- Allianz Emerging Europe Equity¹⁾ - Because of the current and ever-evolving circumstances associated with the Ukraine / Russia situation, the current political situation and liquidity constraints caused by the ongoing closure of the Moscow stock exchange for international investors and various sanctions imposed on the financial markets, it is currently not possible to perform a proper valuation of the assets of the Fund. Consequently, and after careful consideration, the Board of Directors came to the conclusion that it is in the best interest of the shareholders to temporarily suspend the calculation of the net asset value and subsequently the dealing of shares.

The Board of Directors of the Company decided to temporarily suspend the calculation of the Net Asset Value of the Fund with effect from 28 February 2022. This decision was taken on 1st of March and the calculation of the NAV is still suspended as of 30 September 2023.

The uncertainty for a valuation of assets is currently related to the Russian equities held by the fund. In order to calculate the

All-in-Fee payable to the management company, the Russian equities and sight deposits have been valued with zero. All other assets are valued according to the standard valuation principles. The last redemption and subscription prices has been calculated at 28.02.2022.

A separate pool of assets and separate accounting records are maintained for each Subfund.

The figures presented in this report relate to the period from 1 October 2022 to 30 September 2023. They should not necessarily be taken as an indication of the future development of the Subfunds.

Subscriptions are only valid if made on the basis of the current Prospectus, the Articles of Incorporation, the Key Investor Information Document supplemented by the latest available audited Annual Report. If the latest Annual Report was published more than eight months ago, then the most recent Semi-Annual Report must also be made available.

The Prospectus, the Articles of Incorporation, the Key Investor Information Document as well as the respective Annual and Semi-Annual Reports can be obtained at the registered office of the Company or from the Management Company, the Custodian and each Paying and Information Agent without charge.

Some transactions conducted in the reporting period do no longer appear in the Investment Portfolio. The Statement of Changes in the composition of the securities portfolio during the reference period is available free of charge on request at the registered office of the Company and at the representatives where the Subfunds are distributed.

¹⁾ Not authorized in Hong Kong and not available to the public of Hong Kong.

²⁾ This Sub-fund is not classified as an ESG fund in Hong Kong pursuant to the Commission's Circular to management companies of SFC-authorized unit trusts and mutual funds - ESG funds dated 29 June 2021 (as may be revised from time to time).

Important notice to our Shareholders

The conflict between Russia and Ukraine is not just affecting political relations, but is also having an impact on the economy. Both the sanctions imposed on Russia and other geopolitical developments led to more expensive and scarcer energy, higher inflation and interest rates, and supply chain problems during the reporting period. These effects are also reflected in capital markets, where prices are influenced by market and stock exchange values. The global economy and capital markets continue to face high levels of uncertainty.

The Economic Sanctions issued against the Russian Federation, the separatist regions of Donetsk People's Republic and Luhansk People's Republic, and Belarus are constantly evolving. AllianzGI is complying with all relevant current and intends to comply with all relevant future sanctions including but not limited to those imposed by the EU, Japan, Singapore, South Korea, Switzerland, UK and US. All trades that AllianzGI sends to its counterparties comply with AllianzGI's obligations under the relevant sanctions. AllianzGI has a globally coordinated economic sanctions team from the Legal, Compliance and Risk functions that monitors economic sanctions and coordinates their implementation. This team is actively monitoring the current situation and has been working with impacted departments, including portfolio management, trading and operations, to take relevant action and ensure timely implementation. In particular, the team is coordinating the implementation of the multi-jurisdictional sanctions against the Russian Federation, the separatist regions of Donetsk People's Republic and Luhansk People's Republic and Belarus.

AllianzGI has policies, procedures and systems in place to screen new and existing investors against applicable sanctions lists. In relation to Article 5f of Regulation (EU) No 833/2014 and Article 1y of Regulation (EC) No 765/2006, AllianzGI has decided to stop selling any fund units/shares or securities to Russian and Belarussian nationals after 12 April 2022. In this regard, AllianzGI has instructed its distribution partners, fund platforms and service providers such as transfer agents to stop distributing fund units/shares to Russian and Belarussian nationals. Where Russian or Belarussian nationals hold units/shares in funds before 12 April 2022, AllianzGI has instructed their service providers to block the investor's account for subscriptions and other transactions which would constitute a sale of fund units/shares.

Launch of new Subfunds

With the approval of the Luxembourg Supervisory Authority, the Board of Directors of Allianz Global Investors Fund (the "Company") decided to launch the following new Subfunds:

¹⁾ In the case of liquidation/merger the performance until the liquidation/merger date is shown.

* The Net Asset Value calculation of Allianz Emerging Europe Equity has been suspended with effect from 28th February 2022 due to current and ever-evolving circumstances associated with the Ukraine/Russia situation.

The calculation is based on the net asset value per share (excluding sales charge), assuming distributions, if any, were reinvested. The performance is calculated according to the method recommended by the German BVI (Bundesverband Investment und Asset Management e.V.).

Past performance is not an indication of current or future performance.

The performance data do not take account of the commissions and costs incurred on the issue and redemption of shares.

Economic situation and capital market in the reporting period/outlook

Robust global economy – despite geopolitical uncertainty and tighter monetary policy

As of the end of September 2023, the reporting year has seen the global economy holding up comparatively well despite certain stress factors such as geopolitical conflicts, high inflation and rising interest rates. In particular, the easing of tensions in the oil and natural gas markets had a positive impact. Despite the widespread discontinuation of direct deliveries from Russia, the supply situation on the international energy markets remained robust overall. Another stabilising effect was the absence of the much feared recession in the US economy. To some extent, this offset China's continued economic weakness. By contrast, several other emerging markets again recorded solid growth, thereby supporting the global economy.

As far as monetary policy is concerned, central banks in most developed economies continued with their monetary tightening to counteract the rate of inflation, which remains high. For instance, the US Federal Reserve raised the range for its key interest rate several times, most recently to between 5.25% and 5.50%. In the Eurozone, the European Central Bank also raised interest rates sharply to 4.5%. Although the Bank of Japan maintained its slightly negative key interest rate, it moved away from its previous policy of strictly controlling long-term interest rates in view of increased inflationary trends. In some emerging countries, there was already scope again for growth-enhancing interest rate cuts, given moderate inflation rates.

Equity markets: mostly strong price increases

On the international stock markets, prices rose significantly for the most part. In the United States, the optimistic outlook for earnings prevailed, despite sharply rising interest rates and tightening credit conditions. This was due to the ongoing positive labour market situation and fiscal policy programmes aimed at strengthening domestic production. Japanese equities recorded far above-average growth, not least because of the monetary policy, which continues to be very generous, but also due to the stable situation of many sales markets. In Europe, German stocks performed particularly well, benefiting from the marked easing in oil and gas prices, although the domestic economy stagnated. China's equity market recorded only a moderate increase, reflecting uncertainty about the state of the real estate market and

relatively low growth momentum. In many other emerging markets, however, prices rose sharply, which was again helped by increased capital inflows from international investors.

Bond markets: higher-yield securities outshine government bonds

Development in the bond markets of developed countries followed a dual path: Government securities with high credit ratings suffered from only moderate interest rates and falling prices as a result of the upward trend in market yields. While US government bonds still achieved a moderate increase (in dollars), public-sector securities from the Eurozone performed slightly negatively, especially those with relatively long residual maturities. Investment-grade corporate bonds showed a marked improvement, primarily because they are less sensitive to interest rates due to their usually shorter durations. High-yield bonds produced very good results. Their above-average current earnings were generally offset by stable prices, which reflected the more robust than expected economic situation. Interest-bearing securities from emerging markets also posted significant gains. They benefited from several factors at the same time: Interest rates in many emerging countries tended to remain stable in view of comparatively lower inflation rates. Furthermore, solid growth rates prevailed, which are increasingly drawing on domestic sources. Last but not least, there was a reversal of international capital flows after many international investors had initially preferred the dollar zone in an environment of high geopolitical uncertainty.

Outlook

Equities

There are clear signs of an impending economic downturn in the US: The Treasury yield curve has been inverted since 2022. This means that interest rates are higher on the short end of the yield curve than on the long end, which has proven to be a reliable indicator of an impending recession in the past. If the US economy remains remarkably robust, this is likely to be due in particular to the depletion of savings built up during the coronavirus crisis. Banks, meanwhile, have tightened their lending standards to a level that has not been seen since 2008, and the leading economic indicators and dynamics in the manufacturing sector are all negative. From a global perspective, industrial production and world trade are tending to weaken and corporate investment appears to be declining.

Rising oil prices are also having a decelerating effect as they drive up costs for businesses and consumers. If the economic environment were to deteriorate more sharply, price fluctuations in the equity markets could increase.

Bonds

The US Federal Reserve (the Fed) is likely to have reached the end of its rate hike cycle. While overall US economic data has remained relatively robust, it shows continued disinflation. At the same time, there is evidence of an easing in labour shortages, which is a key inflation indicator for the Fed. The downward trend in inflation is also reflected in lower consumer inflation expectations. The majority of market participants have now delayed expectations of an initial interest rate cut in the United States – such a move has only been priced into the markets for July 2024. After the last meeting of the European Central Bank, market participants in the Eurozone also expect key interest rates to remain at high levels for longer than originally expected due to persistent inflationary pressures. However, it is expected that the ECB's actions at its next monetary policy meetings will strongly depend on the data. The prospect of comparatively stable yields with lower price fluctuation margins compared to the equity market is currently a general argument in favour of bonds.
