What is this product?

Type: Shares of Amundi CPR Climate Action, an investment fund.

Term: The term of the Fund is open-ended. The Management Company may terminate the Fund by dissolution or merger with another fund, in accordance with the legal provisions.

Objectives: This product has a financial investment objective and a sustainable investment objective. **Amundi CPR Climate Action** is a financial product that promotes ESG characteristics in accordance with Article 8 of the Disclosure Regulation. In other words, it pursues sustainable investment. More detailed information can be found in the prospectus under Section 14, "Investment objective", and in the "Additional investor information" annex under "Pre-contractual information" or "Sustainability (ESG) principles".

Financial investment objective: Long-term capital growth with adequate diversification of risk, taking into account capital market developments.

Sustainable investment objective: Combating climate change in line with the United Nations Sustainable Development Goal and achieving a higher ESG rating and a lower carbon footprint than the MSCI All Country World Index.

Investment strategy and instruments: Amundi CPR Climate Action is an equity fund that invests mainly, i.e. at least 66% of its assets, in shares of companies from all economic regions and sectors and of all capitalisation sizes worldwide. Within that percentage, the Fund may invest up to a maximum of 25% of its assets in Chinese A-shares. Up to 10% of the Fund's assets may be invested in shares of other investment funds, but acquisitions are restricted to (near-)money market funds.

As part of the investment strategy, up to 34% of the Fund's assets may be invested in derivative instruments (calculated on the basis of current market prices) which are used for hedging purposes. As a result, there may be an increased risk of loss of the Fund's assets, at least temporarily.

The Fund pursues an active investment strategy and is not based on any reference value to achieve its financial investment objective.

The Fund applies strict exclusion rules to certain industries and sectors with the aim of determining a selection of ESG securities.

The Fund Manager will use macro market data in combination with basic analysis of individual issuers to identify equities with improved long-term prospects.

External fund management: CPR Asset Management

Intended Retail Investor: This product is intended for investors with a basic knowledge and with no or limited experience of investing in funds, seeking to increase the value of their investment over the recommended holding period and who are prepared to take on a high level of risk to their original capital.

Redemption and Dealing: Shares may be sold (redeemed) as stated in the prospectus and investor information document at the respective dealing price (net asset value). Further details can be found in the prospectus or the investor information document of Amundi CPR Climate Action.

Distribution Policy: As this is a non-distributing share class, investment income is reinvested.

Depositary: UniCredit Bank Austria AG.

What are the risks and what could I get in return?

RISK INDICATOR

Lower risk

Higher risk

The risk indicator assumes you keep the product for five years.

We have classified this product as 5 out of 7, which is a medium-high risk class. The risk of potential losses from future performance is therefore classified as medium-high. In unfavourable market conditions, it is likely that our ability to pay you will be compromised.

Additional risks: Market liquidity risk could amplify the variation of product performances.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Beside the risks included in the risk indicator, other risks may affect the Product's performance. Further information can be found in the prospectus or the investor information document of Amundi CPR Climate Action.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last five years.
