What is the product?

Type: This product is a Société d'Investissement à Capital Variable (SICAV).

Term: The fund has been established for an indefinite period of time. The PRIIP Manufacturer reserves the right to liquidate the fund, subject to approval by the Board of Directors.

Objectives: The fund seeks total return, consisting of a high level of current income and capital appreciation by investing, under normal market conditions, at least 80% of its total assets in corporate debt securities that are below-investment-grade (i.e., rated lower than Baa by Moody's or lower than BBB by Standard & Poor's or, if unrated, determined to be of comparable quality by the fund), at least 75% of its total assets in debt securities of U.S. issuers, up to 25% of its total assets in U.S. dollar-denominated debt securities of non-U.S. issuers, and up to 20% of its total assets in asset-backed securities. U.S. debt securities are securities: (1) issued by companies with their principal office in the United States or exercising a predominant part of their economic activities in the United States; or (2) issued by U.S. governmental issuers. The fund invests principally in below-investment-grade debt securities (often called "high yield" securities or "junk bonds") of U.S. corporate issuers that are rated BB through B by Standard & Poor's or Ba through B by Moody's or an equivalent quality rating from another U.S. nationally recognized statistical ratings organization, or are deemed by the fund to be of comparable quality. While the fund may purchase securities of any maturity, under normal circumstances, its U.S. dollar-weighted average effective maturity is expected to be three years or less. The fund may also use futures, forward contracts, options or swap agreements, as well as other derivatives, for hedging, efficient portfolio management or investment purposes. The fund focuses on selecting individual securities that may potentially add value from income and/or capital appreciation, primarily using a bottom-up fundamental credit analysis to generate new ideas and to understand the potential risks. The fund is actively managed and not managed in reference to a benchmark. You may redeem your investment upon demand on each business day when banks in Luxembourg are open for normal business and the New York Stock Exchange is open for trading (a "Business Day"). This share class intends to distribute gross dividends, if any. Shareholders should note that paying dividends gross of expenses may result in the shareholder receiving a higher dividend than they would have otherwise received and therefore may suffer a higher income tax liability as a result. Shareholders should seek their own professional tax advice in this regard.

Intended Investor:

This product is intended for institutional investors of all knowledge and/or experience levels seeking more income with higher volatility in overall return, who have an investment horizon of 3 years or longer and who have a risk tolerance compatible with the product's SRI rating.

Depository: Brown Brothers Harriman (Luxembourg) S.C.A.

Further Information: This document describes a share class of a sub-fund of Allspring (Lux) Worldwide Fund. The assets and liabilities of each sub-fund are segregated and no sub-fund is responsible for the liabilities of another. The prospectus and financial reports are prepared for Allspring (Lux) Worldwide Fund as a whole. You may obtain free copies of these documents in English, French, and German from Allspring (Lux) Worldwide Fund, c/o Brown Brothers Harriman (Luxembourg) S.C.A., 80 Route d'Esch, L-1470 Luxembourg or at allspringglobal.com.

Price Publication: Net asset value per share is calculated on each Business Day and is available in local media and/or with the fund's local agent in certain countries and at the registered office of the fund.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator

< Lower risk Higher risk >>

1	2	3	4	5	6	7
---	---	---	---	---	---	---

The risk indicator assumes you keep the product for a minimum of 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

We have classified this product as class 2 out of 7, which is a low-risk class. This rates the potential losses from future performance at a low level, and poor market conditions are very unlikely to impact the capacity of the fund to pay you.

Be aware of currency risk. You will receive payments in a different currency, so the final return you will get depend on the exchange rate between the two currencies. This risk is not considered in the indicator shown above.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product / a suitable benchmark over the last 10 years. Markets could develop very differently in the future.

Recommended minimum holding period: 3 Years

Investment: 10 000 EUR

Scenarios		1 Year	3 Years
Minimum: There is no minimum guaranteed return. You could lose some or all of your investment.		(recommended holding period)	
Stress scenario	What you might get back after costs	6 140 EUR	7 730 EUR
	Average return each year	- 38.55 %	- 8.21 %
Unfavourable scenario	What you might get back after costs	9 250 EUR	9 560 EUR
	Average return each year	- 7.47%	- 1.47%
Moderate scenario	What you might get back after costs	10 120 EUR	10 370 EUR
	Average return each year	1.16%	1.23%
Favourable scenario	What you might get back after costs	11 280 EUR	11 190 EUR
	Average return each year	12.84%	3.83%

The figures shown include all the costs of the product itself but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances

Unfavourable: This type of scenario occurred for an investment between 04/2017 and 03/2020.

Moderate: This type of scenario occurred for an investment between 12/2014 and 11/2017.

Favourable: This type of scenario occurred for an investment between 01/2019 and 12/2021.

What happens if Allspring Global Investments Luxembourg S.A. is unable to pay out?

The value of your investment would not be affected by a default by the PRIIP Manufacturer. The value of your investment is not guaranteed but you will not face financial loss greater than the amount of your investment.

What are the costs?

The person selling you or advising you about this product may charge you other costs. If so, this person will provide you with information about these costs, and should show you the impact that all costs will have on your investment over time.

Costs over Time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods:

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10 000 is invested.

Investment: 10 000 EUR	If you exit after 1 Year	If you exit after 3 Years
Total Costs	106 EUR	333 EUR
Annual Cost Impact	1.06 %	1.07 %

This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.30% before costs and 1.23% after costs.
