

Key Investor Information

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Allianz International Investment Funds - Allianz Fixed Income Macro Fund Share Class E (Acc) (GBP)

Managed by Allianz Global Investors GmbH, part of Allianz Global Investors

ISIN: GB00BG43NG36

Objectives and Investment Policy

The Fund aims to generate capital growth by outperforming SONIA (in GBP) by producing positive absolute returns above SONIA (in GBP) (net of fees) over a rolling twelve month period irrespective of market conditions by investing in derivatives of fixed income instruments and fixed income securities. Investors should be aware that the Fund's capital is at risk and there is no guarantee that it will achieve its objective over any period.

We may invest up to 100% of the Fund's assets into fixed income securities indirectly through the use of derivatives and directly into conventional fixed income securities using particular risk management process. More than 35% of the value of the Fund may be invested in securities issued or guaranteed by the following states; the UK, Australia, Austria, Belgium, Canada, Denmark, Finland, France, Germany, Greece, Iceland, Ireland, Italy, Japan, Liechtenstein, Luxembourg, Netherlands, Norway, Portugal, Spain, Sweden, Switzerland and the United States of America. Investments in either derivatives or fixed income securities may be in developed markets and non-developed markets or emerging markets. Up to 30% of the Fund's assets may be in China via RMB currency exposure. We may also utilise

deposits and money market instruments and their value, together in total, may make up to a maximum of 100% of the Fund. We may also invest up to a maximum of 10% of the Fund in collective investment schemes. The Fund will make extensive use of derivatives for investment purposes and for efficient portfolio management (including for hedging).

The Fund is actively managed and will not be constrained by the benchmark.

Benchmark of the fund is SONIA (in GBP).

Due to its investment strategy we expect a high volume of transactions which results in higher transactions costs reducing the return of the fund.

You may redeem shares of the fund usually on each business day by 12:00.

We reinvest the income into the fund.

Recommendation: this fund may not be appropriate for investors who plan to withdraw their money within 5 years.

Risk and Reward Profile

← Typically lower rewards
← Typically lower risk

Typically higher rewards →
Typically higher risk →

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future.

Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 3 have shown in the past a low to medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 3

might be subject to low to medium price fluctuations based on the historical volatilities observed.

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

A significant portion of the fund may be invested in derivative instruments. If a fund employs derivatives to increase the level of investment (investment purposes), it may result in a medium to long-term risk profile that offers potentially much greater market risk than that of a fund with a similar profile that does not invest in derivatives. This may additionally alter the funds return profile in a way that the fund may not be correlated with other funds or market indices.

Charges

These charges are used to pay the costs of running the fund, including the costs of marketing and selling. They reduce the potential growth of your investment.

One-off charges deducted before or after you invest

| | |
|--------------|-------|
| Entry Charge | 0.00% |
| Exit Charge | 0.00% |

This is the maximum charge that might be taken out of your money before it is invested or before the proceeds of your investments are paid out.

Charges taken from the fund over a year

| | |
|-----------------|-------|
| Ongoing Charges | 0.35% |
|-----------------|-------|

The entry and exit charges shown are maximum figures. In some cases you might pay less – you can find actual entry and exit charges from your financial adviser.

The ongoing charges shown are based on the fund's last financial year ending 30.04.2021. It may vary from year to year. It does not include transaction costs incurred when we buy or sell assets for the fund.

A dilution levy may be charged on purchases and redemptions of shares to protect the remaining investors against the costs incurred by the fund in buying or redeeming its investments. This levy may be charged where the fund is experiencing large levels of net purchases/redemptions and on "large deals" (i.e. deals of 2% or more of the value of the fund). The amount of any such dilution levy is calculated by reference to the estimated costs of dealing in the underlying investments using the rates calculated for the preceding quarter.

You will find more details about the calculation of the charges in the prospectus.

Past Performance

Past performance is not a reliable guide to future performance.

The past performance shown here takes account of all charges and costs with the exception of the entry and exit charge.

The fund was launched in 2018.

The performance of the fund is calculated in GBP.
