LEGAL ADVISOR Arendt & Medernach S.A.

41A, avenue J.F. Kennedy L-2082 Luxembourg Grand Duchy of Luxembourg In quarter one of 2023, the global economy slowed, but with strong regional divergences. In the United States and notably, in the Eurozone, the downturn was more moderate than expected. However, in March, tensions in the markets led to more uncertainty. China remained on an upward trajectory in the wake of its post-Covid reopening, helping to limit the deceleration of other emerging economies. While falling, inflation remained very high in most countries, with central banks continuing to raise key interest rates. Interest rate markets experienced high volatility, while equity markets posted positive performances, thanks in particular to a good January. In quarter two of 2023, a large proportion of the global economy continued to experience stagflation (low growth and very high inflation). While any decline in inflation barely spread to underlying indices (excluding Energy and Food). Central banks continued to raise their key rates, but at a slower pace than in previous quarters. With regard to financial markets, equities rose while bonds were volatile, albeit to varying degrees, depending on regions and maturities.

In quarter three of 2023, the US economy performed well, while in the Eurozone and China, the economic situation continued to disappoint. Inflation continued to fall in most countries, but remained too high from the central banks' perspective. Central banks in developed economies continued to raise their key rates, but at a slower pace than in previous quarters. By contrast, some central banks in emerging economies started to cut interest rates.

In quarter four, economic activity while decelerating remained buoyant in the United States and continued to disappoint in the Eurozone. Growth in most emerging economies slowed somewhat, while remaining relatively strong. Inflation continued to decline in most countries. The Federal Reserve (Fed) and the European Central Bank (ECB) hinted at an end of their key-rate hike cycles, while a number of central banks in emerging economies cut theirs.

United States

At the start of 2023 US economic surveys were mixed: the ISM manufacturing index settled in negative territory but, after a brief dip at the turn of the year, the ISM Services index recovered well, then fell close to neutral in March 2023. The US labour market remained very strong: job creation surprised on the upside in January 2023 and, to a lesser extent, in February. The US unemployment rate hit a historic low in January at 3.4%, it then rose to 3.6% in February, mainly due to people rejoining the labour force. US inflation continued to decline, albeit at a very moderate pace: the general index rose by 6.0%, over 12 months in February (6.4% in January), while the underlying index stood at 5.5% (after reaching 5.6%). At the end of the first quarter, recessionary fears proliferated following the bankruptcies of SVB and two smaller banks, which raised concerns about the financial stability and lending conditions of the real economy. Faced with the triple challenge of high inflation, declining growth and rising financial tensions, the Fed continued its monetary tightening, albeit at a slower pace. It raised the Fed Funds rate by 25 basis points in February and then again in March to widen the range to 4.75/5.00%.

Faced with the Fed's rapid rise in interest rates, the US economy slowed in quarter two of 2023, but more gradually than expected at the end of quarter one. In particular, the consequences of the bankruptcy of several regional banks in March remained limited, and fears of a financial crisis eased. Economic indicators weakened (more in industry than in services), but did not signal an imminent recession. Although the unemployment rate rose in May (3.7%, the highest rate seen since October 2022), the labour market nonetheless continued to create more jobs than expected. As for inflation, the general index continued to slow (4.0% over 12 months in May after reaching 5.0% in March and a peak of 9.1% in June 2022), especially under the effect of energy prices, but this trend was less marked on underlying inflation (5.3% in May after reaching 5.6% in March and a peak of 6.6% in September 2022). After raising Fed Funds rates by 25 basis points in May (to 5.0-5.25%), the Fed left them unchanged in June, while signalling a high probability of further increases by the end of the year.

In quarter three, notwithstanding sharply rising interest rates, the US economy proved stronger than expected. Among other factors, the reasons for this resilience included higher levels of household savings and public measures to support investment. September's ISM indicators pointed to strong activity in Services and an easing of contraction in Industry. Albeit slowing, job creation remained at a high level, with the unemployment rate rising slightly (3.8% in August compared to 3.6% in June). The general inflation index accelerated again (3.7% in August compared to 3.0% in June), mainly due to the rise in fuel prices, but the underlying index continued to slow (4.3% in August compared to 4.8% in June). The Fed raised the Fed Funds rates by 25 bps in July (taking the range to 5.25-5.50%), but left them unchanged in September, leaving the door open for further possible rate hikes.

In quarter four, while the US economy continued to prove remarkably resilient to the sharp rise in interest rates, the trend was still towards a slowdown. Quarter three growth figures published in quarter four, showed dynamic activity (with year-on-year GDP growth standing at 4.9%, according to the December revision). However, according to more recent figures, the labour market started to run out of steam, as, even though the job creation rate remained high (with nearly 180,000 new jobs per month on average in quarter four), the unemployment rate stood at 3.7% in December, compared to 3.4% at its lowest level in April. Other monthly figures, such as retail sales, durable goods orders or industrial production, indicated slower growth in quarter four compared to quarter three. On the other hand, while inflation remained above the Fed's 2% target, it did fall significantly, with the 12-month rise in the general price index standing at just 3.1% (compared to 3.7% in August), and the 12-month rise in the underlying index standing at 4.0% (compared to 4.3% in August). Following the interest rate hike in July, the Fed did not change key interest rates. The Fed's statement suggested that current interest rates were satisfactory and that the pace of future rate cuts was already under discussion.

Eurozone

Eurozone economic indicators surprised positively in quarter one of 2023, signalling a stagnation in economic activity rather than a sharp drop. Supporting factors were lower gas prices and the economic recovery in China. The Manufacturing PMI continued to point to a contraction, but its Services counterpart returned to positive territory. The labour market remained strong, with the unemployment rate at an all-time low (6.6%) in February. Inflationary pressures remained very strong: while the general inflation index slowed significantly (up 6.9% over 12 months in March after peaking at 10.6% in October 2022), mainly thanks to negative base effects on energy prices, this was not the case for the underlying index, which continued its acceleration (up 5.7% in February, the highest rate seen since the creation of the euro). Determined to bring inflation down, the ECB raised its key rates by 50 basis points in February, then again in March, to bring the deposit facility interest rate to 3.5%. However, in March, rising financial tensions in the United States, as well as its repercussions in Europe (Credit Suisse bankruptcy and temporary fears about Deutsche Bank) drew attention to new risks.

In quarter two of 2023, Eurozone economic activity remained hampered by the rise in interest rates, the effect of high inflation on household purchasing power as well as an economically sluggish international environment due to the slowdown in the United States and China. After two quarters of a slight decline in GDP in quarter four of 2022 and quarter one of 2023, indicators relating to quarter two were mostly below expectations. Economic surveys pointed to a very significant divergence between Industry (still in difficulty following the shocks of recent years) and Services (where activity remained vigorous, but slowing down). Eurozone inflation continued to fall: over 12 months, the general index was at 5.5% in June after reaching 6.9% in March after a peak of 10.6% in October 2022. However, this decline in inflation only spread very moderately to the underlying index: up 5.4% in June after peaking at 5.7% in March. In addition, wages rose sharply in quarter one. The ECB raised its rates by 25 basis points in May, then again by 25 basis points in June, bringing the deposit facility interest rate to 3.5%. The ECB also suggested a probable additional increase in July.

In quarter three economic activity in the Eurozone was disappointing. Quarter two growth figures showed near stagnation (0.1% increase in GDP), after the standstill already observed in quarter one. While countries with high exposure to Services (France and Spain) maintained a slightly positive pace, countries with a more significant position in Industry experienced almost no growth (Germany) or negative growth (Italy). Business activity surveys in quarter three (PMI indices in particular) showed that the decline already observed in Industry was starting to spread to the Services sector. Despite some signs of slowdown, the labour market was strong, with the unemployment rate remaining at 6.4% in August, its lowest level since the creation of the Eurozone. Inflation fell sharply: in September, the 12-month rise in the general index was reduced to 4.3% (compared to 5.5% in June), and that of the underlying index, to 4.5% (compared to 5.5%). The ECB raised its key rates by 25 bps in July, then again in September, raising the deposit facility rate to 4.00%. However, the ECB refrained from presenting further increases as likely, asserting its confidence in the current level of interest rates to further drive inflation down.

Economic activity continued to be very sluggish in the Eurozone, with rising interest rates compounding the difficulties of the Industrial sector. At the end of November, the revised quarter three GDP figures indicated a very slight contraction (-0.1% for the entire region, including slight decline in France and Germany, a slight increase in Italy and a slightly larger increase in Spain). This GDR erosion is part of the near economic stagnation seen since the start of the year. The figures for the start of quarter four showed no noticeable improvement. However, the labour market remained in relatively good shape, with the unemployment rate staying at 6.5%, its lowest rate since the Eurozone was created. There was some good news from inflation too, as the general price index increase slowed down, falling to 2.9% over 12 months in December (following on from 4.4% in September), as was also the case for the underlying index, which slowed to 3.4% (following on from 4.5% in September).

Following its interest rate rise in September, the ECB kept its key rates unchanged. At its December Monetary Policy Committee meeting, the ECB reiterated that it was confident that the current interest rate level would help to bring down inflation further, while indicating that it was too early to discuss potential rate cuts.

■Emerging Markets

Quarter one of 2023 was marked by stronger-than-expected activity in China, boosted by a strong upturn in housing sales and favourable budgetary measures. By contrast, the economic situation has been much worse in other emerging economies, although they have proven to be resilient. January's inflation figures showed lower-than-expected declines and even, in some cases, continued acceleration of underlying inflation due to wage indexing mechanisms. However, February's inflation figures then pointed to a more general downturn. In the wake of the sharp downward revision of their expectations regarding the trajectory of key rates in advanced economies, the markets also modified their forecasts for emerging economies. However, in these economies, monetary policy continued to be driven primarily according to the local context, seeking the right balance between interest rate rises and pauses in interest rate hikes, depending on inflation trends and expectations. In China, the People's Bank of China (PBoC) unexpectedly reduced the Reserve Requirement Rate (RRR) to stem the sharp rise in interbank rates and to maintain sufficient liquidity in the financial system.

In the second quarter of 2023, the publication of quarter one GDP figures indicated that economic activity had held up better than expected in most emerging countries, due to the slowdown in inflation, the easing of pressures on supply chains thanks to the reopening of China, expansionary budgetary policies in some countries and the greater resilience of European and American economies. High-frequency indicators confirmed a soft landing scenario without, however, suggesting a significant rebound. In China, quarter two growth data signalled a more pronounced than expected slowdown in the Construction and Manufacturing Production sectors. The PBoC reacted by reducing most of its rates by 10 basis points. Some central banks (South Africa, Colombia, Malaysia, Thailand, Philippines and Turkey) once again raised their rates due to inflation but also due to pressures on their currencies thanks to an upward revision of market expectations regarding the US Federal Reserve and the rise in geopolitical tensions. However, in May inflation figures overall surprised on the downside, and the tone of most central banks became more accommodating. Despite high market volatility, the main indices (GBI, EMBI, MSCI) outperformed in quarter two.

Chinese data for quarter three continued to show weakness, particularly in the Real Estate sector, as real estate developers faced new debt difficulties. However, data published in August exceeded expectations, suggesting that the worst had been seen in quarter three. Nevertheless, despite expectations of a gradual cyclical recovery, China is currently experiencing a long-term slowdown. The main factor behind this slowdown was and will continue to be the Real Estate sector. The Chinese government responded with a number of policy measures, but these were not extensive enough to rapidly stimulate growth, with a long-term transition to a less intensive housing and export growth model remaining a priority.

In the majority of emerging countries, macroeconomic momentum remained weak but showed signs of improvement. However, exports seem to have hit their lowest level. Due to weakening base effects, rising food and energy prices and currency pressures, inflation decline slowed down in August and impacted household purchasing power. Yet, apart from a few atypical cases (Turkey, Russia and Thailand, for example), central banks began and continued their monetary easing by lowering their rates. However, many have adopted a more cautious tone following statements of the US Federal Reserve and the possibility of maintaining high rates for longer. Major events in quarter three were the BRICS group opening the door for six new members (Argentina, Egypt, Iran, Ethiopia, Saudi Arabia and the United Arab Emirates), and India's inclusion in the EMGBI index.

China continued to evolve its economic policies cautiously in quarter four, against the backdrop of a very uneven recovery. Public spending on infrastructure rose, but consumption slowed and inflation settled in negative territory. In Brazil, growth and inflation continued to slow down, while in India consumption proved to be more robust than investment. Overall, in emerging economies, domestic demand decelerated and inflation eased, but was still above central bank targets in most cases. Central banks continued to cut their rates, with, for example, the Central Bank of Brazil reducing interest rates by 50 basis points on a number of occasions and the Central Bank of Chile accelerating its pace, with cuts of 75 basis points. Other central banks, such as the Central Bank of Colombia and the Czech National Bank, followed suit. The seemingly less restrictive stance of the US Federal Reserve reduced the pressure on exchange rates, which had previously driven Bank Indonesia to raise rates and the Central Bank of Chile to slow down its cuts. Finally, in Argentina, new President Milei began his term of office with a 50% devaluation of the peso and an ambitious plan to liberalise the economy.

Net Asset Value at Year End

1 INTRODUCTION

Amundi Fund Solutions (the "SICAV") is organised as an open-ended investment company. The Company is an Undertaking for Collective Investment in Transferable Securities (UCITS) created on 24 October 2014 and qualifies under Part I of the Luxembourg amended law of 17 December 2010 relating to Undertakings for Collective Investment. It is governed by the Management Regulations effective as at year-end, and updated for the last time on 12 February 2018 and published in the Recueil Electronique des Sociétés et Associations ("RESA") on 4 April 2018.

The SICAV's initial capital of thirty one thousand Euro (EUR 31,000) divided into three hundred and ten (310) Shares of no par value fully held by Amundi Luxembourg S.A. has been unblocked after the effective launch of Amundi Fund Solutions.

The SICAV is managed by Amundi Luxembourg S.A. (the "Management Company") a company organised in the form of a public limited company ("société anonyme") under chapter 15 of the Law of 17 December 2010 as amended, wholly owned subsidiary of Amundi Asset Management S.A.S, registered with the Trade and Companies Register under number B 57.255 and having its registered office in Luxembourg. It was incorporated on 20 December 1996 for an unlimited period of time. Its Articles of Incorporation are published in the RESA and have been published and amended for the last time on 1 January 2018.

The following Sub-Funds have been launched:

The Sub-Fund Amundi Fund Solutions - Buy and Watch Income 03/2028 was launched on 13 February 2023.

The Sub-Fund Amundi Fund Solutions - Buy and Watch Income 06/2028 was launched on 3 April 2023.

The Sub-Fund Amundi Fund Solutions - Buy and Watch High Income Bond Opportunities 03/2028 was launched on 3 April 2023.

The Sub-Funds Amundi Fund Solutions - Buy and Watch Income 06/2028 - II and Amundi Fund Solutions - Buy and Watch High Income Bond Opportunities 06/2028 were launched on 19 June 2023

The Sub-Funds Amundi Fund Solutions - Buy and Watch Income 11/2028 and Amundi Fund Solutions - Buy and Watch High Income Bond Opportunities 11/2028 were launched on 13 November 2023.

The following Sub-Fund has been renamed during the period:

Amundi Fund Solutions - Sustainable Income 11/2027 into Amundi Fund Solutions - Multi Asset Income 11/2027 on 8 July 2023.

As at 31 December 2023, 23 Sub-Funds were active as detailed below:

2 PRINCIPAL ACCOUNTING CONVENTIONS

■ PRESENTATION OF FINANCIAL STATEMENTS

These financial statements are prepared in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

The financial statements reflect the Net Asset Values ("NAV") as calculated on the last business day of the year based on latest available market prices of the investments.

Valuation of investments and other instruments

The following pricing policy applies:

■ Valuation of investments - Investments which are quoted or dealt in on an official stock exchange or on a Regulated Market or any Other Regulated Market are valued at the last available prices at close of business of the relevant Valuation Day. Pricing rules (Bid/Mid/Ask) of each Sub-Fund are regularly reviewed by the Board of Directors of the Management Company of the Fund, and may be adapted either to the investment cycle and/or to the investment objective of each Sub-Fund.

In the event that any assets held in a Sub-Fund's portfolio on the relevant day are not quoted or dealt in on any stock exchange or on any Regulated Market, or on any Other Regulated Market or if, with respect of assets quoted or dealt in on any stock exchange or dealt in on any such markets, the last available price (as determined pursuant to the previous paragraph) is not representative of the fair market value of the relevant assets, the value of such assets is based on a reasonably foreseeable sales price determined prudently and in good faith by the Board of Directors of the SICAV.

Open-ended and closed-ended UCIs - Units or shares of open-ended UCIs are valued at their last determined and available Net Asset Value or, if such price is not representative of the fair market value of such assets, then the price is determined prudently and in good faith by the Board of Directors of the SICAV. Units or shares of a closed-ended UCI are valued at their last available market value.

- Forward foreign exchange contracts Forward foreign exchange contracts are valued at the forward rate applicable at the "Statement of Net Assets" date for the period until their maturity. Net unrealised gain and loss on forward foreign exchange contracts are recorded in the "Statement of Net Assets"; net realised and net change in unrealised gain/(loss) on forward foreign exchange contracts are recorded in the "Statement of Operations and Changes in Net Assets".

 The SICAV also offers Hedged Share Class. All gain/(loss) on forward foreign exchange contracts used for Hedged Share Classes are allocated solely to the relevant Share Class.
- Financial futures contracts Financial futures contracts are valued at the quoted price available on an official stock exchange (following the pricing policy as described above under "Valuation of investments"). Initial margin deposits are made in cash upon entering into futures contracts. Subsequent payments, referred to as variation margins, are made or received by the Sub-Fund periodically and are based on changes in the market value of open futures contracts. Net unrealised gain and loss on financial futures contracts are recorded in the "Statement of Net Assets"; net realised and net change in unrealised gain/(loss) on financial futures contracts are recorded in the "Statement of Operations and Changes in Net Assets". When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.
- Upfront premium Options contracts When the Sub-Fund purchases an options contract with an upfront premium, it pays a premium and an amount equal to that premium is recorded as an asset. When the Sub-Fund writes an option with an upfront premium, it receives a premium and an amount equal to that premium is recorded as a liability.
 - The asset or liability is adjusted daily to reflect the current market value of the options contracts.
 - Options contracts which are quoted or dealt in on a stock exchange or on a Regulated Market or any Other Regulated Market are valued at the exchange quoted price (following the pricing policy described above under "Valuation of investments"). OTC options are marked-to-market based upon daily prices calculated by third party agents and verified against the value received from the counterparty.
 - If the last known prices are not representative, the valuation will be based on the potential realisation value estimated by the Board of Directors of the SICAV with prudence and in good faith.
 - If an option expires unexercised, the Sub-Fund realises a gain or loss to the extent of the premium received or paid. Premiums received or paid, net unrealised gain and loss from options contracts are recorded in the "Statement of Net Assets" under the account balances "Upfront premium Options contracts purchased at market value" or "Upfront premium Options contracts written at market value".
 - Net realised and net change in unrealised gain/(loss) on options contracts are recorded in the "Statement of Operations and Changes in Net Assets".
- Futures-style options contracts Futures-style options contracts are valued at the quoted price available on an official stock exchange (following the pricing policy as described above under "Valuation of investments"). Initial margin deposits are paid in cash upon entering into the contract. Subsequent positive or negative cashflows, referred to as variation margins, are paid or received by the Sub-Fund periodically and are based on changes in the market value of open option contracts. When the contract is closed, the concerned Sub-Fund records a realised gain or loss equal to the difference between the proceeds from (or cost of) the closing transaction and the opening transaction.
 - Net unrealised gain and loss on futures-style options contracts are recorded in the "Statement of Net Assets".
 - Net realised and net change in unrealised gain/(loss) on futures-style options contracts are recorded on the caption "Options" in the "Statement of Operations and Changes in Net Assets".
- Swaps contracts Sub-Funds may enter into different types of swaps agreements such as interest rate swaps, swaptions, inflation-linked swaps, credit default swaps and total return swaps. Net unrealised gain and loss on swaps contracts are recorded in the "Statement of Net Assets". Net realised and net change in unrealised gain/(loss) on swap contracts are recorded in the "Statement of Operations and Changes in Net Assets". Swaps contracts are valued at fair market value as determined in good faith pursuant to procedures established by the Board of Directors of the SICAV.
 - Swaps contracts are marked-to-market at each Net Asset Valuation calculation date. The market value is based on the valuation of elements laid down in the contract, and it is obtained from third party agents, market makers or internal models, pursuant to the procedures established by the Board of Directors of the SICAV.
 - Effective interest expense/income on swaps contracts is booked in full in the "Statement of Operations and Changes in Net Assets". Accrued expense/income on swaps contracts are netted on each Net Asset Valuation calculation date for each swap contract and the resulting net balance is posted per swap, either as interest expense on swap or interest income on swap, in the "Statement of Operations and Changes in Net Assets".
- Income Interest income is accrued on a daily basis. Dividends are shown net of withholding taxes deducted at source, and are recorded as income on the exdividend date.
- Realised gain and loss Net realised gain and loss comprise the gain or loss arising on the trading of securities and other investments, financial futures contracts, forward foreign exchange contracts, options contracts, swaps contracts and other investments during the year, and differences arising on the revaluation of other assets and liabilities denominated in foreign currencies at year end. Net realised gains or losses are determined on the basis of weighted average cost of the investments sold except for futures contracts, where the First-In First-Out ("FIFO") methodology is applied.
- Combined financial statements The figures of each Sub-Fund are presented in their respective Base Currency. The combined financial statements are expressed in euros. The combined financial statements are presented for information purposes only.

3 EXCHANGE RATES USED AS OF 31 DECEMBER 2023

Assets and liabilities expressed in currencies other than the Base Currency of the Fund are converted at exchange rates prevailing as at 31 December 2023. Profit and losses arising on foreign exchange operations are recorded in the "Statement of Operations and Changes in Net Assets". Transactions in foreign currencies are converted into the Base Currency of the Fund at exchange rates prevailing on the transaction dates.

The exchange rates used as at 31 December 2023 are as follows:

4 MANAGEMENT, INVESTMENT MANAGEMENT AND DISTRIBUTION FEES

The management fee is a percentage of the Net Asset Value of each Sub-Fund, which ranges, according to the prospectus, from max 0.35% to max 2.25% per annum and it is calculated and accrued on each Valuation Day on the basis of the Net Asset Value of the relevant Share Class and is payable monthly in arrears.

For Share Class X, the management fees are agreed between the Management Company and the relevant investors and are charged and collected by the Management Company directly from the Shareholder and will not be charged to the Sub-Funds or reflected in the Net Asset Value.

The Management Company is responsible for the payment of fees to the Investment Managers who may pass on all or a portion of their own fees to the Sub-Investment Managers.

The management fee rates effectively applied as at 31 December 2023 are as follows:

In addition to the Management Fees disclosed above, as per Prospectus, for Sub-Funds investing a substantial portion of their assets in investment funds, the maximum management fee of other UCIs or UCITS in which the Sub-Fund invests in shall not exceed 3% of such target Sub-Funds.

In respect of Sub-Fund's investments in UCITS and other UCIs whether managed or not by the Management Company or any other company linked to the Management Company, the maximum level of ongoing charges of such target funds as at 31 December 2023 are disclosed below:

| Sub-Fund | Ongoing Charges rate |
|--|----------------------|
| Amundi Fund Solutions - Buy and Watch Income 06/2025 | 0.06% |
| Amundi Fund Solutions - Buy and Watch Income 07/2025 | 0.06% |
| Amundi Fund Solutions – Buy and Watch Income 03/2028 | 0.06% |
| Amundi Fund Solutions - Buy and Watch Income 06/2028 | 0.06% |
| Amundi Fund Solutions - Buy and Watch Income 11/2028 | 0.06% |
| Amundi Fund Solutions - Buy and Watch Income 06/2028 II | 0.06% |
| Amundi Fund Solutions - Buy and Watch Optimal Yield Bond 04/2026 | 0.06% |
| Amundi Fund Solutions - Buy and Watch US High Yield Opportunities 11/2026 | 0.06% |
| Amundi Fund Solutions - Buy and Watch High Income Bond Opportunities 03/2028 | 0.06% |
| Amundi Fund Solutions - Buy and Watch High Income Bond Opportunities 06/2028 | 0.06% |
| Amundi Fund Solutions - Buy and Watch High Income Bond Opportunities 11/2028 | 0.06% |
| Amundi Fund Solutions - Conservative | 1.45% |
| Amundi Fund Solutions - Balanced | 1.45% |
| Amundi Fund Solutions - Sustainable Growth | 1.31% |
| Amundi Fund Solutions - Diversified Income Best Select | 1.29% |

If the Fund invests in the units or shares of other UCITS and/or other UCIs that are managed, directly or by delegation, by the same Management Company or by any other company to which the Management Company is linked, that Management Company or other company may not charge subscription or redemption fees on account of the Fund's investment in the units or shares of other UCITS and/or other UCI.

In accordance with the article 46(3) of the law of 17 December 2010, the maximum Management fee rates for the underlying funds for the following Sub-Funds are:

| | Annual rate |
|--|-------------|
| Amundi Fund Solutions - Conservative | 1.25% |
| Amundi Fund Solutions - Balanced | 1.00% |
| Amundi Fund Solutions - Sustainable Growth | 1.10% |
| Amundi Fund Solutions - Diversified Income Best Select | 1.00% |

5 DEPOSITARY AND PAYING AGENT, ADMINISTRATOR, REGISTRAR AND TRANSFER AGENT

The Depositary and Paying Agent, the Administrator and the Registrar and Transfer Agent receive out of the assets of the relevant Sub-Fund, a fee for their services as detailed below.

- Depositary and Paying Agent: The fee is a percentage of portfolio value at each month end of the Sub-Fund. It ranges from 0.003% to 0.50% p.a. depending on where the assets of the relevant Sub-Fund are held. The fee is calculated and accrued on each Valuation Day and is payable quarterly in arrears.
- Administrator: The fee for the main services provided, amounts to an annual rate of 0.01%, is calculated and accrued on each Valuation Day on the basis of the Net Asset Value of the relevant Sub-Fund. It is payable quarterly in arrears.
- Registrar and Transfer Agent: The main components of the compensation for the services provided are the number of the existing active Share Classes, the number of clients' accounts and the number of transactions processed.

6 TAXATION OF THE SICAV - TAXE D'ABONNEMENT

In accordance with the legislation currently prevailing in Luxembourg, the SICAV is not subject to any taxes on income or capital gains. The SICAV is subject to a subscription tax *Taxe d'abonnement*, which amounts to an annual rate of 0.05% based on the Net Asset Value of each Sub-Fund at the end of each calendar quarter, calculated and paid quarterly. However, this tax is reduced to 0.01% for Net Asset Value related to Share Classes only aimed at eligible institutional investors and for Sub-Funds whose sole object is collective investment in money market instruments and in deposits with credit institutions.

Pursuant to Article 175 (a) of the amended law of 17 December 2010, the net asset invested in UCIs already subject to *Taxe d'abonnement* is exempted from this tax. Interest and dividend income received by the SICAV may be subject to non-recoverable withholding tax in the countries of origin.

7 OPEN POSITIONS ON FUTURES CONTRACTS

As at 31 December 2023, certain Sub-Funds had the following positions on futures contracts: The broker of all the futures listed is SOCIETE GENERALE.

12 OTHER INCOME

Amounts of other income in the Statement of Operations and Changes in Net Assets include mainly redemption fees and other taxes.

13 OTHER CHARGES

Balances for other charges in the Statement of Operations and Changes in Net Assets mainly include deposit account fees, legal charges and OTC pricing fees.

14 STATEMENT OF PORTFOLIO MOVEMENTS

A list of changes in the portfolio for the year ended 31 December 2023 is available free of charge at the registered office of the Management Company of the SICAV. All details relating to the Outstanding Derivatives Contracts as at 31 December 2023 are presented within the Notes to the Financial Statements.

15 DIVIDENDS

- Monthly Target Distributing: these classes aim to distribute on a monthly basis a dividend based on an annual target yield defined at the beginning of the year.
- **Distributing Annually:** these classes distribute on an annual basis an amount based on the income generated in the previous year or a dividend based on an annual target yield defined at the launch date/beginning of the year. Depending on the Sub-Fund the income distributed could be net or gross of fees.

Dividend Distribution policy is described in the prospectus of the SICAV for further details.

16 TRANSACTION COSTS

The transaction costs the SICAV incurred in the year 2023 related to purchase or sale of financial instruments are disclosed in a specific expenses line of the "Statement of Operations and Changes in the Net Assets". Transaction costs include costs directly linked to the acquisition or sale of financial instruments, to the extent that such costs are shown separately on transaction confirmations.

For some asset classes, transaction costs are usually incorporated in dealing prices and are not reported separately.

Depending on the nature of the investments of the Sub-Fund, this may result in no data being reported in the transaction costs section for some Sub-Funds.

17 SWING PRICING

On any valuation days when it believes that trading in a Sub-Fund's shares will require significant purchases or sales of portfolio investments, the Board of Directors may adjust the Sub-Fund's NAV to more closely reflect the actual prices of the underlying transactions, based on estimated dealing spreads, costs, and other market and trading considerations. In general, the NAV will be adjusted upward when there is strong demand to buy Sub-Fund shares and downward when there is strong demand to redeem sub-fund shares. Any such adjustment is applied to all the Sub-Fund's transactions of a given day.

Those adjustments follow the objective to protect the SICAV's long-term Shareholders from costs associated with ongoing subscription and redemption activity and are not meant to address specific circumstances of each individual investor. For any given Valuation Day, the adjustment will normally not be larger than 2% of NAV, but the Board of Directors can raise this limit when necessary to protect the interests of shareholders.

During the period ending December 31, 2023, the following Sub-Funds were in scope of the Swing Price Mechanism:

| Sub-Fund |
|--|
| Amundi Fund Solutions - Buy and Watch Income 03/2028 |
| Amundi Fund Solutions - Buy and Watch Income 06/2028 |
| Amundi Fund Solutions - Buy and Watch Income 06/2028 - II |
| Amundi Fund Solutions - Buy and Watch Income 11/2028 |
| Amundi Fund Solutions - Buy and Watch High Income Bond Opportunities 03/2028 |
| Amundi Fund Solutions - Buy and Watch High Income Bond Opportunities 06/2028 |
| Amundi Fund Solutions - Buy and Watch High Income Bond Opportunities 11/2028 |
| Amundi Fund Solutions - Multi Asset Income 11/2027 |

Due to net shareholders' activity, the Net Asset Value per unit dated 31 December 2023 for Amundi Fund Solutions – Buy and Watch Income 03/2028 swung. Therefore the official Net Asset Value per unit as of 31 December 2023, disclosed in the "Financial Details Relating to the Last 3 Years" section of this report include a Swing Pricing adjustment, which is not recognized in the "Statement of Net Assets".

The amount of this adjustment booked for the Net Asset Values as of 31 December 2023 was:

| Sub-Funds | NAV before swing | Adjustement in EUR | NAV after swing |
|--|------------------|--------------------|-----------------|
| | | | |
| Amundi Fund Solutions – Buy and Watch Income 03/2028 | 150,938,115 | -290,138 | 150,647,977 |

18 SUSTAINABLE FINANCE DISCLOSURE REGULATION ("SFDR")

Information on environmental and/or social characteristics and/or sustainable investments are available under the (unaudited) Sustainable Finance Disclosure Regulation section and its relevant annexes where applicable.

19 SUBSEQUENT EVENTS

The Sub-Funds Amundi Fund Solutions – Buy and Watch Income 03/2029 and Amundi Fund Solutions – Buy and Watch High Income Bond Opportunities 03/2029 were launched on 20 March 2024.

Audit report

To the Shareholders of Amundi Fund Solutions

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Amundi Fund Solutions (the "Fund") and of each of its sub-funds as at 31 December 2023, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund's financial statements comprise:

- the securities portfolio as at 31 December 2023;
- the statement of net assets as at 31 December 2023;
- the statement of operations and changes in net assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the "Commission de Surveillance du Secteur Financier" (CSSF). Our responsibilities under the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the "Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements" section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the "Réviseur d'entreprises agréé" for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to
 fraud or error, design and perform audit procedures responsive to those risks, and obtain audit
 evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting
 a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may
 involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal
 control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures
 that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the
 effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;

- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the
 disclosures, and whether the financial statements represent the underlying transactions and events
 in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

PricewaterhouseCoopers, Société coopérative Represented by

REMUNERATION POLICY AND PRACTICES

Amundi Luxembourg S.A. remuneration policy is compliant with the requirements detailed in the European Directive 2014/91/EU that come into force on March 18, 2016, and was transposed into Luxembourg Law of 10 May 2016. The remuneration policy is based on Amundi group remuneration framework, and it is reviewed annually and approved by the Board of Amundi Luxembourg. The policy is subject to independent review by the internal Compliance function.

In main evolutions of the 2023 remuneration policy was linked to "Amundi Ambition 2025" and ESG criteria and Sustainability Risk. Qualitative and quantitative criteria for Investment Management and Sales and Marketing has been added. There were no further material changes to the remuneration policy adopted for previous years. The policy applicable for 2023 was approved by Amundi Luxembourg Board on October 05, 2023 Amundi group Remuneration Committee reviews on an annual basis the group remuneration policy. The 2023 review took place on February 02, 2023.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of academic qualification, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system.

Variable remuneration awards consider the performance of the employee, her/his business unit and Amundi group as a whole, and it is based on both financial and non-financial criteria.

Amundi Luxembourg S.A. and Amundi group have defined all identified staff having authority or influence on the funds Amundi manages, and who consequently are likely to have an impact on the performance or the risk profile of the funds.

AMOUNTS OF REMUNERATION AWARDED

Amundi Luxembourg S.A., the Management Company acts as of December 31, 2023 as Management Company or AIFM for several umbrella and standalone UCITS and AIFs.

The total remuneration expressed in Euro paid by Amundi Luxembourg to its staff during the calendar year 2023 is as follows:

| | | | Variable | |
|--------------------|----------------------|--------------------|--------------|---------------|
| | Nr. of beneficiaries | Fixed remuneration | remuneration | Total |
| Staff | 110 | 8,737,726.50 | 1,545,780.42 | 10,283,506.92 |
| Out of which | | | | |
| - Identified staff | 9 | 1,419,514.99 | 516,082.67 | 1,935,597,66 |
| - All other staff | 101 | 7,318,211.51 | 1,029,697.75 | 8,347,909.26 |

As of December 31, 2023 Amundi Fund Solutions represented around 1.16% of the Total Net Assets under Management of Amundi Luxembourg S.A..

The total remuneration figures shown above refer to activities in respect of all funds managed.

Amundi Luxembourg S.A. and Amundi group employees who are appointed to the Board of Directors of the Management Company and/or of the Funds waive the right to any remuneration in respect of all funds managed.

No employee of the Management Company receives any amount, including carried interest and performance fees, paid directly by the UCITS or AIFs managed.

SFT REGULATION

During the year 2023, the SICAV did not engage in transactions which are the subject of EU regulation No 2015/2365 on the transparency of securities financing transactions and of reuse. Accordingly, no global, concentration or transaction data, or information on the reuse or safekeeping of collateral is required to be reported.

DISCLOSURE REGULATION

On 18 December 2019, the European Council and European Parliament announced that they had reached a political agreement on the Disclosure Regulation, thereby seeking to establish a pan-European framework to facilitate Sustainable Investment. The Disclosure Regulation provides for a harmonized approach in respect of sustainability-related disclosures to investors within the European Economic Area's financial services sector.

For the purposes of the Disclosure Regulation, the Management Company meets the criteria of a "financial market participant", whilst each Sub-Fund qualifies as a "financial product".

For further details on how a Sub-Fund complies with the requirements of the Disclosure Regulation please refer to the supplement for that Sub-Fund. Please also refer to the section on 'Sustainable Investment' in the Prospectus of the Fund and the Amundi Responsible Investment Policy available on www.amundi.com.

As required by Art.11 of the Disclosure Regulation the Fund makes the following statements:

Under the Amundi Responsible Investment Policy, Amundi has developed its own ESG rating approach. The Amundi ESG rating aims to measure the ESG performance of an issuer, i.e. its ability to anticipate and manage Sustainability Risks and opportunities inherent to its industry and individual circumstances. By using the Amundi ESG ratings, portfolio managers are taking into account Sustainability Risks in their investment decisions. Amundi applies targeted exclusion policies to all Amundi's active investing strategies by excluding companies in contradiction with the Responsible Investment Policy, such as those which do not respect international conventions, internationally recognized frameworks or national regulations.

Article 8 Sub-Funds (required Art.11.1)

The Sub-Funds listed below are classified pursuant to article 8 of the Disclosure Regulation and aim to promote environmental and/or social characteristics. In addition to applying Amundi's Responsible Investment Policy, these Article 8 Sub-Funds aim to promote such characteristics through investments resulting in an ESG score of their portfolios greater than of their respective benchmark or investment universe. The ESG portfolio score is the AUM-weighted average of the issuers' ESG score based on Amundi ESG scoring model.

During 2023, the Investment Manager continuously promoted environmental and/or social characteristics through the application of the abovementioned methodologies.

Article 6 Sub-Funds

Given the investment focus and the asset classes/sectors they invest in, the investment managers of all other Sub-Funds, not classified pursuant to article 8 or 9 of the Disclosure Regulation did not integrate a consideration of environmentally sustainable economic activities into the investment process for the Sub-Fund.

Therefore, it should be noted that the investments underlying these Sub-Funds did not take into account the EU criteria for environmentally sustainable economic activities.

Throughout the financial year, these Sub-Funds considered PAI 14 via the Amundi Minimum Standard and Exclusion Policy related to controversial weapons, excluding issuers in the production, sale, storage or services for and of anti-personnel mines and cluster bombs, prohibited by the Ottawa and Oslo treaties and issuers involved in the production, sale or storage of chemical, biological and depleted uranium weapons, as per Amundi Global Responsible Investment Policy.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUND SOLUTIONS - BUY AND WATCH INCOME 11/2028

Legal entity identifier: 2138004DMXIBQWKTMJ45

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

| Did this | financial product have a sustainable | invest | ment o | objective? |
|----------|---|--------|--------------------------------|---|
| • • | Yes | • • | ΧI | No |
| | in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | X | (E/S) on not has sustain propo | moted Environmental/Social characteristics and while it did ave as its objective a nable investment, it had a ortion of 56.75% of nable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective |
| ir | made a sustainable nvestments with a social bjective: | | did no | moted E/S characteristics, but ot make any sustainable tments |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

At the end the construction phase of the portfolio, the Sub-Fund had an ESG score of its portfolio greater than its investment universe which is defined as the ICE BofA Global Corporate Index. The Sub-Fund does not invest in F & G-rated securities (utilizing Amundi's ESG rating methodology).

However, during the Reinvestment Period, the Sub-Fund's portfolio ESG score may or may not have been greater than that of its investment universe.

Sustainability indicators measure how the environmental or social characteristics

promoted by the

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

financial product are attained.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the ESG investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.677 (C)**.

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect
 environmental impact, by limiting their energy consumption, reducing their greenhouse
 emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

... and compared to previous periods?

This is the first SFDR periodic report produced for this sub-fund.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

 Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise,

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that
 may influence value creation, including material ESG issues. For more information, please
 refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

The list includes the investments constituting the greatest proportion of investments of the financial productduring the referenceperiod which is: From 01/01/2023 to

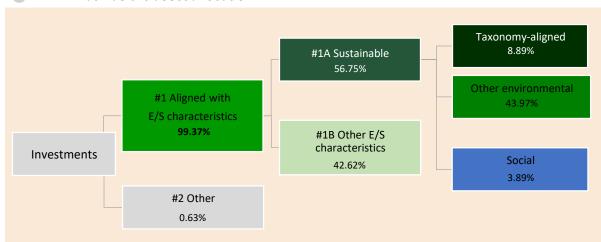

31/12/2023

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets. **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

| Sector | Sub-Sector | % Assets |
|------------|------------------------|----------|
| Corporates | Banking | 40.45% |
| Corporates | Consumer Discretionary | 16.34% |
| Treasuries | Treasuries | 10.27% |
| Corporates | Electric | 7.92% |
| Corporates | Communications | 4.96% |
| Corporates | Capital Goods | 3.90% |
| Corporates | Transportation | 3.06% |
| Corporates | Basic Industry | 2.72% |
| Corporates | Immobilier | 2.02% |
| Corporates | Energy | 1.52% |
| Corporates | Finance Companies | 1.47% |
| Corporates | Technology | 1.27% |

| Corporates | Consumer Staples | 1.26% |
|------------|------------------|-------|
| Financials | Mutual Funds | 1.04% |
| Corporates | Other Utilities | 0.97% |
| Corporates | Insurance | 0.25% |
| Others | Others | 0.23% |
| Forex | Forex | 0.17% |
| Cash | Cash | 0.19% |

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies

-capital
expenditure
(CapEx) showing

the green

investments made by investee companies, e.g. for a transition to a green economy. - operational expenditure (OpEx) reflecting green operational activities of investee

companies.

(M)

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 8.89% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

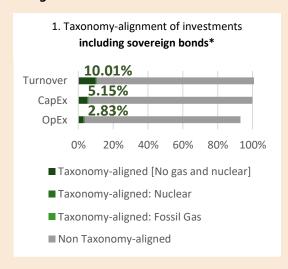

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

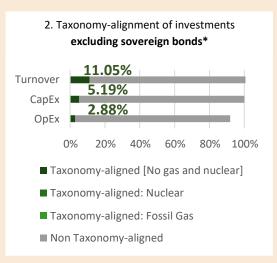

| Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹? |
|--|
| Yes: |
| In fossil gas In nuclear energy |
| X No |

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- What was the share of investments in transitional and enabling activities?

As of 31/12/2023, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.05% and the share of investment in enabling activities was 0.58%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first SFDR periodic report produced for this sub-fund.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was **43.97%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

The share of socially sustainable investments at the end of the period was 3.89%.

not take into account the criteria for environmentally sustainable

economic activities

sustainable

investments with

an environmental

objective that **do**

under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/esg-documentation, provides detailed reporting on this engagement and its results

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. This product does not have an ESG Benchmark.

- How does the reference benchmark differ from a broad market index?
 This product does not have an ESG Benchmark.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This product does not have an ESG Benchmark.

How did this financial product perform compared with the reference benchmark?

This product does not have an ESG Benchmark.

How did this financial product perform compared with the broad market index?

This product does not have an ESG Benchmark.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

To what extent were the environmental and/or social characteristics promoted by this financial product met?

At the end of the construction phase of the portfolio, the Sub-Fund has a portfolio ESG score greater than that of its investment universe which is defined as the ICE BofA Global High Yield Index. The Sub-Fund did not invest in F & G-rated securities (utilising Amundi's ESG rating methodology).

However, during the Reinvestment Period, the Sub-Fund's portfolio ESG Score may or may not have been greater than that of its investment universe.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the ESG investment universe of the Product.

At the end of the period:

The weighted average ESG rating of the portfolio is 0.219 (D).

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect
 environmental impact, by limiting their energy consumption, reducing their greenhouse
 emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

... and compared to previous periods?

This is the first SFDR periodic report produced for this sub-fund.

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and

security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anticorruption and antibribery matters.

including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?

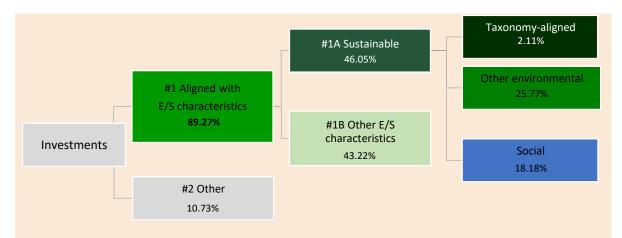

The list includes the investments constituting the greatest proportion of investments of the financial productduring the referenceperiod which is: From 01/01/2023 to 31/12/2023

| Largest | Sector | Sub-Sector | Country | % Assets |
|--|------------|---------------------------|---------------|----------|

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- In which economic sectors were the investments made?

| Sector | Sub-Sector | % Assets |
|------------|------------------------|----------|
| Corporates | Consumer Discretionary | 25.48% |
| Corporates | Consumer Staples | 19.04% |
| Corporates | Banking | 11.82% |
| Corporates | Capital Goods | 10.66% |
| Corporates | Basic Industry | 9.74% |
| Financials | Mutual Funds | 7.70% |
| Corporates | Communications | 6.78% |

| Others | Others | 4.58% |
|------------|-------------------|--------|
| Corporates | Other Financials | 4.57% |
| Corporates | Transportation | 2.53% |
| Corporates | BROKERAGE | 1.45% |
| Corporates | Other Industrials | 0.66% |
| Forex | Forex | -0.80% |
| Cash | Cash | -4.23% |

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies

-capital
expenditure
(CapEx) showing

the green

investments made by investee companies, e.g. for a transition to a green economy. - operational expenditure (OpEx) reflecting green operational activities of investee

companies.

(M)

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 2.11% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

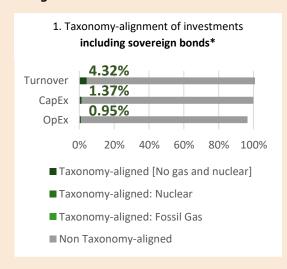

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

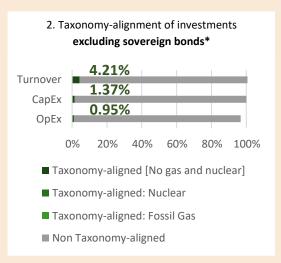

| Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹? | | | | |
|--|--|--|--|--|
| Yes: | | | | |
| In fossil gas In nuclear energy | | | | |
| X No | | | | |

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

- * For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- What was the share of investments in transitional and enabling activities?

As of 31/12/2023, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.13%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

This is the first SFDR periodic report produced for this sub-fund.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was **25.77%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

The share of socially sustainable investments at the end of the period was 18.18%.

sustainable
investments with
an environmental
objective that do
not take into
account the criteria
for environmentally
sustainable

economic activities

under the EU Taxonomy.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/esg-documentation, provides detailed reporting on this engagement and its results

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

This product does not have an ESG Benchmark.

- How does the reference benchmark differ from a broad market index?
 This product does not have an ESG Benchmark.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This product does not have an ESG Benchmark.

How did this financial product perform compared with the reference benchmark?

This product does not have an ESG Benchmark.

How did this financial product perform compared with the broad market index?

This product does not have an ESG Benchmark.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUND SOLUTIONS - CONSERVATIVE

Legal entity identifier: 2138004RMAVNJS9Z3637

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | | | | |
|---|---|-----|---|---------------|--|--|
| •• | Yes | • • | X No | | | |
| | It made sustainable investments with an environmental objective: in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | X | It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _7.50%_ of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | n Ser n | | |
| | It made a sustainable investments with a social objective: | | It promoted E/S characteristics, but did not make any sustainable investments | | | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe ICE BOFA 0-1 YEAR US CORPORATE INDEX. In determining the ESG score of the Product and the ESG investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the ESG investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is **0.654 (C)**.
- The weighted average ESG rating of the ESG investment universe is 0 (D).

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

... and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.538 (C) and the weighted average ESG rating of the ESG investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as

material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial productduring the referenceperiod which is: From 01/01/2023 to

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- -The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- In which economic sectors were the investments made?

| Sector | Sub-Sector | % Assets |
|------------|--------------|----------|
| Financials | Mutual Funds | 97.85% |
| Others | Others | 0.18% |
| Treasuries | Treasuries | 0.00% |
| Forex | Forex | -0.82% |
| Cash | Cash | 2.79% |

Taxonomy-aligned activities are expressed as a share of: -turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period

Additional Information (unaudited)

reflecting the share of revenue from green activities of investee companies

-capital
expenditure
(CapEx) showing
the green
investments made
by investee
companies, e.g. for
a transition to a
green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

the fund invested 1.11% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

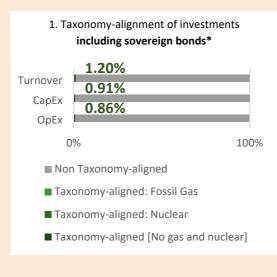

In nuclear energy

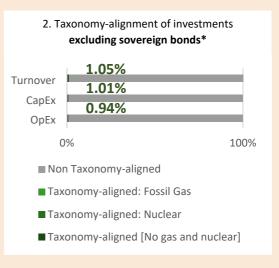

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial

What was the share of investments in transitional and enabling activities?

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

As of 31/12/2023, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.73% and the share of investment in enabling activities was 0.79%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous period Taxonomy alignment was not reported, because at the time reliable reported data was not yet available.

sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was **2.14%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

The share of socially sustainable investments at the end of the period was 4.25%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/esg-documentation, provides detailed reporting on this engagement and its results

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

This product does not have an ESG Benchmark.

- How does the reference benchmark differ from a broad market index?
 This product does not have an ESG Benchmark.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This product does not have an ESG Benchmark.

How did this financial product perform compared with the reference benchmark?

This product does not have an ESG Benchmark.

How did this financial product perform compared with the broad market index?
This product does not have an ESG Benchmark.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUND SOLUTIONS - BALANCED

Legal entity identifier: 213800VT7344LISUK668

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

| in | made a sustainable vestments with a social bjective: | | It promoted E/S characteristics, but did not make any sustainable investments | t | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe ICE BOFA 0-1 YEAR US CORPORATE INDEX. In determining the ESG score of the Product and the ESG investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the ESG investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is 0.549 (C).
- The weighted average ESG rating of the ESG investment universe is 0 (D).

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

... and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.474 (C) and the weighted average ESG rating of the ESG investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as

material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- -The sub-category **#1B** Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- In which economic sectors were the investments made?

| Sector | Sub-Sector | % Assets |
|------------|--------------|----------|
| Financials | Mutual Funds | 98.03% |
| Others | Others | 0.33% |
| Treasuries | Treasuries | 0.00% |
| Forex | Forex | -0.76% |
| Cash | Cash | 2.40% |

Taxonomy-aligned activities are expressed as a share of: -turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period

reflecting the share of revenue from green activities of investee companies

-capital
expenditure
(CapEx) showing
the green
investments made
by investee
companies, e.g. for
a transition to a
green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies. the fund invested 0.81% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

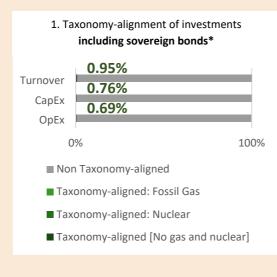

In nuclear energy

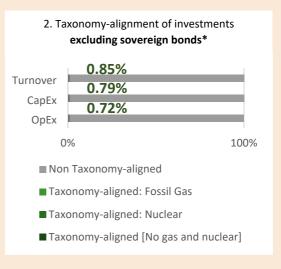

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activitiesdirectly enable
other activities to
make a substantial

What was the share of investments in transitional and enabling activities?

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

As of 31/12/2023, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.50% and the share of investment in enabling activities was 0.58%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous period Taxonomy alignment was not reported, because at the time reliable reported data was not yet available.

sustainable
investments with
an environmental
objective that do
not take into
account the criteria
for environmentally
sustainable
economic activities
under the EU
Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was **3.76%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

The share of socially sustainable investments at the end of the period was 4.70%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/esg-documentation, provides detailed reporting on this engagement and its results

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUND SOLUTIONS - SUSTAINABLE GROWTH

Legal entity identifier: 213800O8NTDM4INV7E95

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

| Ш | It made a sustainable investments with a social objective: | | It promoted E/S chadid not make any sinvestments | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe ICE BOFA 0-1 YEAR US CORPORATE INDEX. In determining the ESG score of the Product and the ESG investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the ESG investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is 0.569 (C).
- The weighted average ESG rating of the ESG investment universe is 0 (D).

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect environmental impact, by limiting their energy consumption, reducing their greenhouse emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

... and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.504 (C) and the weighted average ESG rating of the ESG investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as

material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?

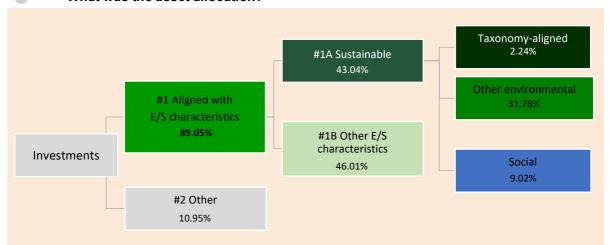

The list includes the investments constituting the greatest proportion of investments of the financial productduring the referenceperiod which is: From 01/01/2023 to

31/12/2023

| Largest | Sector | Sub-Sector | Country | % Assets |

What was the asset allocation?

Asset allocation describes the share of investments in specific assets. **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#20ther includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments. The category **#1 Aligned with E/S characteristics** covers:

- The sub-category #1A Sustainable covers environmentally and socially sustainable investments.
- -The sub-category **#1B** Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.
- In which economic sectors were the investments made?

| Sector | Sub-Sector | % Assets |
|------------|--------------|----------|
| Financials | Mutual Funds | 91.97% |
| Forex | Forex | 0.62% |
| Others | Others | 0.44% |
| Treasuries | Treasuries | 0.00% |
| Cash | Cash | 6.97% |

Taxonomy-aligned activities are expressed as a share of: -turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period

Additional Information (unaudited)

reflecting the share of revenue from green activities of investee companies

-capital
expenditure
(CapEx) showing
the green
investments made
by investee
companies, e.g. for
a transition to a
green economy.

- operational expenditure (OpEx) reflecting green operational activities of investee companies.

the fund invested 2.24% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes:

In fossil gas

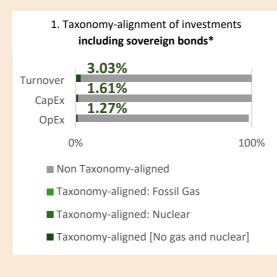

In nuclear energy

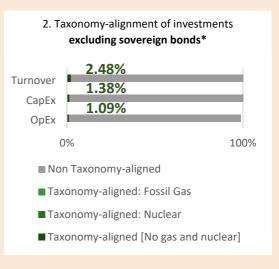

No

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial

What was the share of investments in transitional and enabling activities?

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

As of 31/12/2023, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.01% and the share of investment in enabling activities was 0.27%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous period Taxonomy alignment was not reported, because at the time reliable reported data was not yet available.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was **31.78%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

The share of socially sustainable investments at the end of the period was 9.02%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/esg-documentation, provides detailed reporting on this engagement and its results

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that

they promote.

This product does not have an ESG Benchmark.

- How does the reference benchmark differ from a broad market index?
 This product does not have an ESG Benchmark.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This product does not have an ESG Benchmark.

How did this financial product perform compared with the reference benchmark?

This product does not have an ESG Benchmark.

How did this financial product perform compared with the broad market index?
This product does not have an ESG Benchmark.

Template periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product name: AMUNDI FUND SOLUTIONS - MULTI ASSET INCOME 11/2027

Legal entity identifier: 213800CZB11YS88HR140

Sustainable
investment means
an investment in an
economic activity
that contributes to
an environmental or
social objective,
provided that the
investment does not
significantly harm
any environmental or
social objective and
that the investee
companies follow
good governance

practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

| Did this financial product have a sustainable investment objective? | | | | | |
|---|---|-----|--------------------------------|--|--|
| •• | Yes | • • | ΧI | No | |
| | It made sustainable investments with an environmental objective: in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy | X | (E/S) on not has sustain propo | moted Environmental/Social characteristics and while it did ave as its objective a nable investment, it had a rtion of 36.55% of nable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective | |
| | It made a sustainable investments with a social objective: | | did no | moted E/S characteristics, but ot make any sustainable ments | |

To what extent were the environmental and/or social characteristics promoted by this financial product met?

During the financial year, the product continuously promoted environmental and/or social characteristics by aiming to have a higher ESG score than the ESG score of its investment universe ICE BOFA 0-1 YEAR US CORPORATE INDEX. In determining the ESG score of the Product and the ESG investment universe, ESG /performance was continuously assessed by comparing the average performance of a security against the security issuer's industry, in respect of each of the three environmental, social and governance characteristics.

The investment universe is a broad market universe that does not evaluate or include components based on environmental and/or social characteristics and is therefore not intended to be consistent with the characteristics promoted by the fund. No ESG benchmark has been designated.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform?

Amundi has developed its own in-house ESG rating process based on the "Best-in-class" approach. Ratings adapted to each sector of activity aim to assess the dynamics in which companies operate.

The sustainability indicator used is the ESG score of the Product that is measured against the ESG score of the ESG investment universe of the Product.

At the end of the period:

- The weighted average ESG rating of the portfolio is 0.777 (C).
- The weighted average ESG rating of the ESG investment universe is **0** (**D**).

The Amundi ESG rating used to determine the ESG score is an ESG quantitative score translated into seven grades, ranging from A (the best scores universe) to G (the worst). In the Amundi ESG Rating scale, the securities belonging to the exclusion list correspond to a G. For corporate issuers, ESG performance is assessed globally and at relevant criteria level by comparison with the average performance of its industry, through the combination of the three ESG dimensions:

- Environmental dimension: this examines issuers' ability to control their direct and indirect
 environmental impact, by limiting their energy consumption, reducing their greenhouse
 emissions, fighting resource depletion and protecting biodiversity.
- Social dimension: this measures how an issuer operates on two distinct concepts: the issuer's strategy to develop its human capital and the respect of the human rights in general;
- Governance dimension: This assesses capability of the issuer to ensure the basis for an effective corporate governance framework and generate value over the long-term.

The methodology applied by Amundi ESG rating uses 38 criteria that are either generic (common to all companies regardless of their activity) or sector specific which are weighted according to sector and considered in terms of their impact on reputation, operational efficiency and regulations in respect of an issuer. Amundi ESG ratings are likely to be expressed globally on the three E, S and G dimensions or individually on any environmental or social factor.

... and compared to previous periods?

At the end of the previous period, the weighted average ESG rating of the portfolio was 0.729 (C) and the weighted average ESG rating of the ESG investment universe was 0 (D).

What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?

The objectives of the sustainable investments are to invest in investee companies that seek to meet two criteria:

- 1. follow best environmental and social practices; and
- 2. avoid making products or providing services that harm the environment and society.

In order for the investee company to be deemed to contribute to the above objective it must be a "best performer" within its sector of activity on at least one of its material environmental or social factors.

The definition of "best performer" relies on Amundi's proprietary ESG methodology which aims to measure the ESG performance of an investee company. In order to be considered a "best performer", an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial

data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score. For energy sector for example, material factors are: emissions and energy, biodiversity and pollution, health and security, local communities and human rights. For a more complete overview of sectors and factors, please refer to the Amundi ESG Regulatory Statement available at www.amundi.lu

To contribute to the above objectives, the investee company should not have significant exposure to activities (e.g.tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production) not compatible with such criteria.

The sustainable nature of an investment is assessed at investee company level.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two filters:

The first DNSH filter relies on monitoring the mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the RTS where robust data is available (e.g.GHG intensity of investee companies) via a combination of indicators (e.g.carbon intensity) and specific thresholds or rules (e.g. that the investee company's carbon intensity does not belong to the last decile of the sector).

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first filter, Amundi has defined a second filter, which does not take the mandatory Principal Adverse Impact indicators above into account, in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector which corresponds to an environmental or social score superior or equal to E using Amundi's ESG rating.

How were the indicators for adverse impacts on sustainability factors taken into account?

The indicators for adverse impacts have been taken into account as detailed in the first do not significant harm (DNSH) filter above.

The first DNSH filter relies on monitoring of mandatory Principal Adverse Impacts indicators in Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 where robust data is available via the combination of following indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors), and
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector, and
- Be cleared of any controversy in relation to work conditions and human rights.
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labour relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The product considers all the mandatory Principal Adverse Impacts as per Annex 1, Table 1 of the Delegated Regulation (EU) 2022/1288 applying to the product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- Exclusion: Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- ESG factors integration: Amundi has adopted minimum ESG integration standards applied by default to its actively managed open-ended funds (exclusion of G rated issuers and better weighted average ESG score higher than the applicable benchmark). The 38 criteria used in Amundi ESG rating approach were also designed to consider key impacts on sustainability factors, as well as quality of the mitigation undertaken are also considered in that respect.
- Engagement: Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories: to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy.
- Vote: Amundi's voting policy responds to a holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information, please refer to Amundi's Voting Policy.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three external data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

For any further detail on how mandatory Principal Adverse Impact indicators are taken into account, please refer to the Amundi Sustainable Finance Disclosure Statement available at www.amundi.com.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial productduring the referenceperiod which is: From 01/01/2023 to

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies

-capital expenditure

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy ?

The fund promotes both environmental and social characteristics. While the fund did not commit to making investments aligned with the EU Taxonomy, during the reporting period the fund invested 1.37% in sustainable investments aligned with the EU Taxonomy. These investments contributed to the climate change mitigation objectives of the EU Taxonomy.

The alignment of investee companies with the above-mentioned EU Taxonomy objectives is measured using turnover (or revenues) and/or green bond use-of-proceeds data.

Additional Information (unaudited)

(CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy. - operational expenditure (OpEx) reflecting green operational activities of investee

companies.

The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

 Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?
 Yes:

In nuclear energy

.

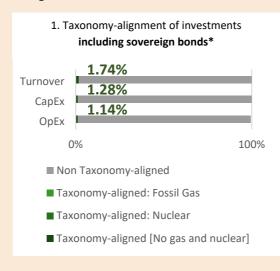

No

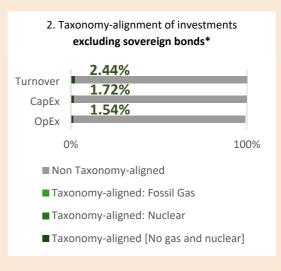

In fossil gas

Reliable data regarding alignment with the EU Taxonomy fossil gas and nuclear energy was not available during the period.

¹Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do no significant harm to any EU Taxonomy objective. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments in transitional and enabling activities?

As of 31/12/2023, using turnover and/or green bond use-of-proceeds data as an indicator, the fund's share of investment in transitional activities was 0.00% and the share of investment in enabling activities was 0.34%. The reported alignment percentage of the investments of the fund with the EU Taxonomy has not been audited by the fund auditors or by any third party.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

In the previous period Taxonomy alignment was not reported, because at the time reliable reported data was not yet available.

economic activities under the EU

Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy was **29.80%** at the end of the period.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

The share of socially sustainable investments at the end of the period was 5.38%.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and other instruments held for the purpose of liquidity and portfolio risk management. For unrated bonds and shares, minimum environmental and social safeguards are in place via controversy screening against the UN Global Compact Principles. It may also include ESG unrated securities for which data needed for the measurement of attainment of environmental or social characteristics is not available.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

Sustainability indicators are continuously made available in the portfolio management system allowing the portfolio managers to assess the impact of their investment decisions.

These indicators are embedded within AMUNDI's control framework, with responsibilities spread between the first level of controls performed by the Investment teams themselves and the second level of controls performed by the Risk teams, who monitor compliance with environmental or social characteristics promoted by the fund on an ongoing basis.

Moreover, AMUNDI's Responsible Investment Policy sets out an active approach to engagement that promotes dialogue with investee companies including those in the portfolio of this product. Our Annual Engagement Report, available on https://about.amundi.com/esg-documentation, provides detailed reporting on this engagement and its results

How did this financial product perform compared to the reference benchmark?

Additional Information (unaudited)

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote. This product does not have an ESG Benchmark.

- How does the reference benchmark differ from a broad market index?
 This product does not have an ESG Benchmark.
- How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This product does not have an ESG Benchmark.

How did this financial product perform compared with the reference benchmark?

This product does not have an ESG Benchmark.

How did this financial product perform compared with the broad market index?
This product does not have an ESG Benchmark.
