greater than the index over rolling three-year periods (before charges).

Portfolio Securities

- The Fund will invest in debt and debt-related securities, including government and corporate bonds, asset backed securities, sub-investment grade bonds and inflation-linked bonds.

- The Fund may also invest in other transferable securities, money market instruments, cash and near cash, derivatives and collective investment schemes.

- The Fund will not invest more than 20% in asset backed securities.

- Bonds will be of any credit quality. Up to 100% of the Fund may be invested in sub-investment grade bonds.

- Investment in corporate bonds will follow the abrdn "Global Income Bond Promoting ESG Investment Approach" (the "Investment Approach"), which is published at www.abrdn.com under "Fund Centre".

- This approach utilises abrdn's fixed income investment process, which enables portfolio managers to qualitatively assess how ESG factors are likely to impact on the company's ability to repay its debt, both now and in the future. To complement this research, the abrdn ESG House Score is used to quantitatively identify and exclude those companies exposed to the highest ESG risks. In addition, abrdn apply a set of company exclusions, which are related to the UN Global Compact, Controversial Weapons, Tobacco Manufacturing and Thermal Coal.

- Green bonds, Social bonds or Sustainable bonds issued by companies otherwise excluded by the environmental screens are permitted, where the proceeds of such issues can be confirmed as having a positive environmental impact.

- Financial derivative instruments, money-market instruments and cash may not adhere to this approach.

Management Process

- The Fund is actively managed without reference to a benchmark.

- Through the application of the Investment Approach, the Fund has an expected minimum of 10% in Sustainable Investments and targets a lower carbon intensity than the following comparable investment universe: 50% Bloomberg Global High Yield Corporate Index, 30% Bloomberg Global Aggregate Corporates Total Return Index and 20% JP Morgan CEMBI Broad Diversified Index.

- Engagement with external company management teams is used to evaluate the ownership structures, governance and management quality of those companies, in order to inform portfolio construction. As part of this, up to 5% of asset may be invested in companies in high carbon emitting sectors, which are seen as having ambitious and credible targets to decarbonise their operations, in order to support their transition to ultimately comply with the environmental screens.

- The Fund will seek to reduce the risk of losses and the expected change (as measured by annual volatility) in the value of the Fund is not ordinarily expected to exceed 8% over the longer term.

Derivatives and Techniques

- The Fund will routinely use derivatives to reduce risk or cost, or to generate additional capital or income at proportionate risk (Efficient Portfolio Management) or to meet its investment objective. Derivatives may be used to provide market exposures different to those that could be achieved through investment in assets in which the Fund is primarily invested. Usage of Derivatives is monitored to ensure that the Fund is not exposed to excessive or unintended risks.

- In particular, interest rate swaps and government bond futures may be used to manage the overall interest rate risk in the portfolio, while contracts on credit default swap indices may be used to add or reduce high yield credit exposure, based on the investment team's view of the market.

This fund is subject to Article 8 of the Sustainable Finance Disclosure Regulation ("SFDR").

Investors in the fund may buy and sell shares on any dealing day (as defined in the Prospectus). If you invest in income shares, income from investments in the fund will be paid out to you. If you invest in accumulation shares, income will be added to the value of your shares.

Intended Retail Investor

Investors with basic investment knowledge. Investors who can accept large short term losses. Investors wanting an income and some growth over the longer term (5 years or more). Investors with a specific need around a sustainability-related outcome. The Fund has specific and generic risks with a risk rating as per the risk indicator. The Fund is intended for general sale to retail and professional investors through all distribution channels with or without professional advice.

The Fund's depository is Citibank Europe plc Luxembourg Branch. The prospectus, the articles of association, the annual reports and interim reports may be obtained free of charge from our website or via the contact details in 'Other relevant information'. All documents are available in English and German; the prospectus is also available in French and Italian. What are the risks and what could I get in return?

Risk Indicator

Lower risk Higher risk

The risk indicator assumes you keep the product for 5 years. The actual risk can vary significantly if you sell it at an earlier stage. The value of investments and the income from them can go down as well as up, and you may get back less than you invested.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this Fund as 2 out of 7, which is a low risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact our capacity to pay you.

Where the currency of the country where you are resident is different to the currency of the product, **please be aware of currency risk**. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance or any capital guarantee against credit risk, so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions. Markets could develop very differently in the future.

Recommended holding period:		5 years	
Example Investment:		€10,000	
		If you exit after 1 year	If you exit after 5 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	€5,810	€5,960
	Average return each year	-41.90%	-9.80%
Unfavourable	What you might get back after costs	€7,910	€8,110
	Average return each year	-20.90%	-4.10%
Moderate	What you might get back after costs	€9,810	€10,990
	Average return each year	-1.90%	1.90%
Favourable	What you might get back after costs	€11,460	€12,650
	Average return each year	14.60%	4.80%

The figures shown include all the costs of the product itself, and includes the costs of your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The unfavourable scenario occurred for an investment between August 2021 and December 2022. The moderate scenario occurred for an investment in the benchmark between September 2014 and September 2019. The favourable scenario occurred for an investment in the benchmark between January 2016 and January 2021.

What happens if the Company is unable to pay out?

There is no financial compensation scheme for retail investors in SICAVs domiciled in Luxembourg. In the absence of a compensation scheme applicable to investments in the Fund, investors may face a financial loss of up to their entire investment amount.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- 10,000 EUR is invested.

	If you exit after 1 year	If you exit after 5 years
Total costs	€629	€1,345
Annual cost impact (*)	6.3%	2.4% each year

* This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 4,3% before costs and 1,9% after costs. We may share part of the costs with the person selling you the product to cover the services they provide to you. They will inform you of the amount.

Composition of Costs

One-off costs upon entry or exit		If you exit after 1 year
