Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU2002517923
WKN: A2PLEH

Objectives and Investment Policy

Superior risks adjusted returns by investing in global bond markets.

We follow an active management approach with the aim to outperform the Benchmark. In selecting and weighting the fund's assets we do not replicate or reproduce the Benchmark. Sub-Fund assets therefore deviate significantly from the Benchmark.

Sub-Fund assets are primarily invested by us in global bonds as described in the investment objective. Sub-Fund assets may be completely invested by us in Emerging Markets. Sub-Fund assets (excluding ABS/MBS) may be completely invested by us in High Yield bonds bearing a typically higher risk and higher potential of gains. Max. 20% of Sub-Fund assets may be invested by us in ABS and/or MBS with a good credit rating. We focus on credit long / short strategies which are mainly implemented in the corporate bond market, via bonds, derivatives and cash. The strategies may vary in respect of credit-rating requirements, regional exposure and some may also take advantage of event driven opportunities within the corporate bond market. Max. 100% Sub-Fund assets may be held in deposits and/or may be invested directly in Money Market Instruments and/or (up to 10% of Sub-Fund assets) in money market funds on a temporary basis

for liquidity management and/or defensive purpose. Max. 10% non-EUR Currency Exposure. The Duration of Sub-Fund assets should be between minus 3 and plus 6 years.

Benchmark: €STR (in EUR).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

You may redeem shares of the fund usually on each business day.

We usually distribute the income of the fund on a yearly basis.

Recommended Holding Period: 5 Years

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.
