1 ACTIVITY

Amundi Index Solutions (the “SICAV”) is organised as a société anonyme and qualifying as a “Société d'Investissement à Capital Variable” (“SICAV”) under the laws of the Grand Duchy of Luxembourg and created on 9 June 2016. The articles of incorporation (the “Articles”) were initially published in the Memorial Recueil des Sociétés et Associations, on 17 June 2016.

The SICAV is submitted to Part I of the law of 17 December 2010 as amended, relating to Undertakings for Collective Investment.

The SICAV is registered under number B 206.810 at the Commercial Register of Luxembourg, where its Articles are available for inspection and a copy thereof may be obtained upon request.

The Capital of the SICAV is represented by the sum of the net assets of all of the sub-funds.

As at 30 September 2022, the following sub-funds were active:

The sub-fund AMUNDI GOVT BOND LOWEST RATED EUROMTS INVESTMENT GRADE 1-3 has been renamed as AMUNDI GOVT BOND LOWEST RATED EURO INVESTMENT GRADE 1-3 on 10 June 2022.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

■ PRESENTATION OF FINANCIAL STATEMENTS

The SICAV's financial statements are prepared and presented in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

■ VALUATION POLICY

■ **Securities Portfolio** - Transferable securities, money market instruments, and derivatives that are quoted or dealt in on any stock exchange or traded in any other regulated market are generally valued at the last available market price on the relevant business day.

Non-listed securities, or listed securities for which the price determined according to the above methods is not representative of fair market value are valued in good faith at a prudent estimate of their sale price.

Derivatives that are not listed on any official stock exchange or are traded over the counter are valued daily in a reliable and verifiable manner, consistent with market practice.

■ **Valuation of swaps** - Total return swaps are contracts where one party transfers to another party the total performance of a reference asset, including all interest, fee income, market gains or losses, and credit losses. Total return swaps entered into by the sub-funds are in the form of unfunded swaps. An unfunded swap is a swap where no upfront payment is made by the total return receiver at inception. Swaps are valued at the net present value of their cash flows. The interest receivable on swaps are included in the item "Receivable on swap" of the Statement of Net Assets and the interest payable are included in the item "Payable on purchase on swap" of the Statement of Net Assets.

■ **Valuation of forward foreign exchange contracts** - Outstanding forward foreign exchange contracts are valued at the closing date by reference to the rate of exchange applicable to the outstanding life of the contract. The unrealised appreciation or depreciation on forward foreign exchange contracts is disclosed in the accounts.

■ **Valuation of futures** - During the financial year, the SICAV concluded a series of future contracts. At the end of the year, the outstanding contracts are valued at their net liquidation value based on the closing price of the exchange on which the futures contracts are traded. The change in unrealised net gains or losses appears in the Statement of Operations and Changes in the Net Asset.

■ **Swing pricing** - On business days when it believes that trading in a sub-fund's shares will require significant purchases or sales of portfolio investments, the Board may adjust the sub-fund's NAV to more closely reflect the actual prices of the underlying transactions, based on estimated dealing spreads, costs, and other market and trading considerations. In general, the NAV will be adjusted upward when there is strong demand to buy sub-fund shares and downward when there is strong demand to redeem sub-fund shares. For any given business day the adjustment will normally not be larger than 2% of the NAV, but the Board can raise this limit when necessary to protect the interests of shareholders.

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

The swing factor is the amount by which the NAV is swung when the swing pricing process is triggered after net subscriptions or redemptions exceed the swing threshold. The factors to consider when setting the swinging factor include net broker commissions paid by the sub-fund and fiscal charges (e.g. stamp duty and sales tax).

During the year-ended 30 September 2022, the maximum swing factor has been applied to the following sub-funds:

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

During the year-ended 30 September 2022, the maximum swing factor has been applied to the following sub-funds (continued):

Sub-funds	Maximum swing factor Inflow rate (%)	Maximum swing factor Outflow rate (%)
AMUNDI GLOBAL CORP SRI 1-5Y	0.610	0.350
AMUNDI INDEX EURO CORPORATE SRI	0.550	0.450
AMUNDI INDEX EURO CORPORATE SRI 0-3 Y	0.430	0.450
AMUNDI INDEX US CORP SRI	0.850	0.200
AMUNDI EURO ISTOXX CLIMATE PARIS ALIGNED PAB	0.167	0.015
AMUNDI INDEX EURO CORP BBB 1-5	0.450	0.450
AMUNDI INDEX GLOBAL AGG 500M	0.140	0.080
AMUNDI INDEX US GOV INFLATION-LINKED BOND	0.109	0.109
AMUNDI INDEX J.P. MORGAN EMU GOVIES IG	0.014	0.014
AMUNDI INDEX J.P. MORGAN GBI GLOBAL GOVIES	0.022	0.022
AMUNDI GLOBAL INFLATION-LINKED BOND SELECT	0.070	0.070
AMUNDI PRIME EURO GOVIES	0.057	0.000

- Conversion of items expressed in foreign currencies** - Bank deposits, other net assets and the value of portfolio securities denominated in currencies other than the base currency of the sub-fund are converted to the reference currency of the sub-fund at the exchange rate prevailing at the closing date. Income and expenses in a currency other than the base currency of the sub-fund are converted to the base currency of the sub-fund at the exchange rate prevailing at the date of recognition.

The combined financial statements are expressed in Euros (EUR), and are calculated by summing the net assets of each sub-fund. The exchange rates used for the combined figures are the following:

1 EUR = 0.97965 USD
 1 EUR = 141.7994 JPY
 1 EUR = 0.8776 GBP

2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

- **Dividend and Interest Income** - Dividend income is recorded as of the ex-dividend date and net of withholding tax; the figures include also the amount of net dividends received from the counterparties for the securities lent. Interest income is recorded on an accrual basis.
- **Net realised profit or loss on sales of investment securities and derivative instruments** - The net profit or loss realised on sales of investment securities is calculated on the basis of the average cost of the securities sold. For forwards foreign exchange contracts, the realised profit or loss is calculated by each forward contract and for financial futures it is first in first out. Equities swaps transactions are computed by taking in consideration both the floating leg which refers to the interest rate of the contracts and the equity leg which refers to the performance of the underlying equity of the contract.

■ DIVIDEND POLICY

Distributing shares will distribute all or part of the net investment income received by the relevant sub-fund, and may also distribute capital gains (both realised and unrealised) and capital. When a dividend is declared, the NAV of the relevant class is reduced by the amount of the dividend. Dividends may be declared yearly, quarterly or monthly, as indicated by a share class suffix (QD, MD, YD). Such shares set a target dividend amount, which is communicated in advance. This is an amount that the sub-fund aims to pay, but does not guarantee. Target dividends may be stated as a specific currency amount or as a percentage of NAV. In order to meet a targeted dividend amount, a sub-fund may end up paying out more money than it actually earned in dividends, meaning that the Shareholders are getting some of their capital back as a dividend.

For more information on dividend calendar and objectives, go to amundi.com and/or amundi.etf.com.

Distribution shares with no share class suffix (QD, MD, YD) declare an annual dividend in November.

Additional dividends may be declared as determined by the Board.

Dividends on distributing shares are either automatically reinvested or paid according to the bank account details Amundi has on file for the Shareholders' account. For each share class, dividends are paid in the currency of the share class. The Shareholders can request to have their dividends converted to a different currency. If the currency is one that the sub-fund accepts, there is typically no currency conversion charge. In other cases the Shareholders will be typically charged applicable currency conversion costs.

Unclaimed dividend payments will be returned to the sub-fund after five years. Dividends are paid only on shares owned as at the record date. No sub-fund will make a dividend payment if the assets of the SICAV are below the minimum capital requirement, or if paying the dividend would cause that situation to occur.

■ TRANSACTION FEES

Transaction fees include fees resulting from the coding of each new trade (buy or sell) by the dedicated service within CACEIS Bank, Luxembourg Branch, forex fees, stock exchange fees, handling charges linked to transactions on portfolio securities and forward foreign exchange contracts. The transaction fees are included in the item "Transactions fees".

■ SECURITIES LENDING AND BORROWING

In securities lending and borrowing transactions, a lender transfers securities or instruments to a borrower, subject to a commitment that the borrower will return equivalent securities or instruments on a future date or when requested by the lender. Through such transactions, a sub-fund may lend securities or instruments with any counterparty that is subject to prudential supervision rules considered by the CSSF as equivalent to those prescribed by EU law.

- A sub-fund may lend portfolio securities either directly or through one of the following:
- a standardised lending system organised by a recognised clearing institution;
 - a lending system organised by a financial institution that specializes in this type of transaction.

The borrower must provide a guarantee (in the form of collateral) that extends throughout the loan period and is at least equal to the global valuation of the securities lent, plus the value of any haircut considered appropriate in light of the collateral quality.

The figures of the security lending income disclosed in Statement of Operations and Changes in Net Assets are net, representing the gross income after the deduction of the 35% for direct and indirect costs. The gross income and the costs are recorded on a daily accrual basis. The entities involved in the execution of the EPM transactions are Amundi Intermediation and CACEIS, which are related parties.

■ ABBREVIATION

In the Securities Portfolio, XX XX/XXA refers to Perpetual Bonds.

3 TAXE D'ABONNEMENT

The SICAV is normally subject to a subscription tax ("taxe d'abonnement"). For Indexed sub-funds (with listed shares), the SICAV is exempted from the "taxe d'abonnement" pursuant to article 175 (e) of the 2010 Law.

The SICAV is not currently subject to any other Luxembourg taxes on income or capital gains.

While the above tax information is accurate to the best of the Board's knowledge, it is possible that a tax authority may impose new taxes (including retroactive taxes).

4 MANAGEMENT AND ADMINISTRATIVE FEES

Amundi Luxembourg S.A is entitled to receive from the SICAV the Management Fees calculated for each sub-fund. These fees are calculated and accrued on each Dealing Day and are payable quarterly in arrears. Amundi Luxembourg S.A is responsible for the payment of fees to Investment managers, service providers and Distributors.

The administrative fee is a fee expressed as a percentage of the NAV of the sub-funds and classes of shares, payable quarterly in arrears to Amundi Luxembourg S.A. and calculated each day.

4 MANAGEMENT AND ADMINISTRATIVE FEES (continued)

As at 30 September 2022, the management fees and applicable administrative fees per annum are as follows:

12 VALUATION OF RUSSIAN SECURITIES

As a consequence of the Russian invasion on Ukraine on 24th February and its impact on the Russian markets and securities, the Board of Directors and the Management Company decided from the beginning of March to daily review and fair value Russian equities (including ADR/GDR) and bonds. Fair valuation takes into consideration the valuation and potential deletion of the securities from the index by the providers of the benchmark indices as well as the sanctions regimes in force and their impact on the tradability and settlement process of the concerned securities. As at the time of writing, the fair valuation process in respect of these securities remains in place.

A limited number of trades on such securities, carried out immediately before the invasion, remained unsettled at fiscal year-end 30/09. The cash-flows linked to unsettled trades were fully offset afterwards.

The Board of Directors and the Management Company are undertaking actions to resolve the issues in the interest of the fund and its shareholders, having regard to the unprecedented nature of the situation and continue to monitor the evolution of the situation.

Here below is the list of Russian securities which have been fair valued as of 30 September 2022, in the following sub-funds:

AMUNDI INDEX MSCI EMERGING MARKETS
 AMUNDI PRIME EMERGING MARKETS
 AMUNDI INDEX MSCI EMERGING MARKETS SRI PAB
 AMUNDI MSCI EMERGING EX CHINA ESG LEADERS SELECT
 AMUNDI MSCI EMERGING ESG LEADERS
 AMUNDI INDEX MSCI EMERGING ESG BROAD CTB
 AMUNDI INDEX GLOBAL AGG 500M

13 SUBSEQUENT EVENTS

The sub-fund AMUNDI INDEX MSCI NORTH AMERICA has been renamed AMUNDI INDEX NORTH AMERICA ESG BROAD CTB on 18 October 2022.

The sub-fund AMUNDI MSCI EUROPE EX-SWITZERLAND has been renamed AMUNDI MSCI EUROPE EX SWITZERLAND ESG LEADERS SELECT on 20 October 2022.

On 18 November 2022:

- The sub-fund LYXOR EUROMTS COVERED BOND AGGREGATE UCITS ETF, from LYXOR INDEX FUND merged into the sub-fund AMUNDI EURO CORP 0-1Y ESG of AMUNDI INDEX SOLUTIONS;
- The sub-fund LYXOR STOXX EUROPE 600 REAL ESTATE UCITS ETF, from LYXOR INDEX FUND merged into the sub-fund AMUNDI FTSE EPRA EUROPE REAL ESTATE of AMUNDI INDEX SOLUTIONS;
- The sub-fund LYXOR CORE EURO GOVERNMENT BOND (DR) UCITS ETF, from MULTI UNITS LUXEMBOURG merged into AMUNDI PRIME EURO GOVIES of AMUNDI INDEX SOLUTIONS;
- The sub-fund LYXOR MSCI JAPAN ESG LEADERS EXTRA (DR) UCITS ETF, from MULTI UNITS LUXEMBOURG merged into AMUNDI INDEX MSCI JAPAN SRI PAB of AMUNDI INDEX SOLUTIONS;
- The sub-fund LYXOR MSCI EMU ESG LEADERS EXTRA (DR) UCITS ETF, from MULTI UNITS LUXEMBOURG merged into AMUNDI INDEX MSCI EMU SRI PAB of AMUNDI INDEX SOLUTIONS.

The sub-fund AMUNDI CHINA CNY BONDS has been launched on 28 November 2022.

On 20 January 2023:

- The sub-fund AMUNDI INDEX MSCI JAPAN ESG BROAD CTB merged into AMUNDI INDEX MSCI JAPAN;
- The sub-fund AMUNDI INDEX MSCI JAPAN has been renamed as AMUNDI MSCI JAPAN ESG CLIMATE NET ZERO AMBITION CTB.

Audit report

To the Shareholders of
Amundi Index Solutions

Report on the audit of the financial statements

Our opinion

In our opinion, the accompanying financial statements give a true and fair view of the financial position of Amundi Index Solutions (the “Fund”) and of each of its sub-funds as at 30 September 2022, and of the results of their operations and changes in their net assets for the year then ended in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements.

What we have audited

The Fund’s financial statements comprise:

- the statement of net assets as at 30 September 2022;
- the securities portfolio as at 30 September 2022;
- the statement of operations and changes in net assets for the year then ended; and
- the notes to the financial statements, which include a summary of significant accounting policies.

Basis for opinion

We conducted our audit in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 on the audit profession (Law of 23 July 2016) and with International Standards on Auditing (ISAs) as adopted for Luxembourg by the “Commission de Surveillance du Secteur Financier” (CSSF). Our responsibilities under the EU Regulation No 537/2014, the Law of 23 July 2016 and ISAs as adopted for Luxembourg by the CSSF are further described in the “Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements” section of our report.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

We are independent of the Fund in accordance with the International Code of Ethics for Professional Accountants, including International Independence Standards, issued by the International Ethics Standards Board for Accountants (IESBA Code) as adopted for Luxembourg by the CSSF together with the ethical requirements that are relevant to our audit of the financial statements. We have fulfilled our other ethical responsibilities under those ethical requirements.

To the best of our knowledge and belief, we declare that we have not provided non-audit services that are prohibited under Article 5(1) of the EU Regulation No 537/2014.

Key audit matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the financial statements of the current period.

These matters were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters.

Key audit matter	How our audit addressed the key audit matter
-------------------------	---

Existence of OTC swaps

The existence of such assets is considered to be a key audit matter due to the potential magnitude of material misstatement combined with the higher inherent risk for assets that cannot be held by the Depository Bank.

We gained an understanding of the control environment and operating effectiveness of key controls surrounding authorisation, completeness and accuracy of OTC swaps transactions and the reconciliation process in place for these instruments at the fund administrator.

We obtained from the Depository Bank, the confirmation of the ownership by the Fund of all OTC swaps instruments. We agreed all positions as per Depository Bank confirmation to the Fund's accounting records.

Valuation of OTC swaps

As part of their investment strategy, a number of sub-funds of Amundi Index Solutions use over-the-counter swaps to replicate the performance of indices.

We gained an understanding of the control environment and operating effectiveness of key controls surrounding the valuation of OTC swaps (total return swaps) at Fund Administrator level through its ISAE 3402 controls report. In addition, we gained an understanding of key controls over the valuation process implemented by the Management Company.

The valuation of such investments is considered to be a key audit matter due to the potential magnitude of a material misstatement.

We carried out an independent valuation of all the total return swaps held by the Fund as of 30 September 2022.

Refer to Note 2 of the financial statements for the valuation policy for such instruments.

We independently determined a range of acceptable values, based on models using recognized methodologies, considering the key terms of the contracts and observable market data.

In addition, for all OTC swaps, we compared the value of such derivatives to the counter-valuation performed by the Fund's Management Company.

Other information

The Board of Directors of the Fund is responsible for the other information. The other information comprises the information stated in the annual report but does not include the financial statements and our audit report thereon.

Our opinion on the financial statements does not cover the other information and we do not express any form of assurance conclusion thereon.

In connection with our audit of the financial statements, our responsibility is to read the other information identified above and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report in this regard.

Responsibilities of the Board of Directors of the Fund for the financial statements

The Board of Directors of the Fund is responsible for the preparation and fair presentation of the financial statements in accordance with Luxembourg legal and regulatory requirements relating to the preparation and presentation of the financial statements, and for such internal control as the Board of Directors of the Fund determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the Board of Directors of the Fund is responsible for assessing the Fund's and each of its sub-funds' ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless the Board of Directors of the Fund either intends to liquidate the Fund or close any of its sub-funds or to cease operations, or has no realistic alternative but to do so.

Responsibilities of the “Réviseur d’entreprises agréé” for the audit of the financial statements

The objectives of our audit are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an audit report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with the EU Regulation No 537/2014, the Law of 23 July 2016 and with ISAs as adopted for Luxembourg by the CSSF, we exercise professional judgment and maintain professional scepticism throughout the audit. We also:

- identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control;
- obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control;
- evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by the Board of Directors of the Fund;
- conclude on the appropriateness of the Board of Directors of the Fund's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Fund's or any of its sub-funds' ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our audit report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our audit report. However, future events or conditions may cause the Fund or any of its sub-funds to cease to continue as a going concern;
- evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with those charged with governance regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide those charged with governance with a statement that we have complied with relevant ethical requirements regarding independence, and communicate to them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, actions taken to eliminate threats or safeguards applied.

From the matters communicated with those charged with governance, we determine those matters that were of most significance in the audit of the financial statements of the current period and are therefore the key audit matters. We describe these matters in our audit report unless law or regulation precludes public disclosure about the matter.

Report on other legal and regulatory requirements

We have been appointed as “Réviseur d’entreprises agréé” of the Fund by the General Meeting of the Shareholders on 28 January 2022 and the duration of our uninterrupted engagement, including previous renewals and reappointments, is 2 years.

PricewaterhouseCoopers, Société coopérative

SECURITIES FINANCING TRANSACTIONS AND OF REUSE REGULATION (“SFTR”) (Unaudited additional information)

1 SECURITIES LENDING TRANSACTIONS

The Regulation on Transparency of Securities Financing Transactions and of Reuse (the « SFTR ») entered into force on 12 January 2016 aiming to improve transparency in securities and commodities lending, repurchase transactions, margin loans and certain collateral arrangements. The disclosure requirements of the SFTR include the following details on securities lending:

REMUNERATION POLICY AND PRACTICES

Amundi Luxembourg remuneration policy is compliant with the requirements detailed in the European Directive 2014/91/EU that come into force on 18 March 2016, and was transposed into Luxembourg Law of 10 May 2016.

The remuneration policy is based on Amundi group remuneration framework, and it is reviewed annually and approved by the Board of Amundi Luxembourg. The policy is subject to independent review by the internal Compliance function.

In 2021 there were no material changes to the remuneration policy adopted for previous years.

The policy applicable for 2021 was approved by Amundi Luxembourg Board on April 15th, 2021.

Amundi group Remuneration Committee reviews on an annual basis the group remuneration policy. The 2021 review took place on February 9th, 2021.

The remuneration policy and practices objectives are consistent with and promote sound and effective risk management, aligning remuneration with long-term performance and risks in order to avoid conflicts of interest. Fixed remuneration components are linked to the roles covered, the professional services rendered and the scope of responsibilities, reflecting the level of academic qualification, market pay levels, experience and skills required for each position, as well as the level of excellence demonstrated. Variable remuneration is designed to promote a sustainable long-term development of the Management Company and a solid and effective risk management system. Variable remuneration awards consider the performance of the employee, her/his business unit and Amundi group as a whole, and it is based on both financial and non-financial criteria.

Amundi Luxembourg and Amundi group have defined all identified staff having authority or influence on the funds Amundi manages, and who consequently are likely to have an impact on the performance or the risk profile of our the funds.

1. AMOUNTS OF REMUNERATION AWARDED

Amundi Luxembourg, the Management Company acts as of 31.12.2021 as Management Company or AIFM for several umbrella and standalone UCITS and AIFs.

The total remuneration expressed in Euro paid by Amundi Luxembourg to its staff during the calendar year 2021 is as follows:

	No of beneficiaries	Fixed remuneration	Variable remuneration	Total
Staff	82	7,662,788	1,192,475	8,855,263
Out of which				
- Identified staff	9	1,479,885	494,995	1,974,880
- All other staff	73	6,182,903	697,480	6,880,383

Amundi Index Solution Fund represented as of 31.12.2021 around 46% and as of 30.09.2022 around 44% of the Total Net Assets under Management of Amundi Luxembourg S.A.. The total remuneration figures shown above refer to activities in respect of all funds managed.

Amundi Luxembourg S.A. and Amundi group employees who are appointed to the Board of Directors of the Management Company and of the Fund waive the right to any remuneration in respect of all funds managed. No employee of the Management Company receives any amount, including carried interest and performance fees, paid directly by the UCITS or AIFs managed.

2. REMUNERATION OF DELEGATES

As of 30 September 2022:

- Amundi Asset Management managed EUR 940.91 billion AuM, out of which EUR 84.41 billion represented by the sub-funds in the umbrella (respectively 8.97% of the total assets managed by the Investment Manager and 96.42% of the total umbrella's AuM). The pro-rata portion of the identified staff total remuneration attributable to the management of these sub-funds was EUR 3,215,254, out of which EUR 1,263,366 in fixed remuneration and EUR 1,951,888 in variable one. The pro-rata portion of staff total remuneration attributable to the management of these sub-funds was EUR 15,118,594, out of which EUR 9,972,441 in fixed remuneration and EUR 5,146,153 in variable one. Amundi Asset Management had a total of 69 identified staff out of a total of 1400 staff in 2021.

- Amundi Japan Ltd managed EUR 25.49 billion AuM, out of which EUR 3.13 billion represented by the sub-funds in the umbrella (respectively 12.28% of the total assets managed by the Investment Manager and 3.58% of the total umbrella's AuM). The pro-rata portion of the identified staff total remuneration attributable to the management of these sub-funds was EUR 402,706, out of which EUR 285,071 in fixed remuneration and EUR 117,635 in variable one. The pro-rata portion of staff total remuneration attributable to the management of these sub-funds was EUR 2,425,261, out of which EUR 1,928,336 in fixed remuneration and EUR 496,925 in variable one. Amundi Japan Ltd had a total of 12 identified staff out of a total of 160 staff in 2021.

Please note that the latest remuneration figures available refer to the calendar year 2021

SUSTAINABLE FINANCE DISCLOSURE REGULATION (“SFDR”)

Disclosure Regulation

On 18 December 2019, the European Council and European Parliament announced that they had reached a political agreement on the Disclosure Regulation, thereby seeking to establish a pan-European framework to facilitate Sustainable Investment. The Disclosure Regulation provides for a harmonized approach in respect of sustainability-related disclosures to investors within the European Economic Area's financial services sector. For the purposes of the Disclosure Regulation, the Management Company meets the criteria of a "financial market participant", whilst each Sub-Fund qualifies as a "financial product".

Please also refer to the section on 'Sustainable Investment' in the Prospectus of the Fund and the Amundi Responsible Investment Policy available on www.amundi.com.

As required by the Disclosure Regulation, the Fund makes the following statements:

Under the Amundi Responsible Investment Policy, Amundi has developed its own ESG rating approach. The Amundi ESG rating aims to measure the ESG performance of an issuer, i.e. its ability to anticipate and manage Sustainability Risks and opportunities inherent to its industry and individual circumstances. By using the Amundi ESG ratings, portfolio managers are taking into account Sustainability Risks in their investment decisions.

The Sub-Funds are classified as following:

Article 9 Sub-Funds

These Sub-Funds have a sustainable objective and is therefore classified as article 9 under SFDR (Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector). Therefore, as required by Article 58 of COMMISSION DELEGATED REGULATION (EU) 2022/1288, detailed information on the environmental or social characteristics promoted by the financial product is available in an annex to this report.

This annex contains information about:

- Attainment of the sustainable investment objective of the financial product;
- Top investments, asset allocation & proportion of investments in different economic sectors and sub-sectors;
- Information on sustainable investments.

List of Art. 9 Sub-Funds as of 30 September 2022:

Article 8 Sub-Funds

These sub-funds promote environmental or social characteristics and is therefore classified as article 8 under SFDR (Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector). Therefore, as required by Article 50(2) of COMMISSION DELEGATED REGULATION (EU) 2022/1288, detailed information on the environmental or social characteristics promoted by the financial product is available in an annex to this report. This annex contains information about:

- Attainment of the environmental or social characteristics promoted by the financial products;
- Top investments, asset allocation & proportion of investments in different economic sectors and sub-sectors;
- Information on investments in environmentally sustainable economic activities.

Other Sub-Funds

Given the investment focus and the asset classes/sectors they invest in, the Investment Managers of all other Sub-Funds, not classified pursuant to article 8 or 9 of the Disclosure Regulation did not integrate a consideration of environmentally sustainable economic activities into the investment process for the Sub-Fund. Therefore, it should be noted that the investments underlying these Sub-Funds did not take into account the EU criteria for environmentally sustainable economic activities.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI INDEX MSCI EM ASIA SRI PAB

Legal entity identifier:
213800XKAFV6VIB4O832

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes **No**

<input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 42.68%	<input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments
<input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
<input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	<input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
<input type="checkbox"/> It made a sustainable investments with a social objective:	<input type="checkbox"/> with a social objective
	<input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI EM Asia SRI filtered PAB Index	208,3	100%
30/11/2022	MSCI EM Asia	543,9	99%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production)

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

Largest Investments	Sector	% Assets	Country

------	--------

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The share of sustainable investments with environmental objective not aligned to taxonomy is **36.11%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

s product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***
 MSCI EM Asia SRI Filtered PAB Index is an equity index based on the MSCI Emerging Markets (EM) Asia index representative of the large and mid-cap stocks across 9 Asian emerging market countries (as of November 2021) (the "Parent Index"). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

---	--

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI Emerging Markets SRI filtered PAB Index	240,232	99,4%
30/11/2022	MSCI EM (Emerging Markets)	669,548	99,1%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (“DNSH”), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **What was the share of investments in transitional and enabling activities?**
Reliable data regarding transitional and enabling activities was not available during the period.
- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
Reliable data regarding EU Taxonomy was not available during on the previous reference periods

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**
The share of sustainable investments with environmental objective not aligned to taxonomy is This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments?**
This product does not commit to have social sustainable investments

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **69.84%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

MSCI EMU SRI Filtered PAB Index is an equity index based on the MSCI EMU index representative of the large and mid-cap stocks across 10 developed market countries in the European Economic and Monetary Union (as of November 2021) (the "Parent Index"). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

<p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 77.22%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made a sustainable investments with a social objective:</p>	<p><input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p>
--	--

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI Europe SRI filtered PAB Index	180,691	100,0%
30/11/2022	MSCI Europe	543,423	99,5%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The share of sustainable investments with environmental objective not aligned to taxonomy is **64.5%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

s product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

MSCI Europe SRI Filtered PAB Index is an equity index based on the MSCI Europe index representative of the large and mid-cap stocks across 15 developed market countries in Europe (as of November 2021) (the "Parent Index"). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **42.48%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

MSCI Japan SRI Filtered PAB Index is an equity index based on the MSCI Japan index representative of the large and mid-cap stocks of Japanese market (the "Parent Index"). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

AMUNDI INDEX MSCI PACIFIC EX JAPAN SRI PAB

Legal entity identifier:
22210085PY3LW5RGLP55

Sustainable investment objective

Did this financial product have a sustainable investment objective?

X

Yes

No

It made **sustainable investments with an environmental objective: 44.79%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:**

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI Pacific ex Japan SRI filtered PAB Index	376,2	100%
30/11/2022	MSCI PACIFIC ex JAPAN	818,8	99%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

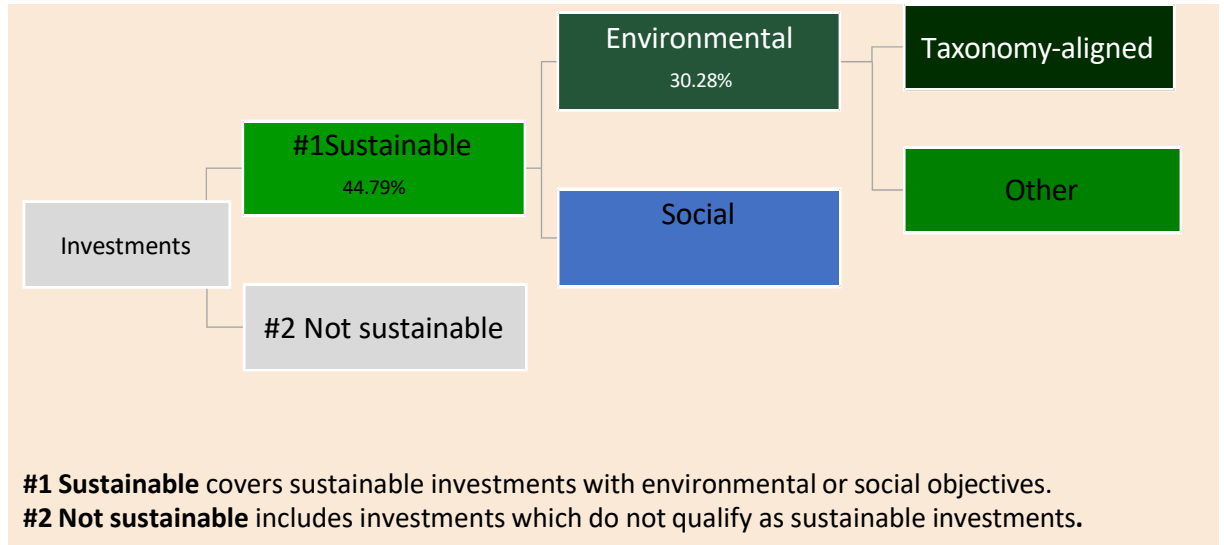

Largest Investments	Sector	% Assets	Country
UNITED OVERSEAS BANK	Banks	5.56 %	SGP

Taxonomy-aligned activities are expressed as a share of:
-turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **30.28%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

under the EU Taxonomy.

This product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

MSCI Pacific ex Japan SRI Filtered PAB Index is an equity index based on the MSCI Pacific ex Japan index representative of the large and mid-cap stocks across 4 of 5 developed markets countries of the Pacific region, excluding Japan (as of November 2021) (the "Parent Index"). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

--	--

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI World SRI filtered PAB Index	149,0	99%
30/11/2022	MSCI WORLD	379,8	99%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **How did the sustainable investments not cause significant harm to any sustainable investment objective??**

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests: The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

— **How were the indicators for adverse impacts on sustainability factors taken into account?**

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

— **Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?**

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: From 01/10/2021 to 30/09/2022

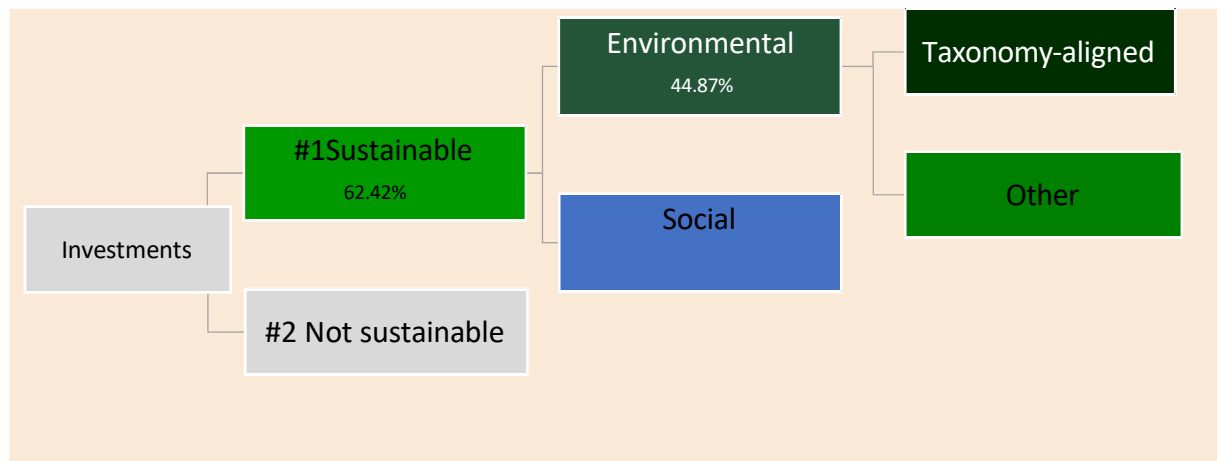

Largest Investments	Sector	% Assets	Country
TESLA INC	Automobiles	5.19 %	USA

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **44.87%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

MSCI World SRI Filtered PAB Index is an equity index based on the MSCI World index representative of the large and mid-cap stocks across 23 developed market countries (as of November 2021) (the "Parent Index"). The Index provides exposure to companies with outstanding Environmental, Social and Governance (ESG) ratings and excludes companies whose products have negative social or environmental impacts. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) regulation minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI MSCI UK IMI SRI PAB

222100W4JS565M7W3C88

Sustainable investment objective

Did this financial product have a sustainable investment objective?

X

Yes

No

It made **sustainable investments with an environmental objective: 72.36%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:**

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI UK IMI filtered PAB Index	295,7	100%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.

<p><input type="checkbox"/> It made a sustainable investments with a social objective:</p>	<p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p>

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI Europe Climate Change CTB Select Index Net EUR	215,3	100%
30/11/2022	MSCI EUROPE	543,4	99,5%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights

- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

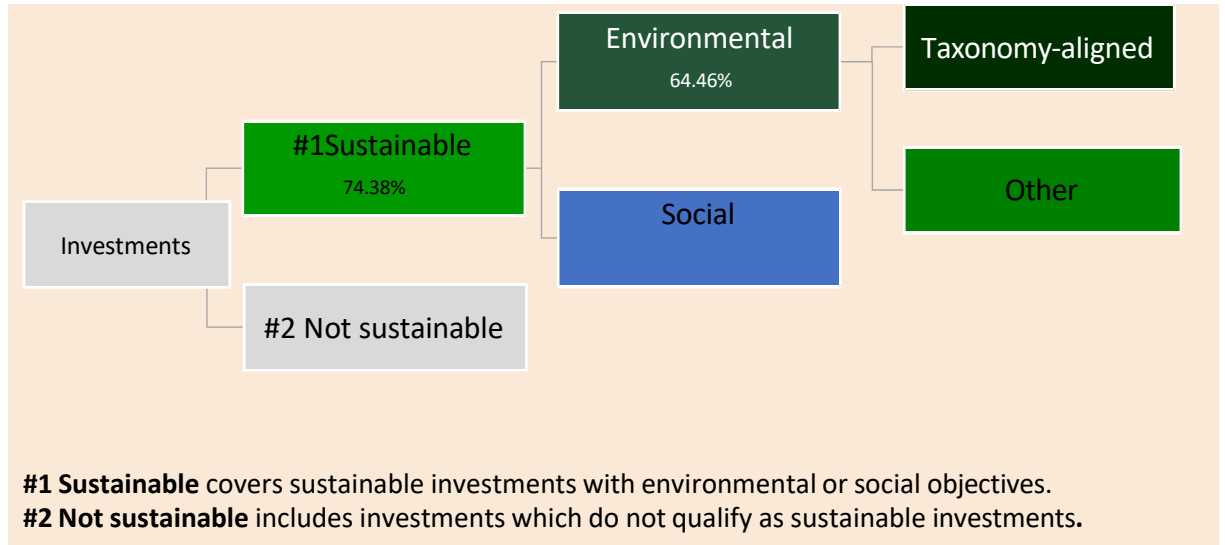

Largest Investments	Sector	% Assets	Country

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **64.46%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

The MSCI Europe Climate Change CTB Select Index is an equity index based on the MSCI Europe Index ("Parent Index") representative of the large and mid-cap securities across 15 Developed Markets countries in Europe (as of December 2020). The Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) label minimum requirements.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI MSCI WORLD CLIMATE TRANSITION CTB

Legal entity identifier:
222100479LWJEIXZB875

Sustainable investment objective

Did this financial product have a sustainable investment objective?

X

Yes

No

It made **sustainable investments with an environmental objective: 47.12%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:**

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI Europe Climate Change CTB Select Index Net EUR	147,4	100%
30/11/2022	MSCI EUROPE	379,8	99%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights

- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **35.63%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

under the EU Taxonomy.

This product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● ***How does the reference benchmark differ from a broad market index?***

The MSCI World Climate Change CTB Select Index is an equity index based on the MSCI World Index ("Parent Index"). representative of the large and mid-cap securities across 23 Developed Markets countries (as of December 2020). The Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) label minimum requirements.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

Yes **No**

<p><input checked="" type="checkbox"/> It made sustainable investments with an environmental objective: 70.65%</p> <ul style="list-style-type: none"> <input type="checkbox"/> in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input checked="" type="checkbox"/> in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <p><input type="checkbox"/> It made a sustainable investments with a social objective:</p>	<p><input type="checkbox"/> It promotes Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments</p> <ul style="list-style-type: none"> <input type="checkbox"/> with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy <input type="checkbox"/> with a social objective <p><input type="checkbox"/> It promotes E/S characteristics, but will not make any sustainable investments</p>
--	--

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI Europe ESG Broad CTB Select Index	310,612	100,0%
30/11/2022	MSCI EUROPE	543,423	99,5%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy. This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy is **63.39%**
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments?**

This product does not commit to have social sustainable investments

 **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

 **What actions have been taken to meet the sustainable investment objective during the reference period?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

 **How did this financial product perform compared to the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

Reference benchmarks are indexes to measure

whether the financial product attains the environmental or social characteristics that they promote.

- ***How does the reference benchmark differ from a broad market index?***

MSCI Europe ESG Broad CTB Select Index is an equity index based on the MSCI Europe Index representative of the large and mid-cap securities across developed markets countries in Europe (the "Parent Index"). The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score. Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Sustainable investment objective

Did this financial product have a sustainable investment objective?

X

Yes

No

It made **sustainable investments with an environmental objective: 38.7%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:**

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI Emerging Markets ESG Broad CTB Select Index	307,801	100,0%
30/11/2022	MSCI EM (emerging markets)	669,548	99,1%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **33.68%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

under the EU Taxonomy.

This product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

MSCI Emerging Markets ESG Broad CTB Select Index is an equity index based on the MSCI Emerging markets Index representative of the large and mid-cap markets across 27 emerging countries (as of November 2021) ("Parent Index"). The Index excludes companies whose products have negative social or environmental impacts, while overweighting companies with strong ESG Score.

Additionally, the Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Climate Transition Benchmark (EU CTB) regulation minimum requirements.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI INDEX MSCI JAPAN ESG BROAD CTB

Legal entity identifier:
213800M78VVESEHOLI55

Sustainable investment objective

Did this financial product have a sustainable investment objective?

X

Yes

No

It made **sustainable investments with an environmental objective: 37.14%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:**

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Climate Transition Benchmarks (EU CTBs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI Japan ESG Broad CTB Select Index	363,3	99%
30/11/2022	MSCI Japan	669,5	99%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

--	--

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI Europe Climate Change Paris Aligned Select Net EUR	210,1	99,73%
30/11/2022	MSCI USA	543,4	99,53%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **64.21%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

The MSCI Europe Climate Change Paris Aligned Select Index is an equity index based on the MSCI Europe Index ("Parent Index") representative of the large and mid-cap securities across 15 Developed Markets countries in Europe (as of March 2020). The Index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) label minimum requirements.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI MSCI WORLD CLIMATE PARIS ALIGNED PAB

Legal entity identifier:
213800MMM38NXMDMHQ95

Sustainable investment objective

Did this financial product have a sustainable investment objective?

X

Yes

No

It made **sustainable investments with an environmental objective: 47.02%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:**

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Carbon Intensity	Coverage
30/11/2022	MSCI World Climate Change Paris Aligned Select Net USD	135,8	100%
30/11/2022	MSCI World	379,8	99%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)

- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy. This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

Taxonomy-aligned activities are expressed as a share of:
-turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
 - operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **35.68%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

under the EU Taxonomy.

This product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

The MSCI World Climate Change Paris Aligned Select Index is an equity index based on the MSCI World Index ("Parent Index") representative of the large and mid-cap markets across 23 developed countries (as of March 2020). The index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) label minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Legal entity identifier:
213800SIHE6DBPL91S47

Sustainable investment objective

Did this financial product have a sustainable investment objective?

X

Yes

No

It made **sustainable investments with an environmental objective: 59.05%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:**

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	CO2 emissions	Coverage
30/09/2022	Solactive iCPR Climate Credit PAB Index	28972969.57	100%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests

detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting **the greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

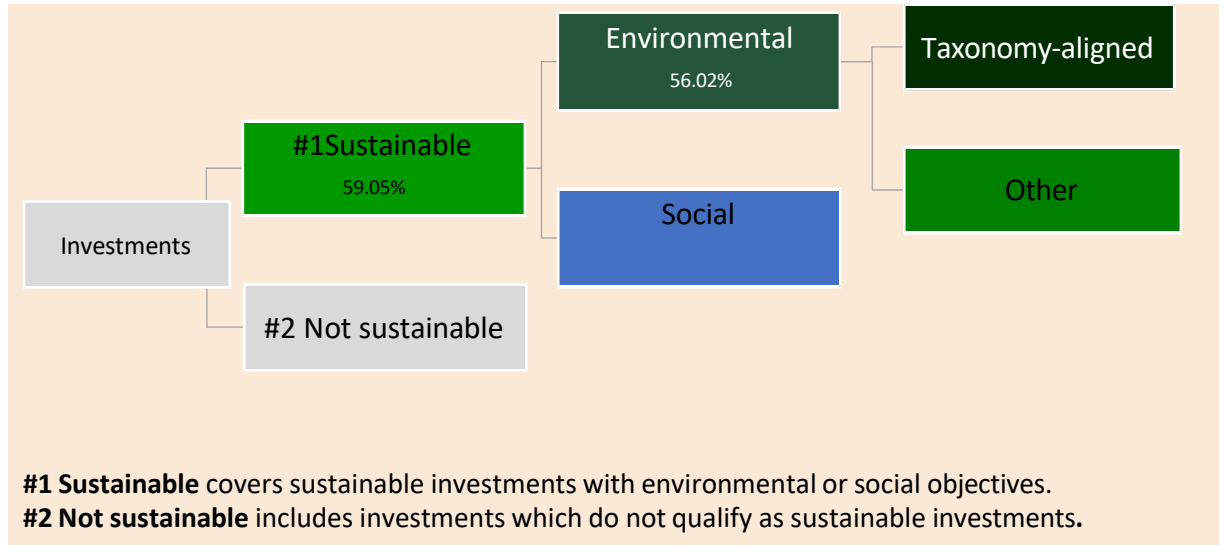

Largest Investments	Sector	% Assets	Country

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments in transitional and enabling activities?**
Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**
Reliable data regarding EU Taxonomy was not available during on the previous reference periods

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy is **56.02%**
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments?**

This product does not commit to have social sustainable investments

 **What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

 **What actions have been taken to meet the sustainable investment objective during the reference period?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

Solactive iCPR Climate Credit PAB Index is a fixed income index based on the Solactive Euro IG Corporate Index ("Parent Index") representative of the corporate, fixed coupon, Euro denominated bonds, with an Investment Grade credit rating according to S&P or Moody's, with a maturity longer than 1 year and an amount outstanding higher than 500m EUR. The index aims to represent the performance of a strategy that reweights securities based upon the opportunities and risks associated with the climate transition to meet the EU Paris-aligned benchmark (EU PAB) label minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI EURO iSTOXX CLIMATE PARIS ALIGNED PAB

Legal entity identifier:
2138007S1QFFN8UYKB61

Sustainable investment objective

Did this financial product have a sustainable investment objective?

X

Yes

No

It made **sustainable investments with an environmental objective: 82.05%**

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:**

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of _____ of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent was the sustainable investment objective of this financial product met?

The Sub Fund promoted environmental and/or social characteristics through among others replicating an index meeting the minimum standards for EU Paris Aligned Benchmarks (EU PABs) under Regulation (EU) 2019/2089 amending Regulation (EU) 2016/1011.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Carbon Intensity (scope123/EVIC Eur)	Coverage
19/09/2022	EURO iSTOXX Ambition Climat PAB EUR (Net Return)	873,09	100,00%
19/09/2022	EURO STOXX	894,50	100,00%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (“DNSH”), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights

- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights?***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product's strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.

Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **70.16%**
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “not sustainable”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments.

What actions have been taken to meet the sustainable investment objective during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social

- *How does the reference benchmark differ from a broad market index?*

characteristics that they promote.

The EURO iSTOXX Ambition Climat PAB Index tracks the performance of liquid securities from the EURO STOXX Total Market Index ("Parent Index"). The index is constructed to meet the EU Paris-aligned benchmark (EU PAB) label minimum requirements.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the sustainable investment objective?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI CAC 40 ESG

Legal entity identifier:
549300TC0PVE58KW9N64

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **84.32%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Date	Index	Weighted average ESG Score	Coverage
Q3 2022	CAC 40 ESG NR	68	100%
Q3 2022	CAC 40	65	100%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
<i>Textiles, Apparel & Luxury Goods</i>	16.99 %
<i>Pharmaceuticals</i>	8.50 %
<i>Aerospace & Defense</i>	8.05 %
<i>Electrical Equipment</i>	8.04 %
<i>Personal Products</i>	7.58 %
<i>Banks</i>	7.25 %
<i>Chemicals</i>	6.76 %
<i>Construction & Engineering</i>	4.25 %
<i>Insurance</i>	3.99 %
<i>Beverages</i>	3.70 %
<i>IT Services</i>	3.56 %
<i>Multi-Utilities</i>	3.30 %

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **68.1%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

CAC 40 ESG Index is an equity index representative of the top 40 companies demonstrating strong Environmental, Social and Governance practices within the CAC Large 60 Index (Parent Index) representing the 60 leading stocks on the Paris stock market. The Index aims to deliver a reduced weighted carbon footprint and improved green-to-brown ratio compared to its Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI ITALY MIB ESG

Legal entity identifier:
549300RPOWOZJH77LP16

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **55.61%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Sub-Fund is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

● **How did the sustainability indicators perform?**

Date	Index	Weighted average ESG Score	Coverage
Q3 2022	MIB ESG NR	63	100%
Q3 2022	MIB	58	99%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Principal adverse impacts are the most significant negative

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

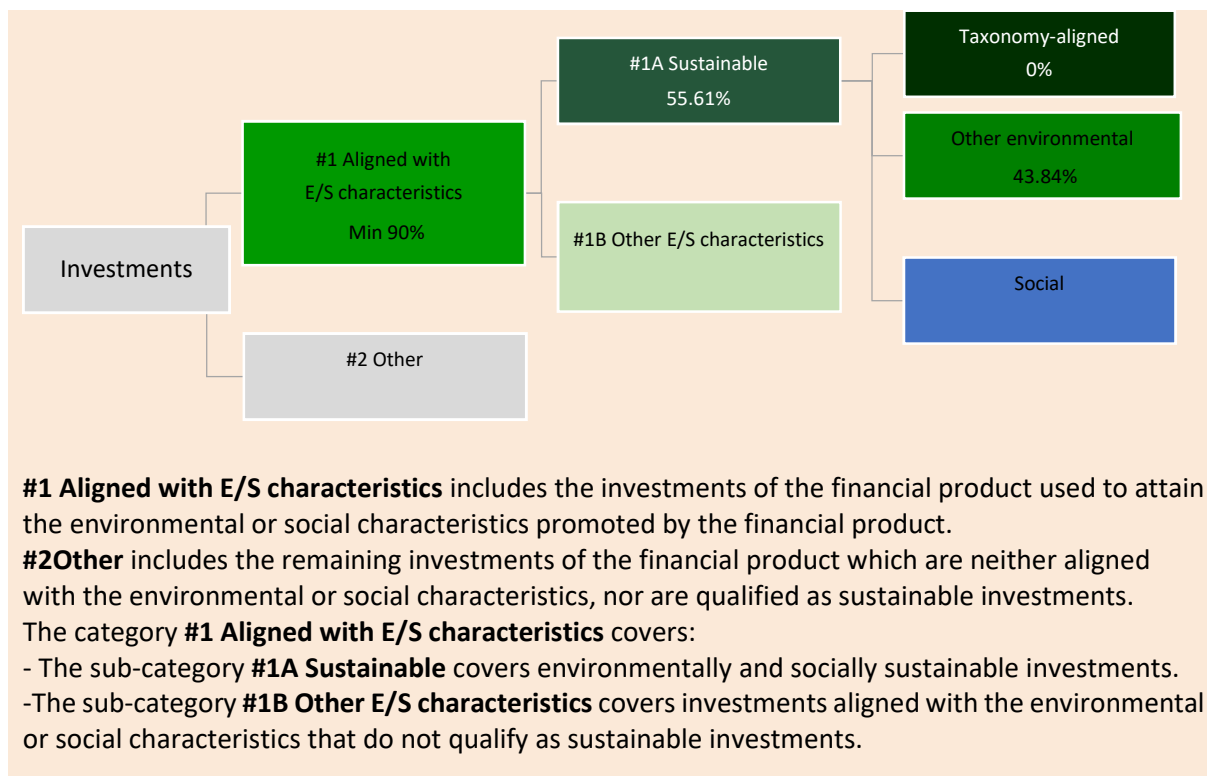

Largest Investments	Sector	% Assets	Country
ENI SPA	Oil, Gas & Consumable Fuels	9.74 %	ITA

Taxonomy-aligned activities are expressed as a share of: -turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **43.84%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

The MIB ESG Index is an equity index representing the top 40 companies demonstrating strong Environmental, Social and Governance practices amongst the 60 most liquid Italian companies listed on Euronext Milan MTA and MIV markets.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI DAX 50 ESG

Legal entity identifier:
213800TB2ROJ7LC3AT12

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **68.2%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Sub-Fund is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

● **How did the sustainability indicators perform?**

Date	Index	ESG score Sustainalytics	Coverage
19/09/2022	DAX 50 ESG (TR) EUR	76,39	100,00%
19/09/2022	DAX	75,53	98,90%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability

matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.

- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

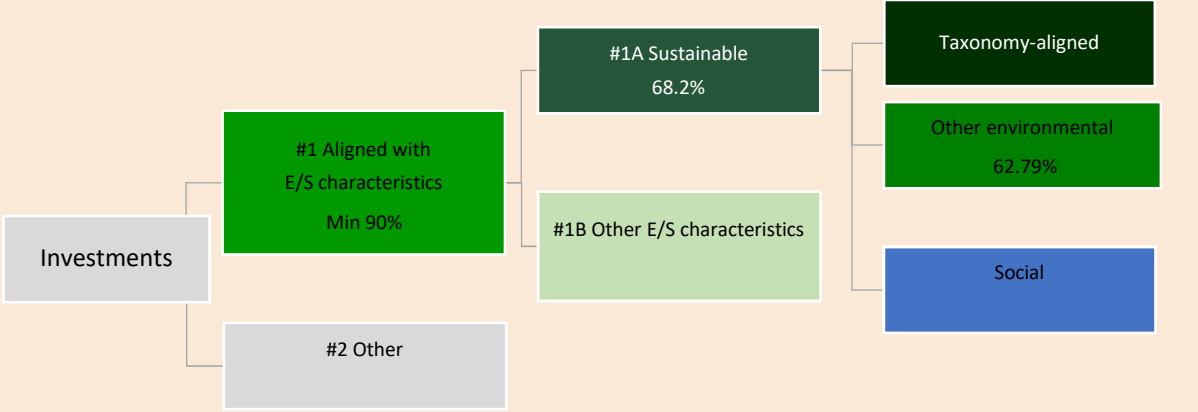

Largest Investments	Sector	% Assets	Country

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

Taxonomy-aligned activities are expressed as a share of: **-turnover** reflecting the share of revenue from green activities of investee companies **-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy. **-operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **62.79%**
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

The DAX 50 ESG tracks the performance of the 50 largest stocks that have comparably good performance based on their Environmental, Social and Governance criteria. The Index is composed of securities included

Reference benchmarks are indexes to measure whether the financial product attains the environmental or

social characteristics that they promote.

in the HDAX index which is representative of the large and medium-sized companies traded on the German equity market and having their legal or operating headquarter located in Germany. The HDAX universe is the joint set of companies included in the DAX (Germany's blue-chip index tracking the performance of the 40 largest companies on the German stock market in terms of market capitalization and turnover rate), the MDAX (comprising the 50 next-largest companies after the DAX in terms of market capitalization and turnover) and the TecDAX (comprising the 30 largest and most liquid tech securities in terms of market capitalization and turnover) indexes.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI S&P 500 ESG

Legal entity identifier:
222100YTW62AGYBTTTC41

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **36.12%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Weighted Avg S&P DJI bESG Score	Coverage
29/04/2022	S&P 500 ESG+ Index (USD) NTR	71,7	100,00%
29/04/2022	S&P 500	63,3	99,94%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

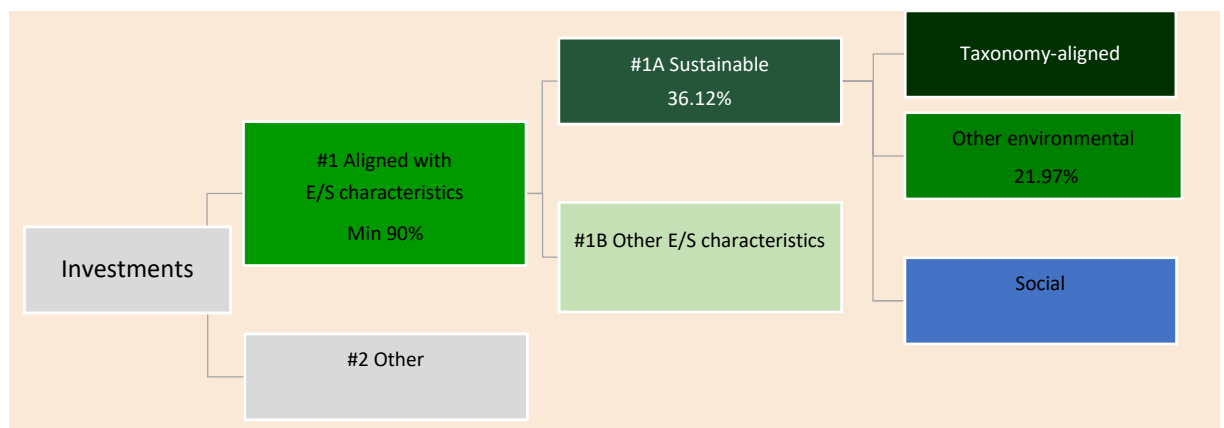

Largest Investments	Sector	% Assets	Country
APPLE INC	Technology Hardware, Storage & Peripherals	9.65 %	USA

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable

What was the share of investments in transitional and enabling activities?

other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

Reliable data regarding transitional and enabling activities was not available during the period.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **21.97%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

Reference benchmarks are indexes to measure whether the financial product

attains the environmental or social characteristics that they promote.

S&P 500 ESG Index (the "Index") is a broad-based, market-cap-weighted index that measures the performance of securities meeting sustainability criteria, while maintaining similar overall industry group weight as the S&P 500 (the "Parent Index"). The S&P500 Index is an equity index representative of the leading securities traded in the USA.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **64.54%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG score Sustainalytics	Coverage
19/09/2022	STOXX Europe 600 ESG Broad Market EUR Net Return	75,49	100%
19/09/2022	STOXX Europe 600	74,11	100%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

Principal adverse impacts are the most significant negative

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● ***In which economic sectors were the investments made?***

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **55.76%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

STOXX Europe 600 ESG Broad Market Index is an equity index based on Stoxx Europe 600 - representing the 600 leading securities of European developed countries (the "Parent Index") that applies a set of sector exclusion and ESG performance screen for security eligibility and targets a total selection of 80% of the number of securities from the Parent Index.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

AMUNDI MSCI AC FAR EAST EX JAPAN ESG LEADERS SELECT

Legal entity identifier:

5493004IAZX5OHV2CQ46

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **37.28%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score	Coverage
30/11/2022	MSCI AC Far East ex Japan ESG Leaders Select 5% Issuer Capped Net USD Index	6,7	100%
30/11/2022	MSCI AC Far East ex Japan	5,8	100%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

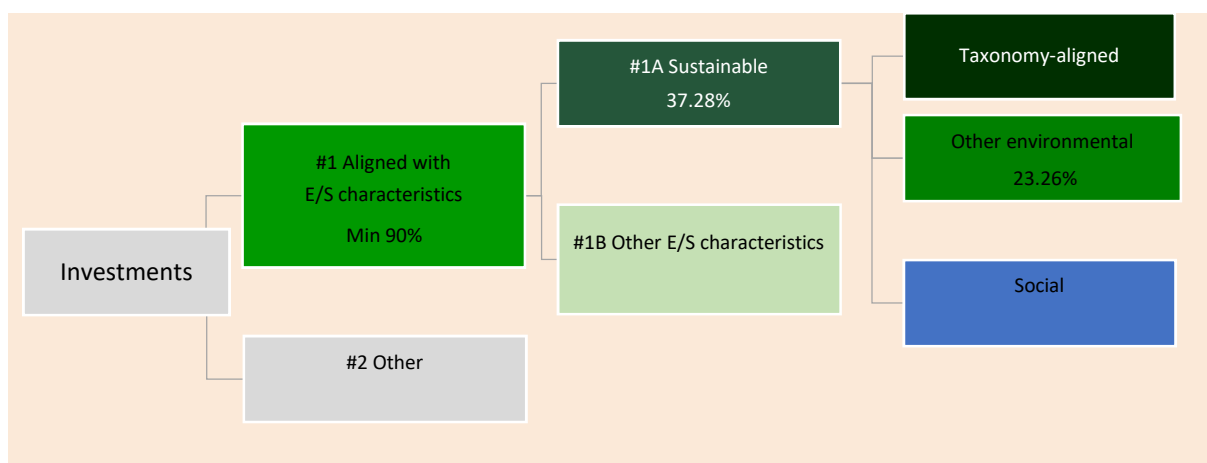

Largest Investments	Sector	% Assets	Country

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

-The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- *In which economic sectors were the investments made?*

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **23.26%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

MSCI Ac Far East ex Japan ESG Leaders Select 5% Issuer Capped index is an equity index based on the MSCI AC Far East ex Japan Index (the "Parent Index"), representative of the large and mid-cap markets across 2 Developed Markets (excluding Japan) and 7 Emerging Markets countries in the Far East, and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

AMUNDI MSCI CHINA ESG LEADERS SELECT

Legal entity identifier:
213800YL23YUT5FBRB63

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **20%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score	Coverage
30/11/2022	MSCI China ESG Leaders Select 5% Issuer Capped Net USD Index	6,0	100%
30/11/2022	MSCI China	4,8	100%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

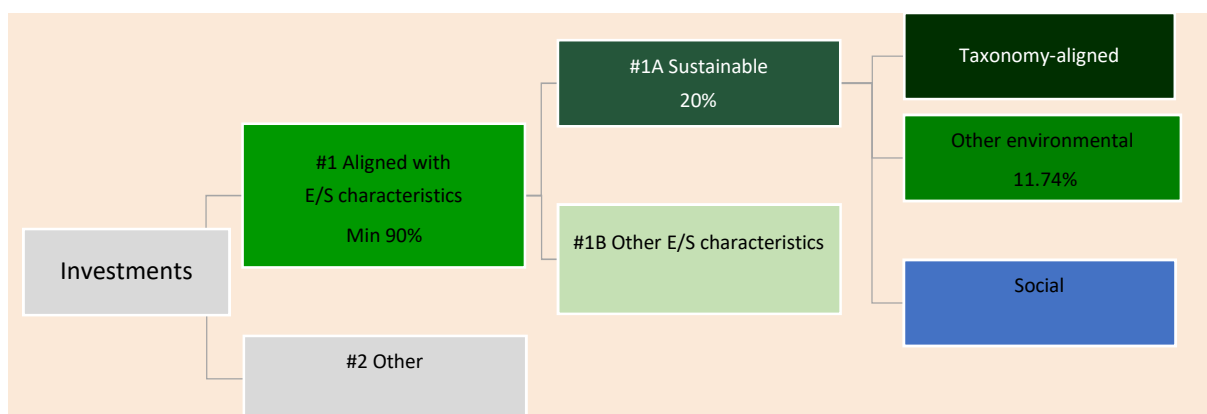

Largest Investments	Sector	% Assets	Country
MEITUAN-CLASS B	Internet & Direct Marketing Retail	5.67 %	CHN

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- *In which economic sectors were the investments made?*

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

are sustainable investments with

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **11.74%**

an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

MSCI China ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI China Index ("Parent Index") representative of large and mid-cap stocks of China equity universe across China A shares, H shares, B shares, Red chips, P chips and foreign listings (e.g. ADRs) and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

AMUNDI MSCI EMERGING EX CHINA ESG LEADERS SELECT

Legal entity identifier:

213800J6GAIQJ1OPP251

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **42.31%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score	Coverage
30/11/2022	MSCI EM ex China ESG Leaders Select 5% Issuer Capped Net USD Index	6,5	100%
30/11/2022	MSCI EM ex China	5,7	100%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **36.2%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

MSCI EM ex China Region ESG Leaders Select 5% Issuer Capped is an equity index based on the MSCI Emerging Markets ex China Index ("Parent Index") representative of large and mid-cap stocks across 26 of the 27 Emerging Markets (EM) countries (as of January 2021) excluding China and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes

No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **38.04%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Date	Index	ESG Score	Coverage
30/11/2022	MSCI EMU ESG Leaders Select 5% Issuer Capped Net EUR	8,7	100%
30/11/2022	MSCI EMU	7,8	100%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

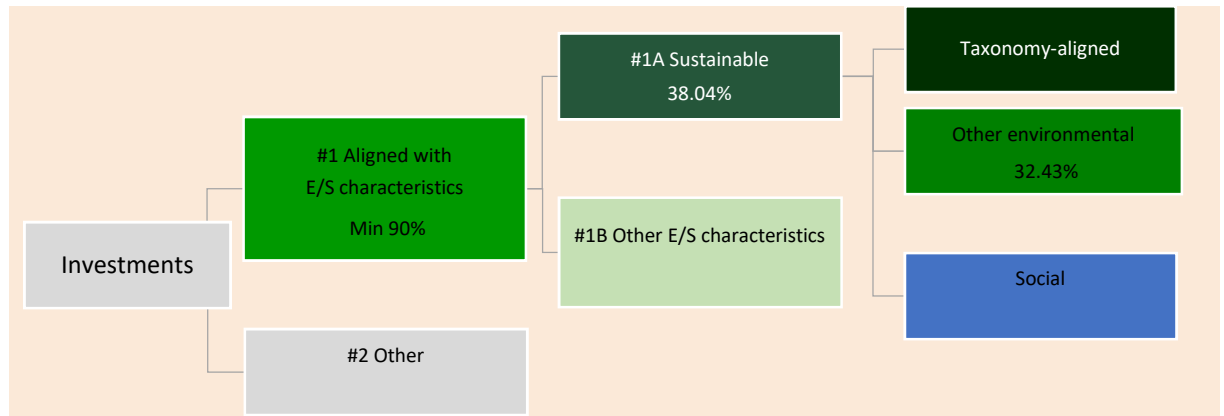

Largest Investments	Sector	% Assets	Country
ALIBABA GROUP HOLDING LTD	Internet & Direct Marketing Retail	4.96 %	CHN
TENCENT HOLDINGS LTD	Interactive Media & Services	4.82 %	CHN

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.
 The category **#1 Aligned with E/S characteristics** covers:
 - The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.

-The sub-category #1B Other E/S characteristics covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

- *In which economic sectors were the investments made?*

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **32.43%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

MSCI EM ESG Leaders 5% Issuer Capped Index is an equity index based on the MSCI Emerging Markets Index ("Parent Index"), representative of the large and mid-cap securities of 27 emerging countries (as of November 2021) and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI MSCI EMU ESG LEADERS SELECT

Legal entity identifier:
2221007ZZU8XN39KWS32

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **68.81%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score	Coverage
30/11/2022	MSCI EMU ESG Leaders Select 5% Issuer Capped Net EUR	8,7	100%
30/11/2022	MSCI EMU	7,8	100%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **55.8%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

MSCI EMU ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI EMU Index ("Parent Index"), representative of the large and mid-cap stocks across 10 developed countries (as of September 2020) in the European Economic and Monetary Union (EMU) and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● **How did this financial product perform compared with the reference benchmark?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

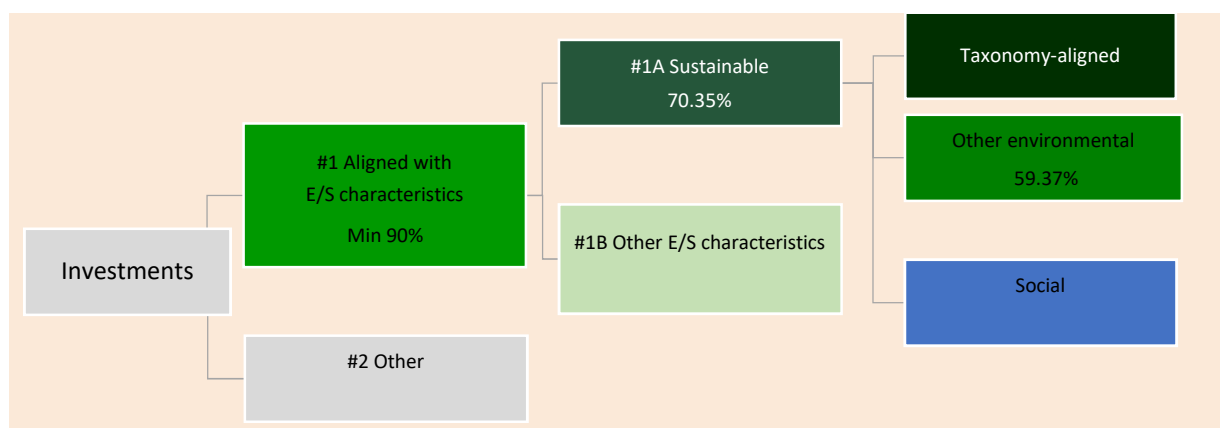

Largest Investments	Sector	% Assets	Country
ROCHE HLDG AG-GENUSS	Pharmaceuticals	5.66 %	USA

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
<i>Pharmaceuticals</i>	15.19 %

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **59.37%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

MSCI Europe ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI Europe Index ("Parent Index"), representative of the large and mid-cap securities of the 15 developed European countries and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- **How did this financial product perform compared with the reference benchmark?**

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI MSCI USA ESG LEADERS SELECT

Legal entity identifier:
2138003G3CHCAIBE6B94

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **50.44%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score	Coverage
30/11/2022	MSCI USA ESG LEADERS SELECT 5% ISSUER CAPPED	7,4	100%
30/11/2022	MSCI USA	6,6	99,8%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

Taxonomy-aligned activities are expressed as a share of: -turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **37.51%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***

MSCI USA ESG Leaders Select 5% Issuer Capped Index is an equity index based on the MSCI USA Index ("Parent Index"), representative of the large and mid-cap securities of the US market and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI MSCI WORLD ESG LEADERS SELECT

Legal entity identifier:
213800PRSOJ2FG7X8887

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **53.26%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score	Coverage
30/11/2022	MSCI WORLD ESG LEADERS SELECT 5% ISSUER CAPPED	7,7	100%
30/11/2022	MSCI World	6,9	100%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

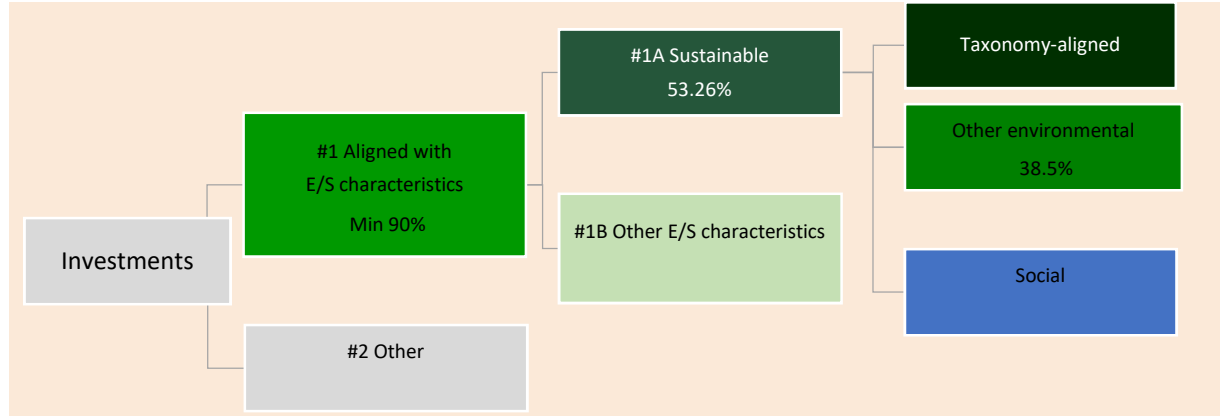

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Software	4.77 %	USA
TESLA INC	Automobiles	3.19 %	USA

PEPSICO INC	Beverages	1.03 %	USA
THERMO FISHER SCIENT	Life Sciences Tools & Services	0.89 %	USA

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investment in financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **38.5%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

How does the reference benchmark differ from a broad market index?

MSCI WORLD ESG LEADERS SELECT 5% Issuer Capped Index is an equity index based on the MSCI World Index ("Parent Index"), representative of the large and mid-cap securities of the 23 developed countries and issued by companies that have the highest Environmental, Social and Governance (ESG) rating in each sector of the Parent Index.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

How did this financial product perform compared with the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI MSCI EMU ESG UNIVERSAL SELECT

Legal entity identifier:
2138005S5JAYPLESDA45

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

- It made **sustainable investments with an environmental objective**: ___%
 - in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
- It promotes **Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **74.34%** of sustainable investments
 - with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
 - with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy
 - with a social objective
- It made a **sustainable investments with a social objective**: ___%
- It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Sub-Fund is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score	Coverage
30/11/2022	MSCI EMU ESG UNIVERSAL SELECT	8,3	100%
30/11/2022	MSCI EMU	7,8	100%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability

matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.

- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

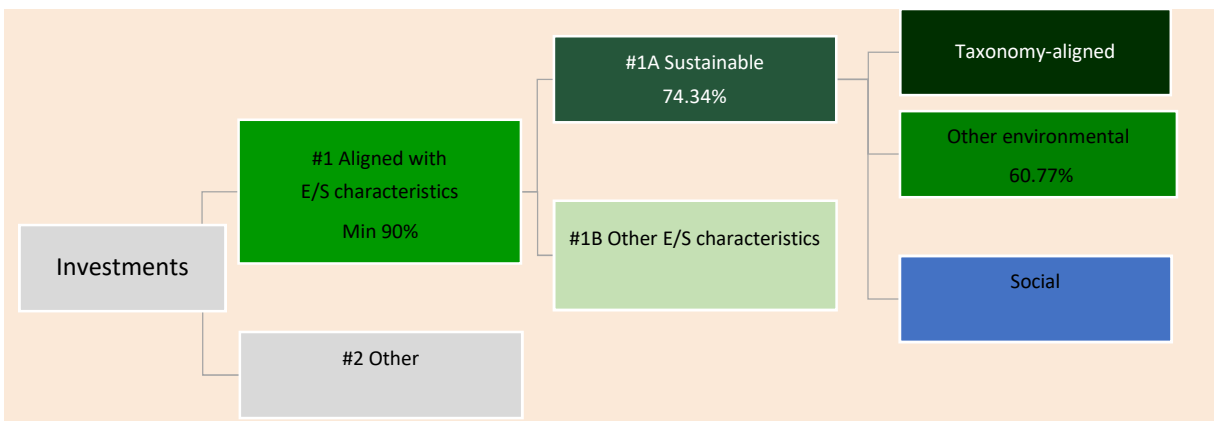

Largest Investments	Sector	% Assets	Country
ASML HOLDING NV	Semiconductors & Semiconductor Equipment	4.76 %	NLD

What was the proportion of sustainability-related investments?

● **What was the asset allocation?**

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

<i>Sector</i>	<i>% Assets</i>

Taxonomy-aligned activities are expressed as a share of:
-turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **60.77%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

MSCI EMU ESG UNIVERSAL SELECT is an equity index based on the MSCI EMU Index ("Parent Index"), representative of the large and mid- cap securities of the 10 developed countries in the European Economic and Monetary Union.

The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile.

The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI MSCI EUROPE ESG UNIVERSAL SELECT

Legal entity identifier:
213800RNWZ7POOYHT64

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **67.31%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Sub-Fund is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score	Coverage
30/11/2022	MSCI EUROPE ESG UNIVERSAL SELECT	8,3	100%
30/11/2022	MSCI EUROPE	7,9	100%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

Principal adverse impacts are the most significant negative

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

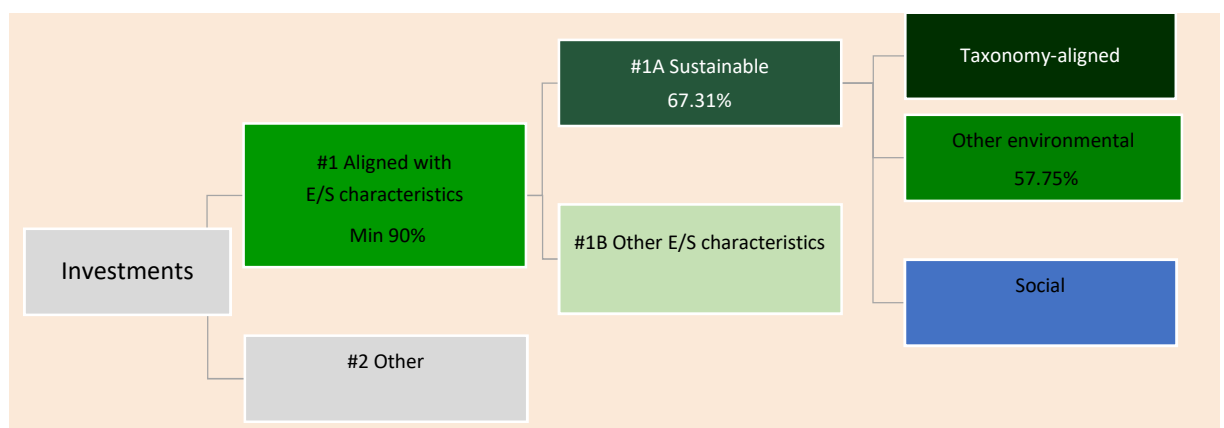

Largest Investments	Sector	% Assets	Country
NESTLE SA-REG	Food Products	5.24 %	USA
ASML HOLDING NV	Semiconductors & Semiconductor Equipment	2.95 %	NLD
ASTRAZENECA GBP	Pharmaceuticals	2.94 %	GBR
NOVO NORDISK A/S-B NEW	Pharmaceuticals	2.89 %	DNK
ROCHE HLDG AG-GENUSS	Pharmaceuticals	1.98 %	USA
HSBC HOLDING PLC GBP	Banks	1.81 %	GBR
UNILEVER PLC (GBP)	Personal Products	1.71 %	GBR
DIAGEO	Beverages	1.68 %	GBR
SAP SE	Software	1.47 %	DEU

LVMH MOET HENNESSY	Textiles, Apparel & Luxury Goods	1.42 %	FRA
SIEMENS AG-REG	Industrial Conglomerates	1.30 %	DEU
ALLIANZ SE-REG	Insurance	1.11 %	DEU
SCHNEIDER ELECT SE	Electrical Equipment	1.06 %	USA
ZURICH INSURANCE GROUP AG	Insurance	1.03 %	CHE

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Sector	% Assets
<i>Pharmaceuticals</i>	11.89 %

Taxonomy-aligned activities are expressed as a share of: -turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy is **57.75%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments?**

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

MSCI Europe ESG UNIVERSAL SELECT is an equity index based on the MSCI Europe Index ("Parent Index"), representative of the large and mid-cap securities of the 15 developed European countries.

The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile.

The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI MSCI USA ESG UNIVERSAL SELECT

Legal entity identifier:
213800XY19W8I3CI2K64

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **40.17%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Sub-Fund is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance ("ESG") rating.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score	Coverage
30/11/2022	MSCI USA ESG UNIVERSAL SELECT	7,0	100%
30/11/2022	MSCI USA	6,6	100%

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability

matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.

- Vote: Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- Controversies monitoring: Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

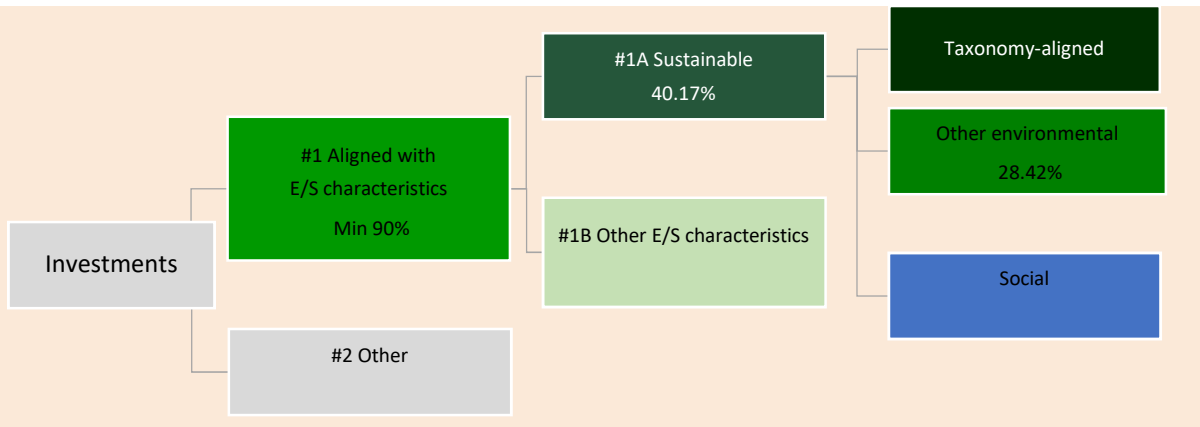

Largest Investments	Sector	% Assets	Country
APPLE INC	Technology Hardware, Storage & Peripherals	5.50 %	USA
MICROSOFT CORP	Software	5.03 %	USA

JOHNSON & JOHNSON	Pharmaceuticals	1.21 %	USA
JPMORGAN CHASE & CO	Banks	1.09 %	USA
CISCO SYSTEMS INC	Communications Equipment	0.94 %	USA
ACCENTURE PLC -A	IT Services	0.92 %	USA

What was the proportion of sustainability-related investments?

● **What was the asset allocation?**

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

● *In which economic sectors were the investments made?*

<i>Sector</i>	<i>% Assets</i>
<i>Software</i>	<i>10.15 %</i>
<i>Semiconductors & Semiconductor Equipment</i>	<i>6.66 %</i>

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

Taxonomy-aligned activities are expressed as a share of: **-turnover** reflecting the share of revenue from green activities of investee companies **-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy. **-operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

- **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **28.42%**
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**

Reference benchmarks are indexes to measure whether the financial product

attains the environmental or social characteristics that they promote.

MSCI USA ESG UNIVERSAL SELECT is an equity index based on the MSCI USA Index ("Parent Index"), representative of the large and mid- cap securities of the US market.

The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile.

The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI MSCI WORLD ESG UNIVERSAL SELECT

Legal entity identifier:
2138002DTNQGWIYKRV03

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes
 No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **46.84%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Sub-Fund is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Date	Index	ESG Score	Coverage
30/11/2022	MSCI WORLD ESG UNIVERSAL SELECT	7,4	100%
30/11/2022	MSCI WORLD	6,9	100%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

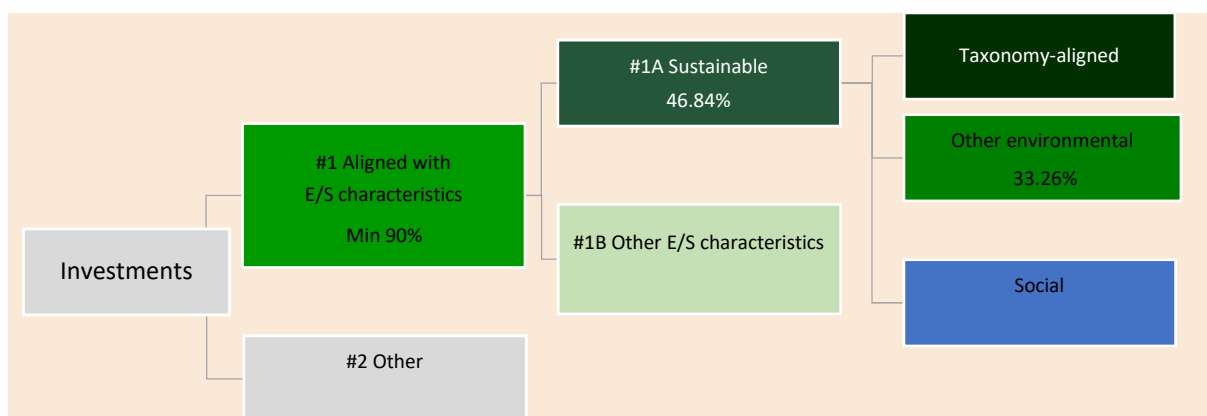

Largest Investments	Sector	% Assets	Country
MICROSOFT CORP	Software	5.13 %	USA
APPLE INC	Technology Hardware, Storage & Peripherals	4.89 %	USA
AMAZON.COM INC	Internet & Direct Marketing Retail	1.79 %	USA
TESLA INC	Automobiles	1.21 %	USA
NESTLE SA-REG	Food Products	1.06 %	USA

JPMORGAN CHASE & CO	Banks	0.69 %	USA
ASML HOLDING NV	Semiconductors & Semiconductor Equipment	0.60 %	NLD

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investment in sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment in financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

Taxonomy-aligned activities are expressed as a share of: **-turnover** reflecting the share of revenue from green activities of investee companies **-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy. **-operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not

yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **33.26%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

MSCI WORLD ESG UNIVERSAL SELECT is an equity index based on the MSCI World Index ("Parent Index"), representative of the large and mid-cap markets across 23 developed market countries.

The index aims to represent the performance of a strategy that increase the exposure compared to the Parent Index to companies with both a robust ESG profile as well as a positive trend in improving that ESG profile.

The methodology aims at adjusting the constituents' free-float market capitalisation weights based upon certain environmental, social and governance ("ESG") metrics.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI EURO CORP 0-1Y ESG

Legal entity identifier:
213800LLBNM6TDFBXD07

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes
 No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **53.53%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Weighted Avg ESG Score	Coverage
30/09/2022	iBoxx MSCI ESG EUR Corporates 0-1 TCA TRI	7,5	100%
30/09/2022	iBoxx € Corporates	7,3	95%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

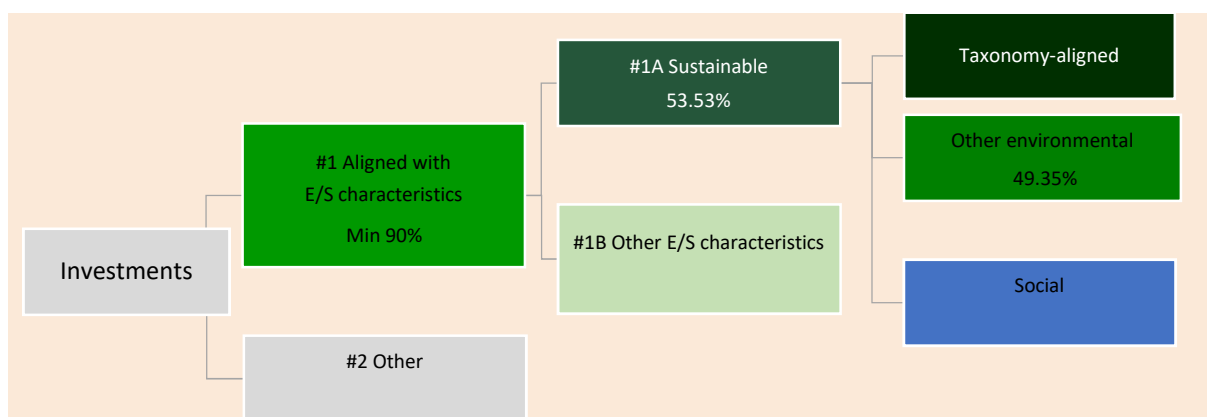

Largest Investments	Sector	% Assets	Country
UBS 0.75% 04/23 EMTN	BANKING	1.08 %	CHE

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

Taxonomy-aligned activities are expressed as a share of:
-turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy is **49.35%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments?**

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

● ***How does the reference benchmark differ from a broad market index?***

Iboxx MSCI ESG EUR Corporates 0-1 TCA Index is a bond index representative of euro-denominated, Investment Grade, fixed-rate bonds issued by private companies (known as 'corporate bonds') with a residual maturity ranging from 1 month to 1 year and applies additional sector and ESG criteria for security eligibility.

● ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

--	---

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The product have respected 100% of the characteristics described in the prospectus.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

At the end of the period, the MSCI ESG score of the index is **C+**

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

To ensure sustainable investments do no significant harm (‘DNSH’), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors’ diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi’s Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

- ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

- ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called “Community Involvement & Human Rights” which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability

matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.

- **Vote:** Amundi's voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi's Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi's funds.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **8.81%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- ***How does the reference benchmark differ from a broad market index?***
- ***How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI GLOBAL CORP SRI 1-5Y

Legal entity identifier:
222100AVKM1M7Q2EFT37

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **41.92%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

Index	ESG Score	Coverage
Bloomberg MSCI Global Corporate ESG Sustainability SRI 1-5 Year Index	A (MSCI ESG rating)	100%

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investment in financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy is **36.87%**
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments?**

This product does not commit to have social sustainable investments

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**
Bloomberg MSCI Global Corporate ESG Sustainability SRI 1-5 Year Index is a bond index comprising multi-currency fixed-rate, investment-grade corporate debt with between 1 and up to, but not including, 5 years remaining to maturity that applies sector and additional ESG criteria for security eligibility.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

Taxonomy-aligned activities are expressed as a share of:
-turnover reflecting the share of revenue from green activities of investee companies
-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
-operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.
Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy is **52.67%**
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments?**

This product does not commit to have social sustainable investments

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**
Bloomberg MSCI Euro Corporate ESG Sustainability SRI Index is a bond index, representative of the corporate fixed-rate investment grade Euro denominated securities, that follows the rules of the Bloomberg Euro Aggregate Corporate Index (the "Parent Index") and applies sector and additional ESG criteria for security eligibility.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI INDEX EURO AGG SRI

Legal entity identifier:
213800MNGINQA3GWTZ79

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes
 No

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **18.49%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● ***How did the sustainability indicators perform?***

At the end of the period, the MSCI ESG score of the index is **C+**

● ***... and compared to previous periods?***

The above sustainability indicators were not compared to previous periods as the regulation was not yet in force

● ***What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?***

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● ***How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?***

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

Taxonomy-aligned activities are expressed as a share of:

- turnover** reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **15.88%**
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI INDEX US CORP SRI

Legal entity identifier:
549300JEQE3CM0S0ZJ51

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **32.94%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	ESG Score	Coverage
30/09/2022	Bloomberg MSCI US Corporate ESG Sustainability SRI	6,9	100%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

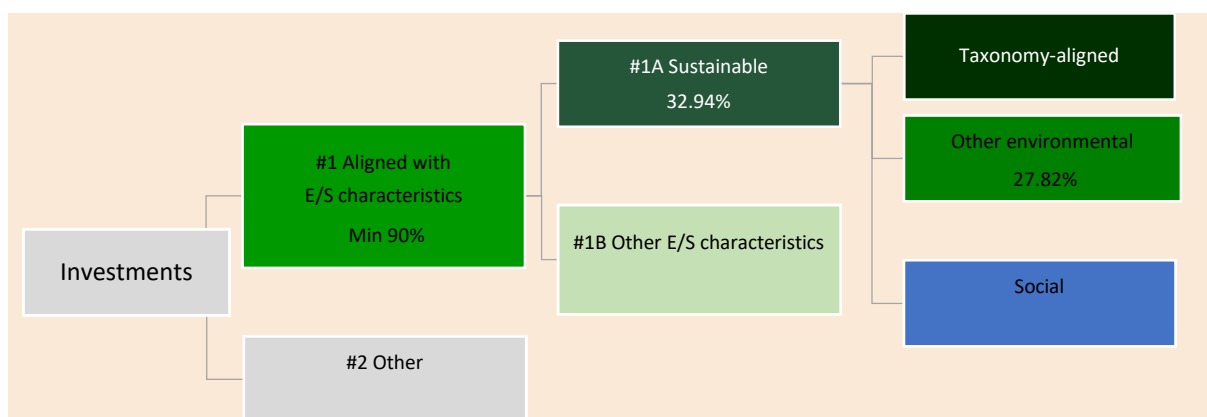

Largest Investments	Sector	% Assets	Country
AT&T 3.5% 09/53	COMMUNICATIONS	0.32 %	USA

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

Taxonomy-aligned activities are expressed as a share of: **-turnover** reflecting the share of revenue from green activities of investee companies **-capital expenditure (CapEx)** showing the green investments made by investee companies, e.g. for a transition to a green economy. **-operational expenditure (OpEx)** reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective. **Transitional activities** are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas

emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

 **What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?**

The share of sustainable investments with environmental objective not aligned to taxonomy is **27.82%**
This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

 **What was the share of socially sustainable investments?**

This product does not commit to have social sustainable investments

 **What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?**

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

- **How does the reference benchmark differ from a broad market index?**
Bloomberg MSCI US Corporate ESG Sustainability SRI Index is a bond index representative of the corporate fixed-rate, investment grade, USD denominated securities that follows the rules of the Bloomberg US Aggregate Corporate Index (the "Parent Index") and applies sector and additional ESG criteria for security eligibility.
- **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

- ***How did this financial product perform compared with the reference benchmark?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

- ***How did this financial product perform compared with the broad market index?***

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:

AMUNDI BBB EURO CORPORATE INVESTMENT GRADE ESG

Legal entity identifier:

549300YTYLJO4SGWFT69

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **59.1%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Index	ESG Score	Coverage
iBoxx MSCI ESG EUR Corporates BBB TCA Index	AAA (MSCI ESG rating)	100%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. 30/09/2022	iBoxx MSCI ESG EUR High Yield Corporates TCA TRI	6,74	100%
30/09/2022	iBoxx EUR High Yield cum-crossover	5,87	71%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds, first graph shows the Taxonomy alignment in relation to all the investments of the financial product, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Data not yet available

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

● What was the share of investments in transitional and enabling activities?

Reliable data regarding transitional and enabling activities was not available during the period.

● How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

are sustainable investments with an environmental objective that do not take into

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **46.43%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

account the criteria for environmentally sustainable economic activities under the EU Taxonomy.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

"#2 Other" includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

How does the reference benchmark differ from a broad market index?

iBoxx MSCI ESG EUR High Yield Corporates TCA Index is a bond index representative of euro-denominated BB/B rated bonds issued by corporate issuers that follows the rules of the iBoxx EUR High Yield TCA Index (the "Parent Index") and applies ESG criteria for security eligibility.

How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

How did this financial product perform compared with the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

How did this financial product perform compared with the broad market index?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI FLOATING RATE EURO CORPORATE ESG

Legal entity identifier:
5493006D311IM3Q4K364

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes **No**

It made **sustainable investments with an environmental objective**: ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective**: ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **55.96%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Weighted Avg ESG Score	Coverage

Taxonomy-aligned activities are expressed as a share of: **-turnover**

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **54.99%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

iBoxx MSCI ESG EUR FRN Investment Grade Corporates TCA Index is a bond index representative of euro-denominated investment grade floating rate note (FRN) bonds issued by corporate issuers from developed countries that follows the rules of the iBoxx EUR FRN Investment Grade Corporates TCA Index (the "Parent Index") and applies ESG criteria for security eligibility.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The **EU Taxonomy** is a classification system laid down in Regulation (EU) 2020/852, establishing a list of **environmentally sustainable economic activities**. That Regulation does not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Product name:
AMUNDI FLOATING RATE USD CORPORATE ESG

Legal entity identifier:
549300W6M26WPJCWRV83

Environmental and/or social characteristics

Does this financial product have a sustainable investment objective?

Yes No

It made **sustainable investments with an environmental objective:** ___%

in economic activities that qualify as environmentally sustainable under the EU Taxonomy

in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

It made a **sustainable investments with a social objective:** ___%

It **promotes Environmental/Social (E/S) characteristics** and while it did not have as its objective a sustainable investment, it had a proportion of **31.99%** of sustainable investments

with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy

with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy

with a social objective

It promotes E/S characteristics, but **will not make any sustainable investments**

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The investment objective of the Product is to track an Index, which is based on a Parent Index. At each of the Index rebalancing date, at least 20% of the Parent Index constituents were removed based on sustainability criteria, among others, an environmental, social and governance (“ESG”) rating.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

● **How did the sustainability indicators perform?**

Date	Index	Weighted Avg ESG Score	Coverage
30/09/2022	iBovx MSCI ESG USD FRN Investment Grade Corporates TCA EUR Hedged TRI	7,4	100%
30/09/2022	iBovx USD FRN Broad Investment Grade Corporates TCA	7,0	98%

● **... and compared to previous periods?**

The above sustainability indicators were not compared to previous in the previous periods as the regulation was not yet in force

● **What were the objectives of the sustainable investments that the financial product partially intends to make and how did the sustainable investment contribute to such objectives?**

The objectives of the sustainable investments were to invest in investee companies that seek to meet two criteria:

1. Follow best environmental and social practices; and
2. Avoid making products or providing services that harm the environment and society.

At the investee company level this means that an investee company must be a “best performer” within its sector of activity on at least one of its material environmental or social factors. The definition of “best performer” relies on Amundi’s proprietary ESG methodology which aims to measure the ESG performance of an investee company.

In order to be considered a “best performer”, an investee company must perform with the best top three rating (A, B or C, out of a rating scale going from A to G) within its sector on at least one material environmental or social factor. Material environmental and social factors are identified at a sector level. The identification of material factors is based on Amundi ESG analysis framework which combines extra-financial data and qualitative analysis of associated sector and sustainability themes. Factors identified as material result in a contribution of more than 10% to the overall ESG score.

Amundi considers the second criterion as met if the investee company does not have significant exposure to activities not compatible with such criteria (e.g. tobacco, weapons, gambling, coal, aviation, meat production, fertilizer and pesticide manufacturing, single-use plastic production).

Principal adverse impacts are the most significant negative

● **How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?**

impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

To ensure sustainable investments do no significant harm ('DNSH'), Amundi utilises two tests:

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules:

- Have a CO2 intensity which does not belong to the last decile compared to other companies within its sector (only applies to high intensity sectors)
- Have a Board of Directors' diversity which does not belong to the last decile compared to other companies within its sector
- Be cleared of any controversy in relation to work conditions and human rights
- Be cleared of any controversy in relation to biodiversity and pollution

Amundi already considers specific Principle Adverse Impacts within its exclusion policy as part of Amundi's Responsible Investment Policy. These exclusions, which apply on the top of the tests detailed above, cover the following topics: exclusions on controversial weapons, Violations of UN Global Compact principles, coal and tobacco.

Beyond the specific sustainability factors covered in the first test, Amundi has defined a second test in order to verify that the company does not badly perform from an overall environmental or social standpoint compared to other companies within its sector.

– ***How were the indicators for adverse impacts on sustainability factors taken into account?***

The first DNSH test relies on monitoring the mandatory Principal Adverse Impacts indicators where robust data is available via a combination of indicators and specific thresholds or rules as described above.

– ***Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:***

Yes, the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights are integrated into our ESG scoring methodology. Our proprietary ESG rating tool assesses issuers using available data from our data providers. For example the model has a dedicated criteria called "Community Involvement & Human Rights" which is applied to all sectors in addition to other human rights linked criteria including socially responsible supply chains, working conditions, and labor relations. Furthermore, we conduct controversy monitoring on a, at minimum, quarterly basis which includes companies identified for human rights violations. When controversies arise, analysts evaluate the situation and apply a score to the controversy (using our proprietary scoring methodology) and determine the best course of action. Controversy scores are updated quarterly to track the trend and remediation efforts.

The EU Taxonomy sets out a “do not significant harm” principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific EU criteria.

The “do no significant harm” principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

Amundi considers all the mandatory Principal Adverse Impacts applying to the Product’s strategy and relies on a combination of exclusion policies (normative and sectorial), engagement and voting approaches:

- **Exclusion:** Amundi has defined normative, activity-based and sector-based exclusion rules covering some of the key adverse sustainability indicators listed by the Disclosure Regulation.
- **Engagement:** Engagement is a continuous and purpose driven process aimed at influencing the activities or behaviour of investee companies. The aim of engagement activities can fall into two categories : to engage an issuer to improve the way it integrates the environmental and social dimension, to engage an issuer to improve its impact on environmental, social, and human rights-related or other sustainability matters that are material to society and the global economy. This approach applies to all of Amundi products. In 2021, Amundi has engaged with 1364 companies.
- **Vote:** Amundi’s voting policy responds to an holistic analysis of all the long-term issues that may influence value creation, including material ESG issues. For more information please refer to Amundi’s Voting Policy . This approach applies by default to all of Amundi products. In 2021, Amundi has voted 4 008 companies.
- **Controversies monitoring:** Amundi has developed a controversy tracking system that relies on three data providers to systematically track controversies and their level of severity. This quantitative approach is then enriched with an in-depth assessment of each severe controversy, led by ESG analysts and the periodic review of its evolution. This approach applies to all of Amundi’s funds.

What were the top investments of this financial product?

The list includes the investments constituting the **greatest proportion of investments** of the financial product during the reference period which is: **From 01/10/2021 to 30/09/2022**

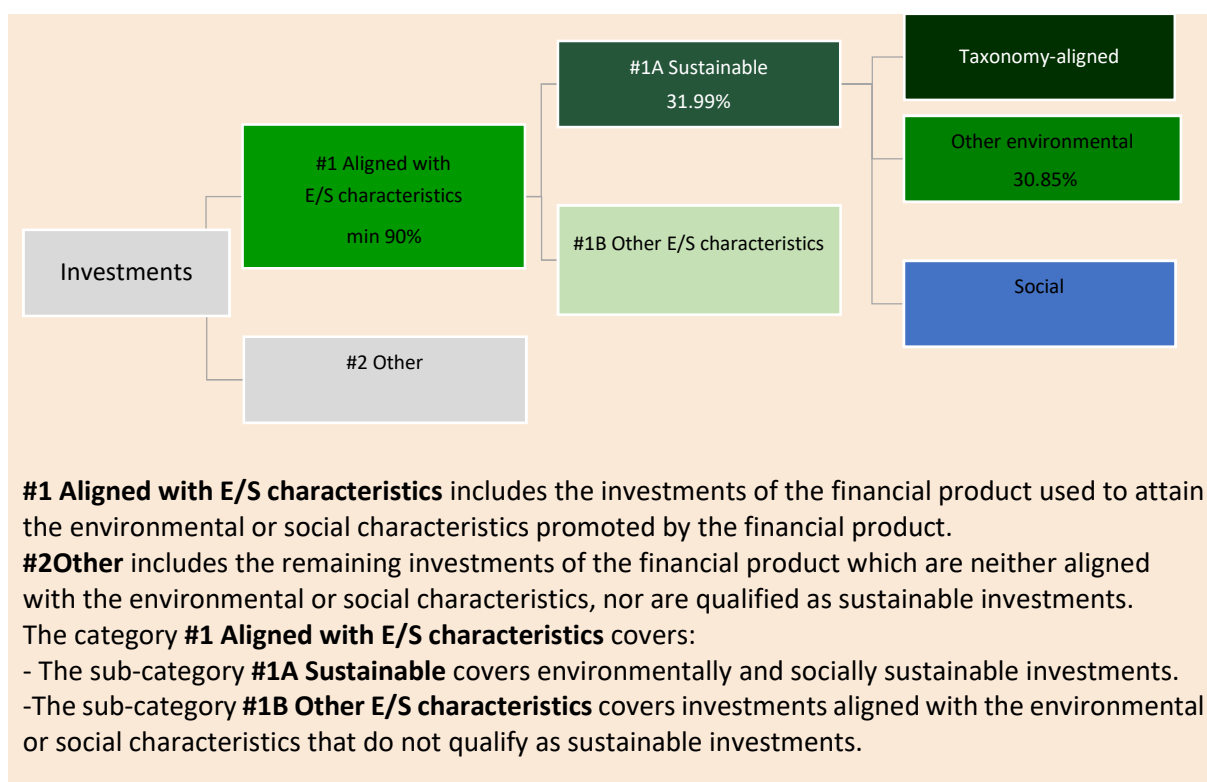

Largest Investments	Sector	% Assets	Country
MS 2.28178% 10/23	BANKING	1.39 %	USA
HSBC FRN 05/24	BANKING	1.32 %	GBR
VZ FRN 05/25	COMMUNICATIONS	1.09 %	USA
MUFG FRN 07/23	BANKING	1.08 %	JPN
AT&T FRN 06/24	COMMUNICATIONS	0.99 %	USA
CBAAU FRN 07/25 REGS	BANKING	0.97 %	AUS
BACR FRN 05/24	BANKING	0.97 %	GBR
TFC FRN 01/24 BKNT	BANKING	0.96 %	USA
BAC FRN 02/26 MTN	BANKING	0.95 %	USA
BNS FRN 09/23 *	BANKING	0.94 %	CAN
BMO FRN 03/23 MTN	BANKING	0.90 %	CAN
MS FRN 5/24	BANKING	0.82 %	USA
SCHW FRN 03/24	BROKERAGE	0.81 %	USA
CM FRN 03/23 *	BANKING	0.81 %	CAN
ATO FRN 03/23	NATURAL_GAS	0.74 %	USA

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

In which economic sectors were the investments made?

Sector	% Assets
--------	----------

<i>BANKING</i>	69.42 %
<i>CONSUMER_CYCLICAL</i>	7.49 %
<i>CONSUMER_NON_CYCLICAL</i>	4.17 %
<i>CAPITAL_GOODS</i>	3.99 %
<i>COMMUNICATIONS</i>	3.80 %
<i>INSURANCE</i>	1.86 %
<i>ELECTRIC</i>	1.44 %
<i>BROKERAGE</i>	1.39 %
<i>NATURAL_GAS</i>	1.39 %
<i>FINANCE_COMPANIES</i>	0.69 %
<i>TECHNOLOGY</i>	0.67 %
<i>ENERGY</i>	0.63 %
<i>TRANSPORTATION</i>	0.31 %
<i>BASIC_INDUSTRY</i>	0.22 %
<i>Other</i>	0.00 %
<i>Cash</i>	2.52 %

Taxonomy-aligned activities are expressed as a share of: -turnover

To what extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Reliable data regarding the EU Taxonomy was not available during the period

reflecting the share of revenue from green activities of investee companies

-capital expenditure (CapEx) showing the green investments made by investee companies, e.g. for a transition to a green economy.
- operational expenditure (OpEx) reflecting green operational activities of investee companies.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

 are sustainable investments with an environmental objective that **do not take into account the criteria** for environmentally sustainable economic activities under the EU Taxonomy.

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign first graph shows the Taxonomy alignment in relation to all the investments of the financial product sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investment financial product other than sovereign bonds.

Data not yet available

** For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures*

● **What was the share of investments in transitional and enabling activities?**

Reliable data regarding transitional and enabling activities was not available during the period.

● **How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?**

Reliable data regarding EU Taxonomy was not available during on the previous reference periods

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with environmental objective not aligned to taxonomy is **30.85%**

This is due to the fact that some issuers are considered sustainable investments under the SFDR Regulation but do have a portion of activities that are not aligned with EU taxonomy standards, or for which data is not yet available to perform an EU taxonomy assessment.

What was the share of socially sustainable investments?

This product does not commit to have social sustainable investments

What investments were included under “other”, what was their purpose and were there any minimum environmental or social safeguards?

“#2 Other” includes cash and unrated instruments held for the purpose of liquidity and portfolio risk management. There were no minimum environmental or social safeguards in place for these investments

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. Binding elements in the Index methodology ensure environmental and/or social characteristics are met at each rebalancing date. The Product strategy is also relying on systematic exclusions policies (normative and sectorial) as further described in Amundi Responsible Investment policy .

How did this financial product perform compared to the reference benchmark?

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error.

● **How does the reference benchmark differ from a broad market index?**

iBoxx MSCI ESG USD FRN Investment Grade Corporates TCA Index is a bond index representative of USD denominated investment grade floating rate note (FRN) bonds issued by corporate issuers from developed countries that follows the rules of the iBoxx USD FRN Investment Grade Corporates TCA Index (the "Parent Index") and applies ESG criteria for security eligibility.

● **How did this financial product perform with regard to the sustainability indicators to determine the alignment of the reference benchmark with the environmental or social characteristics promoted?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index

● **How did this financial product perform compared with the reference benchmark?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. As a result, the sustainability indicators of the Product performed overall in line with the ones of the Index.

● **How did this financial product perform compared with the broad market index?**

This product is passively managed. Its investment strategy is to replicate the Index while minimizing the related tracking error. A comparison of the Index replicated by the Sub Fund vs its Parent index has already been detailed on section How did the sustainability indicators perform?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.
