Allianz Global Investors Fund - Allianz Convertible Bond Share Class IT (EUR)

Managed by Allianz Global Investors GmbH, part of
Allianz Global Investors

ISIN: LU0706716544
WKN: A1JPF4

Objectives and Investment Policy

Long term capital growth by investing in convertible debt securities of European Bond Markets in accordance with the Sustainability Key Performance Indicator Strategy (Relative) ("KPI Strategy (Relative)"). In this context, the aim is to outperform the Sub-Fund's Sustainability KPI compared to Sub-Fund's Benchmark to achieve the investment objective.

We manage this Sub-Fund in reference to a Benchmark. Sub-Fund's Benchmark plays a role for the Sub-Fund's performance objectives and measures. We follow an active management approach with the aim to outperform the Benchmark. Although our deviation from the investment universe, weightings and risk characteristics of the Benchmark is likely to be material in our own discretion, the majority of the Sub-Fund's investments (excluding derivatives) may consist of components of the Benchmark.

The Sub-Fund follows the KPI Strategy (Relative) and promotes responsible investments by applying an investment objective related to one sustainability key performance indicator ("Sustainability KPI") to provide transparency on the measurable sustainability outcome pursued by the Sub-Fund's Investment Manager for the shareholders. Minimum exclusion criteria for direct investments are applied.

Min. 60% of Sub-Fund assets are invested in convertible bonds as described in the investment objective in accordance with the KPI Strategy (Relative). Max. 40% of Sub-Fund assets may be invested in bonds other than described in the investment objective in accordance with the KPI Strategy (Relative). Sub-Fund's Sustainability KPI is the "Weighted Average GHG Intensity (Sales)" which is the weighted average of the GHG intensity (in tCO₂e per Millions of sales) of Sub-Fund's portfolio. Sub-Fund's investment objective shall be achieved by an outperformance of the Weighted Average GHG Intensity (Sales) of Sub-Fund's portfolio compared to the Weighted Average GHG Intensity (Sales) of Sub-Fund's Benchmark. Sub-Fund assets may be invested completely in High-Yield

bonds bearing a typically higher risk and higher potential of gains, within this limit max. 10% of Sub-Fund assets may be invested in bonds with a rating of CC (Standard & Poor's) or lower (including defaulted securities). Max. 40% Sub-Fund assets may be held in deposits and/or may be invested directly in Money Market Instruments and/or (up to 10% of Sub-Fund assets) in money market funds on a temporary basis for liquidity management and/or defensive purpose. Max. 20% of Sub-Fund assets may be invested in Emerging Markets. Max. 20% of Sub-Fund assets may be invested in ABS and/or MBS. Max. 10% of Sub-Fund assets may be invested in UCITS and/or UCI. In addition, Sub-Fund assets may be invested in the exercise of subscription, conversion and option rights on investments such as convertible debt securities and/or contingent convertible bonds in Equities and comparable securities or rights. Min. 70% of Sub-Fund's portfolio shall be evaluated by the "Weighted Average GHG Intensity (Sales)". Portfolio in this respect does not comprise derivatives and instruments that are non-evaluated by nature (e.g., cash and Deposits).

Benchmark: Thomson Reuters Refinitiv Europe Focus (in EUR).

You may redeem shares of the fund usually on each business day.

We reinvest the income into the fund.

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).

SFDR Category – Article 8 (a financial product which promotes, amongst other characteristics, environmental or social characteristics, provided that the companies in which the investments are made follow good governance practices)

Risk and Reward Profile

This risk and reward indicator is based on past performance data. It may not be a reliable indication of the future risk profile of the fund.

The categorisation of the fund is not guaranteed and may change in the future. Even the lowest category 1 does not mean a risk-free investment.

Why is the fund in this category?

Funds of category 4 have shown in the past a medium volatility. The volatility describes how much the value of the fund went up and down in the past. The units of a fund of category 4 might be subject to medium price fluctuations

based on the historical volatilities observed.

The following material risks are not fully captured by the risk and reward indicator:

We may invest directly or indirectly a significant portion of the fund into bonds or money markets instruments. If the issuer may fall into insolvency or may suffer economical problems the interest and/or the capital of these assets may not or may not be completely paid and/or the price of the assets may drop.

The fund contains a material proportion of assets which either have a low level of liquidity or which, under certain circumstances, may have a low level of liquidity. As a result, it is possible that these assets cannot be sold or can only be sold at a significant discount. Consequently, a high level of redemptions may lead to an increased risk of redemptions being suspended. For this reason we may not be able to pay your money back, or not immediately, and/or the fund price may fall.
