Allianz Adifonds Share Class A (EUR)

ISIN DE0008471038

WKN 847103

PRODUCT

Allianz Adifonds (the "Fund") is established as a Germany domiciled FCP and managed by Allianz Global Investors GmbH, part of group Allianz Global Investors.

This Fund is authorised and regulated by Bundesanstalt für Finanzdienstleistungsaufsicht in Germany (www.bafin.de).

Allianz Global Investors GmbH, a German capital management company, is authorised and regulated by the Bundesanstalt für Finanzdienstleistungsaufsicht (BaFin) in Germany (www.bafin.de). For more information on this Fund, please refer to <https://regulatory.allianzgi.com> or call +49 69 24431 140.

This key information document is accurate as at 16.04.2024.

WHAT IS THIS PRODUCT?

TYPE

This Fund is a UCITS fund in accordance with EU Directive 2009/65/EC.

TERM

The Fund has been set-up for an indefinite period of time. In accordance with the Fund's rules, the assets belonging to the Fund are owned jointly by the Fund's unitholders. The Management Company may terminate the Fund's management according to the Fund's rules. In this case, the Management Company / the Fund's appointed depository will either entrust its management to another management company or the depository will liquidate the Fund and distribute the proceeds to the Fund's unitholders.

You may redeem shares of the Fund usually on each business day. We usually distribute the income of the Fund on a yearly basis. The management company may suspend redemption if exceptional circumstances make this appear necessary, taking into account the interests of the investors, or limit redemption if the investors' redemption requests reach a predefined threshold above which the redemption requests can no longer be executed in the interests of the investors as a whole.

OBJECTIVES

The Fund's investment objective is to participate in the performance of unit class F2 (EUR) of Allianz German Equity (the "Master Fund"). To achieve this objective, we will invest at least 95% of the Fund's assets in units of the Master Fund. The Master Fund aims to achieve long-term capital growth by investing in German equity markets.

The Master Fund follows the KPI Strategy (Relative) and promotes the reduction of greenhouse gas emissions. One of the "key indicators" used when applying the KPI Strategy (Relative) measures the Fund's greenhouse gas intensity (GHG intensity). This is determined using the weighted average intensity of the greenhouse gas emissions of the issuers in the Fund's portfolio, which in turn is calculated based on the annual turnover of each company concerned. Reducing greenhouse gas emissions is taken into account insofar as the GHG intensity of the Master Fund must be 20% lower than the GHG intensity of the Fund's benchmark. Moreover, in the context of pursuing the KPI Strategy (Relative), certain issuers are excluded on the basis of applying minimum exclusion criteria. Furthermore, investments are not made in issuers that fail to apply good corporate governance practices.

The Master Fund is an eligible French shared savings plan (Plan d'Épargne en Actions, PEA). That is why at least 75% of the Master Fund's assets are invested for the long-term in German equities in line with the Master Fund's investment objective. A maximum of 25% of the Master Fund's assets may be invested in equities other than those described in the investment objective. A maximum of 25% of the Master Fund's assets may be invested in emerging markets. A maximum of 15% of the Master Fund's assets may be held directly in deposits or invested in money market instruments or (for up to 10% of the Master Fund's assets) invested in money market funds. A maximum of 10% of the Master Fund's assets may be invested in target funds (UCITS and/or UCI). The Master Fund is considered to be an "equity fund" according to the German Investment Tax Act (Investmentsteuergesetz).

The Master Fund's Investment Manager follows an active management

approach with the aim to outperform the Benchmark. Although the deviation from the investment universe, weightings and risk characteristics of the Master-Fund's Benchmark is likely to be material in the Master Fund's Investment Manager's own discretion, the minority of the Master-Fund's investments (excluding derivatives) may consist of components of the Benchmark.

Benchmark: DAX Performance Return Gross (in EUR).

The Fund's performance will be very similar to the Master Fund's performance. At least 80% of the assets held in the Master Fund's portfolio or the issuers thereof may be rated using the key indicator. The basis for calculating the 80% threshold is the net asset value of the Master Fund, excluding instruments that by their nature do not hold a rating, e.g. cash and deposits. Derivatives are not usually rated. Derivatives (with the exception of credit default swaps) are generally only rated if their underlying asset is a single rated corporate issuer. At least 15% of the Master Fund's assets are invested in sustainable investments. The minimum percentage of the Master Fund's investments aligned with the EU Taxonomy is 0.01% of the Fund's assets. The Fund is not marketed as expressly sustainable and/or the Fund does not pursue a sustainable investment strategy within the meaning of the administrative practice of the German Federal Financial Supervisory Authority (BaFin). Derivatives may be used in the Master Fund to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage). A derivative is a financial instrument whose value depends - not necessarily 1:1 - on the development of one or more underlying assets (e.g. securities or interest rates).

SFDR Category – Article 8 (a financial product which promotes, amongst other characteristics, environmental or social characteristics, provided that the companies in which the investments are made follow good governance practices)

OTHER INFORMATION

Depository: State Street Bank International GmbH

- unit prices, further information (including other unit classes of the Fund) and the Fund's remuneration policy
- past performance (up to 10 years) and performance scenarios of the Fund.

INTENDED RETAIL INVESTOR

The Fund is aimed at retail investors with basic knowledge and/or experience

of financial products. Prospective investors should be capable of bearing a financial loss and should not attach any importance to capital protection.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

← Lower risk

Higher risk →

The risk indicator assumes you keep the Fund for 5 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Fund compared to other products. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you. We have classified this Fund as 4 out of 7, which is a medium risk class on the basis of the PRIIPs regulation. This rates the potential losses from future

performance at medium level, and poor market conditions could impact our capacity to pay you. The categorisation of the Fund is not guaranteed and may change in the future. Even the lowest category 1 does not mean a risk-free investment.

Be aware of currency risk. You could receive payments in a different currency from your currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This Fund does not include any protection from future market performance so you could lose some or all of your investment.

The following material risks are not fully captured by the SRI: Unusual market conditions or large unpredictable events can amplify this Fund's risks and trigger other risks such as counterparty, liquidity, and operational risks (a complete description of risks can be found in the Prospectus).

PERFORMANCE SCENARIOS

The figures shown include all the costs of the Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund and/or suitable benchmark over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between 9/2017 and 9/2022. The moderate scenario occurred for an investment between 5/2014 and 5/2019. The favourable scenario occurred for an investment between 6/2016 and 6/2021.

Recommended holding period: 5 YEARS

Example Investment: 10,000 EUR

Scenarios		If you exit after 1 year	If you exit after 5 years
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs <i>Average return each year</i>	1,560 EUR -84.4 %	1,720 EUR -29.7 % each year
Unfavourable	What you might get back after costs <i>Average return each year</i>	6,510 EUR -34.9 %	7,700 EUR -5.1 % each year
Moderate	What you might get back after costs <i>Average return each year</i>	10,130 EUR 1.3 %	11,670 EUR 3.1 % each year
Favourable	What you might get back after costs <i>Average return each year</i>	14,670 EUR 46.7 %	15,170 EUR 8.7 % each year

WHAT HAPPENS IF ALLIANZ GLOBAL INVESTORS GMBH IS UNABLE TO PAY OUT?

The Fund assets are strictly kept separate from other funds' assets and the management company's own assets.

The Fund is neither liable for other funds' assets nor liable for liabilities of the management company, this applies also to liabilities of the management company arising from legal transactions which it concludes for the collective account of the Fund's investors.

Therefore, neither an insolvency of the management company nor of the Fund's appointed depository will result in an investor losing money in the Fund.

In case of insolvency of the management company, the Fund's depository will either liquidate the Fund and distribute the proceeds to Fund's investors or entrust its management to another management company.

WHAT ARE THE COSTS?

The person advising on or selling you this Fund may charge you other costs. If so, this person will provide you with information about these costs and how

COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

they affect your investment.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 5 years
Total costs	661 EUR	1,708 EUR
Annual cost impact (*)	6.6 %	2.9 % each year

(*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 6.0 % before costs and 3.1 % after costs.

COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after 1 year:
Entry costs	5.00 % of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the Fund will inform you of the actual charge.	485 EUR
Exit costs	We do not charge an exit fee for this Fund, but the person selling you the Fund may do so.	0 EUR
Ongoing costs		
Management fees and other administrative or operating costs	1.81 % of the value of your investment per year. This is an estimate based on actual costs over the last year.	172 EUR
Transaction costs	0.04 % of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the Fund. The actual amount will vary depending on how much we buy and sell.	4 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this Fund.	0 EUR

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 5 years

Due to its investment strategy, the Fund's value may vary considerably over the short time. You should therefore stay invested for at least 5 years to profit from gains on the longer term. If you disinvest earlier, there is a higher risk that you might get back only poor returns, or not even the sum you invested. The

Fund is open-ended which means you can redeem money back at every NAV calculation and without having to pay penalties. If applicable to your Fund you will pay the exit fees only. The detailed procedure to redeem from the Fund is described in the Prospectus.

HOW CAN I COMPLAIN?

Please contact the complaint management team using the details below. They will oversee the processing of the complaint by the different lines of business involved until its resolution and will ensure that potential conflicts of interest are identified and handled appropriately.
