## What is this product?

**Type:** Units of AMUNDI EURO LIQUIDITY-RATED SRI, a UCITS (Undertaking for Collective Investment in Transferable Securities), established in the form of an FCP.

**Term:** The Fund has an unlimited duration. The Management Company may dissolve the Fund by means of liquidation or merger with another fund in accordance with legal requirements.

**AMF Classification ("Autorité des Marchés Financiers"):** Standard Variable Net Asset Value Money Market UCI

**Objectives:** By subscribing to AMUNDI EURO LIQUIDITY-RATED SRI, you are investing in money market instruments with a maximum maturity of two years.

The Fund's management objective is to outperform its benchmark, the capitalised €STR, an index representing the Eurozone money market rate, after taking into account ongoing charges and while incorporating ESG criteria into the Fund's security analysis and selection process.

However, in periods of negative returns on the money market, the Fund's return may be negatively affected. Moreover, after taking ongoing charges into account, the Fund may be outperformed by the capitalised €STR.

The fund incorporates ESG (environment, social and governance) criteria into the analysis and selection of securities, in addition to financial criteria (liquidity, maturity, profitability and quality).

The non-financial analysis results in an ESG rating for each issuer on a scale ranging from A (highest rating) to G (lowest rating). At least 90% of securities in the portfolio have an ESG rating.

In addition, the Fund implements an SRI strategy based on a combination of approaches:

- "rating improvement" approach (the average ESG rating of the portfolio must be higher than the ESG rating of the investment universe after eliminating at least 20% of the lowest-rated securities);

- regulatory by excluding certain issuers:

  - o exclusion of issuers rated F and G on purchase;

  - o legal exclusions on controversial weapons;

  - o exclusion of companies that seriously and repeatedly contravene one or more of the ten principles of the United Nations Global Compact;

  - o sectoral exclusions on coal and tobacco.

- Best-in-Class which aims to give priority to issuers that are leaders in their business sectors based on ESG criteria identified by the Management Company's team of non-financial analysts.

The Best-in-Class approach does not exclude any business sectors a priori; the Fund may therefore be exposed to certain controversial sectors. To limit the potential non-financial risks of these sectors, the Fund applies the exclusions set out above, coupled with a commitment policy that aims to promote dialogue with issuers and support them in improving their ESG practices.

To achieve this, the management team selects high-quality money market instruments in euro or foreign currencies, taking into account their residual life.

These securities are selected from within a previously determined investment universe according to an internal risk assessment and monitoring process.

In order to assess the credit quality of these instruments, the management company may refer to investment grade ratings from recognised ratings agencies it deems the most relevant, on a non-exclusive basis, when purchasing an instrument; it shall however endeavour to avoid any mechanical dependence on these ratings throughout the period of time in which the securities are held.

Foreign currency securities are fully hedged against currency risk.

By way of derogation, the 5% limit of the UCI assets may be increased to 100% of its assets when the Fund invests in money market instruments issued or guaranteed individually or jointly by certain sovereign, quasi-sovereign or supranational entities of the European Union as outlined by European Regulation (EU) 2017/1131 of the European Parliament and Council of 14 June 2017.

The Fund may make temporary purchases and sales of securities. Eligible forward financial instruments may be used for hedging purposes.

The UCI is actively managed. The index is used a posteriori as a performance comparison indicator. The management strategy is discretionary and has no index-related constraints.

The UCI is classified Article 8 within the meaning the SFDR Regulation (Regulation (EU) 2019/2088 on sustainability-related disclosures in the financial services sector (known as the "Disclosure Regulation")).

**Intended retail investors:** This product is intended for investors with a basic knowledge and little or no experience of investing in funds, who are seeking to increase the value of their investment while preserving all or part of their invested capital over the recommended holding period and who are prepared to assume a medium level of risk on their initial capital.

The product is not open to residents of the United States of America/"U.S. Person" (the definition of "U.S. Person" is available on the Management Company's website [www.amundi.fr](http://www.amundi.fr) and/or in the prospectus).

**Redemption and transaction:** Units may be sold (redeemed) daily as stated in the prospectus at the respective dealing price (net asset value). Further details are provided in the AMUNDI EURO LIQUIDITY-RATED SRI prospectus.

**Distribution Policy:** As this is a non-distributing unit class, investment income is reinvested.

## What are the risks and what could I get in return?

### RISK INDICATOR

The risk indicator assumes you keep the product for more than one month.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movement in the markets or because we are not able to pay you.

We have classified this product as 1 out of 7, which is the lowest risk class. This rates the potential losses from future performance at a very low level, and poor market conditions are very unlikely to impact our capacity to pay you.

**Additional risks:** Market liquidity risk could amplify the variation of product performances.

The use of complex products such as derivatives can lead to increased movement of securities in your portfolio.

Beside the risks included in the risk indicator, other risks may affect the Fund's performance. Please refer to the AMUNDI EURO LIQUIDITY-RATED SRI prospectus.

### PERFORMANCE SCENARIOS

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the Fund over the last 10 years. Markets could develop very differently in the future. The stress scenario shows what you might get back in extreme market circumstances.

### What happens if Amundi Asset Management is unable to pay out?

The product is a co-ownership of financial instruments and deposits separate from the Management Company. In the event of default by the Management Company, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss to the product is mitigated due to the legal segregation of the depositary's assets from those of the product.

### What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

### COSTS OVER TIME

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product, and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- in the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.

- EUR 10,000 is invested.

Investment EUR 10,000	
Scenarios	If you exit after Greater than 1 month*
Total costs	€104
Cost impact**	1.0%

\* Recommended holding period.

\*\* This illustrates the effect of costs over a holding period of less than one year. This percentage cannot be directly compared to the cost impact figures provided for other PRIIPs. These figures include the maximum distribution fee that the person selling you the product may charge (1.00% of amount invested/EUR 100). This person will inform you of the actual distribution fee.

## COMPOSITION OF COSTS

One-off costs upon entry or exit		If you exit after more than one month
<b>Entry costs</b>	This includes distribution costs of 1.00% of the amount invested. This is the most you will be charged. The person selling you the product will inform you of the actual charge.	Up to EUR 100
<b>Exit costs</b>	We do not charge an exit fee for this product, but the person selling you the product may do so.	EUR 0.00
Ongoing costs taken each year		
<b>Management fees and other administrative or operating costs</b>	0.43% of the value of your investment per year. This percentage is based on the actual costs over the last year.	EUR 3.57
<b>Transaction costs</b>	0.04% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on the volume of our purchases and sales.	EUR 0.35
Incidental costs taken under specific conditions		
<b>Performance fees</b>	30.00% of the annual outperformance of the reference asset. The calculation applies on each Net Asset Value calculation date in accordance with the terms described in the prospectus. Past underperformances over the last five years must be recovered before any new performance fee accrual. The actual amount will vary depending on how well your investment performs. The aforementioned estimate of total costs includes the average over the past five years. <b>The performance fee is paid even if the performance of the unit over the observation period is negative, while remaining higher than the performance of the Reference Asset.</b>	EUR 0.00

## How long should I hold it and can I take money out early?
