Allianz Global Investors Fund - Allianz Multi Asset Opportunities Share Class W9 (H2-EUR)

Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU1584112020
WKN: A2DNSB

Objectives and Investment Policy

The investment policy aims to generate long term capital growth through investments in a broad range of asset classes. The Sub-Fund seeks to generate superior risk adjusted returns throughout a market cycle. The investment policy is geared towards generating appropriate annualized returns while taking into account the opportunities and risks of a highly flexible multi asset strategy.

We follow an active management approach with the aim to outperform the Benchmark. In selecting and weighting the fund's assets we do not replicate or reproduce the Benchmark. Sub-Fund assets therefore deviate significantly from the Benchmark.

Min. 70% of Sub-Fund assets are invested by us based on a flexible multi asset strategy in a variety of different instruments such as Equities, bonds, UCITS/UCI, indices (e.g. hedge funds indices, indices on commodity futures), commodities, currencies and/or real estate property funds. Sub-Fund assets may be completely invested in Emerging Markets and/or in High-Yield bonds. Max. 20 % of Sub-Fund assets may be invested by us in ABS and/or MBS with a good credit rating. All bonds and Money Market Instruments must have at the time of acquisition a rating of at least B- or a comparable rating from a recognised rating agency. We may assume separate currency positions, corresponding derivatives and foreign currencies, even if the

Sub-Fund does not include any assets denominated in these respective currencies. Max. 40% of Sub-Fund assets may be invested in securities referring to commodities and/or commodity forwards and/or commodity futures.

Exposure to the base currency of the fund (USD) will be hedged to a large extent against the reference currency of the shareclass (EUR) which reduces the potential risks and limits potential gains from exchange rate movements.

Benchmark: SOFR (hedged into EUR).

You may redeem shares of the fund usually on each business day.

We usually distribute the income of the fund on a yearly basis.

Recommended Holding Period: 5 Years

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 3 have shown in the past a low to medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 3 might be subject to low to medium price fluctuations based on the historical volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.
