# AXA World Funds - Euro Inflation Plus

A Sub-Fund of AXA World Funds SICAV

Share class: AXA World Funds - Euro Inflation Plus M Capitalisation EUR (ISIN : LU2257473699)

This Sub-Fund is managed by AXA Funds Management S.A., part of the AXA IM Group

## Objective and Investment Policy

### Investment Objective

To seek to outperform, in EUR, on a yearly basis the Harmonised Indices of Consumer Prices Excluding Tobacco (Benchmark), net of ongoing charges. This annualized target outperformance is an objective and is not guaranteed.

### Investment Policy

The Sub-Fund is actively managed and references the Benchmark by seeking to outperform it. As the Benchmark is a rate used by European Central Bank for assessing price stability for monetary policy purposes and the Sub-Fund's investment allocation or holdings' composition is not constituted in relation to it, the deviation from the Benchmark is likely to be significant. The methodology for Euro area inflation calculation can be found on the European Commission website. The Benchmark is produced and published using a methodology like the one existing for inflation linked bonds following the standard model such as French, German, Italian and US sovereign inflation linked securities. Inflation-linked bonds notably apply appropriate lags for determining their coupon and redemption based on a daily linear interpolated inflation rate as price indices are not immediately available at the end of each month.

The Investment Manager actively manages inflation breakevens by using inflation swaps (long or short position depending on its anticipation of the inflation perspectives), inflation-linked bonds and/ or futures. The Sub-Fund may invest up to 100% of net assets in debt securities and up to 100% in inflation-linked bonds, both issued by governments, public institutions and companies in OECD countries only (including emerging). The Sub-Fund does not invest more than 20% in corporate bonds. Exposure of the assets denominated in non-EUR currency will be hedged against EUR.

The Sub-Fund invests only in Investment Grade debt securities. Ratings are based on the lower of 2 ratings or the 2nd highest of 3 ratings depending on how many are available. If securities are unrated, they must be judged equivalent by the investment manager. In case of a credit downgrade, securities will be sold within 6 months. The selection of debt securities is not exclusively and mechanically based on their publicly available credit ratings but also on an internal credit or market risk analysis. The decision to buy or sell securities is also based on other analysis criteria of the investment manager.

The Sub-Fund is managed with an inflation duration ranging from -10 to 10 years and an interest rates duration from 0 to 5 years.

The Sub-Fund may invest in or be exposed to callable bonds up to 20% of its net asset.

The Sub-Fund may invest in 144A securities in a substantial way depending on the opportunity and up to 1/3 in money market instruments.

Derivatives, including credit default swaps, may be used for efficient portfolio management, hedging and investment purposes.

The Sub-Fund is a financial product that promotes environmental and/or social characteristics within the meaning of article 8 of the Regulation (EU) 2019/2088 of 27 November 2019 on sustainability-related disclosures in the financial sector.

## Past Performance

The Sub-Fund was launched on 04/10/2021 and the share class in 2022.

The performance of the Sub-Fund is not tracking the benchmark index. For the different shareclasses of the Sub-Fund, the performance of the benchmark is displayed in the "Past Performance" section either as converted to the currency of the relevant shareclass or hedged against the reference currency of the Sub-fund in the case of hedged shareclasses ("hedged benchmark"). For some cases where the hedged benchmark is not available, the benchmark is displayed in the reference currency of the Sub-Fund, thus the performance of the displayed benchmark may deviate from the one of the relevant shareclass due to the performance differential inherent within the currency hedging activity not reflected in the benchmark.
