DIRECTORS' REPORT

Directors' Report for the financial year ended 31 December 2023

The Directors of the ICAV present herewith their annual report together with the audited financial statements for the financial year ended 31 December 2023 ("the financial year ended 31 December 2023").

The financial statements of the ICAV have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union and Irish statute comprising the Irish Collective Assetmanagement Vehicles Act 2015 (the "ICAV Act") and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 as amended by European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 as may be amended or replaced (the "UCITS Regulations").

Statement of Directors' Responsibilities

The Directors are responsible for preparing the annual report and the ICAV's financial statements in accordance with IFRS as adopted by the European Union, with the Irish Collective Asset-Management Vehicle Act 2015 (the "ICAV Act") and the UCITS Regulations.

The ICAV Act requires the Directors to prepare financial statements for each financial period which give a true and fair view of the assets and liabilities and financial position of the ICAV and of the profit or loss of the ICAV for that period and to otherwise comply with the ICAV Act. In preparing these financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with IFRS as adopted by the European Union and ensure that they contain the additional information required by the ICAV Act; and
- prepare the financial statements on the going concern basis unless it is inappropriate to presume that the ICAV will continue in business.

The Directors are responsible for ensuring the maintenance of adequate accounting records which correctly explain and record the transactions of the ICAV, enable at any time the assets, liabilities, financial position and profit or loss of the ICAV and its Funds to be determined with reasonable accuracy, enable them to ensure that the financial statements and Directors' Report comply with the ICAV Act and enable the financial statements to be audited in accordance with IFRS as adopted by the European Union, the ICAV Act and the UCITS Regulations. The accounting records are kept by State Street Fund Services (Ireland) Limited (the "Administrator"), at 78 Sir John Rogerson's Quay, Dublin 2, Ireland. The Directors believe that they have complied with the requirement with regard to adequate accounting records by employing an experienced Administrator with appropriate expertise and adequate resources. The Directors are responsible for safeguarding the assets of the ICAV. In this regard, they have entrusted the assets of the ICAV to State Street Custodial Services (Ireland) Limited who has been appointed as Depositary to the ICAV pursuant to the terms of a Depositary Agreement in accordance with the requirements of the UCITS Regulations. The Directors have a general responsibility for taking such steps as are reasonably open to them to prevent and detect fraud and other irregularities.

The Directors are responsible for ensuring that the financial statements are published to investors in a durable medium that ensures the integrity of the financial information on the website. The financial statements are available on www.axa-im.com.

Transactions with connected persons

Regulation 43 of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations") requires that any transaction between a UCITS and a connected person is conducted at arm's length and be in the best interests of the shareholders of the UCITS entity.

DIRECTORS' REPORT (continued)

Transactions with connected persons (continued)

For the purpose of Regulation 42 of the Central Bank UCITS Regulations, a "connected person" means the management company, administrator or depositary to a UCITS; and the delegates, or sub-delegates of such a management company, administrator or depositary (excluding any non-group company sub-custodians appointed by a depositary); and any associated or group company of such a management company, administrator, depositary, delegate or sub-delegate.

The Directors are satisfied that (i) there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with a connected party (as defined in Regulation 42 of the Central Bank UCITS Regulations) and (ii) all transactions with connected parties entered into during the period to which the report relates complied with the obligations that are prescribed by Regulation 43(1) of the Central Bank UCITS Regulations.

Statement of Compliance on Corporate Governance

The ICAV has adopted in full the voluntary Corporate Governance Code for Investment Funds and Management Companies (the "Code") as published by the Irish Funds, the text of which is available from the Irish Funds website, www.irishfunds.ie. The ICAV has been fully compliant with the Code for the financial year ended 31 December 2023.

Distributions

There were no distributions during the financial year ended 31 December 2023 (2022: None).

Business Review, Results and Future Developments

The results of operations for the financial year are set out in the Statement of Comprehensive Income. A detailed review of the development of the business and future developments is included in the Manager's Report on pages 8 to 15. The Directors do not anticipate any significant change in the structure or investment objective of the Funds.

Risk Management Objectives and Policies

Details of the ICAV's risk management objectives and policies are included in Note 11 to the financial statements.

Key Performance Indicators

The Directors consider that the change in NAV per share of each share class are key indicators of the performance of each Fund of the ICAV.

Future Developments

Please see the Outlook sections in the Manager's Report for information of likely future developments in the business of the ICAV.

Employees

The ICAV had no employees during the financial year ended 31 December 2023 (2022: None).

Significant events during the financial year

The following Funds and Share Classes launched during the financial year ended 31 December 2023:

- AXA IM US High Yield Opportunities UCITS ETF (launched on 5 December 2023)
 - o Class A (USD)
- AXA IM MSCI USA Equity PAB UCITS ETF (launched on 20 November 2023)
 - o Class A (USD)
- AXA IM USD Credit PAB UCITS ETF (launched on 30 October 2023)
 - o Class A (USD)
- AXA IM Euro Credit PAB UCITS ETF (launched on 11 July 2023)
 - o Class A (EUR)

DIRECTORS' REPORT (continued)

Significant events since the financial year end

- AXA IM MSCI Europe Equity PAB UCITS ETF (launched on 18 January 2024)
 - Class A (EUR)

There were no other significant events after the financial year ended 31 December 2023 that have an impact on these financial statements.

Directors

The names of persons who served as Directors for the full financial year ended 31 December 2023, unless otherwise stated, are set out below:

- Fiona Mulcahy*
- Kevin O'Brien*
- Ouajnat Karim (appointed on 23 January 2023)
- Jean-Louis Laforge (appointed on 25 January 2023)

Secretary

Tudor Trust Limited was appointed secretary on incorporation of the ICAV.

Directors and ICAV's Secretary's interest in shares and contracts

The Directors of the ICAV, the ICAV's Secretary and their families had no beneficial interest in the shares of the ICAV at 31 December 2023. None of the Directors has or has had any direct interest in the promotion of the ICAV or in any transaction effected by the ICAV which is unusual in its nature or conditions or is significant to the business of the ICAV or in any contracts or arrangements of the ICAV other than:

- Jean-Louis Laforge is an executive officer of and also an employee of the Manager and is Director of a number of Irish investment funds managed by the Manager or its affiliates.
- Kevin O'Brien is Director of a number of Irish investment funds managed by the Manager or its affiliates.
- Fiona Mulcahy is Director of one other Irish investment fund managed by the Manager or its affiliates.
- Ouajnat Karim is an employee of the Manager and is Director of a number of Irish investment funds managed by the Manager or its affiliates.

No present Director or any connected person has any interests beneficial or non-beneficial in the share capital of the ICAV.

Independent auditors

PricewaterhouseCoopers will resign as auditors in advance of the 31 December 2024 Annual Report and Financial Statements. A new Independent auditor will be engaged in due course.

On behalf of the Board of Directors

Director

25 April 2024

^{*} Independent Non-Executive Director.

REPORT OF THE DEPOSITARY TO THE SHAREHOLDERS

We have enquired into the conduct of AXA IM ETF ICAV ('the ICAV') for the financial year ended 31 December 2023, in our capacity as Depositary to the ICAV.

This report including the opinion has been prepared for and solely for the shareholders in the ICAV as a body, in accordance with Regulation 34, (1), (3) and (4) in Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the ICAV in each annual accounting period and report thereon to the shareholders.

Our report shall state whether, in our opinion, the ICAV has been managed in that period in accordance with the provisions of the ICAV's Instrument of Incorporation and the UCITS Regulations. It is the overall responsibility of the ICAV to comply with these provisions. If the ICAV has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Regulation 34, (1), (3) and (4) in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the ICAV has been managed (i) in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the ICAV's Instrument of Incorporation and the UCITS Regulations and (ii) otherwise in accordance with the ICAV's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the ICAV has been managed during the year, in all material respects:

- i. in accordance with the limitations imposed on the investment and borrowing powers of the ICAV by the Instrument of Incorporation, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and
- ii. otherwise in accordance with the provisions of the Instrument of Incorporation, the UCITS Regulations and the Central Bank UCITS Regulations.

MANAGER'S REPORT

2023 Global Economic and Market Overview

Financial Market Conditions

Although inflation peaked in 2022, 2023 started with central banks continuing the process of sharp monetary policy tightening in most jurisdictions as policy makers feared inflation persistence and second-round inflation effects after the price shocks of 2022. Tighter monetary policy added to headwinds to economic activity, although activity varied in different regions depending on idiosyncratic conditions. Inflation rates continued to soften, although remained above central bank target levels in most regions. Central banks reached what appeared to be peaks in the policy rate cycle, with some emerging market central banks beginning to loosen policy. A sharp monetary tightening led to a number of small bank failures in the US in March, but fallout was contained. Global activity continued despite a terrorist attack on Israel and Israel's retaliation on the terrorist group Hamas in Gaza, which increased global uncertainty even as events remained localised into year-end.

In Europe, inflation fell sharply from 9.2% at the end of 2022, to 2.9% at the end of 2023, although core measures of inflation saw less of an improvement, closing 2023 at 3.4% (from 5.2% end-2022). The sharp fall in inflation reflected an improvement in supply conditions, including a re-routing of energy supplies and a fall in global energy prices, and an improvement in global supply-chains as the global economy continued to recover from the pandemic. However, it also reflected a material weakening in economic activity across the region, the economy avoiding technical recession with modest 0.1% per quarter growth in each quarter of the first half of 2023, before contracting again by 0.1% in Q3 and stagnating in Q4. Activity diverged somewhat across the currency union with Germany the weakest performer since Q1 2022, in part reflecting the importance of Russian energy supplies to its large industrial complex, and Italy also reflecting its larger industrial composition. Spain was the clear outperformer, in part reflecting less change to energy supply and a greater service sector composition. The ECB continued to raise its key deposit rate to 4.00% in September (from 2.00% end-2022), which is expected to be the peak rate.

The US experienced relatively resilient growth across 2023 even as the Federal Reserve continued to tighten policy and inflation eased. The economy expanded a little above trend the first half ("H1") of 2023 (2.2% average annualised pace) before posting strong, consumer driven surges of 4.9% and 3.4% (annualised) in Q3 and Q4 2023. Growth was supported by healthy consumer balance sheets, in part still benefiting from previous year's COVID fiscal stimulus, fresh incentives for private investment and structural improvements to the labour supply, including increased participation and immigration. Despite still solid growth, labour market imbalances continued to unwind helping inflation continue to fall to reach 3.4% in December (from 6.5% end-2022), with core prices also falling back to 3.9% from 5.7%. The Federal Reserve (Fed) continued to tighten policy across 2023, although slowing the pace of tightening from the second half ("H2") of 2022. It raised the Fed Funds Target range to 5.25-5.50% in July (from 4.25-4.50% end-2022), with official communication stating that Fed members considered rates to be "at or near" their peak.

In Asia, China dominated concerns. A surprisingly abrupt end to the "Zero Covid" policy at the end of 2022 contributed to a strong 2.3% expansion of the economy in Q1 2023 as the economy "reopened". However, with households emerging from the pandemic with weaker balance sheets than Western counterparts and with related, ongoing difficulties in the important housing sector, activity was unable to sustain this sharp growth, posting a weak 0.5% in Q2, before picking up again in Q3 to 1.5% and slowing at 1% in Q4. Government intervention increased in August with some easing in monetary policy, but a more substantive increase in fiscal support, including an unusual mid-year adjustment to the central government deficit target. This looks to have supported annual growth in China to the government's target of "around 5%". Japan also benefited from a belated easing of COVID restrictions and a rebound in tourism. The Japanese economy expanded by 1% in each of the first two quarters of 2023, before contracting by 0.8% in Q3 and stabilising at 0.1% in Q4. Inflation ended 2022 at 4.0% and peaked at 4.3% in January 2023 – its highest rate in 42 years. Inflation retreated to 2.6% in December. The Bank of Japan had set in place a number of adjustments to its yield curve control (YCC) policy across 2023, effectively ending it and allowing longer-term rates to rise, but there was still no change to its negative policy rate with the overnight call rate remaining at -0.1%.

Financial Markets

Bond yields rose for most of the year as central bank rate expectations rose over the first half of the year to be supplanted by concerns of policy remaining higher for longer – a sentiment which peaked over the summer before expectations of central bank rate cuts saw bonds rally and yields fall sharply to year-end. Over the same period equity markets performance was resilient in the face of rising yield expectations, spurred by solid corporate earnings, and then also rallied as yields fell sharply towards year-end. Credit markets were broadly stable over most of the year, with the exception around the banking turmoil in H1, before spreads tightened into year-end. Volatility measures illustrated the divergence across asset classes, falling across the course of the year for equities, but remaining elevated for bonds.

The MSCI AC World index rallied by 20.1% across the course of 2023, recovering the losses from the previous year. In broad terms, this was reflected in most large indices. The US S&P 500 index saw an even stronger 24.2% rise over the course of the year, although much of the S&P performance was concentrated in mega tech firms. By comparison, the Euro Stoxx 50 index underperformed the S&P, up 19.2% across the course of the year. This reflected divergent performances across other European bourses, with the German Dax and Spanish IBEX 35 indices rising 20.3% and 22.8% respectively on the year, an outperforming Italian MIB index, up 28.0% and an underperforming French CAC 40, up only 16.5%. The Japanese TOPIX index gained the most with a 25.1% rise over the course of 2023. However, China's Shanghai Composite posted a drop of 11.4% as concerns around the economy and government intervention continued to weigh. (N.B. single-country indices excluding dividends).

US bond market developments captured global attention in 2023, although in the first half of the year, 10-year UST yields were broadly steady between 3.50-3.75%, with yields falling sharply around the time of the SVB bank failure in March. Yields then rose sharply over the summer to reach 5% at their peak in October, only to fall back precipitously into year-end and close the year below 4% and a mere 3bps higher than their 2022 close. In Europe, bond volatility was also higher in the first few months of the year as markets focused on the ECB outlook. After the US bank failures (and Credit Suisse rescue) European yields fell back sharply. They subsequently gradually rose from this point with the German 10-year bund yield reaching a peak in October close to 3.00%, before falling back in line with global yields and closing the year at 2.03%, 56bps lower than end-2022. In general, other sovereign issuers outperformed the German Bund market over the year. Japan government bond yields were impacted sharply by changes to the Bank of Japan's yield curve control adjustments that started at the back end of 2022. Yields jumped towards 0.50% from 0.25% after the late-2022 tweak to BoJ policy and again in July after further adjustment. This paved the way for a rise in yields close to 1% at the start of November before yields followed the international pattern and reversed sharply into year-end and thus closing the year at 0.62%, 21bps higher than the close of 2022.

Credit markets had already recovered from a material repricing by the end of 2022. Across 2023, other than the period around the bank problems in March, spreads were stable over the year and even drifted tighter into year-end. In the US, investment grade (IG) corporate debt closed the year with spreads indicated at 104bps – the tightest since January 2022. US high yield (HY) spreads were also tighter by 30bps to close at 334bps. The picture was similar in Europe, IG debt down 19bps on the year, the spread at 135bps, the lowest since April 2022 and HY debt closed 2023 at 395bps, down 20bps on the year and the tightest since February 2022.

Outlook

Following resilient growth across many economies in 2023, we expect softer growth in 2024. We characterise this more as a mid-cycle adjustment. Inflation has come down sharply in most jurisdictions, primarily as energy, food and consumer goods prices have adjusted. Core prices have been slower to fall. Most should see continued disinflation across 2024, but only reach target in 2025. Central banks should be able to start to ease monetary policy by the summer.

2024 is a key political year with around two billion voters going to the polls. The US Presidential Elections in November are likely to be most consequential globally.

Key for financial markets will be the speed and timing of rate cuts. Markets are currently hopeful that the US will engineer a soft-landing allowing Fed to cut rates fast. There are 2 risks – either US activity does not slow enough to allow rate cuts or there is a hard landing in which case the Federal Reserve will need to cut rates fast.

Outlook (continued)

Equity markets were supported by better-than-expected economic growth in 2023 but most of the returns were driven by multiple expansion which cannot continue indefinitely and so earnings growth is needed. Consensus is for between 5 to 10% EPS growth in 2024 driven by Financials, Technology and Healthcare which added to dividend growth should support modest equity gains in 2024.

Equities 2024 Outlook

Peak rates and peak inflation continued to act as a powerful tailwind to markets with many markets reaching all-time highs.

Valuations do not give strong signals either way but falling bond yields are a clear support. EPS estimates for 2024 are improving gradually, consensus now expects 10-12% EPS growth. The US remains expensive compared to all other regions, but the recent rally saw breadth expand and more cyclical markets and sectors participating.

Sentiment has turned much more bullish so it would seem to us that a lot of good news and performance is being pulled forward. Consolidation at these levels would be healthy.

Credit 2024 Outlook

Credit markets (IG and HY) have seen a huge amount of investor support of late and spreads have fallen to levels that equate with periods where Central Banks were actively purchasing securities. The anticipation of a smooth normalization of policy rates as inflation has fallen and has pushed investors to increase risk at relatively rich levels. There is little wiggle room out there should either stronger growth derail interest rate cuts or even weaker growth impact risk appetite. After a good year where spreads buoyed fixed income portfolio returns, we turn more cautious.

AXA IM ACT Biodiversity Equity UCITS ETF

Fund's Performance

As a reminder, the investment objective of the Fund is to seek long-term capital growth from an actively managed portfolio of sustainable investments comprising listed equity and equity-related securities, including companies that are acting positively for biodiversity by reducing and/or limiting the negative impact of human activities on Biodiversity.

The Fund is an actively managed exchange traded fund (ETF). The Fund does not seek to replicate the performance of a specified index but does reference the MSCI AC World Total Return Net (the "Performance Benchmark") for comparative purposes only.

The Fund has been launched in 2022 and has increased by 13.85% over the last year compared to a rise in the benchmark of 22.2%.

The Fund underperformed its benchmark over the period due mainly to a poor stock selection; in particular, IDIA, Agilent Technologies and Darling were the biggest detractors' names in 2023.

In terms of performance, USD Acc share class gained 15.74% net since launch while its benchmark delivered a positive performance of 21.29% leading to a 5.55% underperformance for the Fund.

Also, the EUR Hedged Acc share class had a performance of +17.29% net whereas the benchmark gained +28.17% since its launch.

The Fund is now listed on Xetra (Germany), on Borsa Italiana (Italy) and SIX (Switzerland).

AXA IM ACT Climate Equity UCITS ETF

Fund's Performance

The investment objective of the Fund is to seek long-term capital growth from an actively managed portfolio comprising listed equity and equity-related securities, including companies that are acting positively for the climate by reducing and/or limiting the impact of global warming on economies and societies.

The Fund is an actively managed exchange traded fund (ETF). The Fund does not seek to replicate the performance of a specified index but does reference the MSCI AC World Total Return Net (the "Performance Benchmark") for comparative purposes only.

The Fund has been launched in 2022 and has increased by 18.96% over the last year compared to a rise in the benchmark of 22.2%.

The Fund underperformed its benchmark over the period due mainly to a poor stock selection; in particular SolarEdge, Darling Ingredients and Albermarle were the biggest detractors' names in 2023.

In terms of performance, USD Acc share class gained 32.26% net since launch in line with its benchmark (+32.54% over the period).

Also, the EUR Hedged Acc share class had a performance of +30.25% net whereas the benchmark gained +32.8% since launch.

The Fund is now listed on Xetra (Germany), on Borsa Italiana (Italy) and SIX (Switzerland).

AXA IM NASDAQ 100 UCITS ETF

Fund's Performance

The Fund is an index fund (passively managed), and its investment policy consists of creating a portfolio that seeks to replicate the benchmark NASDAQ 100 as closely as possible.

The Fund intends to replicate the constituents of the Index by holding all the securities comprising the Index in generally the same proportions as they are held in the Index.

The Fund has been launched in 2022 with only one share class (USD Acc - IE000QDFFK00).

As of December 31 December 2023, the Fund had an impressive performance net of fees of +54.67% while its benchmark had a net performance of +55.13% in 2023.

Tracking Error is at 0.02% YtD.

The Fund is now listed on Xetra (Germany), Borsa Italiana, SIX (Switzerland) and BIVA (Mexico).

AXA IM US High Yield Opportunities UCITS ETF

Fund's Performance

The investment objective of the Fund is to seek high income and long-term growth in USD from an actively managed portfolio of high yield bonds.

The Fund is actively managed in reference to the ICE® BofA® US High Yield Index (the "Benchmark") in order to capture opportunities in the US high yield bond market.

The Fund invests in high yield corporate bonds that are mainly issued by US companies and denominated in USD, such as fixed rate bonds, floating rate bonds, convertible bonds not including contingent convertible bonds, callable bonds and perpetual bonds. The Fund may also invest in 144A securities where considered to offer the best opportunity for the Fund, and may be fully invested in these securities. The decision to buy or sell securities is also based on other analysis criteria of the Investment Manager. As part of the investment process, the Fund will invest at least 90% in securities which are components of the Benchmark excluding cash and cash equivalent (the Initial Investment Universe). While the Investment Manager has the discretion when selecting the portfolio holdings to ensure that their characteristics are consistent with its convictions, the Fund is restricted in the extent to which its portfolio holdings can deviate from those of the Benchmark as it widely forms the Initial Investment Universe. Such deviation from the Benchmark is expected to be limited.

The Fund, which is actively managed, has been launched in December 2023 but it already delivered a positive performance of 3.15% ahead of its benchmark, which posted a performance of +3.03% over the period.

The Fund is already listed on Xetra (Germany), on Borsa Italiana (Italy) and SIX (Switzerland).

Fund's Performance

The Fund is passively managed and will apply a physical replication. The Fund will seek to achieve its investment objective by investing in large and mid - capitalisation equity securities listed or traded on US equity markets that as far as possible and practicable consist of the constituent securities of the Index (MSCI USA Climate Paris Aligned Benchmark).

The Fund has been launched in Q4 2023 with only one share class (USD Acc - IE000AXIKJM8).

As of 31 December 2023, the Fund had a performance of 5.83% net of fees in line with its benchmark (+5.81%) over the period.

Tracking Error is at 0.03% since launch.

The Fund is already listed on Xetra (Germany), on Borsa Italiana (Italy) and SIX (Switzerland).

Fund's Performance

The investment objective of the Fund is to seek long-term capital growth from an actively managed portfolio of USD denominated investment grade corporate debt securities issued in the US domestic market while maintaining a decarbonization trajectory aligned with the carbon emissions of the ICE® US Corporate Paris-Aligned Absolute Emissions Index (the Benchmark), to outperform over the long-term the financial performance net of management fees of the Benchmark and to have absolute carbon emissions less than/equal to the Benchmark.

The Fund, which is actively managed, has been launched during the last Quarter of 2023 and has increased by 9.59% since launch ahead of its benchmark, which increased by 9.21% during the same period.

The Fund has been listed on Xetra (Germany), on Borsa Italiana (Italy) and SIX (Switzerland).

Fund's Performance

The investment objective of the Fund is to seek long-term capital growth from an actively managed portfolio of investment grade Euro denominated corporate debt securities while maintaining a decarbonization strategy aligned with the carbon emissions of the ICE BofA Euro Corporate Index Paris Aligned.

The Fund is actively managed and references the ICE Bofa Euro Corporate Index Paris Aligned (Absolute Emissions) for comparative purposes only. The Manager has full discretion over the composition of the portfolio of the Fund. However, the Fund invests at least 90% of net assets in investment grade, EUR denominated, fixed and floating rate debt securities that are issued by companies that are component securities of the Benchmark.

The Fund, which is the first Active Fixed income launched by AXA-IM, has been launched in 2023 and has increased by 6.4% in line with its benchmark (6.41%).

The Fund has been listed on Xetra (Germany), on Borsa Italiana (Italy) and SIX (Switzerland).

AXA Investment Managers Paris

Independent auditors' report to the shareholders of the Funds of AXA IM ETF ICAV

Report on the audit of the financial statements

Opinion

In our opinion, AXA IM ETF ICAV's financial statements:

- give a true and fair view of the Funds' assets, liabilities and financial position as at 31 December 2023 and of their results and cash flows for the year then ended;
- have been properly prepared in accordance with International Financial Reporting Standards ("IFRSs") as adopted by the European Union; and
- have been properly prepared in accordance with the requirements of the Irish Collective Asset-management Vehicles Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the Annual Report and Audited Financial Statements, which comprise:

- the Statement of Financial Position as at 31 December 2023;
- the Statement of Comprehensive Income for the year then ended;
- the Statement of Cash Flows for the year then ended;
- the Statement of Changes in Net Assets Attributable to Holders of Redeemable Participating Shares for the year then ended;
- the Statement of Changes in Equity for the year then ended;
- the Schedule of Investments for each of the Funds as at 31 December 2023; and
- the notes to the financial statements for each of the Funds, which include a description of the accounting
 policies.

Our opinion is consistent with our reporting to the Board of Directors.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the ICAV in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard as applicable to listed public interest entities, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

To the best of our knowledge and belief, we declare that non-audit services prohibited by IAASA's Ethical Standard were not provided to the ICAV.

Other than those disclosed in note 9, we have provided no non-audit services to the ICAV in the period from 1 January 2023 to 31 December 2023.

Our audit approach

Overview

- Overall materiality: 50 basis points (2022: 50 basis points) of Net Asset Value ("NAV") at 31 December 2023 (2022: 31 December 2022) for each of the ICAV's Funds.
- Performance materiality: 75% of overall materiality.

Audit scope

• The ICAV is an open-ended investment ICAV with variable capital and engages AXA Investment Managers Paris S.A. (the "Manager") to manage certain duties and responsibilities with regards to the day-to-day management of the ICAV. We tailored the scope of our audit taking into account the types of investments within the Funds' portfolios, the involvement of the third parties referred to overleaf, the accounting processes and controls, and the industry in which the ICAV operates. We look at each of the Funds at an individual level.

Key audit matters

- Valuation of financial assets and financial liabilities at fair value through profit or loss
- Existence of financial assets and financial liabilities at fair value through profit or loss.

The scope of our audit

As part of designing our audit, we determined materiality and assessed the risks of material misstatement in the financial statements. In particular, we looked at where the directors made subjective judgements, for example the selection of pricing sources to value the investment portfolio. As in all of our audits, we also addressed the risk of management override of internal controls, including evaluating whether there was evidence of bias by the directors that represented a risk of material misstatement due to fraud.

Key audit matters

Key audit matters are those matters that, in the auditors' professional judgement, were of most significance in the audit of the financial statements of the current period and include the most significant assessed risks of material misstatement (whether or not due to fraud) identified by the auditors, including those which had the greatest effect on: the overall audit strategy; the allocation of resources in the audit; and directing the efforts of the engagement team. These matters, and any comments we make on the results of our procedures thereon, were addressed in the context of our audit of the financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. This is not a complete list of all risks identified by our audit.

Key audit matter

Valuation of financial assets and financial liabilities at fair value through profit or loss

Refer to the Schedule of Investments for each Fund, Note 2(c) Financial instruments at fair value through profit or loss and Note 12(d) Fair Value Estimation.

The financial assets and financial liabilities at fair value through profit or loss included in the Statement of Financial Position of each Fund at 31 December 2023 are valued at fair value in line with IFRS as adopted by the European Union.

The valuation of financial assets and financial liabilities at fair value through profit or loss is considered a key audit matter as these financial assets and liabilities represent the principal element of the financial statements.

How our audit addressed the key audit matter

We tested the valuation of the financial assets and financial liabilities at fair value through profit or loss by:

- independently obtaining prices for the ordinary shares and bonds held by each Fund and compared these prices to the prices applied in the accounting records of each Fund maintained by the Administrator; and
- independently obtaining forward foreign currency rates and compared these rates to the rates applied in the accounting records of each relevant Fund maintained by the Administrator.

No material misstatements were identified as a result of the procedures we performed.

Key audit matter

Existence of financial assets and financial liabilities at fair value through profit or loss

Refer to the Schedule of Investments for each Fund, Note 2(c) Financial instruments at fair value through profit or loss and Note 12(d) Fair Value Estimation.

The financial assets and financial liabilities at fair value through profit or loss included in the Statement of Financial Position of each Fund are held with the Depositary and counterparty at 31 December 2023.

The existence of financial assets and financial liabilities at fair value through profit or loss are considered a key audit matter as these financial assets and liabilities represent the principal element of the financial statements.

How our audit addressed the key audit matter

The financial assets and financial liabilities at fair value through profit or loss are held with the Depositary and counterparty.

We obtained independent confirmations from the Depositary and counterparty of the financial assets and financial liabilities at fair value through profit or loss held at 31 December 2023. We reconciled these confirmations to the accounting records of each Fund maintained by the Administrator and evaluated any material differences identified.

matter as these financial assets and liabilities represent the principal element of the financial statements.

No material misstatements were identified as a result of the procedures we performed.

How we tailored the audit scope

We tailored the scope of our audit to ensure that we performed enough work to be able to give an opinion on the financial statements as a whole, taking into account the structure of the ICAV, the accounting processes and controls, and the industry in which it operates.

The directors control the affairs of the ICAV and are responsible for the overall investment policy which is determined by them. The ICAV engages the Manager to manage certain duties and responsibilities with regards to the day to day management of the ICAV. The Manager has delegated certain responsibilities to State Street Fund Services (Ireland) Limited (the 'Administrator'). The financial statements, which remain the responsibility of the directors, are prepared on their behalf by the financial reporting service provider. The ICAV has appointed State Street Custodial Services (Ireland) Limited (the "Depositary") to act as Depositary of the ICAV's assets. In establishing the overall approach to our audit, we assessed the risk of material misstatement at a fund level, taking into account the nature, likelihood and potential magnitude of any misstatement. As part of our risk assessment, we considered the ICAV's interaction with the Administrator, and we assessed the control environment in place at the Administrator.

Materiality

The scope of our audit was influenced by our application of materiality. We set certain quantitative thresholds for materiality. These, together with qualitative considerations, helped us to determine the scope of our audit and the nature, timing and extent of our audit procedures on the individual financial statement line items and disclosures and in evaluating the effect of misstatements, both individually and in aggregate on the financial statements as a whole.

Based on our professional judgement, we determined materiality for the financial statements of each of the ICAV's Funds as follows:

Overall materiality and how we determined it	50 basis points (2022: 50 basis points) of Net Asset Value ("NAV") at 31 December 2023 (2022: 31 December 2022) for each of the ICAV's Funds.
Rationale for benchmark applied	The main objective of the ICAV is to provide investors with a return on their investment at a fund level. We applied the benchmark of NAV because NAV is a focus of investors as the return on their investment.

We use performance materiality to reduce to an appropriately low level the probability that the aggregate of uncorrected and undetected misstatements exceeds overall materiality. Specifically, we use performance materiality in determining the scope of our audit and the nature and extent of our testing of account balances, classes of transactions and disclosures, for example in determining sample sizes. Our performance materiality was 75% of overall materiality.

In determining the performance materiality, we considered a number of factors - the history of misstatements, risk assessment and aggregation risk and the effectiveness of controls - and concluded that an amount at the upper end of our normal range was appropriate.

We agreed with the Board of Directors that we would report to them misstatements identified during our audit above 5 basis points of each Fund's NAV, for NAV per share impacting differences (2022: 5 basis points of each Fund's NAV, for NAV per share impacting differences) as well as misstatements below that amount that, in our view, warranted reporting for qualitative reasons.

Conclusions relating to going concern

Our evaluation of the directors' assessment of the Funds' ability to continue to adopt the going concern basis of accounting included:

- Obtaining an understanding the nature of the ICAV;
- Obtaining an understanding of the key indicators that are monitored with response to the going concern assumption and management's future plans for the Funds over the going concern period (being 12 months from the date of approval of the financial statements);
- Review of available board minutes during the year under audit and those available up to the date of this report;
- Consideration of post year end capital activity as recorded in the underlying accounting records;
- Enquiring of management with respect to any planned significant redemptions of which they have been informed of; and
- Considered the liquidity risk management techniques which are available to the ICAV and its Funds.

Based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for issue.

In auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the Annual Report and Audited Financial Statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

Based on the responsibilities described above and our work undertaken in the course of the audit, the Irish Collective Assetmanagement Vehicles Act 2015 requires us to also report the opinion as described below:

Directors' Report

• In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 31 December 2023 is consistent with the financial statements.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities set out on page 3, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the ICAV or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Irregularities, including fraud, are instances of non-compliance with laws and regulations. We design procedures in line with our responsibilities, outlined above, to detect material misstatements in respect of irregularities, including fraud. The extent to which our procedures are capable of detecting irregularities, including fraud, is detailed below.

Based on our understanding of the ICAV and industry, we identified that the principal risks of non-compliance with laws and regulations related to the Central Bank of Ireland regulations applicable to the ICAV, and we considered the extent to which non-compliance might have a material effect on the financial statements. We also considered those laws and regulations that have a direct impact on the preparation of the financial statements such as the Irish Collective Assetmanagement Vehicles Act 2015 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended). We evaluated management's incentives and opportunities for fraudulent manipulation of the financial statements (including the risk of override of controls), and determined that the principal risks were related to Risk of Management Override of Control.

Audit procedures performed by the engagement team included:

- Enquiry of management to identify any instances of non-compliance with laws and regulations;
- Identifying and testing journal entries that met our specific risk based criteria;
- Testing accounting estimates and judgements and considered potential for management bias;
- · Designing audit procedures to incorporate unpredictability around the nature, timing or extent of our testing; and
- Reviewing minutes of the meetings of the Board of Directors.

There are inherent limitations in the audit procedures described above. We are less likely to become aware of instances of non-compliance with laws and regulations that are not closely related to events and transactions reflected in the financial statements. Also, the risk of not detecting a material misstatement due to fraud is higher than the risk of not detecting one resulting from error, as fraud may involve deliberate concealment by, for example, forgery or intentional misrepresentations, or through collusion.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the shareholders of each of the Funds as a body in accordance with section 120 of the Irish Collective Asset-management Vehicles Act 2015 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Irish Collective Asset-management Vehicles Act 2015 exception reporting

Directors' remuneration

Under the Irish Collective Asset-management Vehicles Act 2015 we are required to report to you if, in our opinion, the disclosures of directors' remuneration specified by section 117 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Appointment

We were appointed by the Board of Directors on 24 May 2022 to audit the financial statements for the period ended 31 December 2022 and subsequent financial periods. The period of total uninterrupted engagement is 2 years, covering the period ended 31 December 2022 to the year ended 31 December 2023.

Olivia Hayden

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 DECEMBER 2023

Note 1 - Organisation

AXA IM ETF ICAV (the "ICAV") is an open-ended investment vehicle with variable capital organised under the laws of Ireland as an Irish Collective Asset-management Vehicle ("ICAV"). The ICAV has been authorised by the Central Bank of Ireland (the "Central Bank") as an ("Undertaking for Collective Investment in Transferable Securities ("UCITS") within the meaning of the UCITS Regulations 2011 (as amended) on 16 May 2022. It was registered on 14 December 2021 under registration number C-469468. Its sole object is the collective investment in transferable securities and/or other liquid financial assets referred to in Regulation 68 of the UCITS Regulations of capital raised from the public and which operates on the principle of risk spreading.

The ICAV is structured as an umbrella fund with segregated liability between Funds. The Funds are exchange-traded funds ("ETF"). The shares of the Funds are listed on the regulated market of Deutsche Börse Xetra, Borsa Italiana, SIX (Switzerland). The shares of AXA IM NASDAQ 100 UCITS ETF are listed on the regulated market of BIVA (Mexico).

As at 31 December 2023, the ICAV consists of seven Funds (each a "Fund", together the "Funds"):

- AXA IM ACT Biodiversity Equity UCITS ETF (launched on 31 August 2022)
- AXA IM ACT Climate Equity UCITS ETF (launched on 26 September 2022)
- AXA IM NASDAQ 100 UCITS ETF (launched on 20 December 2022)
- AXA IM US High Yield Opportunities UCITS ETF (launched on 5 December 2023)
- AXA IM MSCI USA Equity PAB UCITS ETF (launched on 20 November 2023)
- AXA IM USD Credit PAB UCITS ETF (launched on 30 October 2023)
- AXA IM Euro Credit PAB UCITS ETF (launched on 11 July 2023)

The investment objective of the AXA IM ACT Biodiversity Equity UCITS ETF is to seek long-term capital growth from an actively managed portfolio of sustainable investments comprising listed equity and equity-related securities, including companies that are acting positively for biodiversity by reducing and/or limiting the negative impact of human activities on biodiversity.

The investment objective of the AXA IM ACT Climate Equity UCITS ETF is to seek long-term capital growth from an actively managed portfolio of sustainable investments comprising listed equity and equity-related securities, including companies that are acting positively for the climate by reducing and/or limiting the impact of global warming on economies and societies.

AXA IM ACT Biodiversity Equity UCITS ETF and AXA IM ACT Climate Equity UCITS ETF will seek to achieve their investment objective by investing in a global portfolio of listed equity and equity-related securities (being, preferred stock, warrants and Depositary Receipts (both American Depositary Receipts ("ADRs") and Global Depositary Receipts ("GDRs")) that will be listed or traded on global Regulated Markets. Both funds may invest up to 10% in China A shares listed in the Shanghai-Hong Kong Stock Connect and, in aggregate, may invest over 25% of their net assets in equity and/or equity-related securities of companies in emerging markets. AXA IM ACT Biodiversity Equity UCITS ETF and AXA IM ACT Climate Equity UCITS ETF are actively managed ETFs. Both Funds do not seek to replicate the performance of a specified index but do reference the MSCI AC World Total Return Net (the "Performance Benchmark") for comparative purposes only. The Manager has full discretion over the composition of the Funds and can take exposure to companies, countries or sectors not included in the Performance Benchmark. There are no restrictions on the extent to which the Funds' portfolio and performance may deviate from those of the Performance Benchmark. The Performance Benchmark is a broad market index which is not aligned with the sustainable investment objective of the Funds, but is used as a reference for its non-sustainable objective.

The investment objective of AXA IM NASDAQ 100 UCITS ETF is to seek to provide investors with the performance by of the NASDAQ-100 Index (the "Index"), less the fees and expenses of the Fund, while aiming to minimise the tracking error in between the Fund's Net Asset Value and the Index.

Note 1 – Organisation (continued)

AXA IM NASDAQ 100 UCITS ETF is passively managed and will seek to achieve its investment objective by investing in equity securities listed or traded on global Regulated Markets that as far as possible and practicable consist of the constituent securities of the Index.

The investment objective of AXA IM US High Yield Opportunities UCITS ETF is to seek high income and long-term growth, in USD, from an actively managed portfolio of high yield bonds.

AXA IM US High Yield Opportunities UCITS ETF will seek to achieve its investment objective by investing in high yield corporate bonds that are mainly issued by US companies and denominated in USD, such as fixed rate bonds, floating rate bonds, convertible bonds and perpetual bonds.

The investment objective of AXA IM MSCI USA Equity PAB UCITS ETF is to seek to provide investors with the performance of the MSCI USA Climate Paris Aligned Index (the "Index"), less the fees and expenses of the Fund, while aiming to minimise the tracking error in between the Fund's Net Asset Value and the Index.

AXA IM MSCI USA Equity PAB UCITS ETF is passively managed and will seek to achieve its investment objective by investing in large and mid-capitalisation equity securities listed or traded on US equity markets that as far as possible and practicable consist of the constituent securities of the Index. The Fund may also hold warrants, as a result of corporate actions only, and rights. The Fund intends to replicate the constituents of the Index by holding all the securities comprising the Index in generally the same proportions as they are held in the Index. In order to replicate the Index, this Fund may invest up to 20% of its Net Asset Value in shares issued by the same body.

The investment objective of AXA IM USD Credit PAB UCITS ETF is to seek long-term capital growth from an actively managed portfolio of USD denominated investment grade corporate debt securities issued in the US domestic market while maintaining a decarbonization trajectory aligned with the carbon emissions of the ICE® US Corporate Paris-Aligned Absolute Emissions Index (COAOPABA) (the "Benchmark"). The Fund aims over the long-term to outperform the financial performance net of management fees of the Benchmark and to have absolute carbon emissions less than or equal to the Benchmark.

In order to achieve its investment objective, AXA IM USD Credit PAB UCITS ETF invests at least 90% of its net assets in USD denominated investment grade fixed and floating rate debt securities mainly issued by US companies and that are component securities of the Benchmark, excluding cash and cash equivalent. As a result, the Fund may invest in green, social, sustainability and sustainability linked bonds. The Fund may also invest in 144A securities where considered to offer the best opportunity for the Fund, and may be fully invested in these securities.

The investment objective of AXA IM Euro Credit PAB UCITS ETF is to seek long-term capital growth from an actively managed portfolio of investment grade Euro denominated corporate debt securities while maintaining a decarbonization strategy aligned with the carbon emissions of the ICE BofA Euro Corporate Index Paris Aligned (Absolute Emissions) EROOPABA (the "Benchmark").

In order to achieve its investment objective, AXA IM Euro Credit PAB UCITS ETF invests at least 90% of its net assets in investment grade, EUR denominated, fixed and floating rate debt securities that are issued by companies that are component securities of the Benchmark, excluding cash and cash equivalent.

Note 2 - Basis of preparation and summary of accounting policies

For the ICAV, these financial statements cover the financial year ended 31 December 2023.

The comparative information for these financial statements cover the financial period from 14 December 2021 (the ICAV date of registration) to 31 December 2022 ("the financial period ended 31 December 2022").

Note 2 – Basis of preparation and summary of accounting policies (continued)

(a) Basis of Preparation

The financial statements have been prepared in accordance with International Financial Reporting Standards ("IFRS") as adopted by the European Union ("EU"), the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 as amended by European Union (Undertakings for Collective Investment in Transferable Securities) (Amendment) Regulations 2016 as may be amended or replaced (the "UCITS Regulations") and the Irish Collective Asset-management Vehicles Act 2015 (the "ICAV Act").

The financial statements of each Fund have been prepared on a going concern basis as the Directors are of the view that each Fund can continue in operational existence for twelve months from the date of approval of these financial statements. The Directors anticipate each Fund's financial assets will continue to generate enough cash flows on an ongoing basis to meet each Fund's liabilities as they fall due.

The financial statements have been prepared under the historical cost convention as modified by the revaluation of financial assets and financial liabilities held at fair value through profit or loss.

All references to net assets throughout the annual report and financial statements refer to net assets attributable to holders of redeemable participating shares or equity as applicable unless otherwise stated.

(b) Material Accounting Policies

The principal accounting policies and estimation techniques applied in the preparation of these financial statements are set out below.

The accounting standards have been applied consistently by the ICAV.

New amendments to the standard are effective for annual periods beginning 1 January 2023, and have been applied in preparing these financial statements

Disclosure of Accounting Policies (Amendments to IAS1 and IFRS Practice Statement 2)

The amendments require entities to disclose their material accounting policies, rather than their significant accounting policies. It is effective for annual periods beginning on or after 1 January 2023. These have been applied in preparing the financial statements and have not had a significant impact on the Fund.

IAS 8 Accounting Policies - definition of accounting estimates has been clarified

The amendment to IAS 8 Accounting Policies, Changes in Accounting Estimates and Errors clarifies how companies should distinguish changes in accounting policies from changes in accounting estimates.

There are no other new standards, amendments or interpretations issues and effective for the financial period beginning 1 January 2023 that have a significant impact on the Fund's financial position, performance, or disclosure in its financial statements.

New standards, amendments and interprestations issued but not effective for the financial period beginning 1 January 2023 and not early adopted

There are no other new standards, amendments or interpretations issues and effective for the financial period beginning 1 January 2023 that have a significant impact on the Fund's financial position, performance, or disclosure in its financial statements.

(c) Financial instruments at fair value through profit or loss

(i) Classification

The classification (and subsequent measurement) of a financial instrument is based on the business model in which a financial instrument is managed and on its contractual cash flow characteristics. Since each Fund of the ICAV manages and evaluates the performance of all of its financial instruments on a fair value basis, each Fund classifies its investments as financial assets and financial liabilities at fair value through profit or loss except deposits with credit institutions that are measured at amortised cost, which is representative of fair value.

Note 2 – Basis of preparation and summary of accounting policies (continued)

(c) Financial instruments at fair value through profit or loss (continued)

(ii) Recognition, derecognition and measurement

Regular purchases and sales of investments are recognised on the trade date, the date on which the Funds of the ICAV commits to purchase or sell the investment. Transaction costs are expensed as incurred in the Statement of Comprehensive Income.

Financial assets are derecognised when the rights to receive cash flows from the investments have expired or the Funds of the ICAV has transferred substantially all risks and rewards of ownership and a realised gain or loss is recognised. Financial liabilities are derecognised when they are extinguished, that is, when the obligation specified in the contract is discharged, cancelled or expires. Realised gains and losses are presented in the Statement of Comprehensive Income within Net income/(loss) on investments and foreign currency.

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the financial assets or financial liabilities at fair value through profit or loss category are presented in the Statement of Comprehensive Income within Net income/(loss) on investments and foreign currency.

The Fund may, in accordance with the requirements of the Central Bank, apply an amortised cost method of valuation in respect of money market instruments with a known residual maturity of less than three months and no specific sensitivity to market parameters, including credit risk.

(iii) Fair value estimation

In determining the value of the assets of the Fund, each Investment listed, traded or dealt in on a Regulated Market for which market quotations are readily available shall be valued at the last traded price at the Valuation Point in the relevant Regulated Market on the relevant Dealing Day, provided that the value of the Investment listed, traded or dealt in on a Regulated Market but acquired or traded at a premium or at a discount outside or off the relevant stock exchange may be valued, taking into account the level of premium or discount as at the date of valuation of the Investment as the Directors may consider appropriate and the Depositary must ensure that the adoption of such procedure is justifiable in the context of establishing the probable realisation value of the security. If the Investment is normally listed, traded or dealt in on or under the rules of more than one Regulated Market, the relevant Regulated Market shall be that which constitutes the main market for the Investment.

If prices for an Investment listed, traded or dealt in on the relevant Regulated Market are not available at the relevant time or are unrepresentative, or in the event that any Investments are not listed or traded on any Regulated Market, such Investment shall be valued at such value as shall be certified with care and good faith as the probable realisation value of the Investment by (i) the Manager or (ii) a competent professional person appointed by the Directors and approved for such purpose by the Depositary which may be the Investment Manager or (iii) by any other means provided the value is approved by the Depositary.

Cash deposits and similar Investments shall be valued at their par value together with accrued interest which is representative of fair value unless in the opinion of the Directors any adjustment should be made to reflect the fair value thereof.

(d) Critical Accounting Estimates, Judgements and Assumptions

In preparation of financial statements in conformity with IFRS as adopted by the EU, the ICAV is required to make certain accounting estimates, judgements and assumptions. Actual results may differ from these estimates and assumptions. The Directors believe that any estimate used in preparing the financial statements are reasonable and prudent. Critical accounting estimates are those which involve the most complex or subjective judgements or assessments. The area of the ICAV's business that typically requires such estimates is the determination of the fair value of financial assets and financial liabilities as discussed in the financial instruments section above. The area of the ICAV's business that typically requires judgement is the determination of functional currency as discussed in the Foreign Exchange Translation section below.

Note 2 – Basis of preparation and summary of accounting policies (continued)

(e) Realised Gains and Losses on Investments

Realised gains and losses on sales of investments arising during the financial period are calculated based on the average book cost of the investment and are included in "Net income/(loss) on investments and foreign currency" in the Statement of Comprehensive Income.

(f) Unrealised Gains and Losses on Investments

Unrealised gains and losses on investments arising from changes in fair value of financial assets and financial liabilities are included in "Net income/(loss) on investments and foreign currency" in the Statement of Comprehensive Income.

(g) Interest and Dividend Income

Interest income generated from assets classified as FVTPL is disclosed in Interest income on financial assets at FVTPL. Interest income on cash in the Statement of Comprehensive Income includes interest income generated from assets measured at amortised cost. Interest receivable in the Statement of Financial Position is measured initially at fair value and subsequently at amortised cost and includes interest receivable from assets classified as FVTPL and interest receivable from cash.

Dividend income arising on the underlying equity investments of the Funds of the ICAV is disclosed in the Statement of Comprehensive Income on the date on which the relevant securities are listed as "ex-dividend". Income is accounted for gross of any non-recoverable withholding taxes and net of any tax credits. The withholding tax is shown separately in the Statement of Comprehensive Income.

(h) Foreign Exchange Translation

Functional and Presentation Currency

Items included in the financial statements of the ICAV are measured in the currency of the primary economic environment in which each Fund operates (the "functional currency"). The ICAV has also adopted these functional currencies as the presentation currency of each of the Funds.

The functional and presentation currency of each Fund is USD except for AXA IM EuroCredit PAB UCITS ETF which is EUR. Transactions in foreign currencies are translated into the reporting currency at exchange rates ruling at the transaction dates. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the result for the financial period.

(i) Cash and cash equivalents

Cash and cash equivalents held comprises cash and short-term deposit accounts, which are liquid and readily realisable. All cash and bank balances are held by State Street Custodial Services (Ireland) Limited as detailed in Note 3 to these financial statements.

(j) Expenses

Expenses are recognised in the Statement of Comprehensive Income on an accrual basis.

(k) Taxation

As disclosed in Note 8 to the financial statements, generally the ICAV is not subject to Irish tax on income, profits or capital gains or other taxes payable. However, income from investments held by the Funds may be subject to withholding taxes or capital gains taxes in jurisdictions other than the Funds' country of domicile. Taxes incurred by the Funds are recorded in the Statement of Comprehensive Income within withholding tax.

(I) Redeemable Participating Shares

Redeemable participating shares are issued and redeemed at the holder's option at prices based on the Fund's NAV per share at the time of issue or redemption.

AXA IM ACT Biodiversity Equity UCITS ETF and AXA IM ACT Climate Equity UCITS ETF issue redeemable participating shares, which are redeemable at the holder's option and are classified as financial liabilities.

Note 2 – Basis of preparation and summary of accounting policies (continued)

(I) Redeemable Participating Shares (continued)

AXA IM NASDAQ 100 UCITS ETF, AXA IM US High Yield Opportunities UCITS ETF, AXA IM MSCI USA Equity PAB UCITS ETF, AXA IM USD Credit PAB UCITS ETF, AXA IM Euro Credit PAB UCITS ETF issue redeemable participating shares which are redeemable at the holder's option and are classified as equity.

For all Funds, the redeemable participating share is carried at the redemption amount that is payable at the financial year end date if the holder exercises the right to put the share back into the Fund.

IAS 32 requires puttable financial instruments that meet the definition of a financial liability to be classified as equity where certain strict criteria are met. Those criteria include:

- . the puttable instruments must entitle the holder to a pro-rata share of net assets;
- . the puttable instruments must be the most subordinated class and class features must be identical;
- . there must be no contractual obligations to deliver cash or another financial asset other than the obligation on the issuer to repurchase; and
- . the total expected cash flows from the puttable instrument over its life must be based substantially on the profit or loss of the issuer.

For the year ended 31 December 2023, AXA IM NASDAQ 100 UCITS ETF meets the criteria to classify its shares as equity. As a result of the reclassification of redeemable shares from liabilities to equity, a Statement of Changes in Equity is presented for AXA IM NASDAQ 100 UCITS ETF for the year ended 31 December 2023. The comparative information has not been amended as it would not have a material impact on the presentation of the financial statements.

Note 3 - Cash and cash equivalents

Cash and cash equivalents are held with State Street Custodial Services (Ireland) Limited. The credit rating of State Street Custodial Services (Ireland) Limited was A1 per Moody's at 31 December 2023 (2022: A1).

Note 4 - Fees and expenses

The ICAV employs an "all in one" fee structure for its Funds pursuant to which it pays to the Manager out of each Fund's assets a total expense ratio ("TER") of a percentage of each Fund's NAV as described in note 10 as the "Management Fees".

Transaction costs

Transaction costs are incremental costs that are directly attributable to the acquisition, issue or disposal of the financial asset or financial liability. Due to operational challenges in extracting the transaction costs on the purchase and sale of forward foreign exchange currency contracts, transaction costs on these instruments cannot be separately identified. They are included in the purchase and sale price of the investment, and therefore not disclosed separately in this note. Purchases and sales transaction costs are included in Net income/(loss) on investments and foreign currency in the Statement of Comprehensive Income.

Transaction costs for the financial year ended 31 December 2023 and financial period ended 31 December 2022 are disclosed below.

	Currency	financial year ended 31 December 2023	financial period ended 31 December 2022
AXA IM ACT Biodiversity Equity UCITS ETF	USD	4,025	128,242
AXA IM ACT Climate Equity UCITS ETF	USD	4,027	128,793
AXA IM NASDAQ 100 UCITS ETF	USD	5,600	566
AXA IM US High Yield Opportunities UCITS ETF	USD	6,000	-
AXA IM MSCI USA Equity PAB UCITS ETF	USD	608	-
AXA IM USD Credit PAB UCITS ETF	USD	-	-
AXA IM Euro Credit PAB UCITS ETF	EUR	-	-

Note 5 – Soft commissions and directed brokerage

During the financial year ended 31 December 2023 and financial period ended 31 December 2022, the Funds had not entered into any soft commission or directed brokerage arrangements.

Note 6 - Exchange Rates

The exchange rates at 31 December 2023 and 31 December 2022 used in the annual report are disclosed below.

As at 31 December 2	2023	As at 31 Decemb	per 2022
1 USD =	1.4655 AUD	1 USD =	1.4746 AUD
1 USD =	4.8576 BRL	1 USD =	5.27975 BRL

1 USD =	10.07785 SEK	1 USD =	-
1 USD =	1287.9 KRW	1 USD =	-

Note 7 - Dividend distributions

The Directors did not declare any dividend distributions for the financial year ended 31 December 2023 or period ended 31 December 2022.

Note 8 - Taxation

Under current law and practice the ICAV qualifies as an Investment Undertaking as defined in Section 739B of the Taxes Consolidation Act, 1997 ("the TCA"), as amended. Provided the ICAV continues to be resident for tax purposes in Ireland and is authorised by the Central Bank of Ireland, the ICAV should not be chargeable to Irish tax on its relevant income or gains.

However, Irish tax may arise on the happening of a "chargeable event". A chargeable event includes any dividend distribution payment to shareholders, any encashment, redemption, cancellation or transfer of shares, and any deemed disposal of shares for Irish tax purposes arising as a result of holding shares in the ICAV for a period of eight years or more.

No Irish tax will arise in respect of chargeable events in respect of a Shareholder who is an Exempt Irish Investor (as defined in Section 739D of the TCA) or who is neither Irish resident nor ordinarily resident in Ireland for tax purposes at the time of the chargeable event, provided, in each case, that an appropriate valid declaration in accordance with Schedule 2B of the TCA is held by the ICAV and the ICAV is not in possession of any information which would reasonably suggest that the information contained therein is no longer materially correct or where the ICAV has been authorised by Irish Revenue to make gross payments in the absence of appropriate declarations.

Dividend distributions and capital gains (if any) received on investments made by the ICAV may be subject to withholding taxes imposed by the country of origin and such taxes may not be recoverable by the ICAV or its Shareholders.

Note 8 – Taxation (continued)

The Organisation for Economic Co-operation and Development (OECD) released the Pillar Two model rules (the Global Anti-Base Erosion Proposal, or 'GloBE') to reform international corporate taxation. The legislation will be effective for the ICAV's financial year beginning on or after 1 January 2024.

It is still unclear on whether and how Pillar Two model rules would apply to the ICAV, which is still in the process of assessing whether it may fall within the scope of Pillar Two model rules, as well as its potential exposure, if any, to Pillar Two income taxes.

Note 9 – Auditor's Remuneration

Audit fees for the provision of statutory audit services and taxation service for the financial year ended 31 December 2023 and 2022 were as follows:

	Year ended	Period ended
	31 December 2023	31 December 2022
Statutory audit of the ICAV	51,455	22,190
PwC Ireland taxation advisory services	5,500	-
PwC Network taxation compliance services	7,915	5,610
Total	64,870	27,800

The fees outlined in this note are inclusive of out of pocket expenses and exclusive of Valued Added Tax ("VAT"). No fees were paid to the auditor in relation to other assurance, advisory or other non-audit services for the financial period ended 31 December 2023 and 2022.

Note 10 - Transactions with related parties

Parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making financial or operational decisions.

Management Fees

The ICAV has appointed AXA Investment Managers Paris S.A. as the Manager pursuant to the Management Agreement. The Manager is responsible on a day-to-day basis, under the supervision of the Directors, for the management of the ICAV's affairs, portfolio management of the ICAV's Investments and dividend distribution of the Shares.

The ICAV employs an "all in one" fee structure (the "Management Fees") for its Funds pursuant to which it pays to the Manager out of each Fund's assets a total expense ratio ("TER") of a percentage of each Fund's NAV calculation date.

The Manager is responsible for discharging all operational expenses, including, fees and expenses of the Investment Manager, Depositary, Administrator, paying agent, company secretary, iNAV provider, the Directors, the costs of maintaining the Funds and any registration of the Funds with any governmental or regulatory authority; fees related to the listing of the Funds, market makers, settlement agents, the costs associated to the share class hedging, preparation, printing, translating and posting of prospectuses, sales literature and reports to Shareholders, regulatory fees of the Central Bank and other governmental agencies or authority; insurance premiums; fees and expenses for legal, audit; any dividend distribution fees or expenses, cost of establishing the ICAV and each Fund and of registering each Fund in other jurisdictions or with any listing agent or stock exchange and set-up fees.

The ICAV will pay, out of the assets of each Fund and in addition to the TER, interest, taxes, brokerage commissions and other expenses connected with execution of portfolio transactions, the securities lending fees where applicable, extraordinary expenses such as extraordinary legal costs.

Note 10 – Transactions with related parties (continued)

Management Fees (continued)

The Manager will discharge any excess amounts out of its own assets in the event the costs and expenses of a Fund or Class that are intended to be covered within the TER exceed the stated maximum TER below.

	Maximum TER
AXA IM ACT Biodiversity Equity UCITS ETF A Capitalisation USD A Capitalisation EUR Hedged	0.70% 0.70%
AXA IM ACT Climate Equity UCITS ETF A Capitalisation USD A Capitalisation EUR Hedged	0.70% 0.70%
AXA IM NASDAQ 100 UCITS ETF A Capitalisation USD	0.14%
AXA IM US High Yield Opportunities UCITS ETF A Capitalisation USD	0.35%
AXA IM MSCI USA Equity PAB UCITS ETF A Capitalisation USD	0.20%
AXA IM USD Credit PAB UCITS ETF A Capitalisation USD	0.18%
AXA IM Euro Credit PAB UCITS ETF A Capitalisation EUR	0.20%

Any amount remaining from the TER paid to the Manager after payment of the relevant costs and expenses will be retained by the Manager in return for the provision of its services to the ICAV.

To the extent that there is a change to the expenses to be discharged by the Manager, Shareholders will be notified in advance. If it is proposed to increase the maximum level of the TER for a particular Fund, this will be reflected in an updated version of the Fund Supplement and will be subject to approval by the majority of votes of Shareholders of the relevant Fund or Class passed at a general meeting of the relevant Fund or Class or by all of the Shareholders of the relevant Fund or Class by way of a written resolution.

Management fees earned for the financial year are disclosed in the Statement of Comprehensive Income and Management fees payable at the financial year end are disclosed in the Statement of Financial Position.

Other transactions with related parties

Jean-Louis Laforge is a Director of the ICAV and also an employee of the Manager.

Ouajnat Karim is a Director of the ICAV and also an employee of AXA Investment Managers UK Ltd, which is part of the AXA IM Group.

In 2023, affiliates of the Manager invested USD 31.18 million into AXA IM ACT Biodiversity UCITS ETF, USD 29.95 million into AXA IM ACT Climate Equity UCITS ETF, EUR 15.39 million into AXA IM Euro Credit PAB UCITS ETF and USD 7.82 million into AXA IM USD Credit PAB UCITS ETF.

In 2022, affiliates of the Manager invested USD 241.49 million into the AXA IM ACT Biodiversity UCITS ETF and USD 300.29 million into AXA IM ACT Climate Equity UCITS ETF on the launch date of each Fund.

The independent non-Executive Directors are entitled to remuneration for their service as directors.

Note 10 – Transactions with related parties (continued)

Other transactions with related parties (continued)

During the year ended 31 December 2023 and 2022, the ICAV incurred Directors' fees as follows, and as at 31 December 2023 and 2022 the following amounts remained payable:

Payable as at	Payable as at	Fees during	Fees during
31 December 2023	31 December 2023	2022	2023
EUR	EUR	EUR	EUR
_		61.000	65.000

Note 11 - Share Capital

The share capital of the ICAV shall at all times equal the Net Asset Value of the ICAV. The Directors are empowered to issue up to 500 billion Shares of no par value in the ICAV at the Net Asset Value per Share on such terms as they may think fit. There are no rights of pre-emption upon the issue of Shares in the ICAV.

Each of the Shares entitles the Shareholder to participate equally on a pro rata basis in the dividend distributions and net assets of a Fund attributable to the relevant Class in respect of which they are issued, save in the case of dividend distributions declared prior to becoming a Shareholder. The Subscriber Shares' entitlement is limited to the amount subscribed and accrued interest thereon.

Each of the Shares entitles the Shareholder to attend and vote at meetings of the ICAV and of the relevant Class of a Fund represented by those Shares. No Class confers on the holder thereof any preferential or preemptive rights or any rights to participate in the profits and dividend distributions of any other Class or any voting rights in relation to matters relating solely to any other Class.

At 31 December 2023	435,507,130	206,382,568	641,889,698

Note 12 - Financial Risk Management Process

As an ICAV, the management of financial instruments is fundamental to the management of its business. The Manager is responsible, subject to the overall supervision and control of the Directors, for managing the assets and investments of the Funds of the ICAV in accordance with the investment objectives and guidelines approved by the Directors and policies set forth in the Prospectus and Supplements.

There are no changes in the risk management processes during the financial year ended 31 December 2023 and financial period ended 31 December 2022.

Investment Risk

The ICAV's activities expose it to a variety of financial risks: market risk (including market price risk, foreign exchange risk and interest rate risk), liquidity risk and credit risk.

Note 12 – Financial Risk Management Process (continued)

a) Market risk

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: market price risk, currency risk and interest rate risk.

Global exposure

In accordance with the UCITS Regulations, the Manager is required to employ a risk management process to monitor the exposure to the Funds from derivatives. The Central Bank requires exposure to be measured in one of two ways, either using the Commitment Approach or Value at Risk ("VaR").

During the financial year ended 31 December 2023 and financial period ended 31 December 2022, the Commitment Approach was used.

The Commitment Approach is a methodology that aggregates the underlying notional values of derivatives to determine the exposure of the Fund to derivatives. In accordance with the UCITS Regulations, exposure to derivatives for Funds which use the Commitment Approach must not exceed 100% of the Fund's NAV. During the financial year ended 31 December 2023 and financial period ended 31 December 2022, exposure to derivatives for Funds which use the Commitment Approach has not exceeded 100% of the Fund's NAV.

(i) Sensitivity analysis

The sensitivity analysis is a relative estimate of risk and is not intended to be a precise and accurate number. The calculations are based on historical data. Future movements in inflation rates, currency rates and interest rates and correlations between securities could vary significantly from those experienced in the past.

(ii) Market price risk

Market price risk is the risk that the value of the instrument will fluctuate as a result of changes in market prices (other than those arising from interest rate risk or currency risk), whether caused by factors specific to an individual investment, its issuer or all factors affecting all instruments traded in the market. The Manager considers the asset allocation of the portfolio in order to manage the risk associated with particular countries or industry sectors whilst continuing to follow each Fund's investment objective.

At 31 December 2023 and 2022, the fair values of equities expose the Funds to price risk. The movements in the prices of these investments result in movements in the performance of the Funds.

Note 12 - Financial Risk Management Process (continued)

a) Market risk (continued)

If the market price of each security held by each Fund had increased by 5% at 31 December 2023 and 2022, with all other variables remaining constant, this would have increased the net assets attributable to holders of redeemable participating shares/equity by the following amounts:

	Currency	Exposure 2023	Sensitivity 5% 2023	Exposure 2022	Sensitivity 5% 2022
AXA IM ACT Biodiversity Equity UCITS ETF Investments in Ordinary shares	USD	380,461,450	19,023,073	327,490,757	16,374,538
AXA IM ACT Climate Equity UCITS ETF Investments in Ordinary shares	USD	411,090,591	20,554,530	340,299,201	17,014,960
AXA IM NASDAQ 100 UCITS ETF Investments in Ordinary shares	USD	641,743,481	32,087,174	350,684,028	17,534,201
AXA IM US High Yield Opportunities UCITS ETF Investments in Bonds	USD	53,145,513	2,657,276	-	-
AXA IM MSCI USA Equity PAB UCITS ETF Investments in Ordinary shares	USD	12,686,093	634,305	-	-
AXA IM USD Credit PAB UCITS ETF Investments in Bonds	USD	108,300,391	5,415,020	-	-
AXA IM Euro Credit PAB UCITS ETF Investments in Bonds	EUR	163,959,336	8,197,967	-	-

Conversely, if the price of each security held by each Fund would have decreased by 5% at 31 December 2023 and 2022, with all other variables remaining constant, this would have decreased the net assets attributable to holders of redeemable participating shares/equity by the same amounts.

(iii) Currency risk

Assets and liabilities of Funds may be denominated in a currency other than the base currencies of the Funds and changes in the exchange rate between the base currency and the currency of the asset or liability may lead to an appreciation or a depreciation of the value of the Funds' assets or liabilities as expressed in the base currency. Classes of Shares in the Fund may be denominated in currencies other than the base currency of the Fund and changes in the exchange rate between the base currency and the denominated currency of the Class may lead to an appreciation or a depreciation of the value of the investor's holding as expressed in the base currency. Where the Class is unhedged a currency conversion will take place on subscription, redemption, exchange and dividend distributions at prevailing exchange rates. Accordingly, the value of the shares may be affected by any currency movement between the currency of the financial assets and financial liabilities and the base currency. The table below summarises the significant foreign currency risk exposure of the Fund's assets and liabilities, monetary and non-monetary, and reflects the way the risk is monitored and managed. The tables also summarise the impact on currency risk exposure from a 5% increase in the relevant foreign currency exchange. A 5% decrease in exchange rates would have an equal and opposite effect.

Note 12 – Financial Risk Management Process (continued)

AXA IM NASDAQ 100 UCITS ETF, AXA IM US High Yield Opportunities UCITS ETF, AXA IM MSCI USA Equity PAB UCITS ETF, AXA IM USD Credit PAB UCITS ETF and AXA IM Euro Credit PAB UCITS ETF are not exposed to currency risk as at 31 December 2023 and 2022.

Note 12 - Financial Risk Management Process (continued)

a) Market risk (continued)

(iv) Interest rate risk

Interest rate risk arises from the possibility that changes in interest rates will affect future cash flows or the fair values of financial instruments and cash and cash equivalents. Some of the Funds hold fixed rate bond investments that expose the Fund to fair value interest rate risk. Some of the Funds hold floating rate bond investments and cash and cash equivalents that expose the Fund to cash flow interest rate risk. Changes to prevailing interest rates or changes in expectations of future rates may result in an increase or decrease in the value of the securities held. In general, if interest rates rise, the value of bond investments will decline. A decline in interest rates will in general have the opposite effect. Other assets and liabilities bear no interest rate risk.

The tables below summarise each Fund's exposure to interest rate risks.

The table below sets out the impact to the Fund's net assets at 31 December 2023 in the event that interest rates on bonds increase by 1bps. A 1bps decrease would have an equal and opposite effect. Interest rate risk on cash and cash equivalents is not deemed significant.

	Currency	sensitivity
AXA IM US High Yield Opportunities UCITS ETF	USD	20,323
AXA IM USD Credit PAB UCITS ETF	USD	70,444
AXA IM Euro Credit PAB UCITS ETF	EUR	77,633

AXA IM ACT Biodiversity Equity UCITS ETF, AXA IM ACT Climate Equity UCITS ETF, AXA IM NASDAQ 100 UCITS ETF and AXA IM MSCI USA Equity PAB UCITS ETF have no debt securities and are not exposed interest rate sensitivity on bonds as at 31 December 2023 and 2022.

(b) Credit risk

Credit risk is the risk that a counterparty to a financial instrument will fail to discharge an obligation or commitment that it entered into with the ICAV on behalf of the Funds.

Note 12 – Financial Risk Management Process (continued)

(b) Credit risk (continued)

There can be no assurance that issuers of the securities or other instruments in which a Fund invests will not be subject to credit difficulties leading to the loss of some or all of the sums invested in such securities or instruments or payments due on such securities or instruments (as well as any appreciation of sums invested in such securities).

As at 31 December 2023 and 2022, the Funds are exposed to credit risk associated with cash and securities held by the Funds which are held with State Street Custodial Services (Ireland) Limited as the Depositary. Bankruptcy or insolvency of the Depositary may cause the Funds' rights with respect to cash and securities held by the Depositary to be delayed or limited. The Funds' securities are separately identified on the books and records of State Street Custodial Services (Ireland) Limited, therefore the rights, with respect to those securities, are preserved insofar as possible.

The credit rating of State Street Bank and Trust Company in relation to open forward foreign currency exchange contracts as at 31 December 2023 was A1 per Moody's (2022: A1). Please refer to the Schedule of Investments for each Fund for details regarding investments in open forward foreign currency exchange contracts.

Thus in the event of insolvency or bankruptcy of the Depositary, the Funds' investments are segregated and protected. However, in the case of a credit event, access to assets may be delayed. Cash, unlike securities is fungible and cannot be registered in the name of, or identified as beneficially owned by a client, nor can it practically be held in physical segregation. Therefore the Funds will remain a general creditor with respect to cash balances in the event of default.

The cash at the Depositary is maintained in correspondent accounts of State Street Custodial Services (Ireland) Limited.

As at 31 December 2023, the credit rating of the Depositary was A1 per Moody's (2022: A1).

There are no deposits with credit institutions as at 31 December 2023 and 2022.

At 31 December 2023 the Funds held investments with the following ratings:

At 31 December 2022 the Funds did not hold any investments in debt securities.

(c) Liquidity risk

Liquidity risk is identified as the possibility that a Fund may not be able to meet its financial liabilities as they fall due.

The Manager has established a liquidity management policy which enables it to identify, monitor and manage the liquidity risks of the Funds and to ensure the liquidity profile of the investments of the Funds will facilitate compliance with its underlying obligations.

The Manager's liquidity policy takes into account the investment strategy, the liquidity profile, redemption policy and other underlying obligations of the Funds. The liquidity management systems and procedures include appropriate escalation measures to address anticipated or actual liquidity shortages or other distressed situations of the Funds.

Internal liquidity monitoring model measures adequacy between liquidity of the assets and liquidity of the Funds on a weekly basis. Simulations are performed both on standard conditions and stressed conditions. Internal limits and alerts are set up for the Funds in order to mitigate liquidity risk at Fund level.

In summary, the liquidity management policy monitors the profile of investments held by the Funds and ensures that such investments are appropriate to the redemption policy of the Funds and will facilitate compliance with the Funds' underlying obligations.

The ICAV may only borrow on a temporary basis and the aggregate amount of such borrowings may not exceed 10% of the NAV of each Fund. Subject to this limit, the Directors may exercise all borrowing powers on behalf of the ICAV. In accordance with the provisions of the UCITS Regulations, the Directors may instruct the Depositary to give a charge over the assets of the ICAV as security for such borrowings.

Securities and/or instruments invested in by the Funds may not be listed or rated and consequently liquidity may be low. Moreover, the accumulation and disposal of holdings in some investments may be time consuming and may need to be conducted at unfavourable prices. The Funds may also encounter difficulties in disposing of assets at their fair price due to adverse market conditions leading to limited liquidity and/or to the suspension of the valuation of the Funds' NAV and dealings in the Funds' shares.

The assets held by the Funds are considered sufficiently liquid and readily realisable within a period of one month or less to cover the Funds' liabilities at period end.

Note 12 – Financial Risk Management Process (continued)

(c) Liquidity risk (continued)

The tables below analyse the Funds' financial liabilities into relevant maturity groupings based on the remaining period at the reporting date to the contractual maturity date. The amounts in the tables are the contractual undiscounted cash flows.

(d) Fair Value Estimation

The ICAV classifies fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

The fair value hierarchy has the following levels:

- Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).
- Level 3: Certain inputs for the asset or liability are not based on observable market data (that is, unobservable inputs).

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety.

If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Manager. The Manager considers observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the financial period and are deemed to have occurred when the pricing source or methodology used to price an investment has changed which triggers a change in level as defined under IFRS 13.

There were no transfers between Levels 1, 2 or 3 during the financial year ended 31 December 2023 and financial period ended 31 December 2022.

The below table summarises the Funds' fair value hierarchy at 31 December 2023 and 2022. All liabilities except for financial liabilities in relation to open Forward Foreign Currency Exchange contracts are not measured at fair value through profit or loss but their carrying value approximates fair value.

Note 13 - Financial Derivative Instruments

The Funds may employ techniques and instruments for the purposes of efficient portfolio management and to provide protection against exchange rate risks in accordance with the conditions and limits as set down by the UCITS Regulations. The exposure obtained through financial derivative instruments and the identity of the counterparty to these instruments are disclosed in the Schedule of Investments for the relevant Fund.

As at and during the financial year ended 31 December 2023 and financial period ended 31 December 2022, the Funds had investments in open forward foreign currency exchange contracts. The forward foreign currency exchange contracts are employed for hedging purposes. The realised and unrealised gains and losses on forward currency contracts are included within "Net income/(loss) on investments and foreign currency" in the Statement of Comprehensive Income.

There was no collateral received or collateral pledged as at or during the financial year ended 31 December 2023 and period ended 31 December 2022.

The Funds did not employ techniques for the purposes of efficient portfolio management as at or during the year ended 31 December 2023 and financial period ended 31 December 2022.

Note 14 - Contingent assets and contingent liabilities

There were no contingent assets and liabilities as at 31 December 2023 and 2022.

Note 15 - Significant events during the financial year

The following Funds and Share Classes launched during the financial year ended 31 December 2023:

- AXA IM US High Yield Opportunities UCITS ETF (launched on 5 December 2023)
 - o Class A (USD)
- AXA IM MSCI USA Equity PAB UCITS ETF (launched on 20 November 2023)
 - o Class A (USD)
- AXA IM USD Credit PAB UCITS ETF (launched on 30 October 2023)
 - o Class A (USD)
- AXA IM Euro Credit PAB UCITS ETF (launched on 11 July 2023)
 - Class A (EUR)

Ouajnat Karim was appointed as Director of the ICAV on 23 January 2023.

Jean-Louis Laforge was appointed as Director of the ICAV on 25 January 2023.

Note 16 - Significant events since the financial year end

- AXA IM MSCI Europe Equity PAB UCITS ETF (launched on 18 January 2024)
 - o Class A (EUR)

There were no other significant events after the financial year ended 31 December 2023 that have an impact on these financial statements.

Note 17 - Approval of financial statements

The financial statements were approved by the Board of Directors on 25 April 2024.

The Central Bank requires a schedule of material changes in the composition of the portfolio during the financial year. These are defined as aggregate purchases of a security exceeding one per cent of the total value of purchases for the period and aggregate disposals greater than one per cent of the total value of sales. At a minimum the largest 20 purchases and 20 sales must be given or all purchases and sales if less than 20. A full listing of the portfolio changes for the period is available, free of charge, from the Administrator.

INFORMATION ON REMUNERATION (UNAUDITED)

INFORMATION REGARDING THE REMUNERATION POLICY STATEMENT

According to regulatory requirements on remuneration disclosure applicable to asset management companies, this disclosure provides an overview of the approach on remuneration taken by AXA Investment Managers (hereafter "AXA IM"). Further information on the composition of the Remuneration Committee and driving principles of the Remuneration Policy is available on AXA IM website: www.axa-im.com/remuneration. A copy of this information is available upon request free of charge.

Governance - AXA IM's Remuneration Policy, which is reviewed and approved by the AXA IM Remuneration Committee every year, sets out the principles relating to remuneration within all entities of AXA IM and takes into account AXA IM's business strategy, objectives, and risk tolerance, as well as the long-term interests of AXA IM's shareholders, clients and employees. The AXA IM Remuneration Committee, in line with the remuneration policies and procedures set and validated at AXA Group level, ensures consistency and fair application of the Remuneration Policy within AXA IM, as well as compliance with applicable regulations.

The central and independent review that the effective implementation of the AXA IM's Remuneration Policy complies with the procedures and policies adopted by AXA IM Group level, is performed by the AXA IM Internal Audit Department, who present each year its conclusions to the AXA IM Remuneration Committee to enable it to perform its diligences.

These conclusions did not mention any particular comments regarding the compliance of the effective implementation of the AXA IM's Remuneration Policy.

The result of the annual exam by the AXA IM Remuneration Committee is presented to the Board of Directors of AXA Investment Managers Paris (hereafter "AXA IM PARIS") along with the amendments implemented into the AXA IM's Remuneration Policy.

These changes mainly concern (i) a reminder of the absence of sales targets that could have a direct impact on the fixed or variable compensation of the employees concerned (ii) the strengthening of the governance framework for the principle of gender equity and equality, (iii) specific adjustments to certain AXA IM Group entities in line with specific regulatory requirements and (iv) minor updates.

Quantitative information - Data provided below are those of AXA Investment Managers covering all subsidiaries of the AXA IM Group and types of portfolios as at 31 December 2023 after application on remuneration data of the ICAV's weighted Asset Under Management allocation key.

Total amount of remuneration paid and / or allocated globally to all staff for the year ended 31 December 2023 (1)		
Fixed Pay (2) (1000 EUR)	671.10	
Variable Pay (3) (1000 EUR)	417.47	
Number of employees (4)	2.808 among which 783 for AXA Investment Managers Paris, management company of the ICAV	

- (1) Excluding social charges, after application of the SPPICAV's (Société de Placement à Prépondérance Immobilière à Capital Variable) weighted Asset Under Management allocation key.
- (2) Fixed Pay amount is based on Fixed Pay effective for all staff at AXA IM on 1 January 2023
- (3) Variable Pay, composed of discretionary, upfront and deferred items, includes:
- Amounts awarded for the performance of the previous year and fully paid over the financial year under review (non-deferred variable nav).
- Amounts awarded for the performance of previous years and the performance of the year under review (deferred variable pay),
- Long-Term Incentives awarded by the AXA Group.
- (4) Number of employees includes Permanent and Temporary contracts excluding interns as at 31 December 2023.
- (5) Number of identified employees within AXA IM Group level and AXA IM PARIS as at 31 December 2023.

INFORMATION ON REMUNERATION (UNAUDITED) (continued)

INFORMATION REGARDING THE REMUNERATION POLICY STATEMENT (continued)

Aggregate amount of compensation paid and / or allocated to risk takers and senior management whose activities have a significant impact on the risk profile of investment vehicles (1)

⁽¹⁾ The TERs above represent an average of administrative expenses incurred during the financial year which shareholders could normally have expected to pay when being invested in the chosen share class. This methodology is in line with accepted standard market practices and represents a fair view of publications to be made in the market.

⁽²⁾ The Ongoing charges are based on historical expense data, as well as anticipated material budget changes for the period. For certain classes of shares and Sub-Funds where there is no relevant expense history, Ongoing charge figures are based on estimates. The figures represent the situation at year-end. The Ongoing charges calculation excludes the Performance fees.

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED)

The ICAV is subject to the Regulation (EU) 2015/2365 on Transparency of Securities Financing Transactions and of Reuse and Amending Regulation (EU) No 648/2012 of the European Parliament and of the Council ("SFTR").

A Securities Financing Transaction ("SFT") is defined per Article 3(11) of the SFTR as:

- a repurchase transaction or a reverse repurchase transaction;
- a securities or commodities lending and securities or commodities borrowing;
- a buy-sell back transaction or sell-buy back transaction;
- a margin lending transaction;
- a total return swaps.

During the financial year ended 31 December 2023 and financial period ended 31 December 2022, the ICAV has not entered into a such SFT. Accordingly, there are no additional disclosures required for the ICAV.

SUSTAINABLE FINANCE DISCLOSURE REGULATION AND TAXONOMY REGULATION DISCLOSURE (UNAUDITED)

SUSTAINABLE FINANCE DISCLOSURE REGULATION ("SFDR") DISCLOSURES AXA IM NASDAQ 100 UCITS ETF

AXA IM NASDAQ 100 UCITS ETF neither promotes environmental and/or social characteristics nor has a sustainable investment objective within the meaning of the articles 8 and 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

Nevertheless, AXA IM follows sectorial exclusion policies covering controversial weapons, soft commodities, climate risks, and ecosystem protection & deforestation. In 2022, AXA IM extended this policy to cover investments incorporating significant land use controversies and responsible for biodiversity loss in relation to soy, cattle and timber.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM ACT Biodiversity Equity **Entity LEI:** 213800WT57EAW49PSZ26

UCITS ETF (the "Financial Product")

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective? YES **⊠** NO It promoted Environmental/Social (E/S) characteristics and It made sustainable investments with an while it did not have as its objective a sustainable environmental objective: ____% investment, it had a proportion of 90.29% of sustainable investments with an environmental objective in economic in economic activities that qualify as activities that qualify as environmentally environmentally sustainable under the sustainable under the EU Taxonomy **EU Taxonomy** with an environmental objective in economic in economic activities that do not activities that do not qualify as environmentally qualify as environmentally sustainable \boxtimes sustainable under the EU Taxonomy under the EU Taxonomy \boxtimes with a social objective It made sustainable investments with a social It promoted E/S characteristics, but did not make objective: % any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

Product & services score on SDG 6, 12, 14, 15

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value
Product & services score on SDG 6, 12, 14, 15	1.38 / 10 (SDG scores range from -10 (significant negative impact) to +10 (significant positive impact)

N.B.: While Sustainability KPIs (including regarding sustainable investments) are reported based on an average of the data available at each end of quarter, for technical reasons benchmarks are reported based on end of year data only. However, given that the volatility of the data is relatively low overall for KPI over the past year, we estimate that comparison of sustainability KPI between the financial product and its benchmark (which does not apply to sustainable investment-related indicators) is relevant and sufficiently accurate."

... And compared to previous periods?

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Product & services score on SDG 6,12, 14, 15	2022	1.52 / 10 (SDG scores range from -10 (significant negative impact) to +10 (significant positive impact)	0.04 / 10 (SDG scores range from -10 (significant negative impact) to +10 (significant positive impact)	100 %

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from +10 corresponding to 'significant contributing impact' to -10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	Scope 1: 17543.543 Scope 2: 4464.664 Scope 3: 112334.313 Scope 1+2: 22008.207 Scope 1+2+3: 133992.156
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$)	Scope 1+2: 65.501 Scope 1+2+3: 404.304
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenu	Scope 1+2+3: 1678.008
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	1.85
Climate Risk policy (engagement only)	PAI 5 : Share of non- renewable energy consumption and production	% of total energy sources	Energy Consumption: 68.19 Energy Production: 74.89
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) ¹	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	Sector NACE C: 0.232 Sector NACE D: 5.697 Sector NACE E: 1.1 Sector NACE F: 0.003 Sector NACE G: 0.047 Sector NACE H: 1.375
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	0.45
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	0.063
SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	2.577

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ²	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	40.44 %
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	14.45%
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	33.16
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

 $Any other sustainable investment \ must \ also \ not \ significantly \ harm \ any \ environmental \ or \ social \ objectives.$

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Principal adverse

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

Units Relevant AXA IM policies **PAI** indicator Measurement Scope 1: 17543.543 Climate Risk policy Scope 2: 4464.664 PAI 1: Green House Gas (GHG) Scope 3: emissions (scope 1, 2 & 3 starting Metric tonnes 112334.313 01/2023) Scope 1+2: Ecosystem protection & 22008.207 **Deforestation policy** Scope 1+2+3: 133992.156 Metric tonnes Climate Risk policy of carbon dioxide Scope 1+2: equivalents per 65.501 PAI 2: Carbon Footprint Ecosystem protection & Scope 1+2+3: million euro or **Deforestation policy** dollar invested 404.304 (tCO2e/M€ or tCO2e/M\$) Climate Risk policy Metric tonnes per eur million PAI 3: GHG intensity of investee Scope 1+2+3: Ecosystem protection & revenue companies 1678.008 **Deforestation policy** % of PAI 4: Exposure to companies active investments Climate Risk policy 1.85 in the fossil fuel sector % of total Energy energy sources Consumption: Climate Risk policy (engagement PAI 5: Share of non-renewable 68.19 only) energy consumption and production Energy Production: 74.89 Ecosystem protection & PAI 7: activities negatively affecting % of 0.45 Deforestation policy biodiversity sensitive area investments PAI 10: Violation of UN global % of ESG standard policy / violation compact principles & OECD investments of international norms and N/A guidelines for Multinational standards **Enterprises** Voting and Engagement policy Expressed as a with systematic voting criteria percentage of PAI 13: Board Gender diversity 33.16 linked with board gender all board members diversity PAI 14: Exposure to controversial % of Controversial weapons policy N/A weapons investments

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter where data is available.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2023-31/12/2023

Top investments	Sector	Proportion	Country
ECOLAB INC XNYS USD	Manufacture of chemicals and chemical products	2.77%	US
DEERE & CO XNYS USD	Manufacture of machinery and equipment n.e.c.	2.67%	US
AGILENT TECHNOLOGIES INC XNYS USD	Manufacture of computer, electronic and optical products	2.49%	US
THERMO FISHER SCIENTIFIC INC XNYS USD	Manufacture of computer, electronic and optical products	2.48%	US
BALL CORP XNYS USD	Manufacture of fabricated metal products, except machinery and equipment	2.44%	US
REPUBLIC SERVICES INC XNYS USD	Waste collection, treatment and disposal activities; materials recovery	2.35%	US
XYLEM INC XNYS USD	Manufacture of machinery and equipment n.e.c.	1.95%	US
AMERICAN WATER WORKS CO INC XNYS USD	Water collection, treatment and supply	1.86%	US
APPLE INC XNGS USD	Manufacture of computer, electronic and optical products	1.79%	US
MICROSOFT CORP XNGS USD	Publishing activities	1.77%	US
DARLING INGREDIENTS INC XNYS USD	Manufacture of food products	1.72%	US
DANAHER CORP XNYS USD	Manufacture of computer, electronic and optical products	1.67%	US
TRIMBLE INC XNGS USD	Manufacture of computer, electronic and optical products	1.65%	US
AECOM XNYS USD	Architectural and engineering activities; technical testing and analysis	1.65%	US
TAIWAN SEMICONDUCTOR MANUFAC XTAI TWD	Manufacture of machinery and equipment n.e.c.	1.65%	TW

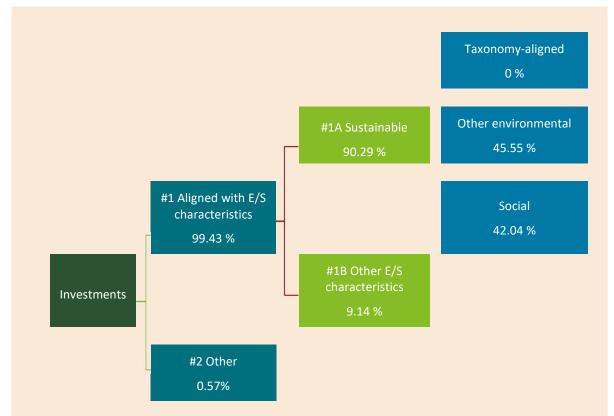

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Top sector	Proportion
Manufacture of computer, electronic and optical products	17.91%
Manufacture of machinery and equipment n.e.c.	8.55%
Manufacture of chemicals and chemical products	7.7%
Financial service activities, except insurance and pension funding	7.65%
Publishing activities	7.55%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	6.47%
Retail trade, except of motor vehicles and motorcycles	3.94%
Manufacture of fabricated metal products, except machinery and equipment	3.29%
Manufacture of food products	2.95%
Water collection, treatment and supply	2.92%
Activities auxiliary to financial services and insurance activities	2.72%
Architectural and engineering activities; technical testing and analysis	2.71%
Computer programming, consultancy and related activities	2.67%
Insurance, reinsurance and pension funding, except compulsory social security	2.61%
Waste collection, treatment and disposal activities; materials recovery	2.35%
Manufacture of paper and paper products	2.3%
Manufacture of motor vehicles, trailers and semi-trailers	2.06%
Manufacture of rubber and plastic products	1.37%
Telecommunications	1.2%
Manufacture of basic metals	1.03%
Manufacture of leather and related products	0.97%
Other professional, scientific and technical activities	0.82%
Other manufacturing	0.81%
Land transport and transport via pipelines	0.78%
Postal and courier activities	0.76%
Information service activities	0.68%
Other	0.6%
Manufacture of wearing apparel	0.51%

Real estate activities	0.51%
Scientific research and development	0.47%
Wholesale trade, except of motor vehicles and motorcycles	0.46%
Advertising and market research	0.41%
Electricity, gas, steam and air conditioning supply	0.41%
Office administrative, office support and other business support activities	0.41%
Other personal service activities	0.27%
Accommodation	0.24%
Rental and leasing activities	0.21%
Manufacture of electrical equipment	0.21%
Education	0.2%
Human health activities	0.18%
Extraction of crude petroleum and natural gas	0.07%
Mining of metal ores	0.05%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy3?

□Yes
\square In fossil gas \square In nuclear energy
⊠No

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

 operational expenditure (OpEx) reflecting the green operational activities of investee companies.

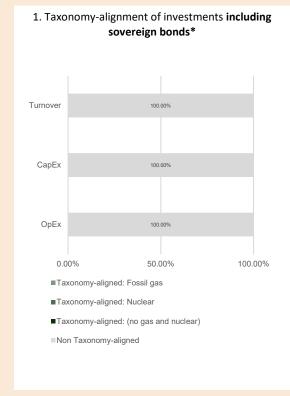

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

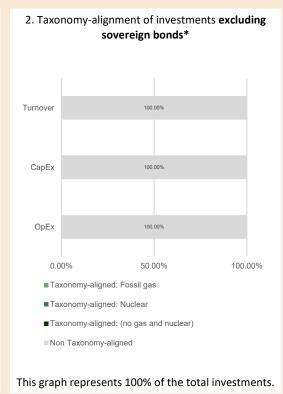

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Financial Product was not aligned to EU Taxonomy for the period of reference, nor for prior year period.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 45.55% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 42.04% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 0.57% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the

financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2023, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM ACT Climate Equity UCITS **Entity LEI:** 213800AUELP1Q8L9OD42 ETF (the "Financial Product")

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective? YES **⊠** NO It promoted Environmental/Social (E/S) characteristics and It made sustainable investments with an while it did not have as its objective a sustainable environmental objective: ____% investment, it had a proportion of 83.26 % of sustainable investments with an environmental objective in economic in economic activities that qualify as activities that qualify as environmentally environmentally sustainable under the sustainable under the EU Taxonomy **EU Taxonomy** with an environmental objective in economic in economic activities that do not activities that do not qualify as environmentally qualify as environmentally sustainable \boxtimes sustainable under the EU Taxonomy under the EU Taxonomy \boxtimes with a social objective It made sustainable investments with a social It promoted E/S characteristics, but did not make objective: % any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

Product & services score on SDG 7, 13

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value
Product & services score on SDG 7, 13	2.6 / 10 (SDG scores range from -10 (significant negative impact) to +10 (significant positive impact)

N.B.: While Sustainability KPIs (including regarding sustainable investments) are reported based on an average of the data available at each end of quarter, for technical reasons benchmarks are reported based on end of year data only. However, given that the volatility of the data is relatively low overall for KPI over the past year, we estimate that comparison of sustainability KPI between the financial product and its benchmark (which does not apply to sustainable investment-related indicators) is relevant and sufficiently accurate."

... And compared to previous periods?

Sustainability KPI Name	Year	Value	Benchmark	Coverage
Product & services score on SDG 7, 13	2022	3.43 / 10 (SDG scores range from -10 (significant negative impact) to +10 (significant positive impact)	0.22 / 10 (SDG scores range from -10 (significant negative impact) to +10 (significant positive impact)	99.27 %

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from +10 corresponding to 'significant contributing impact' to -10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	Scope 1: 16362.915 Scope 2: 6402.832 Scope 3: 153854.563 Scope 1+2: 22765.746 Scope 1+2+3: 174555.219
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$)	Scope 1+2: 64.23 Scope 1+2+3: 483.326
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenu	Scope 1+2+3: 1722.142
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	5.42
Climate Risk policy (engagement only)	PAI 5 : Share of non- renewable energy consumption and production	% of total energy sources	Energy Consumption: 68.28 Energy Production: 44.72
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) ¹	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	Sector NACE B: 0.727 Sector NACE C: 0.217 Sector NACE D: 2.814 Sector NACE G: 0.05 Sector NACE H: 1.282
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	4.73
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	0.004
SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	105.077

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ²	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	45.11 %
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	15.1%
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	32.12
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

 $Any other sustainable investment \ must \ also \ not \ significantly \ harm \ any \ environmental \ or \ social \ objectives.$

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

Units Relevant AXA IM policies **PAI** indicator Measurement Scope 1: 16362.915 Climate Risk policy Scope 2: 6402.832 PAI 1: Green House Gas (GHG) Scope 3: emissions (scope 1, 2 & 3 starting Metric tonnes 153854.563 01/2023) Scope 1+2: Ecosystem protection & 22765.746 **Deforestation policy** Scope 1+2+3: 174555.219 Metric tonnes Climate Risk policy of carbon dioxide Scope 1+2: equivalents per 64.23 PAI 2: Carbon Footprint Ecosystem protection & million euro or Scope 1+2+3: **Deforestation policy** dollar invested 483.326 (tCO2e/M€ or tCO2e/M\$) Climate Risk policy Metric tonnes per eur million PAI 3: GHG intensity of investee Scope 1+2+3: Ecosystem protection & revenue companies 1722.142 **Deforestation policy** % of PAI 4: Exposure to companies active investments Climate Risk policy 5.42 in the fossil fuel sector % of total Energy energy sources Consumption: 68.28 Climate Risk policy (engagement PAI 5: Share of non-renewable only) energy consumption and production Energy Production: 44.72 Ecosystem protection & PAI 7: activities negatively affecting % of 4.73 Deforestation policy biodiversity sensitive area investments PAI 10: Violation of UN global % of ESG standard policy / violation compact principles & OECD investments of international norms and N/A guidelines for Multinational standards **Enterprises** Voting and Engagement policy Expressed as a with systematic voting criteria percentage of PAI 13: Board Gender diversity 32.12 linked with board gender all board members diversity PAI 14: Exposure to controversial % of Controversial weapons policy N/A weapons investments

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter where data is available.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2023-31/12/2023

Top investments	Sector	Proportion	Country
SCHNEIDER ELECTRIC SE XPAR EUR	Manufacture of electrical equipment	2.85%	FR
TESLA INC XNGS USD	Manufacture of motor vehicles, trailers and semitrailers	2.71%	US
SIEMENS AG-REG XETR EUR	Manufacture of electrical equipment	2.36%	DE
IBERDROLA SA XMAD EUR	Electricity, gas, steam and air conditioning supply	2.31%	ES
CADENCE DESIGN SYS INC XNGS USD	Publishing activities	2.26%	US
FIRST SOLAR INC XNGS USD	Manufacture of electrical equipment	2.23%	US
INFINEON TECHNOLOGIES AG XETR EUR	Manufacture of computer, electronic and optical products	2.13%	DE
TAIWAN SEMICONDUCTOR MANUFAC XTAI TWD	Manufacture of machinery and equipment n.e.c.	2.05%	TW
DARLING INGREDIENTS INC XNYS USD	Manufacture of food products	1.82%	US
NATIONAL GRID PLC XLON GBP	Electricity, gas, steam and air conditioning supply	1.66%	GB
ALBEMARLE CORP XNYS USD	Manufacture of chemicals and chemical products	1.56%	US
BORGWARNER INC XNYS USD	Manufacture of motor vehicles, trailers and semitrailers	1.47%	US
NVIDIA CORP XNGS USD	Manufacture of computer, electronic and optical products	1.41%	US
SALESFORCE INC XNYS USD	Publishing activities	1.39%	US
ADOBE INC XNGS USD	Publishing activities	1.38%	US

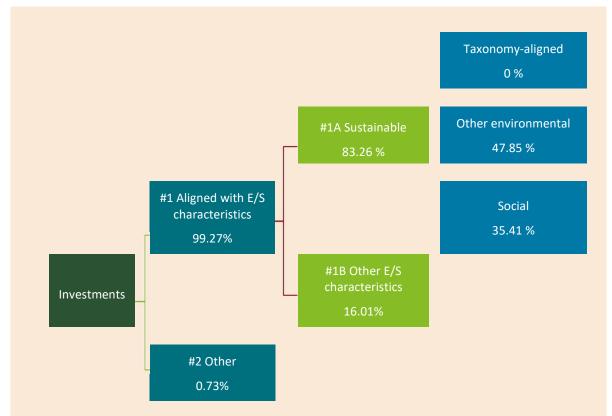

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Top sector	Proportion
Manufacture of computer, electronic and optical products	11.74%
Publishing activities	11.52%
Manufacture of electrical equipment	10.78%
Electricity, gas, steam and air conditioning supply	7.59%
Insurance, reinsurance and pension funding, except compulsory social security	5.95%
Manufacture of machinery and equipment n.e.c.	5.88%
Financial service activities, except insurance and pension funding	5.69%
Manufacture of motor vehicles, trailers and semi-trailers	5.65%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	5.03%
Manufacture of chemicals and chemical products	4.22%
Manufacture of food products	3.95%
Telecommunications	3.07%
Activities auxiliary to financial services and insurance activities	2.49%
Land transport and transport via pipelines	2.25%
Computer programming, consultancy and related activities	2.08%
Retail trade, except of motor vehicles and motorcycles	1.92%
Wholesale trade, except of motor vehicles and motorcycles	1.19%
Manufacture of paper and paper products	1.12%
Manufacture of basic metals	1.12%
Information service activities	1.08%
Scientific research and development	0.76%
Real estate activities	0.7%
Other	0.69%
Office administrative, office support and other business support activities	0.64%
Mining of metal ores	0.64%
Postal and courier activities	0.42%
Manufacture of coke and refined petroleum products	0.41%
Services to buildings and landscape activities	0.34%
Manufacture of leather and related products	0.33%

Architectural and engineering activities; technical testing and analysis	0.29%
Manufacture of other non-metallic mineral products	0.22%
Manufacture of fabricated metal products, except machinery and equipment	0.1%
Manufacture of wearing apparel	0.08%
Manufacture of rubber and plastic products	0.07%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy3?

□Yes	
\square In fossil gas \square In nuclear energy	
⊠No	

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

 operational expenditure (OpEx) reflecting the green operational activities of investee companies.

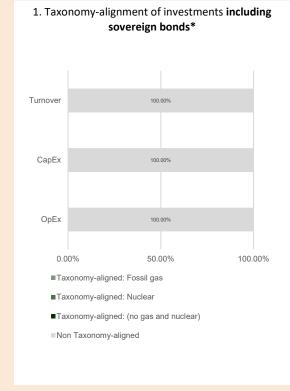

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

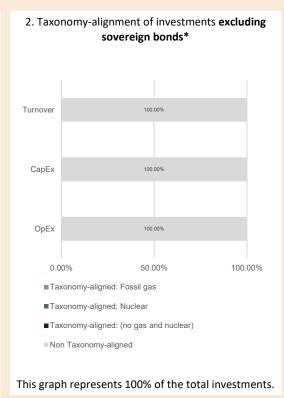

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

The Financial Product was not aligned to EU Taxonomy for the period of reference, nor for prior year period.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU)

2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 47.85% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 35.41% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 0.73% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the

financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2023, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

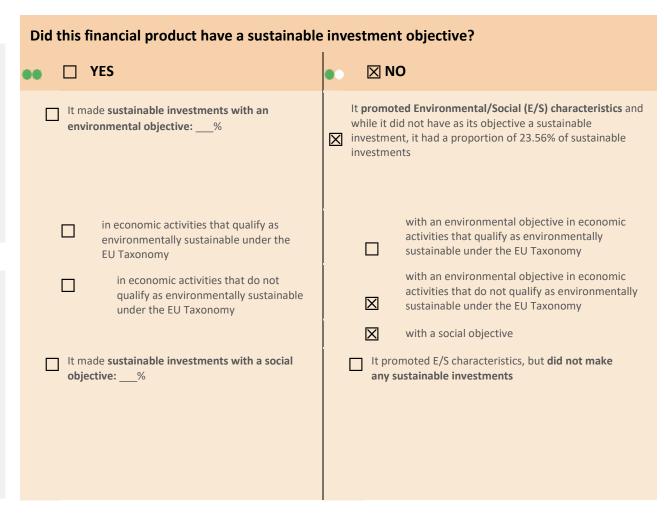

Product Name: AXA IM US High Yield Entity LEI: 2138008Y3CBYTN527V24

Opportunities UCITS ETF (the "Financial Product")

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- o Preservation of climate with exclusion policies on coal and oil sand activities
- o Protection of ecosystem and prevention of deforestation
- o Better health with exclusion on tobacco
- O Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of international norms and standards such as the United Nations Global Compact Principles, International Labor Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and ESG standards have been applied bindingly at all times during the reference period.

The Financial Product has not designated an ESG Benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value	Benchmark	Coverage
ESG Score	5.25 / 10	5.26 / 10	96.75%

N.B.: While Sustainability KPIs (including regarding sustainable investments) are reported based on an average of the data available at each end of quarter, for technical reasons benchmarks are reported based on end of year data only. However, given that the volatility of the data is relatively low overall for KPI over the past year, we estimate that comparison of sustainability KPI between the financial product and its benchmark (which does not apply to sustainable investment-related indicators) is relevant and sufficiently accurate."

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

- 2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.
- 3.Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:
- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.

The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

----- How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from +10 corresponding to 'significant contributing impact' to -10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$)	N/A

Social and Governance:

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ²	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B: The measurement of the principal adverse impacts will not be available this year for this fund due to the implementation of a new strategy. Therefore, we will denote 'N/A' for this reporting period.

--Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per	N/A
Ecosystem protection & Deforestation policy		million euro or dollar invested (tCO2e/M€ or tCO2e/M\$)	,
Climate Risk policy Ecosystem protection & Deforestation policy	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter where data is available.

N.B: The measurement of the principal adverse impacts will not be available this year for this fund due to the implementation of a new strategy. Therefore, we will denote 'N/A' for this reporting period.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

he list includes the nvestments constituting	Top investments	Sector	Proportion	Country

 $The \ portfolio \ proportions \ of investments \ presented \ above \ are \ an \ average \ over \ the \ reference \ period.$

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Top sector	Proportion
Telecommunications	8.56%
Publishing activities	7.47%
Land transport and transport via pipelines	5.71%
Financial service activities, except insurance and pension funding	5.27%
Human health activities	5.08%
Retail trade, except of motor vehicles and motorcycles	5.02%
Water transport	3.49%
Gambling and betting activities	3.44%
Manufacture of chemicals and chemical products	3.39%
Other manufacturing	3.15%
Real estate activities	3.1%
Extraction of crude petroleum and natural gas	3%
Security and investigation activities	2.74%
Manufacture of computer, electronic and optical products	2.52%
Activities auxiliary to financial services and insurance activities	2.34%
Manufacture of food products	2.19%
Manufacture of paper and paper products	1.88%
Information service activities	1.76%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	1.57%
Manufacture of fabricated metal products, except machinery and equipment	1.56%
Wholesale trade, except of motor vehicles and motorcycles	1.5%
Motion picture, video and television programme production, sound recording and music publishing activities	1.39%
Manufacture of machinery and equipment n.e.c.	1.32%
Programming and broadcasting activities	1.31%
Rental and leasing activities	1.26%
Wholesale and retail trade and repair of motor vehicles and motorcycles	1.25%
Mining support service activities	1.15%

Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials	1.14%
Food and beverage service activities	1.1%
Sports activities and amusement and recreation activities	1.07%
Manufacture of rubber and plastic products	1.06%
Construction of buildings	1%
Accommodation	0.96%
Manufacture of electrical equipment	0.92%
Advertising and market research	0.89%
Manufacture of other non-metallic mineral products	0.88%
Manufacture of other transport equipment	0.87%
Office administrative, office support and other business support activities	0.85%
Manufacture of motor vehicles, trailers and semi-trailers	0.82%
Waste collection, treatment and disposal activities; materials recovery	0.63%
Manufacture of basic metals	0.63%
Computer programming, consultancy and related activities	0.61%
Manufacture of wearing apparel	0.6%
Air transport	0.46%
Manufacture of coke and refined petroleum products	0.45%
Electricity, gas, steam and air conditioning supply	0.44%
Creative, arts and entertainment activities	0.42%
Scientific research and development	0.39%
Manufacture of beverages	0.29%
Civil engineering	0.28%
Architectural and engineering activities; technical testing and analysis	0.28%
Manufacture of leather and related products	0.27%
Activities of head offices; management consultancy activities	0.12%
Manufacture of furniture	0.11%
Other The portfolio proportions of investments presented above as	0.06%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomys?

□Yes
☐ In fossil gas ☐ In nuclear energy
⊠No

- capital expenditure
(CapEx) showing the
green investments made
by investee companies,
e.g for a transition to a
green economy.
- operational
expenditure (OpEx)
reflecting the green
operational activities of

investee companies.

Taxonomy-aligned activities are expressed

- turnover reflecting the share of revenue from green activities of investee companies.

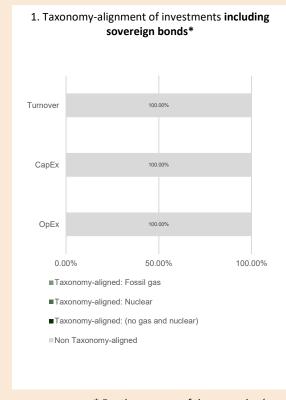

as a share of:

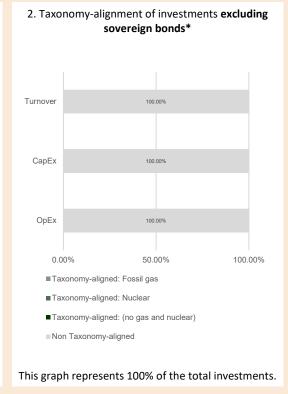

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

(PA)

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 8.81% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 14.76% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 3.97% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2023, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

Not applicable.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM MSCI USA Equity PAB

UCITS ETF (the "Financial Product")

Entity LEI: 213800GVD8ELUJQERY41

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance

practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective? П YES **⊠** NO It promoted Environmental/Social (E/S) characteristics and It made sustainable investments with an while it did not have as its objective a sustainable environmental objective: ____% investment, it had a proportion of 65.51% of sustainable investments with an environmental objective in economic in economic activities that qualify as activities that qualify as environmentally environmentally sustainable under the sustainable under the EU Taxonomy **EU Taxonomy** with an environmental objective in economic in economic activities that do not activities that do not qualify as environmentally qualify as environmentally sustainable Xsustainable under the EU Taxonomy under the EU Taxonomy X with a social objective It made sustainable investments with a social It promoted E/S characteristics, but did not make objective: % any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

- Carbon intensity
- ESG Score

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period.

The Financial Product also used the ESG Benchmark MSCI USA Climate Paris Aligned Index NR as a reference benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value	Coverage
Carbon intensity	58.34 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	100 %
ESG Score	6.73 / 10	100 %

N.B.: While Sustainability KPIs (including regarding sustainable investments) are reported based on an average of the data available at each end of quarter, for technical reasons benchmarks are reported based on end of year data only. However, given that the volatility of the data is relatively low overall for KPI over the past year, we estimate that comparison of sustainability KPI between the financial product and its benchmark (which does not apply to sustainable investment-related indicators) is relevant and sufficiently accurate."

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

- 2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.
- 3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:
- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

- The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
 quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly
 contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively
 overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

- How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from +10 corresponding to 'significant contributing impact' to -10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments. Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenu	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non- renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) ¹	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	N/A
SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ²	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	0.12

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

-Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy		Metric tonnes of carbon	
Ecosystem protection & Deforestation policy	PAI 2: Carbon Footprint	dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$)	N/A
Climate Risk policy		Metric tonnes	
Ecosystem protection & Deforestation policy	PAI 3: GHG intensity of investee companies	per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	0.12

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter where data is available.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2023-31/12/2023

Top investments	Sector	Proportion	Country
APPLE INC XNGS USD	Manufacture of computer, electronic and optical products	7.75%	US
MICROSOFT CORP XNGS USD	Publishing activities	7.33%	US
NVIDIA CORP XNGS USD	Manufacture of computer, electronic and optical products	3.49%	US

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Top sector	Proportion
Manufacture of computer, electronic and optical products	23.69%
Publishing activities	12.24%
Information service activities	8.83%
Real estate activities	7.55%
Activities auxiliary to financial services and insurance activities	6.3%
Retail trade, except of motor vehicles and motorcycles	6.21%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	6.19%
Insurance, reinsurance and pension funding, except compulsory social security	4.29%
Manufacture of motor vehicles, trailers and semi-trailers	2.88%
Manufacture of machinery and equipment n.e.c.	2.23%
Financial service activities, except insurance and pension funding	2.19%
Manufacture of electrical equipment	1.99%
Food and beverage service activities	1.82%
Computer programming, consultancy and related activities	1.74%
Other manufacturing	1.68%
Manufacture of chemicals and chemical products	1.39%
Scientific research and development	1.36%
Electricity, gas, steam and air conditioning supply	1.3%
Telecommunications	0.82%
Manufacture of food products	0.75%
Water collection, treatment and supply	0.49%
Motion picture, video and television programme production, sound recording and music publishing activities	0.49%
Land transport and transport via pipelines	0.48%
Manufacture of beverages	0.44%
Wholesale and retail trade and repair of motor vehicles and motorcycles	0.39%
Architectural and engineering activities; technical testing and analysis	0.33%
Wholesale trade, except of motor vehicles and motorcycles	0.28%

Security and investigation activities	0.27%
Other	0.18%
Other personal service activities	0.15%
Rental and leasing activities	0.15%
Manufacture of leather and related products	0.13%
Services to buildings and landscape activities	0.12%
Programming and broadcasting activities	0.12%
Mining of metal ores	0.11%
Human health activities	0.09%
Manufacture of fabricated metal products, except machinery and equipment	0.08%
Construction of buildings	0.06%
Manufacture of other non-metallic mineral products	0.04%
Employment activities	0.04%
Advertising and market research	0.04%
Accommodation	0.03%
Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials	0.02%
Sports activities and amusement and recreation activities	0.01%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational
 expenditure (OpEx)
 reflecting the green
 operational activities of investee companies.

☐ Yes
☐ In fossil gas ☐ In nuclear energy

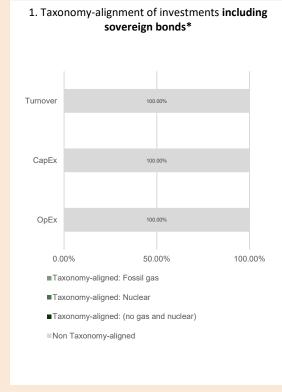

☑No

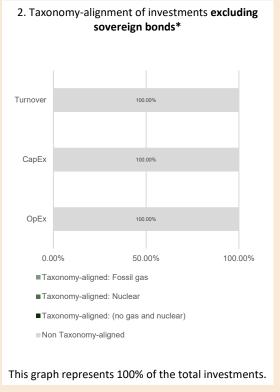

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 32.69% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 32.82% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 2.04% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2023, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Financial Product has designated the MSCI USA Climate Paris Aligned Index NR as its reference benchmark to meet its environmental and social characteristics.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM USD Credit PAB UCITS ETF **Entity LEI:** 2138001ZAYCBQN3OUC65 (the "Financial Product")

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective? YES **⊠** NO It promoted Environmental/Social (E/S) characteristics and It made sustainable investments with an while it did not have as its objective a sustainable environmental objective: ____% investment, it had a proportion of 61.51% of sustainable investments with an environmental objective in economic in economic activities that qualify as activities that qualify as environmentally environmentally sustainable under the sustainable under the EU Taxonomy **EU Taxonomy** with an environmental objective in economic in economic activities that do not activities that do not qualify as environmentally qualify as environmentally sustainable Xsustainable under the EU Taxonomy under the EU Taxonomy X with a social objective It made sustainable investments with a social It promoted E/S characteristics, but did not make objective: % any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period.

The Financial Product also used the ESG Benchmark ICE US Corporate Paris-Aligned Absolute Emissions Index. as a reference benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon intensity	65.3 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	89.51 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	98.07 %

N.B.: While Sustainability KPIs (including regarding sustainable investments) are reported based on an average of the data available at each end of quarter, for technical reasons benchmarks are reported based on end of year data only. However, given that the volatility of the data is relatively low overall for KPI over the past year, we estimate that comparison of sustainability KPI between the financial product and its benchmark (which does not apply to sustainable investment-related indicators) is relevant and sufficiently accurate."

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly

- contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

----- How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from +10 corresponding to 'significant contributing impact' to -10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	N/A
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$)	N/A
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenu	N/A
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5 : Share of non- renewable energy consumption and production	% of total energy sources	N/A
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) ¹	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	N/A
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	N/A
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	N/A
SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	N/A

Social and Governance:

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ²	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

--Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti-corruption and anti-bribery matters.

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2 & 3 starting 01/2023)	Metric tonnes	N/A
Ecosystem protection & Deforestation policy			
Climate Risk policy	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per	N/A
Ecosystem protection & Deforestation policy	774 2. Carbon Footprine	million euro or dollar invested (tCO2e/M€ or tCO2e/M\$)	Ny/
Climate Risk policy		Metric tonnes	
Ecosystem protection & Deforestation policy	PAI 3: GHG intensity of investee companies	per eur million revenue	N/A
Climate Risk policy	PAI 4: Exposure to companies active in the fossil fuel sector	% of investments	N/A
Climate Risk policy (engagement only)	PAI 5: Share of non-renewable energy consumption and production	% of total energy sources	N/A
Ecosystem protection & Deforestation policy	PAI 7: activities negatively affecting biodiversity sensitive area	% of investments	N/A
ESG standard policy / violation of international norms and standards	PAI 10: Violation of UN global compact principles & OECD guidelines for Multinational Enterprises	% of investments	N/A
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board Gender diversity	Expressed as a percentage of all board members	N/A
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter where data is available.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2023-31/12/2023

Top investments	Sector	Proportion	Country
CVS 5.05% - 25/03/2048 Call	Wholesale trade, except of motor vehicles and motorcycles	1.04%	US
JPM 3.509% Var - 23/01/2029 Call	Financial service activities, except insurance and pension funding	0.98%	US

CMCSA 5.5% - 15/05/2064 Call	Telecommunications	0.97%	US
GS 3.691% Var - 05/06/2028 Call	Activities auxiliary to financial services and insurance activities	0.96%	US
ACAFP 1.907% Var - 16/06/2026 Call	Financial service activities, except insurance and pension funding	0.95%	GB
JPM 2.963% Var - 25/01/2033 Call	Financial service activities, except insurance and pension funding	0.95%	US
ORCL 3.6% - 01/04/2040 Call	Publishing activities	0.92%	US
T 4.75% - 15/05/2046 Call	Telecommunications	0.91%	US
HSBC 2.013% Var - 22/09/2028 Call	Financial service activities, except insurance and pension funding	0.9%	GB
CE 6.7% - 15/11/2033 Call	Manufacture of chemicals and chemical products	0.9%	US
HSBC 4.583% Var - 19/06/2029 Call	Financial service activities, except insurance and pension funding	0.89%	GB
GM 3.1% - 12/01/2032 Call	Manufacture of motor vehicles, trailers and semitrailers	0.87%	US
MS 2.943% Var - 21/01/2033 Call	Activities auxiliary to financial services and insurance activities	0.87%	US
BAC 2.972% Var - 04/02/2033 Call	Financial service activities, except insurance and pension funding	0.87%	US
MS 5.449% Var - 20/07/2029 Call	Activities auxiliary to financial services and insurance activities	0.86%	US

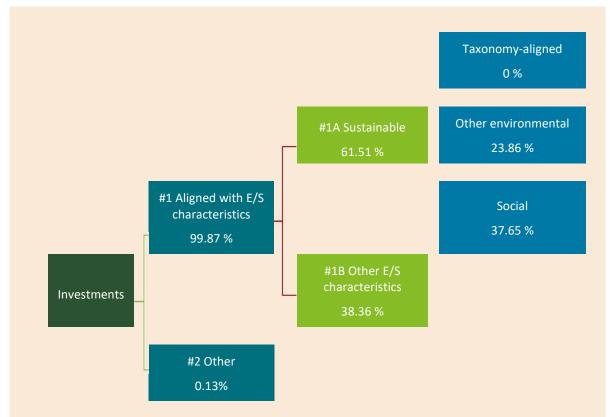

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Top sector	Proportion
Financial service activities, except insurance and pension funding	30.17%
Telecommunications	9.82%
Activities auxiliary to financial services and insurance activities	8.21%
Manufacture of computer, electronic and optical products	6.78%
Insurance, reinsurance and pension funding, except compulsory social security	6.7%
Real estate activities	3.41%
Publishing activities	3.3%
Wholesale trade, except of motor vehicles and motorcycles	2.93%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	2.86%
Manufacture of motor vehicles, trailers and semi-trailers	2.24%
Retail trade, except of motor vehicles and motorcycles	2.02%
Human health activities	2.01%
Manufacture of chemicals and chemical products	1.82%
Manufacture of beverages	1.8%
Manufacture of food products	1.59%
Manufacture of paper and paper products	1.52%
Information service activities	1.45%
Other manufacturing	1.41%
Scientific research and development	1.4%
Land transport and transport via pipelines	1.21%
Manufacture of machinery and equipment n.e.c.	1.17%
Electricity, gas, steam and air conditioning supply	1.03%
Warehousing and support activities for transportation	0.83%
Rental and leasing activities	0.66%
Manufacture of rubber and plastic products	0.64%
Manufacture of basic metals	0.59%
Waste collection, treatment and disposal activities; materials recovery	0.55%
Advertising and market research	0.45%

Motion picture, video and television programme production, sound recording and music publishing activities	0.41%
Accommodation	0.36%
Manufacture of other non-metallic mineral products	0.34%
Food and beverage service activities	0.18%
Other	0.13%

The portfolio proportions of investments presented above are an average over the reference period.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy3?

□Yes	
\square In fossil gas \square In nuclear energy	
⊠No	

Taxonomy-aligned activities are expressed as a share of:

- turnover reflecting the share of revenue from green activities of investee companies.
- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.
- operational expenditure (OpEx) reflecting the green operational activities of investee companies.

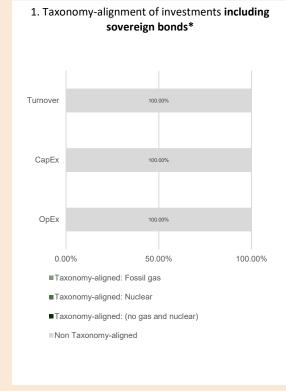

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

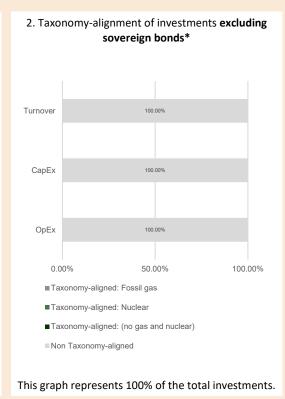

To comply with the EU Taxonomy, the criteria for **fossil** gas include limitations on emissions and switching to fully renewable power or lowcarbon fuels by the end of 2035. For nuclear **energy**, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 23.86% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 37.65% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 0.13% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria described in this appendix. Such assets may be equity or debt instruments, derivatives investments and investment collective schemes that do not promote environmental or social characteristics and that are used to

attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2023, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Financial Product has designated the ICE US Corporate Paris-Aligned Absolute Emissions Index as its reference benchmark to meet its environmental and social characteristics.

Periodic disclosure for the financial products referred to in Article 8, paragraphs 1, 2 and 2a, of Regulation (EU) 2019/2088 and Article 6, first paragraph, of Regulation (EU) 2020/852

Product Name: AXA IM Euro Credit PAB UCITS ETF **Entity LEI:** 213800BGY6L8OIK6ES56 (the "Financial Product")

Environmental and/or social characteristics

Sustainable investment means an investment in an economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not include a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.

Did this financial product have a sustainable investment objective? YES **⊠** NO It promoted Environmental/Social (E/S) characteristics and It made sustainable investments with an while it did not have as its objective a sustainable environmental objective: ____% investment, it had a proportion of 82.42% of sustainable investments with an environmental objective in economic in economic activities that qualify as activities that qualify as environmentally environmentally sustainable under the sustainable under the EU Taxonomy **EU Taxonomy** with an environmental objective in economic in economic activities that do not activities that do not qualify as environmentally qualify as environmentally sustainable Xsustainable under the EU Taxonomy under the EU Taxonomy X with a social objective It made sustainable investments with a social It promoted E/S characteristics, but did not make objective: % any sustainable investments

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Financial Product has met the environmental and social characteristics promoted for the reference period by investing in companies considering their:

Carbon intensity

The Financial Product has also promoted other specific environmental and social characteristics, mainly:

- Preservation of climate with exclusion policies on coal and oil sand activities
- Protection of ecosystem and prevention of deforestation
- Better health with exclusion on tobacco
- Labor rights, society and human rights, business ethics, anti-corruption with exclusion on companies in violation of
 international norms and standards such as the United Nations Global Compact Principles, International Labor
 Organization's (ILO) Conventions or the OECD guidelines for Multinational Enterprises AXA IM sectorial exclusions and
 ESG standards have been applied bindingly at all times during the reference period.

The Financial Product also used the ESG Benchmark ICE Euro Corporate Paris-Aligned Absolute Emissions Index as a reference benchmark to promote environmental or social characteristics.

How did the sustainability indicators perform?

During the reference the period, the attainment of the environmental and social characteristics promoted by the Financial Product has been measured with the sustainability indicators mentioned above:

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Sustainability KPI Name	Value	Benchmark	Coverage
Carbon intensity	118.03 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	81.31 CO2 tons per millions \$ revenue for corporate and in CO2 Kg per PPP \$ of GDP for sovereign	100 %

N.B.: While Sustainability KPIs (including regarding sustainable investments) are reported based on an average of the data available at each end of quarter, for technical reasons benchmarks are reported based on end of year data only. However, given that the volatility of the data is relatively low overall for KPI over the past year, we estimate that comparison of sustainability KPI between the financial product and its benchmark (which does not apply to sustainable investment-related indicators) is relevant and sufficiently accurate."

... And compared to previous periods?

Not applicable.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objective?

During the reference period, the Financial Product has partially invested in instruments qualifying as sustainable investments with various social and environmental objectives (without any limitation) by assessing the positive contribution of investee companies through at least one of the following dimensions:

- 1.UN Sustainable Development Goals alignment (SDG) of investee companies as reference framework, considering companies which contribute positively to at least one SDG either through the Products and Services they offer or the way they carry their activities ("Operations"). To be considered as a sustainable asset, a company must satisfy the following criteria:
- a) the SDG scoring related to the "products and services" offered by the issuer is equal or above 2, corresponding to at least 20% of their revenues being derived from a sustainable activity, or
- b) using a best in universe approach consisting of giving priority to the issuers best rated from a non-financial viewpoint irrespective of their sector of activity, the SDG scoring of the issuer's operations is on the better top 2.5%, except in consideration to the SDG-5 (gender equality), SDG 8 (decent work), SDG 10 (reduced inequalities), SDG 12 (Responsible Production and Consumption) and SDG 16 (peace & justice), for which the SDG scoring of the issuer's Operation is on the better top 5%. For SDG 5, 8, 10 and 16 the selectivity criteria on issuer's "Operations" is less restrictive as such SDGs are better addressed considering the way the issuer carries their activities than the Products and Services offered by the investee company. It is also less restrictive for SDG 12 which can be addressed through the Products & Services or the way the investee company carries their activities.

The quantitative SDG results are sourced from external data providers and can be overridden by a duly supported qualitative analysis performed by the Investment Manager.

2.Integration of issuers engaged in a solid Transition Pathway consistently with the European Commission's ambition to help fund the transition to a 1.5°c world - based on the framework developed by the Science Based Targets Initiative, considering companies which have validated Science-Based targets.

3. Investments in Green, Social or Sustainability Bonds (GSSB), Sustainability Linked Bonds:

- a) GSSB are instruments which aim to contribute to various sustainable objectives by nature. As such, investments in bonds issued by corporates and sovereigns that have been identified as green bonds, social bonds or sustainability bonds in Bloomberg data base are considered as "sustainable investments" under AXA IM's SFDR framework.
- b) With regards to Sustainability Linked Bonds, an internal framework was developed to assess the robustness of those bonds that are used to finance general sustainable purpose. As these instruments are newer leading to heterogeneous practices from issuers, only Sustainability Linked Bonds that get a positive or neutral opinion from AXA IM's internal analysis process are considered as "sustainable investments". This analysis framework draws on the International Capital Market Association (ICMA) guidelines with a stringent proprietary approach based on the following defined criteria: (i) issuer's sustainability strategy and key performance indicators relevance and materiality, (ii) Sustainability performance target's ambition, (iii) bond characteristics and (iv) sustainability performance target's monitoring & reporting.

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

During the reference period, the Do No Significant Harm Principle for the sustainable investments the Financial Product made had been achieved by not investing in company meeting any of the criteria below:

The issuer caused significant harm along any of the SDGs when one of its SDG scores is below -5 based on a
quantitative database from an external provider on a scale ranging from +10 corresponding to 'significantly

- contributing' to -10 corresponding to 'significantly obstructing', unless the quantitative score has been qualitatively overridden.
- The issuer failed within in AXA IM's sectorial and ESG standards ban lists, which consider among other factors the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights.
- The issuer had a CCC (or 1.43) or lower ESG rating according to AXA IM ESG scoring methodology (as defined in SFDR precontractual annex).

How were the indicators for adverse impacts on sustainability factors taken into account?

The Financial Product has taken into consideration Principal Adverse Impacts ("PAIs") indicators to ensure that the sustainable investments did not harm significantly any other sustainability objectives under SFDR.

Principal adverse impacts have been mitigated through AXA IM sectorial exclusion policies and AXA IM ESG standards (as described in the SFDR precontractual annex that have been applied bindingly at all times by the Financial Product), as well as through the filters based on UN Sustainable Development Goals scoring.

Where relevant, Stewardship policies have been an additional risk mitigation on principal adverse impacts through direct dialogue with companies on sustainability and governance issues. Through the engagement activities, the Financial Product has used its influence as an investor to encourage companies to mitigate environmental and social risks relevant to their sectors as described below.

Voting at general meetings has also been an important element of the dialogue with investee companies in order to foster sustainably long-term value of the companies in which the Financial Product invests and mitigate adverse impacts as described below.

AXA IM also relies on the SDG pillar of its sustainable investment framework to monitor and take into account adverse impacts on those sustainability factors by excluding investee companies which have a SDG score under -5 on any SDG (on a scale from +10 corresponding to 'significant contributing impact' to -10 corresponding to 'significant obstructing impact'), unless the quantitative score has been qualitatively overridden following a duly documented analysis by AXA IM Core ESG & Impact Research. This approach enables us to ensure investee companies with the worst adverse impacts on any SDG are not considered as sustainable investments.

Environment:

Relevant AXA IM policies	PAI indicator	Units	Measurement
Climate Risk policy Ecosystem Protection & Deforestation policy	PAI 1: Green House Gas (GHG) emissions (scope 1, 2, & 3 starting 01/2023)	Metric tonnes	Scope 1: 9583.852 Scope 2: 1357.334 Scope 3: 35011.219 Scope 1+2: 10941.186 Scope 1+2+3: 45336.07
	PAI 2: Carbon Footprint	Metric tonnes of carbon dioxide equivalents per million euro or dollar invested (tCO2e/M€ or tCO2e/M\$)	Scope 1+2: 64.408 Scope 1+2+3: 280.684
	PAI 3: GHG intensity of investee companies	Metric tonnes per eur million revenu	Scope 1+2+3: 1009.157
Climate Risk policy	PAI 4: Exposure to Companies active in the fossil fuel sector	% of investments	15.42
Climate Risk policy (engagement only)	PAI 5 : Share of non- renewable energy consumption and production	% of total energy sources	Energy Consumption: 62.85 Energy Production: 66.25
Climate risk policy (considering an expected correlation between GHG emissions and energy consumption) ¹	PAI 6: Energy consumption intensity per high impact climate sector	GWh per million EUR of revenue of investee companies, per high impact climate sector	Sector NACE C: 0.599 Sector NACE D: 3.093 Sector NACE F: 20.01 Sector NACE G: 0.549 Sector NACE H: 0.18 Sector NACE L: 0.464
Ecosystem Protection & Deforestation policy	PAI 7: Activities negatively affecting biodiversity sensitive areas	% of investments	12.05
SDG no significantly negative score	PAI 8: Emissions to water	Tonnes per million EUR invested, expressed as a weighted average	0.001

¹ The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively. Not all high impact climate sectors are targeted by the exclusion policy for the time being.

SDG no significantly negative score	PAI 9: Hazardous waste and radioactive waste ratio	Tonnes per million EUR invested, expressed as a weighted average	0.255
		WCibilted avelage	

Social and Governance:

Relevant AXA IM policies	PAI indicator	Units	Measurement
ESG standards policy: violation of international norms and standards	PAI 10: Violations of UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	N/A
ESG standards policy: violation of international norms and standards (considering an expected correlation between companies non-compliant with international norms and standards and the lack of implementation by companies of processes and compliance mechanisms to monitor compliance with those standards) ²	PAI 11: Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact principles & OECD Guidelines for multinational enterprises	% of investments	12.52 %
SDG no significantly negative score	PAI 12: Unadjusted gender pay gap	Average unadjusted gender pay gap of investee companies	16.61%
Voting and Engagement policy with systematic voting criteria linked with board gender diversity	PAI 13: Board gender diversity	Expressed as a percentage of all board members.	40.15
Controversial weapons policy	PAI 14: Exposure to controversial weapons	% of investments	N/A

The Financial Product is also taking into account the environmental optional indicator PAI 6 'Water usage and recycling' and the social optional indicator PAI 15 'Lack of anti-corruption and anti-bribery policies'.

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

-Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

During the reference period, the Financial Product did not invest in companies which cause, contribute or are linked to violations of international norms and standards in a material manner. Those standards focus on Human Rights, Society, Labor and Environment. AXA IM excluded any companies that have been assessed as "non compliant" to UN's Global Compact Principles, International Labor Organization's (ILO) Conventions, OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights (UNGPs).

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomy-aligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the EU criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the EU criteria for environmentally sustainable economic activities.

Any other sustainable investment must also not significantly harm any environmental or social objectives.

² The approach used to mitigate the PAI indicators through this exclusion policy will evolve as the improvement in data availability and quality enables us to use the PAI more effectively.

Principal adverse

decisions on

relating to

matters.

impacts are the most significant negative

impacts of investment

and employee matters,

rights, anti-corruption and anti-bribery

How did this financial product consider principal adverse impacts on sustainability factors?

The Financial Product took into consideration the following Principal Adverse Impact indicators applying the following exclusion policies and stewardship policies:

Units Relevant AXA IM policies **PAI** indicator Measurement Scope 1: 9583.852 Climate Risk policy Scope 2: 1357.334 PAI 1: Green House Gas (GHG) Scope 3: emissions (scope 1, 2 & 3 starting Metric tonnes 35011.219 01/2023) Scope 1+2: Ecosystem protection & 10941.186 **Deforestation policy** Scope 1+2+3: 45336.07 Metric tonnes Climate Risk policy of carbon dioxide Scope 1+2: equivalents per 64.408 PAI 2: Carbon Footprint Ecosystem protection & Scope 1+2+3: million euro or **Deforestation policy** dollar invested 280.684 (tCO2e/M€ or tCO2e/M\$) Climate Risk policy Metric tonnes per eur million PAI 3: GHG intensity of investee Scope 1+2+3: Ecosystem protection & revenue companies 1009.157 **Deforestation policy** % of PAI 4: Exposure to companies active investments Climate Risk policy 15.42 in the fossil fuel sector % of total Energy energy sources Consumption: 62.85 Climate Risk policy (engagement PAI 5: Share of non-renewable only) energy consumption and production Energy Production: 66.25 Ecosystem protection & PAI 7: activities negatively affecting % of 12.05 Deforestation policy biodiversity sensitive area investments PAI 10: Violation of UN global % of ESG standard policy / violation compact principles & OECD investments of international norms and N/A guidelines for Multinational standards **Enterprises** Voting and Engagement policy Expressed as a with systematic voting criteria percentage of PAI 13: Board Gender diversity 40.15 linked with board gender all board members diversity PAI 14: Exposure to controversial % of Controversial weapons policy N/A weapons investments

PAI calculation methodologies have been defined as consistently as possible with current regulatory guidelines. Furthermore, reporting on PAIs can be limited or may reflect reporting periods prior to the reference period mainly due to challenges with regards to both data availability and reliability. PAI definitions and calculation methodologies may still evolve in the future depending on any additional regulatory guidelines, or due to data evolution with, for instance, data provider's change in methodology, or change in data sets used in order to align different reporting frameworks whenever possible.

N.B.: PAIs are reported based on an average of the impacts at each end of quarter where data is available.

What were the top investments of this financial product?

The top investments of the Financial Product are detailed below:

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01/01/2023-31/12/2023

Top investments	Sector	Proportion	Country
T 1.8% - 05/09/2026 Call	Telecommunications	1.4%	US
VCXAU 1.125% - 07/11/2029 Call	Real estate activities	1.2%	AU
AIB 2.25% Var - 04/04/2028 Call	Financial service activities, except insurance and pension funding	1.18%	IE
EDF 4.375% - 12/10/2029 Call	Electricity, gas, steam and air conditioning supply	1.17%	FR
EDPPL 0.375% - 16/09/2026 Call	Electricity, gas, steam and air conditioning supply	1.15%	NL
VZ 0.375% - 22/03/2029 Call	Telecommunications	0.9%	US
UCGIM 1.25% Var - 16/06/2026 Call	Financial service activities, except insurance and pension funding	0.86%	IT
RBIAV 7.375% Var - 20/12/2032 Call	Financial service activities, except insurance and pension funding	0.81%	АТ
ABNANV 2.375% - 01/06/2027	Financial service activities, except insurance and pension funding	0.81%	NL
RY 4.125% - 05/07/2028	Financial service activities, except insurance and pension funding	0.79%	CA
BBVASM 4.125% Var - 10/05/2026 Call	Financial service activities, except insurance and pension funding	0.79%	ES
ABESM 3% - 27/03/2031 Call	Warehousing and support activities for transportation	0.79%	ES
BFCM 5.125% - 13/01/2033	Financial service activities, except insurance and pension funding	0.76%	FR

BACRED 1.625% - 07/01/2025	Financial service activities, except insurance and pension funding	0.73%	IΤ

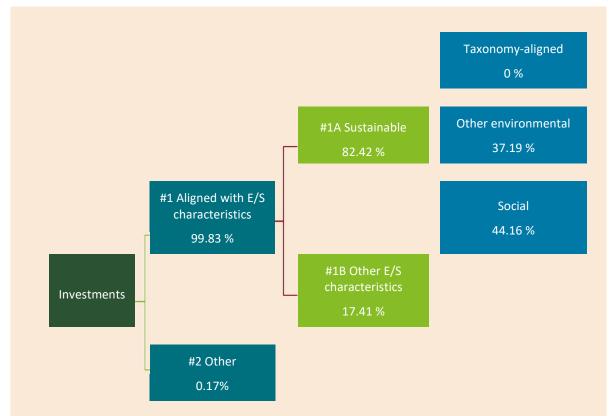

The portfolio proportions of investments presented above are an average over the reference period.

What was the proportion of sustainability-related investments?

What was the asset allocation?

Asset allocation describes the share of investments in specific assets.

#1 Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.

#2 Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

The actual asset allocation has been reported based on the assets weighted average at the end of the reference period. Depending on the potential usage of derivatives within this product's investment strategy, the expected exposure detailed below could be subject to variability as the portfolio's NAV may be impacted by the Mark to Market of derivatives. For more details on the potential usage of derivatives by this product, please refer to its precontractual documents and its investment strategy described within.

In which economic sectors were the investments made?

Financial product's investments were made in the economic sectors detailed below:

Top sector	Proportion
Financial service activities, except insurance and pension funding	48.87%
Electricity, gas, steam and air conditioning supply	15.74%
Telecommunications	8.02%
Real estate activities	4.32%
Insurance, reinsurance and pension funding, except compulsory social security	4.28%
Manufacture of beverages	2.64%
Manufacture of computer, electronic and optical products	1.58%
Warehousing and support activities for transportation	1.2%
Manufacture of paper and paper products	1.16%
Food and beverage service activities	1.1%
Computer programming, consultancy and related activities	1.05%
Manufacture of basic pharmaceutical products and pharmaceutical preparations	0.96%
Advertising and market research	0.94%
Manufacture of other non-metallic mineral products	0.76%
Civil engineering	0.75%
Information service activities	0.73%
Activities auxiliary to financial services and insurance activities	0.67%
Manufacture of chemicals and chemical products	0.63%
Retail trade, except of motor vehicles and motorcycles	0.61%
Manufacture of wearing apparel	0.59%
Other manufacturing	0.55%
Land transport and transport via pipelines	0.55%
Manufacture of food products	0.48%
Scientific research and development	0.4%
Manufacture of leather and related products	0.39%
Office administrative, office support and other business support activities	0.29%
Manufacture of motor vehicles, trailers and semi-trailers	0.21%
Manufacture of machinery and equipment n.e.c.	0.18%
Manufacture of electrical equipment	0.18%

Other	0.17%
Other	0.17%

The portfolio proportions of investments presented above are an average over the reference period.

- capital expenditure (CapEx) showing the green investments made by investee companies, e.g for a transition to a green economy.

- operational expenditure (OpEx) reflecting the green operational activities of investee

companies.

To what extent were the sustainable investments with an environmental objective aligned with the EU Taxonomy?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The Financial Product did not consider the 'do not significant harm criteria' of the EU Taxonomy.

Did the financial product invest in fossil gas and/or nuclear energy related activities that comply with the EU Taxonomy3?

Taxonomy-aligned	∏Yes
activities are expressed	Піє
as a share of:	☐ In fossil gas ☐ In nuclear energ
- turnover reflecting the	
share of revenue from	⊠No
green activities of	
investee companies.	

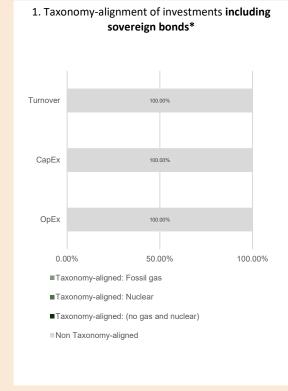

³ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objectives -see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

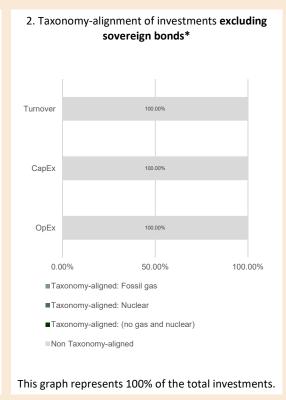

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

The two graphs below show in green the minimum percentage of investments that are aligned with the EU Taxonomy. As there is no appropriate methodology to determine the Taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

What was the share of investments made in transitional and enabling activities?

The Financial Product did not take into consideration the criteria of the EU Taxonomy environmental objectives. The financial Product did not consider the "do not significantly harm" criteria of the EU Taxonomy.

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

Not applicable.

environmental objective that do not take into account the criteria for environmentally sustainable economic activities under Regulation (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU taxonomy?

The share of the sustainable investments with an environmental objective not aligned with the EU Taxonomy has been 37.19% for this Financial Product during the reference period.

Investee companies with an environmental sustainable objective under SFDR are contributing to support UN SDGs or transition to decarbonization based on defined criteria as described above. Those criteria applying to issuers are different from technical screening criteria defined in EU Taxonomy applying to economic activities.

What was the share of socially sustainable investments?

During the reference period, the Financial Product invested in 44.16% of sustainable investments with a social objective.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The remaining "Other" investments represented 0.17% of the Financial Product's Net Asset Value.

The "other" assets may have consisted in, as defined in the precontractual annex:

- cash and cash equivalent investments, and;
- other instruments eligible to the Financial Product and that do not meet the Environmental and/or Social criteria
 described in this appendix. Such assets may be equity or debt instruments, derivatives investments and
 investment collective schemes that do not promote environmental or social characteristics and that are used to

attain the financial objective of the Financial Product and / or for diversification and / or hedging purposes.

Environmental or social safeguards were applied and assessed on all "other" assets except on (i) non single name derivatives, (ii) on UCITS and/or UCIs managed by other management company and (iii) on cash and cash equivalent investments described above.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

In 2023, the Financial Product reinforced exclusion policies applied with new exclusions related to unconventional oil and gas, mainly (i) oil sands leading to the exclusion of companies for which oil sands represents more than 5% of global oil sands production, (ii) Shale/ Fracking excluding players that produce less than 100kboepd with more than 30% of their total production derived from fracking, and (ii) Arctic with divestment from companies deriving more than 10% of their production from Artic Monitoring and Assessment Programme (AMAP) region or representing more than 5% of the total global Arctic production. More details on those enrichments are available under the following link: https://www.axa-im.com/our-policies-and-reports

How did this financial product perform compared to the reference benchmark?

Reference benchmarks are indexes to measure whether the financial product attains the environmental or social characteristics that they promote.

The Financial Product has designated the ICE Euro Corporate Paris-Aligned Absolute Emissions Index as its reference benchmark to meet its environmental and social characteristics.
