What is the product?

Type: This product is a Société d'Investissement à Capital Variable (SICAV).

Term: The fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the fund, subject to approval by the Board of Directors.

Objectives: The fund seeks to maximize investment income while preserving capital, by investing at least two-thirds of its total assets in Euro-denominated credit debt securities, rated investment grade at the time of purchase, issued by sovereign or corporate issuers. Investment grade means bearing a credit rating of BBB- and/or Baa3 or equivalent and above from any one of the following credit rating agencies: Standard & Poor's, Moody's or Fitch, where an investment is not rated by either Standard & Poor's, Moody's or Fitch and where the Sub-Investment Manager consults with such other external sources that are available and uses its professional judgement, supported by at least one external opinion that such investment is of investment grade rating. While the fund may purchase securities of any maturity or duration, under normal circumstances, its average weighted duration is expected to be up to 3.5 years or less. The fund may invest up to one-third of its total assets in currency-hedged non-Euro-denominated debt securities and foreign agencies; up to 10% of its total assets in investment grade asset-backed securities including mortgage-backed securities and commercial mortgage-backed securities; up to 10% of its total assets in debt securities rated below investment grade at the time of purchase; and up to 7.5% of its total assets in contingent convertible bonds. The fund will not invest in assets rated below B-/B3. In the case of a downgrade on an existing investment below B-/B3, the downgraded assets must be sold by the fund in an orderly and timely manner in accordance with the general applicable principles. The fund may also use futures, forward contracts, options, or swap agreements, as well as other derivatives, for hedging, efficient portfolio management or investment purposes. The fund's fundamental credit research combined with active top-down allocation decisions within a controlled risk framework seek to generate superior investment returns. The fund is actively managed but uses the Bloomberg Euro Aggregate Corporate Bonds 1-5 Yr. Index (EUR Unhedged) for performance comparison. The investments of the fund may deviate significantly from the components of and their respective weightings in the benchmark. You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day"). This share class does not distribute dividends. Income is reinvested in the fund.
