WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

RISK INDICATOR

← Lower risk

Higher risk →

The risk indicator assumes you keep the Sub-Fund for 4 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less. You may not be able to cash in early and/or you may have to pay significant extra costs to cash in early. You may not be able to sell your Sub-Fund easily or you may have to sell at a price that significantly impacts on how much you get back.

The summary risk indicator is a guide to the level of risk of this Sub-Fund compared to other products. It shows how likely it is that the Sub-Fund will lose money because of movements in the markets or because we are not able to

pay you. We have classified this Sub-Fund as 2 out of 7, which is a low risk class on the basis of the PRIIPs regulation. This rates the potential losses from future performance at low level, and poor market conditions are very unlikely impact our capacity to pay you. The categorisation of the Sub-Fund is not guaranteed and may change in the future. Even the lowest category 1 does not mean a risk-free investment.

Be aware of currency risk. You could receive payments in a different currency from your currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above. This Sub-Fund does not include any protection from future market performance so you could lose some or all of your investment.

The following material risks are not fully captured by the SRI: Unusual market conditions or large unpredictable events can amplify this Sub-Fund's risks and trigger other risks such as counterparty, liquidity, and operational risks (a complete description of risks can be found in the Prospectus).

PERFORMANCE SCENARIOS

The figures shown include all the costs of the Sub-Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this Sub-Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Sub-Fund and/or suitable benchmark over the last 10 years. WHAT HAPPENS IF ALLIANZ GLOBAL INVESTORS GMBH IS UNABLE TO PAY OUT?

The Sub-Fund assets are strictly kept separate from other funds' assets and the management company's own assets.

The Sub-Fund is neither liable for other funds' assets nor liable for liabilities of the management company, this applies also to liabilities of the management company arising from legal transactions which it concludes for the collective account of the Sub-Fund's investors.

Therefore, neither an insolvency of the management company nor of the Sub-Fund's appointed depository will result in an investor losing money in the Sub-Fund.

In case of insolvency of the management company, the Sub-Fund's depository will either liquidate the Sub-Fund and distribute the proceeds to Sub-Fund's investors or entrust its management to another management company.

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Recommended holding period: 4 years

Due to its investment strategy, the Sub-Fund's value may vary considerably over the short time. You should therefore stay invested for at least 4 years to profit from gains on the longer term. If you disinvest earlier, there is a higher risk that you might get back only poor returns, or not even the sum you

invested. The Sub-Fund is open-ended which means you can redeem money back at every NAV calculation and without having to pay penalties. If applicable to your Sub-Fund you will pay the exit fees only. The detailed procedure to redeem from the Sub-Fund is described in the Prospectus.
