AXA World Funds - Framlington Europe Small Cap

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - Framlington Europe Small Cap BL (Hedged) Capitalisation USD (ISIN : LU2438619855)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

Objective and Investment Policy

Investment Objective

To seek both long-term growth of your investment, in EUR, and a sustainable investment objective, from an actively managed listed equity, equity-related securities and derivatives portfolio, in line with a socially responsible investment (SRI) approach.

Investment Policy

The Sub-Fund is actively managed and references STOXX Europe Small 200 Total Return Net (the "Benchmark") for comparative purposes only. The Investment Manager has full discretion over the composition of the portfolio of the Sub-Fund and can take exposure to companies not included in the Benchmark. There are no restrictions on the extent to which the Sub-Fund's portfolio and performance may deviate from the ones of the Benchmark.

The Sub-Fund uses a SRI approach by investing in sustainable securities that have implemented good practices in terms of environmental impacts, governance and social (ESG) practices. Firstly, the Sub-Fund bindingly applies at all times AXA IM's Sectorial Exclusion and ESG Standards Policies except for derivatives and underlying UCIs (<https://www.axa-im.com/our-policies>) and a "Best-in-universe" (type of ESG selection consisting of giving priority to the issuers in the investable universe best rated from a non-financial viewpoint, irrespective of their sector of activity, and accepting sector biases, because the sectors which are considered more virtuous on the whole will be more heavily represented) selectivity approach with a focus on the Environmental pillar (E scores), as described in the prospectus. Secondly, the investment manager uses a strategy that combines macro-economic, sector and company specific analysis that relies on a rigorous analysis of the companies' business model, management quality, growth prospects and risk/return profile. As an example, the ESG criteria may be carbon footprint for the environmental aspect, management of human resources and gender equality for the social aspect, or remuneration policy for the governance aspect.

The ESG data used are based on methodologies relying in part on third party data and in some cases are internally developed, are subjective and may change over time. The lack of harmonised definitions can make ESG criteria heterogeneous. As such, the different strategies using ESG criteria and ESG reporting are difficult to compare with each other. Strategies incorporating ESG criteria and those incorporating sustainable development criteria may use data that appear similar but which should be distinguished because their calculation method may be different.

The Sub-Fund invests essentially in equities of small and medium

capitalisation companies domiciled in Europe, while ensuring sector diversification.

The Sub-Fund invests at least two thirds of its total assets in small cap companies listed on the European markets.

The Sub-Fund may invest less than 25% of its total assets in Money Market Instruments and up to 10% of its assets in convertible and straight bonds. Within the limit of 200% of the Sub-Fund's net assets, the investment strategy may be achieved by direct investments and/or through derivatives. Derivatives may be used only for efficient portfolio management purposes.

The Sub-Fund is a financial product aiming to achieve a sustainable investment objective within the meaning of article 9 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

The Share Class aims at hedging the foreign exchange risk resulting from the divergence between the reference currency of the Sub-Fund and the currency of this Share Class by using derivatives instruments whilst retaining the exposure to Investment Policy of the Sub-Fund.

Income

For Capitalisation share classes (Cap), the dividend is reinvested.

Sub-Fund Currency

The reference currency of the Sub-Fund is EUR.

Investment Horizon

This Sub-Fund may not be suitable for investors who plan to withdraw their contribution within 5 years.

Processing of subscription and redemption orders

The subscription, conversion or redemption orders must be received by the Registrar and Transfer Agent on any Valuation Day no later than 3 p.m. Luxembourg time. Orders will be processed at the Net Asset Value applicable to such Valuation Day. The investor's attention is drawn to the existence of potential additional processing time due to the possible involvement of intermediaries such as Financial Advisers or distributors.

The Net Asset Value of this Sub-Fund is calculated on a daily basis.

Risk and Reward Profile

The risk category is calculated using historical performance data and may not be a reliable indicator of the Sub-Fund's future risk profile.

The risk category shown is not guaranteed and may shift over time.

The lowest category does not mean risk free.

Why is this Sub-Fund in this category?

The capital of the Sub-Fund is not guaranteed. The Sub-Fund is invested in financial markets and uses techniques and instruments which may be subject to sudden and significant variation, which may result in substantial gains or losses.

Additional Risks (risks materially relevant to the fund which are not adequately captured by the indicator)

Counterparty Risk: Risk of bankruptcy, insolvency, or payment or delivery failure of any of the Sub-Fund's counterparties, leading to a payment or delivery default.

Liquidity Risk: risk of low liquidity level in certain market conditions that might lead the Sub-Fund to face difficulties valuing, purchasing or selling all/part of its assets and resulting in potential impact on its net asset value.

Credit Risk: Risk that issuers of debt securities held in the Sub-Fund may default on their obligations or have their credit rating downgraded, resulting in a decrease in the Net Asset Value.

Impact of any techniques such as derivatives: Certain management strategies involve specific risks, such as liquidity risk, credit risk, counterparty risk, legal risk, valuation risk, operational risk and risks related to the underlying assets.

The use of such strategies may also involve leverage, which may increase the effect of market movements on the Sub-Fund and may result in significant risk of losses.

Charges

The charges you pay are used to pay the cost of running the fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

One-off charges taken before or after you invest

Entry Charge	none
Exit Charge	3.00%

This is the maximum that might be taken out of your money before it is invested.

Charges taken from the fund over a year

Ongoing charge	3.04%
----------------	-------

Charges taken from the fund under certain specific conditions

Performance fees	none
------------------	------

The entry and exit charges shown are maximum figures. In some cases, you might pay less - you can find this out from your Financial Adviser.

The percentage of ongoing charges is an estimate. It excludes:

- Performance fees
- Portfolio transaction costs, except in the case of an entry/exit charge paid by the Sub-Fund when buying or selling units in another collective investment undertaking

For more information about charges, please refer to the Fees and Expenses section of the prospectus which is available at www.axa-im.com.

Past Performance

The Sub-Fund was launched on 09/03/2001 and the share class in 2022.

The performance of the Sub-Fund is not tracking the benchmark index. For the different shareclasses of the Sub-Fund, the performance of the benchmark is displayed in the "Past Performance" section either as converted to the currency of the relevant shareclass or hedged against the reference currency of the Sub-fund in the case of hedged shareclasses ("hedged benchmark"). For some cases where the hedged benchmark is not available, the benchmark is displayed in the reference currency of the Sub-Fund, thus the performance of the displayed benchmark may deviate from the one of the relevant shareclass due to the performance differential inherent within the currency hedging activity not reflected in the benchmark.
