## Objectives and Investment Policy

The fund seeks to generate capital growth over the long term.

We follow an active management approach with the aim to outperform the Benchmark. We will acquire assets that are constituents of the Benchmark and we may use our discretion to invest in assets not included in the Benchmark. In selecting and weighting the fund's assets we deviate materially from the Benchmark.

The Fund follows the Climate Engagement with outcome Strategy and therefore promotes environmental or social characteristics by including environmental and social factors in the investment decision and engages specifically with high emitters in order to promote climate consciousness. Minimum exclusion criteria for direct investments are applied.

We invest at least 70% of the fund's assets, directly or using derivatives, in shares and equivalent securities of companies whose headquarters are in Germany or that are listed on the

MDAX. These companies may not have a market capitalisation higher than the market capitalisation of the largest company on the MDAX. We can also invest in other shares and equivalent securities.

Benchmark: MDAX (in EUR).

We have discretion to deviate from the benchmark.

You may redeem shares of the fund usually on each business day.

We usually distribute the income of the fund on a yearly basis.

Derivatives may be used to offset exposure to price fluctuations (hedging), to take advantage of price differences between two or more markets (arbitrage) or to multiply gains although it may also multiply losses (leverage).
