## WHAT IS THIS PRODUCT?

### TYPE

This Fund is a UCITS according to European Directive 2009/65/EC.

### TERM

The Fund has been set-up for an indefinite period of time. In accordance with the Fund's rules, the assets belonging to the Fund are owned jointly by the Fund's unitholders. The Management Company may terminate the Fund's management according to the Fund's rules. In this case, the Management Company / the Fund's appointed depository will either entrust its management to another management company or the depository will liquidate the Fund and distribute the proceeds to the Fund's unitholders.

You may redeem shares of the Fund usually on each business day. We reinvest the income into the Fund. The management company may suspend redemption if exceptional circumstances make this appear necessary, taking into account the interests of the investors, or limit redemption if the investors' redemption requests reach a predefined threshold above which the redemption requests can no longer be executed in the interests of the investors as a whole.

### OBJECTIVES

The Fund aims to earn a return on the bond portion of the portfolio that is in line with the return on the euro bond markets and to achieve long-term capital growth in the equity portion of the portfolio. For example, pension capital is to be built up for the birth years 1952 to 1956.

We invest in interest-bearing securities that have a good credit rating. These securities have an average duration (remaining term) of up to nine years. In addition, we invest up to 50% of the Fund's assets directly or via derivatives in equities and comparable securities (e.g. equity funds). There is no significant foreign currency risk against the euro. We follow an active management approach.

Benchmark: none.

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage). A derivative is a financial instrument whose value depends - not necessarily 1:1 - on the development of one or more underlying assets (e.g., securities or interest rates).

SFDR Category – Article 6 (a financial product that does not consider the EU criteria for environmentally sustainable economic activities)

## WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

### RISK INDICATOR

← Lower risk

Higher risk →

The risk indicator assumes you keep the Fund for 3 years. The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this Fund compared to other products. It shows how likely it is that the Fund will lose money because of movements in the markets or because we are not able to pay you. We have classified this Fund as 2 out of 7, which is a low risk class on the basis of the PRIIPs regulation. This rates the potential losses from future performance at low level, and poor market conditions are very

unlikely impact our capacity to pay you. The categorisation of the Fund is not guaranteed and may change in the future. Even the lowest category 1 does not mean a risk-free investment.

**Be aware of currency risk. You could receive payments in a different currency from your currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.** This Fund does not include any protection from future market performance so you could lose some or all of your investment.

The following material risks are not fully captured by the SRI: Unusual market conditions or large unpredictable events can amplify this Fund's risks and trigger other risks such as counterparty, liquidity, and operational risks (a complete description of risks can be found in the Prospectus).

### PERFORMANCE SCENARIOS

The figures shown include all the costs of the Fund itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back. What you will get from this Fund depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund and/or suitable benchmark over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances. The unfavourable scenario occurred for an investment between 9/2019 and 9/2022. The moderate scenario occurred for an investment between 1/2017 and 1/2020. The favourable scenario occurred for an investment between 12/2013 and 12/2016.

**Recommended holding period: 3 YEARS**

**Example Investment: 10,000 EUR**

### WHAT HAPPENS IF ALLIANZ GLOBAL INVESTORS GMBH IS UNABLE TO PAY OUT?

The Fund assets are strictly kept separate from other funds' assets and the management company's own assets.

The Fund is neither liable for other funds' assets nor liable for liabilities of the management company, this applies also to liabilities of the management company arising from legal transactions which it concludes for the collective account of the Fund's investors.

Therefore, neither an insolvency of the management company nor of the Fund's appointed depository will result in an investor losing money in the Fund.

In case of insolvency of the management company, the Fund's depository will either liquidate the Fund and distribute the proceeds to Fund's investors or entrust its management to another management company.

### WHAT ARE THE COSTS?

The person advising on or selling you this Fund may charge you other costs. If so, this person will provide you with information

about these costs and how they affect your investment.

## COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the Fund and how well the Fund does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the Fund performs as shown in the moderate scenario
- 10,000 EUR is invested

	If you exit after 1 year	If you exit after 3 years
<b>Total costs</b>	667 EUR	833 EUR
<b>Annual cost impact (*)</b>	6.7 %	2.9 % each year

(\*) This illustrates how costs reduce your return each year over the holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be -0.7 % before costs and -3.6 % after costs.

## COMPOSITION OF COSTS

### One-off costs upon entry or exit

		If you exit after 1 year:
<b>Entry costs</b>	6.00 % of the amount you pay in when entering this investment. This is the most you will be charged. The person selling you the Fund will inform you of the actual charge.	572 EUR
<b>Exit costs</b>	We do not charge an exit fee for this Fund, but the person selling you the Fund may do so.	0 EUR

### Ongoing costs

## HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

### Recommended holding period: 3 years

Due to its investment strategy, the Fund's value may vary considerably over the short time. You should therefore stay invested for at least 3 years to profit from gains on the longer term. If you disinvest earlier, there is a higher risk that you might get back only poor returns, or not even the sum you invested. The

Fund is open-ended which means you can redeem money back at every NAV calculation and without having to pay penalties. If applicable to your Fund you will pay the exit fees only. The detailed procedure to redeem from the Fund is described in the Prospectus.
