Allianz Global Investors Fund - Allianz Strategic Bond Share Class RT (H2-GBP)

Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU2207432928
WKN: A2P9GD

Objectives and Investment Policy

Long term capital growth by investing in global bond markets. The investment policy is geared towards generating appropriate annualised returns above the markets based on global government and corporate bonds by taking into account the opportunities and risks of a strategy in long and short positions in the global Bond Markets.

We manage this Sub-Fund in reference to a Benchmark. Sub-Fund's Benchmark plays a role for the Sub-Fund's performance objectives and measures. We follow an active management approach with the aim to outperform the Benchmark. Although our deviation from the investment universe, weightings and risk characteristics of the Benchmark is likely to be significant in our own discretion, the majority of the Sub-Fund's investments (excluding derivatives) may consist of components of the Benchmark.

Min. 70% of Sub-Fund assets are primarily invested by us in bonds as described in the investment objective by using a gross calculation exposure approach (long exposure plus short exposure). We are using an overall framework of a Long / Short Approach by investing in derivatives and will make extensive use of derivatives for investment purposes and for efficient portfolio management (including for hedging). We have full discretion as to how to generate positive (long positions) as well as negative exposure (short positions) of various asset classes. Sub Fund assets may be invested in future-contracts and/or in option contracts on global equity indices (equity index futures / equity index options) for both, efficient portfolio management and hedging purposes. Sub-Fund assets may be invested completely by us in Emerging Markets. Max. 50% of Sub-Fund assets may be invested by us in High-Yield bonds (excluding ABS/MBS) bearing

a typically higher risk and higher potential of gains. Max. 20% of Sub-Fund assets may be invested by us in ABS and/or MBS. We may invest up to 30% of the Sub-Fund assets in Chinese bonds denominated in RMB either directly via CIBM Direct/Bond ConnectMax. 100% Sub-Fund assets may be held in deposits and/or may be invested directly in Money Market Instruments on a temporary basis for liquidity management and/or defensive purpose.

Exposure to the base currency of the fund (USD) will be hedged to a large extent against the reference currency of the shareclass (GBP) which reduces the potential risks and limits potential gains from exchange rate movements.

Benchmark: BLOOMBERG Global Aggregate Total Return (hedged into GBP).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

You may redeem shares of the fund usually on each business day.

We reinvest the income into the fund.

Recommended Holding Period: 4 Years

Derivatives may be used to a large extent to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

SFDR Category – Article 6 (a financial product that does not consider the EU criteria for environmentally sustainable economic activities)

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be subject to medium price fluctuations based on the historical volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.
