GENERAL INFORMATION

Baillie Gifford Worldwide Funds plc (the "Company") is an open-ended investment company with variable capital organised under the laws of Ireland as a public limited company pursuant to the Companies Act 2014. The Company was incorporated on 28 October 2010 under registration number 490695 and was authorised by the Central Bank of Ireland (the "Central Bank") on 23 December 2010. It operates pursuant to the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations, 2011 (as amended) (the "UCITS Regulations").

The Company is organised in the form of an umbrella fund with segregated liability between sub-funds. As at 30 September 2023 the Company comprised of thirty sub-funds (each a "Fund", together the "Funds"), twenty four of which are funded; Baillie Gifford Worldwide Asia ex Japan Fund (the "Asia ex Japan Fund"), Baillie Gifford Worldwide China A Shares Growth Fund (the "China A Shares Growth Fund"), Baillie Gifford Worldwide China Fund (the "China Fund"), Baillie Gifford Worldwide Discovery Fund (the "Discovery Fund"), Baillie Gifford Worldwide Diversified Return US Dollar Fund (the "Diversified Return US Dollar Fund"), Baillie Gifford Worldwide Diversified Return Yen Fund (the "Diversified Return Yen Fund"), Baillie Gifford Worldwide Emerging Markets All Cap Fund (the "Emerging Markets All Cap Fund"), Baillie Gifford Worldwide Emerging Markets Leading Companies Fund (the "Emerging Markets Leading Companies Fund"), Baillie Gifford Worldwide European High Yield Bond Fund (the "European High Yield Bond Fund"), Baillie Gifford Worldwide Global Alpha Choice Fund (the "Global Alpha Choice Fund"), Baillie Gifford Worldwide Global Alpha Fund (the "Global Alpha Fund"), Baillie Gifford Worldwide Global Income Growth Fund (the "Global Income Growth Fund"), Baillie Gifford Worldwide Global Stewardship Fund (the "Global Stewardship Fund"), Baillie Gifford Worldwide Global Strategic Bond Fund (the "Global Strategic Bond Fund"), Baillie Gifford Worldwide Health Innovation Fund (the "Health Innovation Fund"), Baillie Gifford Islamic Global Equities Fund (the "Islamic Global Equities Fund"), Baillie Gifford Worldwide Japanese Fund (the "Japanese Fund"), Baillie Gifford Worldwide Long Term Global Growth Fund (the "Long Term Global Growth Fund"), Baillie Gifford Worldwide Pan-European Fund (the "Pan-European Fund"), Baillie Gifford Worldwide Positive Change Fund (the "Positive Change Fund"), Baillie Gifford Worldwide Responsible Global Equity Income Fund (the "Responsible Global Equity Income Fund"), Baillie Gifford Worldwide Sustainable Emerging Markets Bond Fund (the "Sustainable Emerging Markets Bond Fund"), Baillie Gifford Worldwide US Equity Alpha Fund (the "US Equity Alpha Fund") and Baillie Gifford Worldwide US Equity Growth Fund (the "US Equity Growth Fund"), two of which are unfunded; Baillie Gifford Worldwide Emerging Markets ex China Equities Fund (the "Emerging Markets ex China Equities Fund") and Baillie Gifford Worldwide Global Developed Equities Fund (the "Global Developed Equities Fund") and four of which are terminated; Baillie Gifford Worldwide Diversified Return Euro Fund (the "Diversified Return Euro Fund"), Baillie Gifford Worldwide European Growth Fund (the "European Growth Fund"), Baillie Gifford Worldwide Systematic Long Term Growth Fund (the "Systematic Long Term Growth Fund") and Baillie Gifford Worldwide UK Equity Alpha Fund (the "UK Equity Alpha Fund"). At the start of the reporting year, the Company also had three other Funds: Baillie Gifford Worldwide US Concentrated Growth Fund, Baillie Gifford Worldwide Diversified Return Australian Dollar Fund and Baillie Gifford Worldwide Diversified Return Canadian Dollar Fund. On the application of the Company, which was made before the start of the year, the regulatory approval of each of these Funds was withdrawn by the Central Bank during the reporting year. These funds were removed from the prospectus in October last year meaning that they have been formally withdrawn and this has been noted by the CBI.

⁴Fund ceased operations on 25 November 2022.

⁵Fund commenced operations on 12 December 2022.

DIRECTORS' REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023

The directors of the Company (the "Directors") present their report and audited financial statements for the Company for the financial year ended (referred to herein as the "year-end" or "year ended") 30 September 2023.

The Company is organised in the form of an umbrella fund with thirty Funds, twenty four of which are funded; Asia ex Japan Fund, China A Shares Growth Fund, China Fund, Discovery Fund, Diversified Return US Dollar Fund, Diversified Return Yen Fund, Emerging Markets All Cap Fund, Emerging Markets Leading Companies Fund, European High Yield Bond Fund, Global Alpha Choice Fund, Global Alpha Fund, Global Income Growth Fund, Global Stewardship Fund, Global Strategic Bond Fund, Health Innovation Fund, Islamic Global Equities Fund, Japanese Fund, Long Term Global Growth Fund, Pan-European Fund, Positive Change Fund, Responsible Global Equity Income Fund, Sustainable Emerging Markets Bond Fund, US Equity Alpha Fund and US Equity Growth Fund, two of which are unfunded; Emerging Markets ex China Equities Fund and Global Developed Equities Fund and four of which are terminated; Diversified Return Euro Fund, European Growth Fund, Systematic Long Term Growth Fund and UK Equity Alpha Fund. At the start of the reporting year, the Company also had three other Funds: Baillie Gifford Worldwide US Concentrated Growth Fund, Baillie Gifford Worldwide Diversified Return Australian Dollar Fund and Baillie Gifford Worldwide Diversified Return Canadian Dollar Fund. On the application of the Company, which was made before the start of the year, the regulatory approval of each of these Funds was withdrawn by the Central Bank during the reporting year.

Statement of Directors' Responsibilities

The Directors are responsible for preparing the annual report and the audited financial statements in accordance with applicable Irish law and Generally Accepted Accounting Practice in Ireland including the accounting standards issued by the Financial Reporting Council and published by the Institute of Chartered Accountants in Ireland.

Under Irish law, the Directors shall not approve the financial statements unless they are satisfied that they give a true and fair view of the Company's assets, liabilities and financial position as at the end of the financial year and the profit or loss of the Company for the financial year.

In preparing the financial statements, the Directors are required to:

- select suitable accounting policies and then apply them consistently;
- make judgements and estimates that are reasonable and prudent;
- state whether the financial statements have been prepared in accordance with applicable accounting standards and identify the standards in
 question, subject to any material departures from those standards being disclosed and explained in the notes to the financial statements;
 and
- prepare the financial statements on a going concern basis unless it is inappropriate to presume that the Company will continue in business.

The Directors are responsible for keeping adequate accounting records that are sufficient to:

- correctly record and explain the transactions of the Company;
- enable, at any time, the assets, liabilities, financial position and profit or loss of the Company to be determined with reasonable accuracy;
- enable the Directors to ensure that the financial statements comply with the Companies Act 2014 and enable those financial statements to be audited.

The Directors are also responsible for safeguarding the assets of the Company and hence for taking reasonable steps for the prevention and detection of fraud and other irregularities.

The financial statements of the Company are published on Baillie Gifford's website (https://www.bailliegifford.com/). The Directors are responsible for the maintenance and integrity of the corporate and financial information relating to the Company published on this website. Legislation in Ireland governing the preparation and dissemination of financial statements may differ from legislation in other jurisdictions.

Accounting Records

The measures taken by the Directors to secure compliance with the Company's obligation to keep adequate accounting records are the use of appropriate systems and procedures and employment of competent persons. The accounting records are kept at 30 Herbert Street, Dublin 2, Ireland.

Directors

The persons listed below served as Directors for the year ended 30 September 2023.

Mr. Derek McGowan (Chairperson) (British)

Mr. Adrian Waters (Irish)*

Mr. Christopher Murphy (British)

Ms. Jean Van Sinderen-Law (Irish)*

*Independent director

Directors' and Company Secretary's Interests in Shares and Contracts

There were no contracts or arrangements of any significance in relation to the business of the Company in which the Directors or Company Secretary had any interest as defined in the Companies Act 2014 at any time during the year ended 30 September 2023 (30 September 2022: none) other than those disclosed in Note 12 of these financial statements.

DIRECTORS' REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 (CONTINUED)

Directors' Compliance Statement

It is the policy of the Company to comply with its relevant obligations (as defined in the Companies Act 2014). As required by Section 225(2) of the Companies Act 2014, the Directors acknowledge that they are responsible for securing the Company's compliance with the relevant obligations. The Directors have drawn up a compliance policy statement as defined in Section 225(3)(a) of the Companies Act 2014 and a compliance policy which refers to the arrangements and structures that are in place and which are, in the Directors' opinion, designed to secure material compliance with the Company's relevant obligations. In discharging their responsibilities under Section 225, the Directors relied upon, among other things, the services provided, advice and/or representations from third parties whom the Directors believe have the requisite knowledge and experience in order to secure material compliance with the Company's relevant obligations.

Review of Business Activities and Future Developments

A review of the business and future developments is given in the Manager's Report. There have been no changes to the nature of the business during the year. At this time, Directors do not anticipate any changes in the structure or the objectives of the Company for the year ending 30 September 2024

Risk Management - Objectives and Policies

Investment in the Company carries with it a degree of risk including, but not limited to, the risks referred to in Note 10 of these financial statements.

Business Risks

The recent market environment has been very difficult for a wide range of investors. The combination of high inflation, interest rate rises, and geopolitical tensions created ongoing uncertainty across financial markets. In particular higher inflation severely impacted early-stage growth businesses, putting the Investment Manager's investing style out of favour with the market.

We have continued to proactively engage with our supply chain and remain satisfied the core daily processes are being managed to good service levels and there has been no notable business disruption or outages. Our key service providers have continued to cope with the higher transaction volumes, continued working from home hybrid models and spike in operational exceptions driven by volatility. The Directors receive regular reports from the Depositary, the Administrator, the Investment Manager and the Manager, with quarterly reporting by the Manager to the Board for monitoring and assessing significant risk events.

The Baillie Gifford Group continues to experience relatively low volumes of incidents. The Baillie Gifford Group's IT systems and infrastructure continue to be resilient, with no service impacting issues identified. Baillie Gifford remains conscious of increased cyber and fraud threats, with the Cyber Security Operations Centre adequately resourced to deal with this.

BBH Ireland has not experienced, nor does it anticipate, any business disruption at this time, and continues to keep its clients and its regulator updated on its operational resilience. Employee awareness and training has continued throughout this period, especially with respect to the increased risk of cyber-attacks and fraud attempts. BBH Ireland continues to take all appropriate steps to ensure the well-being of its employees and continuous delivery of services to its clients.

DIRECTORS' REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 (CONTINUED)

Dividends

DIRECTORS' REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 (CONTINUED)

Results for the year and assets, liabilities and financial position as at 30 September 2023

Details of the assets, liabilities and financial position of the Company and results for the year ended 30 September 2023 are set out on the Statement of Financial Position and the Statement of Comprehensive Income.

Research and Development

The Company continually monitors and reviews its suppliers and their processes in an ongoing effort to improve quality and effectiveness.

Political Contributions

There were no political contributions made during the year ended 30 September 2023 (30 September 2022: none).

Significant Events During the Year

The regulatory approval of the US Concentrated Growth Fund was withdrawn from the Central Bank on 11 October 2022, following the application of the Company, which was made before the start of the reporting year.

An updated prospectus was noted by the Central Bank on 14 October 2022 which related principally to the below changes:

- The addition of two new Funds: the US Equity Alpha Fund and the Global Developed Equities Fund;
- The removal of references to the US Concentrated Growth Fund, as well as two other Funds, the Diversified Return Canadian Dollar Fund and the Diversified Return Australian Dollar Fund, as the applications for revocation of the approval of these two other funds, which were made by the Company to the Central Bank before the start of the reporting year;
- Updates to the investment policies for the following Funds in order to reflect their re-classification pursuant to Article 8 of Regulation (EU) 2019/2088 ("SFDR"). With the exception of the Emerging Markets ex China Equities Fund, these changes were approved by the shareholders at an extraordinary general meeting of each of the relevant Funds held on 3 October 2022. The Emerging Markets ex China Equities Fund had no shareholders as at the date of these updates and so no extraordinary general meeting was held:
 - the China A Shares Growth Fund
 - the China Fund
 - the Emerging Markets All Cap Fund
 - the Emerging Markets ex China Equities Fund
 - the Emerging Markets Leading Companies Fund
 - the Global Alpha Fund
 - the Japanese Fund
 - the Long Term Global Growth Fund
 - the US Equity Growth Fund
- Additional disclosures relating to exclusions of certain investments (such as investment in the production or distribution of armaments, thermal coal and/or sale of tobacco) to a number of existing Funds classified pursuant to Article 8 and Article 9 of SFDR.
- Other minor amendments to the investment policies of the Funds, including to provide for investments by certain of the Funds in shares listed on the ChiNext Market and STAR Board. Except in the case of the Funds listed above as being re-classified pursuant to Article 8 of SFDR and in the case of the Positive Change Fund, the changes to the investment policies were not material and the shareholders of the Funds were notified in advance of these changes taking effect;
- Amendments to the target narratives of a number of Funds;
- An amendment to the selling restriction for Australia;
- Amendments for the reduced management fee from 0.36% to 0.24% for an initial period of 24 months in respect of the Baillie Gifford Worldwide China A Shares Growth Fund:
- Minor amendments to the Sustainable and Responsible Investment and Impact Risk disclosure; and
- Removal of the Moscow Exchange MICEX-RTS from the list of regulated markets as listed at schedule II of the prospectus.

The UK Equity Alpha Fund ceased operations and all remaining shares in the Fund were redeemed on 25 November 2022.

An updated prospectus was noted by the Central Bank on 25 November 2022 which related to the inclusion of the template pre-contractual disclosures required under Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022 supplementing SFDR (the "SFDR Level 2 RTS") and other changes related to SFDR, the SFDR Level 2 RTS and Regulation (EU) 2020/852 the "Taxonomy Regulation".

The US Equity Alpha Fund launched on 12 December 2022.

The regulatory approval of each of the Diversified Return Canadian Dollar Fund and the Diversified Return Australian Dollar Fund was withdrawn from the Central Bank on 22 December 2022, following the application of the Company, which was made before the start of the reporting year.

The Diversified Return Euro Fund ceased operations on 15 March 2023.

DIRECTORS' REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 (CONTINUED)

Significant Events During the Year (continued)

An updated prospectus was noted by the Central Bank on 16 March 2023, which related to updated disclosure requirements principally relating to nuclear energy and fossil gas required by the SFDR Level 2 RTS and other changes related to SFDR, the SFDR Level 2 RTS and the Taxonomy Regulation.

The Systematic Long Term Growth Fund ceased operations on 16 May 2023.

The European Growth Fund ceased operations on 12 July 2023.

There were no other significant events affecting the Company during the year.

Events Since the Year End

Effective 20 October 2023, transition of the Discovery Fund from being classified as fund to which Article 6 applies to Article 8 under SFDR.

Effective 20 October 2023, the Diversified Return US Dollar Fund changed its name to Baillie Gifford Worldwide Diversified Return Fund, the Global Income Growth Fund changed its name to Baillie Gifford Worldwide Global Dividend Growth Fund, the Global Stewardship Fund changed its name to Baillie Gifford Worldwide Sustainable Growth Fund, the Responsible Global Equity Income Fund changed its name to Baillie Gifford Worldwide Responsible Global Dividend Growth Fund.

Effective 1 December 2023, the Arthur Cox LLP appointment as the Legal Adviser of the Company was terminated.

Effective 1 December 2023, the Bradwell Limited appointment as the Company Secretary was terminated.

Effective 1 December 2023, Dillon Eustace LLP was appointed as the Legal Adviser of the Company.

Effective 1 December 2023, Tudor Trust Limited was appointed as the Company Secretary.

Updates to the investment objective and policy sections of the Sustainable Growth Fund.

The Directors have decided to terminate the Baillie Gifford Worldwide European High Yield Bond Fund and the Baillie Gifford Worldwide Global Strategic Bond Fund and as a result the Company will seek to realise all the assets of the Funds and all shares of the Funds shall be repurchased by the Company on 28 February 2024.

In addition, the Directors have decided to terminate the Baillie Gifford Worldwide Sustainable Emerging Markets Bond Fund and as a result the Company will seek to realise all the assets of the Fund and all shares of the Fund shall be repurchased by the Company on 22 April 2024.

There were no other significant events affecting the Company since the year end.

Connected Person Transactions

In accordance with Regulation 81(4) of the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "Central Bank UCITS Regulations"), the Board of Directors, has received confirmation from the Manager, and is satisfied that:

- (a) there are in place arrangements, evidenced by written procedures, to ensure that the obligations that are prescribed by Regulation 43(1) of the Central Bank UCITS Regulations are applied to all transactions with a connected person (as defined in Regulation 42 of the Central Bank UCITS Regulations); and
- (b) all transactions with a connected person that were entered into during the period to which this report relates complied with the obligations prescribed by Regulation 43(1) of the Central Bank UCITS Regulations.

Corporate Governance Statement

The Board of Directors has assessed the measures included in the voluntary Corporate Governance Code for collective investment schemes and Management Companies as published by Irish Funds in December 2011 (the "IF Code"). The Board of Directors adopted all corporate governance practices and procedures in the IF Code.

Individual Accountability Framework

The Directors confirm that they are in compliance with the Individual Accountability Framework.

Independent Auditors

The independent auditors, PricewaterhouseCoopers, have indicated their willingness to continue in office in accordance with Section 383(2) of the Companies Act 2014.

Audit Committee

The Company has not established an audit committee. Given the size, nature and complexity of the Company, and the existing processes and procedures adopted by the Company, the Board of Directors does not consider that an audit committee is required.

BAILLIE GIFFORD WORLDWIDE FUNDS PLC

DIRECTORS' REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 (CONTINUED)

Statement on Relevant Audit Information

Each of the persons who are Directors at the time this report is approved (including the post year end changes) confirms that:

- a) so far as the Director is aware, there is no relevant audit information of which the Company's statutory auditors are unaware, and
- b) the Director has taken all steps that ought to have been taken by the Director in order to make himself/herself aware of any relevant audit information and to establish that the Company's auditors are aware of that information.

STATEMENT OF DEPOSITARY'S RESPONSIBILITIES AND DEPOSITARY'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023

Report of the Depositary to the Shareholders

We have enquired into the conduct of Baillie Gifford Worldwide Funds plc (the "Company") for the financial year ended 30 September 2023, in our capacity as Depositary to the Company.

This report including the opinion has been prepared for and solely for the Shareholders in the Company, in accordance with Part 5 of the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011, as amended, ('the UCITS Regulations'), and for no other purpose. We do not, in giving this opinion, accept or assume responsibility for any other purpose or to any other person to whom this report is shown.

Responsibilities of the Depositary

Our duties and responsibilities are outlined in Part 5 of the UCITS Regulations. One of those duties is to enquire into the conduct of the Company in each annual accounting period and report thereon to the Shareholders.

Our report shall state whether, in our opinion, the Company has been managed in that period in accordance with the provisions of the Company's Memorandum and Articles of Association and the UCITS Regulations. It is the overall responsibility of the Company to comply with these provisions. If the Company has not so complied, we as Depositary must state why this is the case and outline the steps which we have taken to rectify the situation.

Basis of Depositary Opinion

The Depositary conducts such reviews as it, in its reasonable opinion, considers necessary in order to comply with its duties as outlined in Part 5 of the UCITS Regulations and to ensure that, in all material respects, the Company has been managed:

- in accordance with the limitations imposed on its investment and borrowing powers by the provisions of the constitutional documentation and the appropriate regulations; and
- otherwise in accordance with the Company's constitutional documentation and the appropriate regulations.

Opinion

In our opinion, the Company has been managed during the year, in all material respects:

- (i) in accordance with the limitations imposed on the investment and borrowing powers of the Company by the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 ('the Central Bank UCITS Regulations'); and
- (ii) otherwise in accordance with the provisions of the Memorandum & Articles of Association, the UCITS Regulations and the Central Bank UCITS Regulations.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 ASIA EX JAPAN FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund underperformed over the year, but as ever, we would ask that the Fund is judged on longer, more meaningful time frames.

Amongst the top performance contributors over the period were CNOOC (Chinese oil and gas) and EO Technics (Korean semiconductor components). EO Technics has spent 10 years researching and developing laser equipment, to allow node migration in semiconductors. We feel there is a good chance that Samsung will use EoT's technology in the next node migration, giving the company global leadership. Results reported in May showed that company sales have grown over four fold in the prior 12 months.

Amongst the top performance detractors over the period were JD.com (Chinese ecommerce) and Merdeka Copper Gold (Indonesian mining). JD.com is the second largest e-commerce player in China after Alibaba, with particular strengths in logistics and delivery. The growth opportunity remains vast and we believe that JD's competitive edge is being sustained, despite operating in a very competitive environment. JD has looked to expand its market share by taking more third party merchants onto its platform. To stimulate this development, JD has earmarked RMB 10bn for subsidies which has pressured margins in the short term. At its second-quarter results, revenue grew 8% year on year, but the operating margin in the retail business was down slightly, driven by an increase in sales and marketing expenses. However, management is guiding for a return to double-digit group revenue growth for margin expansion for JD Retail.

The Fund is relatively index and sector agnostic, as we primarily focus on finding the best long-term Asian investments irrespective of their country or sector. We remain optimistic about the opportunity set for Asian equities, we believe the macro backdrop is broadly supportive and we see attractive valuations

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 CHINA A SHARES GROWTH FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund was seeded in February 2019 and therefore still has a relatively short track record. The benchmark index MSCI China A Onshore fell over the year to end September and the Fund underperformed. The Fund has outperformed since inception.

The year 2023 continued to be volatile for Chinese markets from a macro perspective. After an encouraging bounce at the beginning of the year, the 'reopening' rally in Chinese equities quickly deflated and macroeconomic data has disappointed for much of the year. With the absence of big bang domestic stimulus, markets appeared to be left with very limited conviction.

As ever, we do not want to draw conclusions from shorter term performance and would ask that the Fund is judged on longer, more meaningful time frames.

That said, we'd note that some of the near-term performance contributors include Zhejiang Sanhua and Anker. Sanhua, an intelligent heat control component manufacturer, has seen fast growth in its supply to the auto sector under the backdrop of increasing electric vehicle penetration in China. We expect Sanhua to continue to benefit from the industry shift towards standardised energy efficiency labelling and stricter environmental standards.

Anker owns a number of consumer electronics brands selling to developed markets, including headsets, chargers and portable speakers. All of its major product lines and regional markets recorded double digit growth in the first half of 2023. Our long-term thesis for Anker remains unchanged: leveraging China's globally competitive consumer electronics supply chain, focusing on product innovation and smart brand positioning in the higher end markets as an independent accessories provider.

Top detractors to the relative return over the year include Beijing United Information Technology (BUIT) and Glodon.

BUIT is an eCommerce platform for industrial products. It delivered 90% earnings growth in 2022 and another 50% in the first half of 2023. However, share price was under pressure from a media report at the end of 2022, claiming wrongdoing with regards to trade financing and equity raising. We commissioned a bespoke report from a third-party due diligence specialist, who found no evidence of the issues claimed by the media. The company has China's largest raw paints platform and is quickly expanding to other verticals. While recognising it is still an early-stage business model, we think BUIT has plausible competitive advantages in this nascent industry which provide the potential for it to be much larger in future.

Glodon, a construction software company, has been negatively impacted by fewer new property project starts in China in the recent year. As a market leader in cost estimation software, Glodon is still well positioned to benefit from, and contribute to, the much-needed cost saving and productivity gains in China's construction industry.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 CHINA FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund was seeded in June 2021 and therefore still has a relatively short track record; however, we have been managing the strategy since 2006.

The benchmark MSCI All China index delivered a small positive return in USD over the year to end September and the Fund underperformed.

The year 2023 continued to be volatile for Chinese markets from a macro perspective. After an encouraging bounce at the beginning of the year, the 'reopening' rally in Chinese equities quickly deflated and macroeconomic data has disappointed for much of the year. With the absence of big bang domestic stimulus, markets appeared to be left with very limited conviction.

As ever, we do not want to draw conclusions from shorter term performance and would ask that the Fund is judged on longer, more meaningful time frames

That said, we'd note that some of the near-term performance detractors include JD.com and Li Ning. JD is one of China's largest eCommerce platforms and Li Ning is a sportswear brand. Weakness in both shares have been driven by the concerns around the speed and timing of China's post-Covid consumption recovery. We believe that JD's competitive edge in logistics and high quality goods (consumer electronics etc) is being sustained, despite operating in a very competitive environment. In the long run, Li Ning retains strong market share ambitions driven by a leading domestic brand image with deep-rooted China-sports DNA, which should play well to the consumption shifts in China in coming years.

Top contributors to relative return over the period include Zijin Mining and Ping An Insurance. Zijin is a gold and copper miner with significant mining projects in both China and overseas. It delivered record high profit in 2022 and we expect its production volume continue to grow in the coming years. Ping An's share has been relatively resilient during a period of weak market sentiment and partially rebounded from its low point at end of 2022. After three years of life insurance agent reform Ping An has started to see some early fruit with rising agent productivity and improving new business value (NBV). It remains a strong candidate to benefit from the long-term penetration increase of China's insurance industry.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 DISCOVERY FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

While the operational metrics of the portfolio remain very positive with five-year delivered sales growth and forward sales significantly ahead of the benchmark, the Fund has underperformed in both absolute terms and relative to the benchmark over the year to 30 September 2023.

There has been little change to the volatile investment environment in which we all find ourselves. There are signs of green shoots, with inflation and interest rates seemingly peaking. However, smaller and less mature companies have faced some of the most punishing market conditions in recent memory, and are currently at their most undervalued compared to large caps in over a decade. We ultimately view the current market instability as an opportunity for the strategy.

Over the year, Novocure and Staar Surgical were among the top detractors.

Novocure, the Israeli manufacturer of wearable treatment devices for solid-state cancers, experienced two setbacks over the year. In June, a read out from its clinical trial in lung cancer precipitated a sharp sell-off as investors viewed the data as insufficient to outline the commercial viability or inconclusive about the treatment's effectiveness. Despite the trial's design flaws, we focussed on the marked improvement in patient outcomes when Novocure's tumour treating fields (TTFs) were combined with checkpoint inhibitors. More recently, the company has revealed that its other trial exploring TTF alongside chemotherapy failed to yield any meaningful benefit in late-stage ovarian cancer patients. We had hoped that the signals seen in earlier trials would translate to a benefit in this hard-to-treat patient group. Following these results, we have engaged with the company. We acknowledge this as a setback but believe there is enough promise in combining TTFs with checkpoint inhibitors, a growing field in cancer treatment, for us to remain holders; indeed, we added to the holding.

Staar Surgical, the US manufacturer of refractive eyesight correction lenses, has seen significant global growth, notably in China, Japan, and South Korea. So far, they have sold 2.5 million implants and expect to sell an additional 3 million over the next three years. In the US, it has faced challenges with the adoption of its lenses due to limited surgery suite access and lack of control over the patient experience. To increase adoption rates, Staar is enhancing surgeon training programs and sees potential in moving towards office-based surgeries as opposed to ambulatory surgical centres as the former can be more affordable. Through these strategies, Staar aims to deliver a long-term growth rate of c.20% and maintain its position as a leading provider of its EVO (Evolutionary Vision Optimization) lenses.

Elsewhere, among the largest contributors to performance over the 12 months were Exact Sciences and Axon Enterprise.

Exact Sciences, known for its colorectal cancer detection product Cologuard, has seen revenue growth of approximately 33% year-over-year and is expected to turn free cash flow positive this year. Its shares have responded positively to these developments. Despite potential growth from developing products in multi-cancer detection and molecular residual disease, the company's slower than desired progress and cautious outlook combined with the recent strong run in the share price have led us to reduce the holding.

Axon Enterprise is the manufacturer of smart devices for law enforcement officers. The company has been making solid operational progress, with revenues growing above 30% for six consecutive quarters (to the end of June). This strong performance has prompted the company to increase guidance for the year. We remain very excited about the company; we believe its existing products should drive meaningful growth while its advances into new products such as drones and AI are intriguing. In light of its rich valuation, we have recently reduced the position to recycle the capital into other holdings.

We remain confident in the investment strategy, focusing on companies that are addressing large problems in areas like automation, healthcare and the energy transition. Our research supports that sustained sales and earnings growth drive share prices in the long term and despite recent challenges, we are optimistic about the portfolio given the underlying holdings' operational progress and promising prospects.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 DISCOVERY FUND (CONTINUED)

The selected share classes provided above are (where available): Class B EUR Acc, Class B USD Acc and the longest running share class if it is not the aforementioned. These are representative; however, other share class data is available on request.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 DIVERSIFIED RETURN US DOLLAR FUND

The performance of the selected share classes for the year to 30 September 2023 is shown in the table below. The performance of individual share classes may differ from the Fund performance. However, we suggest five years as a more appropriate timeframe over which to assess performance, a period consistent with the Fund's objectives.

Over the past 12 months, the global economy has displayed a notably resilient level of growth despite developed market central banks continuing to raise interest rates in the face of stubbornly high inflation. However, the effect of ever-tighter monetary conditions is now more clearly seeping into the real economy, most obviously manifesting as falling developed market government bond prices and higher volatility in equity markets.

In contrast to their developed market counterparts, emerging market economies have performed very well. Their central banks have generally been better placed to adopt a more accommodative economic policy, leading to positive returns at the portfolio level.

Additionally, those investments with a good degree of inherent protection from rising interest rates, most notably in structured finance (due to the 'floating rate' nature of the coupons they pay investors) have also done well.

The asset class that detracted the most over the period is Active Currency. The most prominent position we hold here is in the Japanese yen. The Bank of Japan's reticence to raise interest rates as inflation has remained relatively muted has put it greatly at odds with other major developed economies and has significantly impacted the value of the yen.

Regarding our economic outlook, our latest Scenario Analysis exercise still describes a reasonable probability of a mild global recession. However, our expectation of such an outcome has been pushed back from the first half of 2024 towards the end of next year, possibly even into the next.

On that basis, and considering our view that government bond yields are already at, or at least very near, their high-water mark in this economic cycle, we have been steadily increasing the portfolio's exposure to interest rate-sensitive assets.

In most scenarios, we expect developed and emerging market government bonds to deliver good real and nominal returns, especially if restrictive monetary policies have the impact on growth that we're anticipating (given we would most likely see the pricing-in of rate reductions as central banks respond logically to an impending recession).

In increasing the allocation to these rate-sensitive assets, we redeemed the underlying holdings in our Absolute Return asset class. While those investments served a useful role in the portfolio (and will very likely do so again in the future), we have less need for them now because of the wealth of diversified opportunities elsewhere in the fund.

Overall, however, while there are good individual opportunities to invest in assets at lower prices and where we can justifiably take higher conviction positions in asset classes, the portfolio remains broadly diversified and – if anything – still moderately positioned in terms of overall risk exposure.

This reflects the view that we are more clearly approaching a juncture in investment markets: we are not at a point of all boats being lifted by a rising tide, nor are we likely to be for some time yet. There will, however, come a time for more significant wholesale investments into the more traditionally higher-risk assets in our opportunity set, but that's not right now.

And, in looking at the performance of the fund over the past 12 months, the more duration-sensitive assets in the portfolio (i.e. those investments that are directly linked to changes in interest rates) have suffered the most, while those assets with less interest rate sensitivity have performed better.

While emerging market bonds have been a good contributor to portfolio returns, developed market government bond yields have been rising (i.e. their prices have been falling), leading them to detract from overall portfolio performance.

The main reason for this fundamental difference is due to inflation expectations.

And, although equity markets had a good first half of 2023, buoyed by increasing thoughts of a soft landing, they have more recently fallen in value as some of that optimism has faded.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 EMERGING MARKETS ALL CAP FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

Over the year, the Fund delivered positive performance and outperformed its benchmark. But as ever, we do not draw conclusions from shorter term performance and continue to focus on longer term performance numbers.

The said, we'd note that some of the near-term performance detractors have included SEA Ltd. The stock had been performing well at the beginning of the year as it pivoted to profitability which was well taken by the market. Thereafter the shares fell on the back of results where management indicated that they would be reinvesting profits back into the business going forward. That seems eminently sensible to us. They have become a self-sustaining business and now given the market is both early and competitive there is little reason to post large profits simply to please the short-term whims of the market.

Another detractor over the period was Silergy, one of the leading players in China's analogue semiconductor industry. This is an industry with very appealing long-term growth prospects. China accounts for around 35 - 40% of the global analogue IC (integrated circuit) market, and this is rising. The company's share price has fallen over the last year as shorter-term concerns regarding the semiconductor cycle in consumer electronics have come to dominate the narrative.

Offsetting positive impacts have come from companies in the energy sector, such as Petrobras. A reminder, though, your investment in Petrobras is driven not just by the oil price, but by an expectation of moderate production growth, combined with the eventual realisation by the market that even in a decarbonising world, there is a place for one of the world's lowest cost, least-carbon intensive major oil assets.

MercadoLibre has also been a top performer over the year. We remain enthused about their operational performance, continuing to deliver 30%+ year-on-year revenue growth. The business continues to become stronger competitively, as the breadth of their e-commerce marketplace enables more services for consumers and merchants.

Overall, the team remains very enthusiastic about the range of opportunities available in emerging markets, the supportive macro backdrop and the fundamental strengths of our companies and the lowly valuations the market continues to place on them.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 EMERGING MARKETS LEADING COMPANIES FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

Over the year, the Fund delivered positive absolute performance and outperformed its benchmark. But as ever, we do not draw conclusions from the shorter term and continue to focus on longer term performance.

One of the detractors over the period was Silergy, one of the leading players in China's analogue semiconductor industry. This is an industry with very appealing long-term growth prospects. China accounts for around 35 - 40% of the global analogue IC (integrated circuit) market, and this is rising. The company's share price has fallen over the last year as shorter-term concerns regarding the semiconductor cycle in consumer electronics have come to dominate the narrative.

Another of the near-term performance detractors has been JD.com, the large Chinese e-commerce player, with particular strengths in logistics and delivery. The ecommerce growth opportunity in China remains considerable, though it remains a very competitive environment. JD has looked to expand its market share by taking third party merchants onto its platform. To stimulate this development, JD has earmarked RMB 10bn for subsidies which has pressured margins in the short term. However, following this investment, management is confident of a return to growth next year.

In contrast, Latin American ecommerce company MercadoLibre has been a top performer over the year. We remain enthused about their operational results, with the company continuing to deliver 30%+ year-on-year revenue growth. The business continues to become stronger competitively, as the breadth of their e-commerce marketplace enables more services for both consumers and merchants.

Companies in the energy sector have fared well in the last year, such as Brazil's Petrobras. A reminder, though, that your investment in Petrobras is driven not solely by the oil price, but also by an expectation of moderate production growth. Combine this with the eventual realisation by the market that even in a decarbonising world, there remains a place for one of the world's lowest cost, least-carbon intensive major oil assets for some time to come

Overall, the team remains very enthusiastic about the range of opportunities available in emerging markets, the supportive macro backdrop and the fundamental strengths of our companies and the lowly valuations the market continues to place on them.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 EUROPEAN HIGH YIELD BOND FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest three years is a more sensible timeframe over which to judge performance.

Bond markets have been more stable in the past 12 months, following the rapid rise in yields during much of 2022, which caused bond prices to fall. Returns for European high yield corporate bonds have been strong over the past year, predominantly due to high levels of income, but also an improvement in corporate bond prices. While inflation remains high, it has stabilised somewhat and is expected to fall, with accompanying interest rate rises mainly behind us. Market expectations have oscillated in the past year between signs that inflation is proving stickier than expected, which may lead to 'higher for longer' interest rates, and concerns that tighter financial conditions will soon bite with a significant impact on growth. The risk of recession remains, particularly in the UK, although more recently, growth has surprised positively in the US, which has important implications for the global financial system. This environment has proved supported for corporate fundamentals and bond prices, although we remain wary that current valuations do not fully reflect the risk of a deteriorating outlook.

During the 12-month period to 30 September 2023, the European High Yield Bond Fund outperformed the benchmark index. This was primarily driven by bond selection. For example, the Fund's holding in convertible bonds issued by Spanish telecommunications infrastructure company Cellnex added value as the company performed strongly on reports of a takeover bid. Over three years, the Fund has underperformed the index. This was primarily driven by holdings in hybrid bonds, which were extremely sensitive to more volatile credit markets. Subordinated hybrid bonds provide an opportunity to access higher yields from companies with resilient characteristics by moving down the capital structure. We believe the return opportunity offered by these positions is attractive for the long-term investor, and as such, we are willing to accept the additional volatility that comes with holding these instruments.

The macroeconomic backdrop remains uncertain. There are clear signs of slowing in Europe. As growth softens, company fundamentals are likely to deteriorate, particularly given higher financing costs. While the majority of companies enter this environment from a position of strength, having recently termed out their debt at attractive rates, highly leveraged issuers with short-term financing needs face significant headwinds. However, the impact of higher rates will take time to come through, with company defaults not expected to increase meaningfully in the near term. Given this backdrop, we believe the scope for credit spread tightening (there is an inverse relationship between narrowing credit spreads and bond prices) is limited, so we have focussed our efforts on increasing coupon income as an important driver of future total returns. In addition, downside protection remains at the forefront of our minds. We continue to maintain a balanced portfolio, prioritising diversification and relatively neutral risk positioning. The Fund is underweight CCC-rated and below bonds (the most highly levered high yield bonds) and more cyclical sectors.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 GLOBAL ALPHA CHOICE FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund has underperformed the benchmark index over the past 12 months.

Macroeconomic events dominated global stock markets in the latter quarter of 2022, with interest rate hikes, inflation, and geopolitical concerns creating a challenging environment for growth equities. While 2022 ended with the positive news that China was relaxing its extended zero-Covid policy, uncertainty continued into 2023. At the beginning of the year, we saw a strong rally for growth stocks, fuelled by increasing investor confidence and excitement around generative AI. This was briefly interrupted by market disruption in March due to the mini-banking crisis in the US, which impacted holdings in the broader financials sector. Global equity markets were volatile again in the third quarter of this year, driven in part by a hardened commitment from the US Federal Reserve to keep interest rates 'higher for longer'. This, combined with ongoing woes in China's property sector, led to an increase in uncertainty, which has proven to be a headwind for growth equities – in particular high-growth, early-stage companies – and we have witnessed a very sharp dislocation between share prices and operating fundamentals.

The top detractor to performance is NVIDIA, the leading provider of hardware and software for accelerated computing. Having purchased NVIDIA for the Fund in June 2023, the company appears as a detractor over the longer term due to its strong performance contribution to the index prior to the Fund's purchase, and subsequent underweight position relative to the MSCI ACWI. GPUs and the accelerated computing power they facilitate lie at the heart of generative AI. NVIDIA has established a monopoly AI ecosystem with its GPU hardware and CUDA software. The company's dominance in such a fast-growing area of technological development gives us great confidence that the company will be a primary beneficiary of a powerful growth trend over the next five years and beyond.

Another detractor is the Japanese company Olympus, a manufacturer of endoscopes, flexible cameras used in medical examinations, and other tools that can reduce the need for surgical incision. Sales have also been impacted by China's lockdowns and supply chain pressures due to the war in Ukraine. More recent results have been encouraging, however, with revenues increasing for the fiscal year 2023 vs the same period in 2022, as well as operating and net profits increasing around 28% and 24% respectively. Olympus has undergone a transformation by selling off non-core units and focusing on product sales and R&D. We believe that this transformation of the business will improve its asset base and solidify its position as a market leader over the long term.

The top contributor to performance over the period was Meta. In what Mark Zuckerberg has called the 'Year of Efficiency', in 2023 the company has reduced operating expenses, headcount, and capital expenditure, resulting in increased revenues. The company's share price has rallied in response to these moves, as well as investor enthusiasm for generative AI, and Meta is now reaccelerating. The company is successfully increasing monetisation by increasing its Reels advertising load and introducing click-to-message adverts on both WhatsApp and Messenger. And, in recent months, the company has ramped up spend on research and development (R&D) projects and made significant investments in data centres, servers and network infrastructure, driven by an increase in AI capacity. Meta has proven itself to be a formidable competitor and we believe it has a compelling upside case for a highly profitable business over the long term.

Another contributor to fund performance over the year was the Canadian e-commerce software and services company Shopify. The company featured in the detractors through much of 2022 owing to its early-stage, investing-for-the-future, tech-enabled model – an area particularly impacted by market sentiment around inflation and rising interest rates. Like Meta, Shopify has pivoted to efficiency, reducing headcount and selling its logistics business, Deliverr. This is a strong signal that management is focusing resources on what it does best: software building and integrating AI into the company's processes. Powered by OpenAI's ChatGPT API, the company has launched a new AI shopping assistant on its Shop app, allowing customers to receive a more personalised shopping experience and discover new products through intelligent chatbot conversations. We are excited about the longer-term opportunity for Shopify, as we believe that the move from offline to online shopping is a powerful structural trend that will continue over the coming years.

Looking ahead, we remain confident in the companies within our portfolio and our investment approach. While market conditions and short-term volatility continue to be influenced by factors such as inflation, interest rates, and geopolitical uncertainties, we maintain our focus on the strategic and operational progress of the businesses in which we invest. The data shows that this is a portfolio of increasingly superior quality, operational flexibility and expected earnings growth. These attributes are still not reflected in the valuation premium which remains slim. We can have high conviction that this anomaly will resolve itself in due course and Global Alpha's strong historic track record will restore itself. We sense a once-in-ageneration opportunity, which is why we reflect on the portfolio with a sense of considered excitement.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 GLOBAL ALPHA FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund has underperformed the benchmark index over the past 12 months.

Macroeconomic events dominated global stock markets in the latter quarter of 2022, with interest rate hikes, inflation, and geopolitical concerns creating a challenging environment for growth equities. While 2022 ended with the positive news that China was relaxing its extended zero-Covid policy, uncertainty continued into 2023. At the beginning of the year, we saw a strong rally for growth stocks, fuelled by increasing investor confidence and excitement around generative AI. This was briefly interrupted by market disruption in March due to the mini-banking crisis in the US, which impacted holdings in the broader financials sector. Global equity markets were volatile again in the third quarter of this year, driven in part by a hardened commitment from the US Federal Reserve to keep interest rates 'higher for longer'. This, combined with ongoing woes in China's property sector, led to an increase in uncertainty, which has proven to be a headwind for growth equities – in particular high-growth, early-stage companies – and we have witnessed a very sharp dislocation between share prices and operating fundamentals.

The top detractor to performance is NVIDIA, the leading provider of hardware and software for accelerated computing. Having purchased NVIDIA for the Fund in June 2023, the company appears as a detractor over the longer term due to its strong performance contribution to the index prior to the Fund's purchase, and subsequent underweight position relative to the MSCI ACWI. GPUs and the accelerated computing power they facilitate lie at the heart of generative AI. NVIDIA has established a monopoly AI ecosystem with its GPU hardware and CUDA software. The company's dominance in such a fast-growing area of technological development gives us great confidence that the company will be a primary beneficiary of a powerful growth trend over the next five years and beyond.

Another detractor is the Japanese company Olympus, a manufacturer of endoscopes, flexible cameras used in medical examinations, and other tools that can reduce the need for surgical incision. Sales have also been impacted by China's lockdowns and supply chain pressures due to the war in Ukraine. More recent results have been encouraging, however, with revenues increasing for the fiscal year 2023 vs the same period in 2022, as well as both operating and net profits increasing around 28% and 24% respectively. Olympus has undergone a transformation by selling off non-core units and focusing on product sales and R&D. We believe that this transformation of the business will improve its asset base and solidify its position as a market leader over the long term.

The world's largest building materials company, CRH, was among the top contributors over the year. Over the course of 2022, the company proved itself to be flexible to rising costs having responded to significant increases in energy prices. The market has responded positively to its share buyback program and plans to move its primary stock market listing to New York. CRH's strong presence in the US positions it well to benefit from robust infrastructure demand at both the federal and state levels. In addition, its strong balance sheet makes the company resilient in the face of near-term headwinds, including fears of recession and a weaker economic environment.

Irish airline Ryanair has also performed strongly over the last year. Ryanair has emerged from the pandemic in a strong competitive position, having invested counter-cyclically while its competitors retrenched. The company's cost position is the best of the low-cost carriers, benefiting from the opportunistic Boeing 737 MAX order book, attractively priced lease extensions and volume-based airport agreements. Furthermore, it is the only airline to reduce its cost per passenger compared to 2019, signalling its ability to continue gaining market share when demand is high and capacity has fallen. Our conviction remains high for the low-cost European airline to continue to take further market share due to its more efficient fleet of aircraft and substantial cost advantage relative to competitors.

Looking ahead, we remain confident in the companies within our portfolio and our investment approach. While market conditions and short-term volatility continue to be influenced by factors such as inflation, interest rates, and geopolitical uncertainties, we maintain our focus on the strategic and operational progress of the businesses in which we invest. The data shows that this is a portfolio of increasingly superior quality, operational flexibility and expected earnings growth. These attributes are still not reflected in the valuation premium, which remains slim. We can have high conviction that this anomaly will resolve itself in due course and Global Alpha's strong historic track record will restore itself. We sense a once-in-ageneration opportunity, which is why we reflect on the portfolio with a sense of considered excitement.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2022 GLOBAL ALPHA FUND (CONTINUED)

The selected share classes provided above are (where available): Class B EUR Acc, Class B USD Acc and the longest running share class if it is not the aforementioned. These are representative; however, other share class data is available on request.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 GLOBAL INCOME GROWTH FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

Over the twelve months to September 2023, the Fund has delivered positive returns but slightly lagged global equity markets.

The tug of war between inflation and Central Banks has continued over the last year, with varying impact across the world. In the US, the economy has been remarkably resilient considering the rapid rise of interest rates, helped by some Government stimulus (Biden's Inflation Reduction Act) and the savings accumulated during the covid lockdowns. In Europe, however, the impact of higher rates has been more noticeable and had a larger impact on economic activity. Inflation is decelerating but economic activity is slowing down, also affected by higher energy costs. In China, a relatively subdued reopening of the economy has been impacted by a weakening property market, with the largest property developers starting to buckle under their debt load.

In equity markets, and particularly since the beginning of 2023, a handful of large US technology companies have explained almost all the returns. This is what investors call a "narrow" market.

For the Fund, a limited exposure to these large US technology companies has proved to be a headwind, compounded over the recent months by a lack of exposure to energy stocks at a time when the oil price increased by about 30%.

At stock level, the standout contributor to performance has been Danish pharmaceutical company Novo Nordisk. Their diabetes and obesity drugs (Ozempic and Wegovy) are struggling to meet rapidly increasing demand and Novo has raised its sales and earnings guidance multiple times over the past 12 months. This has translated into a very strong share price increase in the last year, leading Novo Nordisk to become the most valuable company in Europe in September.

Other contributors include the US air conditioning distributor Watsco and French-listed power equipment specialist Schneider Electric. For both companies, strong results throughout the period reassured investors who had become very pessimistic on global activity in the last quarter of 2022.

Evidence of the narrow market mentioned above can be seen in the fact that two of the top five detractors over the period are technology companies not held: Nvidia and Meta.

Among the stocks held, the top detractor is the lithium miner Albemarle, whose share price fell by ~35% (in USD), following a sharp decline in lithium price this year (~65% in USD, after nearly tripling in 2022). Concerns about Chinese demand for EVs and profit-taking by investors speculating on a volatile commodity price were the main drivers of that decline. Swiss pharmaceutical company Roche was another detractor as results were disappointing throughout the period. Roche is adjusting to a post-covid boom in its diagnostics business and is facing strong headwinds from generic competition for three blockbuster drugs. Courier company UPS detracted from performance as it adjusts back to a more normal activity post a covid boom and a potential strike action by its workers led to relatively disappointing results.

For the global economy, the big picture remains mixed. We may be near the end of an interest rate cycle, but may still be far from the start of a cycle of rate cuts. The intrinsic quality of your holdings, as evidenced by their high return on capital and low level of debt, gives the portfolio a resilience which could be very helpful as uncertainty and market volatility increase.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 GLOBAL STEWARDSHIP FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund underperformed over the past 12 months which has been dominated by investor sentiment toward rising interest rates, creating an uncertain, volatile, and short-term-focused market. Long-duration equities, where the value of future cash flows is 5, 10 years plus out, remain (in our view) underappreciated by the market which is focused on present-day security in the wake of higher interest rates expected for longer.

Recent underperformance cannot be solely blamed on market myopia. Investment mistakes, such as holding First Republic Bank, the largest detractor from relative returns over the past 12 months, also played a role. The bank's deposit base was concentrated on the West Coast of the US, and a degree of interest rate exposure on the balance sheet drew comparisons with Silicon Valley Bank, prompting fears of a run and resulting in a sharp fall in the share price. This looked likely to depress margins for the foreseeable future, so we decided to sell the position.

US education platform Chegg was another significant detractor. Our conviction in the sustainability hypothesis waned as we gathered evidence of students using the platform to cheat on coursework. Furthermore, at its last results announcement, the company conceded that ChatGPT was now having an impact on new student sign-ups. As a result, we chose to sell the position for fears that it couldn't compete against the large language models.

The emergence of generative AI technologies, however, was a net positive, with NVIDIA being a clear beneficiary. The California-based designer of graphics processing units is boosting production to meet surging demand for the most advanced silicon chips. More than 90% of generative artificial intelligence programs are trained on NVIDIA hardware, and operational performance has been strikingly good. Shopify is another contributor to the portfolio's performance. The share price has been boosted by founder Toby Lutke's focus on efficiency and its leading position in integrating AI into its offering.

Following the changes made to the team, philosophy, and process for the strategy over a year ago – namely, creating a dedicated centralised team and raising the bar for sustainability and resilience – the portfolio has been through a period of appraisal. Turnover increased earlier in the year, but in the most recent quarter returned to a more normalised level reflecting the team's comfort in the underlying holdings.

We are confident that the portfolio, today, boasts an opportunity to invest in a collection of underappreciated growth companies that are benefitting society, at an attractive valuation.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 GLOBAL STRATEGIC BOND FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest three years is a more sensible timeframe over which to judge performance.

Bond markets have been more stable in the past 12 months, following the rapid rise in yields during much of 2022, which caused bond prices to fall. Corporate bond returns have been positive over the past year, predominantly due to high levels of income, but also with a slight improvement in corporate bond prices. While inflation remains high, it has stabilised somewhat and is expected to fall, with accompanying interest rate rises mainly behind us. Market expectations have oscillated in the past year between signs that inflation is proving stickier than expected, which may lead to 'higher for longer' interest rates, and concerns that tighter financial conditions will soon bite with a significant impact on growth. The risk of recession remains, particularly in the UK, although more recently, growth has surprised positively in the US, which has important implications for the global financial system. This environment has proved supportive for corporate fundamentals and bond prices, although we remain wary that current valuations do not fully reflect the risk of a deteriorating outlook.

During the 12-month period to 30 September 2023, the Global Strategic Bond Fund outperformed the benchmark index. Asset allocation detracted, reflecting underweights in the energy and healthcare sectors, both of which performed strongly in the period. This was offset by strong contributions from bond selection. For example, within the technology and electronics sector, the Fund's holding in convertible bonds issued by Spanish telecommunications infrastructure company Cellnex added value as the company performed strongly on reports of a takeover bid. Over three years, the Fund has performed in line with the index. Asset allocation has made a meaningful contribution, in keeping with our strategic approach, with the Fund profiting from a dynamic approach to allocation between investment grade and high yield bonds.

Given the uncertain macroeconomic outlook, we started to reduce portfolio credit risk in the first quarter of 2023. Looking ahead, we remain wary of increasing our exposure to credit risk as tighter monetary policy continues to feed through to a weaker growth environment. America remains the exception with resilient growth, but there are clear signs of slowing elsewhere (particularly in Europe), and as growth softens, company fundamentals are likely to deteriorate, particularly given higher financing costs. While the majority of companies enter this environment from a position of strength, having recently termed out their debt at attractive rates, highly leveraged companies with short-term financing needs face significant headwinds. In this context, high yield credit spreads—the premium bondholders are paid to lend to high yield issuers—are trading close to post-global financial crisis lows. We continue to prefer investment grade-rated bonds which are less sensitive to declining fundamentals and a weakening economic backdrop.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 HEALTH INNOVATION FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Health Innovation portfolio significantly underperformed the benchmark in the year to the end of September 2023. The Fund's performance was severely impacted by economic uncertainty, a tougher funding environment, and healthcare companies readjusting following the pandemic. Despite this, we believe the rate of innovation in human health is accelerating based on the growing foundation of scientific discovery. The fundamentals of the portfolio remain strong, which we believe will be reflected in stock prices over the long term. The economic environment creates opportunities for companies that can develop better treatments, and devices, and provide efficiencies for health systems, and for active managers with the patience and long-term investment horizon to find the companies driving change.

Exact Sciences was one the largest contributors to performance in the last 12 months. Exact Sciences develops non-invasive cancer screening tests and genetic sequencing to personalise the treatment of cancer for the individual. In June, Exact Sciences announced the results of its second-generation colorectal cancer screening test, Cologuard 2.0, which showed improved accuracy and widened the gap in the test's performance over rivals. Its screening revenue is growing at over 30%, and expects its margins to continue to grow as it scales, helping it reach profitability imminently. Exact Sciences' Cologuard test has penetrated just 10% of the US market, and with its multi-cancer screening test undergoing clinical trials, the company has a large opportunity ahead of it.

Argenx's stock price rose over the last 12 months as it announced positive trial results and impressive revenues for its drug Vyvgart. Argenx uses its antibody engineering expertise and scientific network to develop treatments for rare diseases. Vyvgart has been approved to treat myasthenia gravis, but its trial results for chronic inflammatory demyelinated polyneuropathy (CIDP) exceeded market expectations and expanded the potential patient population. In addition to the other conditions it can address with Vyvgart, Argenx's newly developed ARGX-117 molecule, currently undergoing a phase two trial in multifocal motor neuropathy (MMN), demonstrates the strength of its broader pipeline.

10X Genomics has developed a set of tools and instruments that go beyond our DNA to study what is happening in the body at a cellular level. Despite weakness in demand in the life sciences industry, 10X Genomics continues to execute impressively. Its second-quarter revenues were up 28% year on year, driven by the growth of its new spatial biology device, Xenium. This complements its other devices, such as its single-cell sequencing device, Chromium. This market is still nascent. Having launched over 25 products since its first in 2015 to meet the evolving needs of its customers, we have conviction that the company can continue to innovate to deliver important applications for researchers.

One of the top detractors from performance in the last 12 months was Shockwave Medical, which has developed a device that uses sonic pressure waves to remove dangerous plaques from patients' arteries. The company has made outstanding progress over the last few years, increasing awareness with doctors, improving its products, and expanding the procedures its devices can be used for. Despite its evident progress, Shockwave's stock price fell in the last year as the market punished its decision to reinvest its growing revenues in the acquisition of Neovasc, which has developed a device to treat angina. We think this has expanded its market opportunity by three times and we are encouraged by this statement of its long-term approach.

Moderna, which develops vaccines and treatments based on messenger RNA, also detracted from performance in the last year due to the company's COVID-19 vaccine revenues underwhelming expectations. However, the company made several positive announcements over the last year, including successful phase three trial results for its respiratory syncytial virus (RSV) and flu vaccines, as well as early-stage success for its combination COVID and flu vaccine. The company has reinvested its pandemic revenues to expand its pipeline to over 40 drugs in development across respiratory, latent, and rare diseases, as well as cancer. We believe its mRNA platform is scalable across a wide range of potential diseases and it has shown a clear lead against competitors.

Novocure's stock price fell in the last 12 months which weighed on the Fund's performance. The company has created a novel way to treat cancer through electric fields called Tumour Treating Fields (TTF), already used for brain cancers. The company's stock price fell after it announced disappointing trial results for the treatment of ovarian and lung cancers alongside chemotherapy. However, the trial did show that their TTF devices increase survival rates if used alongside immunotherapy drugs. The trial results refine the patient population for their device and provide some lessons on trial design in the future. Further trials are already underway and are due to be completed in 2024, which we will continue to monitor with interest. Through experience, we know that showing consistency in our approach, focusing on company fundamentals, and keeping a long-term horizon will be vital to delivering value for our clients. We will continue to invest in the innovative companies driving the revolution in human health.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 ISLAMIC GLOBAL EQUITIES FUND

The performance of selected share classes for the period since inception on 10 May 2022 to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measurements are of limited relevance in assessing investment ability and would suggest five-year periods is a more sensible timeframe over which to judge performance. We look forward to reporting to you on more meaningful performance time frames in the years to come.

Whilst an economic backdrop of rising interest rates and lower economic growth suggests a tough outlook for growth equities, we remain optimistic. This is an environment where companies with strong business models should come to the fore and ultimately be rewarded. The Fund is full of many leading businesses, that are in a good position to grow their sales and earnings over the next 5 years and longer.

The Worldwide Islamic Global Equity Fund was seeded in May 2022 and therefore has insufficient track record to provide any meaningful performance commentary at this stage. As at 30 September 2023, the Fund was invested in 43 companies, held across global stock markets. Investing under Islamic principles, our aim is to identify high quality growth companies that will outperform over a 5-year (or longer) horizon.

Top contributors to relative performance during the period were Shopify and Novo Nordisk, while among detractors to relative performance were JD.com and Shockwave Medical.

The Fund is relatively index and sector agnostic, as we primarily focus on finding the best Islamic aligned, long-term investments irrespective of their size, position in an index or location of listing.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 JAPANESE FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The severe derating of equity prices over the past twelve months has significantly impacted short-term performance and detracted from the Fund's longer-term track record. In Japan, growth investing remains starkly out of favour. This appears to be driven by prospects of a tighter monetary policy (benefitting financials), a weak currency buoying exporters (helping autos and industrials) and policy initiatives led by the Tokyo Stock Exchange. We question the sustainability of these drivers and believe the rally may soon run out of steam, leaving its biggest beneficiaries - companies with questionable idiosyncratic appeal – exposed.

The Fund's most significant detractors over the period included CyberAgent and KOSE.

CyberAgent, a company that operates within online advertising, mobile gaming and media has seen its share price suffer in recent months. The company saw a decrease in its earnings following the phenomenal success of Uma Masume Pretty Derby, a game released back in February 2021. The game generated some of the highest revenues ever seen in the Japanese mobile game market and is now naturally declining following its initial success. CyberAgent has also been investing heavily in its advertising platform, which has impacted profits over the short term, but we remain supportive of its approach to prioritise long-term growth.

KOSE the premium skincare and cosmetics company has also been weak this year. We believe this is due to fears of a slowdown in Chinese consumption. Recently, it was impacted by backlash from the Fukushima water incident where Chinese consumers boycotted Japanese brands. We view these as short-term concerns and are encouraged by the significant increase in tourism in Japan, with the number of foreign visitors hitting 96% of pre-Covid-19 levels. KOSE has an impressive portfolio of brands and Tarte remains a standout performer, growing sales at more than 30% year-over-year. We continue to be happy holders and think this is a company that stands to benefit from the rise in middle-class wealth in Asia.

The Fund's most significant contributors over the year included Disco and Mitsubishi Corp.

Disco, the maker of grinding and dicing machines used in the chip manufacturing process continues to see strong demand for its equipment. Recent results reported a record-high gross margin of 68%, which has been boosted by the weaker yen and the success of its product mix shift. The number of shipments increased 10% year-over-year with double-digit growth for dicers, grinders and consumables, with the majority of sales coming from Asia and North America. Looking forward, we believe Disco is well-positioned to benefit from the demand for Silicon Carbide power semiconductors and applications that will likely support broader industry growth.

Mitsubishi Corp is one of Japan's leading trading companies, with operations spanning resources, oil and gas, machinery, electric power, food and retail. Higher commodity prices, the perception of stable earnings and Warren Buffet's widely publicised investment in this, and other, trading companies has helped boost the share price. We believe the company has done well to successfully diversify its business and it appears to be a good capital allocator. The underlying business is, however, cyclical and we are concerned that it may be over-earning in some divisions. It is also promoting itself as an energy transition enabler, but it is unclear whether it is driving change or moving to more defensible and profitable areas. Following this period of outperformance, we decided to reduce the Fund's holding slightly.

Overall, the Fund continues to endure a difficult period of underperformance. Despite this difficult backdrop, we remain confident that we own businesses which are more resilient than recent share price moves suggest. Our focus remains on finding companies that will generate strong earnings growth over the next five years and beyond. Furthermore, after such a significant reset, valuations are at undemanding levels. Furthermore, after such a significant reset, valuations are at undemanding levels, meaning no premium needs to be paid for better quality and higher growth companies.

BAILLIE GIFFORD WORLDWIDE FUNDS PLC

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 JAPANESE FUND (CONTINUED)

The selected share classes provided above are (where available): Class B EUR Acc, Class B USD Acc and the longest running share class if it is not the aforementioned. These are representative; however, other share class data is available on request.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 LONG TERM GLOBAL GROWTH FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ to the Fund performance. We believe that shorter-term performance measurements are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

It appears counterintuitive that a higher cost of capital, spurred by elevated inflation and interest rate hikes, would be conducive to growth and, in turn, favour a portfolio like Long Term Global Growth. But since the beginning of the year, we have begun to see some recovery in share prices, undoing some of the drawdowns experienced during 2022, as the market acknowledges the superior fundamentals and continued operational strength of our holdings. This was further bolstered by the perceived opportunity of continued technological advancements in Artificial Intelligence, which features significantly across the portfolio.

At its core, LTGG's task is future proofing. Investing with an eye on the next ten years, instead of the next quarter, necessitates adaptability, diligent capital allocation, and resilience from our holdings. Now that capital costs have increased, unruly companies have been required to pull back, while the disciplined outliers have been able to forge ahead and win share from those in retreat. This has been the clear theme emerging from our interactions with several LTGG holdings, and we have been excited to see the strength of the green shoots across the portfolio.

Meituan, Adyen and Moderna were among the top detractors to the Fund's relative performance over the last year.

Meituan is an online marketplace for the local service industry in China. It operates in more than 200 categories in 2,800 cities with dominant market shares in on-demand restaurant delivery, in-store dining, hotel booking, and film ticketing. Revenues in 2022 grew north of 20% year-on-year, and this is despite continued lockdowns and restrictions across China. Simultaneously, the company significantly narrowed its operating losses. Despite this, the shares dropped approximately 40% over the last twelve months due to concerns around competition and uncertainty as to whether the regulatory cloud has lifted for this and the other tech platform businesses.

Adyen shares experienced a severe drawdown in August of 2023 after the company reported a tempering of growth and continued countercyclical investment compressed margins. The company is sincerely managed for the long term, and management had guided that it would continue opportunistic hiring to further strengthen its competitive position. Despite some short term headwinds in its US digital segment, we believe the company addresses a structural growth opportunity, with an excellent management team, and a differentiated business model.

Moderna's share price has continued to suffer year to date as a result of market concerns surrounding the company's potential beyond COVID-19 vaccines. The astonishingly rapid development of the COVID-19 vaccine validated the broadly applicable technology platform built by Moderna. With more than 30 treatments currently in active clinical trials and recent progress in its personalised cancer vaccine, the company is not resting on its laurels. While revenues from COVID-19 vaccines will now reduce, the company's balance sheet has strengthened significantly, and it sits on approximately \$16 billon of cash & investments, which will enable them to continue funding their pipeline.

Reflecting on the last twelve months, NVIDIA, Shopify and Pinduoduo were among the top contributors to the Fund's relative performance during the year.

According to NVIDIA CEO Jensen Huang, a new era of computing has begun as companies shift from general-purpose to accelerated computing and generative AI technologies. NVIDIA has reported impressive revenue growth of over 100% in the recent quarter compared to last year, largely due to record data centre revenues. The company's earnings per share also rose significantly, by 850% compared to last year. In the same quarter, major cloud service providers announced the implementation of massive NVIDIA H100 AI chip infrastructures, while leading enterprise IT system and software providers announced partnerships to bring NVIDIA AI to every industry. This has sparked a race to adopt generative AI technology.

Shopify now handles 10% of all US e-commerce transactions and the market has positively reacted to increased discipline towards profitability. They recently disposed of their logistics business and have made a number of changes to their senior management to reflect the changing needs of the business. They are now offering an enterprise solution and have raised prices for the first time ever. Shopify is deepening its relationship with merchants, broadening its opportunity set, and plans to leverage its latent pricing power going forward.

Pinduoduo's impressive performance in the most recent quarter is a testament to the company's growing popularity and success in the Chinese market. The company reported a remarkable 66% increase in sales compared to the previous year, indicating a positive shift in consumer sentiment in China. Despite a significant increase of over 50% in sales and marketing expenses, Pinduoduo's operating profit and net income also saw a substantial increase of almost 50%. This growth can be attributed to the platform's ability to gain trust from brands, with many using it as their primary channel to reach consumers. Pinduoduo is one of China's fastest-growing tech companies, and its international Temu app is rapidly gaining users in the US

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 PAN-EUROPEAN FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Fund underperformed significantly over the past 12 months. The past couple of years performance has weighed on the Fund's longer-term returns. While we understand that our performance may suffer in turbulent times, the quantum of underperformance has been disappointing, and we are determined to improve our record over the long-term.

Uncertainty abounds, whether that concern the path for interest rates or geopolitics. This sits uncomfortably with many investors, creating significant volatility and a flight to safety. This provides as a difficult background, particularly for growth investors as near-term certainty becomes more valuable than long-term opportunity, albeit temporarily. However, that fundamental progress is not reflected in many companies' share prices provides us with the opportunity to reinvest in existing holdings and take new holdings at attractive valuations, leaving us feeling optimistic about the potential of both our portfolio and our ability to deliver value as investors.

The Fund's detractors included payments company Adyen and luxury fashion online marketplace Farfetch. Adyen's shares declined significantly in reaction to its first half earnings results which revealed heightened competitive intensity in the US among payments processors. While we recognise that this is a concern, we remain positive about Adyen's long-term potential. Farfetch is experiencing a transition year with growth having slowed after a strong period through the pandemic. We have been reviewing our investment case in the company of late with the power of aggregators in the online fashion retail world under question.

The Fund's contributors included the fantasy board games company Games Workshop and audio streaming company Spotify. Games Workshop enjoys a very strong following with its loyal customer base and now has an agreement in place with Amazon to turn its Warhammer franchise into a TV series. Meanwhile Spotify shares have performed well due to the market reacting positively to improved cost control and how it has continued to take market share.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 POSITIVE CHANGE FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

The Positive Change Fund underperformed the index over the year to 30 September 2023.

Among the largest detractors from performance over the past 12 months were Orsted and Illumina.

Orsted, a renewable energy developer, faced share price weakness due to its recent announcement of a potential \$2 billion impairment. This was attributed to supply chain issues, rising interest rates, and challenges securing US tax credits. While disappointing, the company had previously communicated its operational difficulties. We are undertaking research to consider these present challenges in the context of Orsted's contribution to building renewable energy infrastructure which remains crucial in addressing climate change.

Illumina continues to face challenges. The growth in the core gene sequencing business has stagnated in the short term. The Grail acquisition faces legal and regulatory obstacles. And the recent governance issues and executive turnover create further uncertainty. We still believe in the long-term growth opportunities for gene sequencing, and our research on genomics suggests that Illumina's competitive position is still strong. We are monitoring the investment case closely, including the strategy of the new CEO.

Among the largest contributors to performance over the past 12 months were Shopify and MercadoLibre.

Shopify continues to build on its robust fundamentals. It now accounts for 10% of US e-commerce transactions, has disposed of its logistics business, and raised prices for the first time. Shop Pay has been shown to boost conversion rates, and Shopify's Gross Merchandise Value growth is ahead of the broader US retail market. Shopify is focusing on its software business, divesting from logistics and agreeing to a fulfilment deal with Amazon. The company plans to leverage its pricing power and deepen its relationship with merchants. Despite a challenging environment, Shopify's robust fundamentals and infrastructure allow merchants to remain agile.

MercadoLibre, the largest e-commerce platform in Latin America, reported impressive growth in both its e-commerce and fintech businesses. This resulted in operating profits doubling year-over-year, with operating margins exceeding industry standards. Over time, the company can leverage its e-commerce business to drive significant growth in fintech, providing a competitive advantage. MercadoLibre has the potential to support livelihoods and promote financial inclusion for millions of people.

Our dual objectives ensure we find and own growing companies whose products solve global challenges. Our focus as patient owners is on the long-term prospects of the companies in the Fund, seeking those with strong competitive advantages and exceptional growth opportunities. We are confident in our positioning, and we believe that the case for investing in the Positive Change Fund is now more important and powerful than ever.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 RESPONSIBLE GLOBAL EQUITY INCOME FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

Over the twelve months to September 2023, the Fund has delivered positive returns but slightly lagged global equity markets.

The tug of war between inflation and Central Banks has continued over the last year, with varying impact across the world. In the US, the economy has been remarkably resilient considering the rapid rise of interest rates, helped by some Government stimulus (Biden's Inflation Reduction Act) and the savings accumulated during the covid lockdowns. In Europe, however, the impact of higher rates has been more noticeable and had a larger impact on economic activity. Inflation is decelerating but economic activity is slowing down, also affected by higher energy costs. In China, a relatively subdued reopening of the economy has been impacted by a weakening property market, with the largest property developers starting to buckle under their debt load.

In equity markets, and particularly since the beginning of 2023, a handful of large US technology companies have explained almost all the returns. This is what investors call a "narrow" market.

For the Fund, a limited exposure to these large US technology companies has proved to be a headwind, compounded over the recent months by a lack of exposure to energy stocks at a time when the oil price increased by about 30%.

At stock level, the standout contributor to performance has been Danish pharmaceutical company Novo Nordisk. Their diabetes and obesity drugs (Ozempic and Wegovy) are struggling to meet rapidly increasing demand and Novo has raised its sales and earnings guidance multiple times over the past 12 months. This has translated into a very strong share price increase in the last year, leading Novo Nordisk to become the most valuable company in Europe in September.

Other contributors include the US air conditioning distributor Watsco and French-listed power equipment specialist Schneider Electric. For both companies, strong results throughout the period reassured investors who had become very pessimistic on global activity in the last quarter of 2022.

Evidence of the narrow market mentioned above can be seen in the fact that two of the top five detractors over the period are technology companies not held: Nvidia and Meta.

Among the stocks held, the top detractor is the lithium miner Albemarle, whose share price fell by ~35% (in USD), following a sharp decline in lithium price this year (~65% in USD), after nearly tripling in 2022). Concerns about Chinese demand for EVs and profit-taking by investors speculating on a volatile commodity price were the main drivers of that decline. Swiss pharmaceutical company Roche was another detractor as results were disappointing throughout the year. Roche is adjusting to a post-covid boom in its diagnostics business and is facing strong headwinds from generic competition for three blockbuster drugs. Courier company UPS detracted from performance as it adjusts back to a more normal activity post a covid boom and a potential strike action by its workers led to relatively disappointing results.

For the global economy, the big picture remains mixed. We may be near the end of an interest rate cycle, but may still be far from the start of a cycle of rate cuts. The intrinsic quality of your holdings, as evidenced by their high return on capital and low level of debt, gives the portfolio a resilience which could be very helpful as uncertainty and market volatility increase.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 SUSTAINABLE EMERGING MARKETS BOND FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest three years is a more sensible timeframe over which to judge performance.

Following a challenging first six months after the Fund was launched, this was a year of recovery for emerging market debt, as investor sentiment towards the asset class improved. The Fund outperformed its benchmark index during the year, helped by country selection and interest rate positioning.

A key driver of the Fund's outperformance during the year was its overweight allocation to Latin America. Central banks in the region reacted more quickly than their developed market counterparts to combat inflation two years ago. As a result, interest rates were very high at the beginning of the year. Inflation has eased and economic growth has slowed in the region during 2023, leaving investors more confident that interest rates have peaked and will start to fall from here. We have already started to see some interest rate cuts in response to the deteriorating growth outlook in emerging markets. However, we believe central banks will be mindful of the risks of deviating from the US Federal Reserve's policy course.

Investment grade issuers such as Uruguay and Peru were among the strongest individual contributors to returns, as the fundamentals of both economies improved during the year. Some of the most lowly-rated bonds in the portfolio made a positive contribution too. For example, our Ukraine sovereign holdings rallied from distressed levels.

In terms of positioning, the Fund continues to have a longer duration position than the benchmark, which it benefitted from during the year. As more interest rate cuts in emerging markets have been 'priced in' during recent months, we have reduced our duration overweight.

As well as reducing interest rate risk, our recent activity has also included reducing credit risk in the portfolio. We have reduced the allocation to hard currency corporate bonds by selling some of the high yield issuers, including TotalPlay in Mexico and OCP in Morocco. The average credit rating in the portfolio is currently BB, which is the same as the benchmark index.

Towards the end of the twelve-month period, emerging market bonds gave up some of their recent gains, primarily driven by an expectation that interest rates will remain 'higher for longer' in the US. Growth in the US has been much more resilient than in other regions, leaving its central bank with little option but to keep monetary policy tight at present. This is a headwind for emerging market bonds, as investors demand a risk premium over US Treasury bonds for lending to emerging market sovereigns.

Looking ahead, hard currency emerging market bonds are well placed to provide attractive levels of income during the coming years, given the high nominal yields available at present. However, the shorter-term performance of the asset class is likely to be heavily influenced by the direction of US interest rates.

MANAGER'S REPORT FOR THE PERIOD ENDED 30 SEPTEMBER 2023¹ US EQUITY ALPHA FUND

The performance of selected share classes for the period since inception on 12 December 2022 to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

We look forward to reporting to you on more meaningful performance timeframes in the years to come.

The US Equity Alpha Fund was seeded in December 2022 and therefore has insufficient track record to provide any meaningful performance commentary at this stage.

As at 30 September 2023, the Fund was invested in 75 US companies. The US Equity Alpha Fund aims to outperform the S&P 500 index over rolling 5 year periods by investing in 60-90 businesses with underappreciated growth potential.

We believe that growing businesses will dominate future stock returns, and that the companies that dominate will exhibit a range of growth profiles. Some will grow rapidly, others will quietly compound, and still more will grow in leaps and pauses. They will be defined by their corporate cultures, ideally suited to the opportunities ahead. Patiently backing these exceptional cultures over several years will give time for their superior characteristics to manifest in stock returns. Our investment process is structured to promote the inclusion of a variety of growth profiles in the Fund at any given time.

¹Fund commenced operations on 12 December 2022.

MANAGER'S REPORT FOR THE YEAR ENDED 30 SEPTEMBER 2023 US EQUITY GROWTH FUND

The performance of selected share classes for the year to 30 September 2023 is given in the table below. We manage the Fund as a whole and do not consider the impact of currency movements on share class performance. The performance of individual share classes may differ from the Fund performance. We believe shorter-term performance measures are of limited relevance in assessing investment ability and would suggest five years is a more sensible timeframe over which to judge performance.

For the year to 30 September 2023, the US Equity Growth Fund underperformed its benchmark amid continued market volatility.

Share prices across the portfolio were turbulent during the last twelve months as stock markets remained sensitive to news flow and upward pressure on interest rates appeared to weigh on investor sentiment. Recessionary fears have persisted, and market participants' time horizons are as short as ever. Still, we are encouraged by how companies in your portfolio are executing in this changed environment. These firms are also addressing structural changes that transcend market cycles. We are confident in the health of your portfolio and the growth opportunities ahead of it.

Medical device company Novocure and First Republic Bank were notable detractors this year. Novocure shared mixed results from a trial of its Tumour Treating Fields technology. The results reduced our conviction in the company's growth opportunity and we sold your holding. First Republic Bank suffered a run on deposits following another regional bank's collapse. It was in otherwise good financial health, with prudent management and a compelling expansion opportunity. We believed First Republic Bank's growth opportunity was impaired and sold the holding.

Merchant software platform Shopify and computing company NVIDIA were notable contributors this year. Shopify chose to focus more on its software business, divesting from logistics. It agreed a fulfilment deal with Amazon, deciding to also integrate Amazon's 'Buy With Prime' payment option. Shopify can thrive as more of retail shifts online. NVIDIA experienced a demand surge as Artificial Intelligence (AI) software grew in popularity. NVIDIA's Graphics Processing Unit chips are uniquely suited to the task of AI computing, and AI uses may proliferate rapidly.

We are excited about the prospects for undervalued growth given the breadth of change underway, and the nervy position stock markets find themselves in. The scope for disruption is widening as the IT revolution broadens, spread faster by AI advancement. We expect innovation to accelerate across industries. The best companies will shift from "growth at all costs" to "growth with cost control" and thrive as a result. This environment presents an ideal opportunity for selective growth investors.

Independent auditors' report to the members of Baillie Gifford Worldwide Funds plc

Report on the audit of the financial statements

Opinion

In our opinion, Baillie Gifford Worldwide Funds plc's financial statements:

- give a true and fair view of the Company's and Funds' assets, liabilities and financial position as at 30 September 2023 and of their results for the year then ended;
- have been properly prepared in accordance with Generally Accepted Accounting Practice in Ireland (accounting standards issued by the Financial Reporting Council of the UK, including Financial Reporting Standard 102 "The Financial Reporting Standard applicable in the UK and Republic of Ireland" and Irish law); and
- have been properly prepared in accordance with the requirements of the Companies Act 2014 and the European Communities (Undertakings for Collective Investment in Transferable Securities) Regulations 2011 (as amended).

We have audited the financial statements, included within the annual report and audited financial statements, which comprise:

- the statement of financial position as at 30 September 2023;
- the statement of comprehensive income for the year then ended;
- the statement of changes in net assets attributable to holders of redeemable participating shares for the year then ended;
- the statement of investments for each of the Funds as at 30 September 2023; and
- the notes to the financial statements for the Company and for each of its Funds, which include a description of the significant accounting policies.

Basis for opinion

We conducted our audit in accordance with International Standards on Auditing (Ireland) ("ISAs (Ireland)") and applicable law.

Our responsibilities under ISAs (Ireland) are further described in the Auditors' responsibilities for the audit of the financial statements section of our report. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Independence

We remained independent of the Company in accordance with the ethical requirements that are relevant to our audit of the financial statements in Ireland, which includes IAASA's Ethical Standard, and we have fulfilled our other ethical responsibilities in accordance with these requirements.

Emphasis of matter - financial statements prepared on a basis other than going concern

In forming our opinion on the financial statements, which is not modified, we draw attention to note 1. a) to the financial statements which describes the reasons why the financial statements of Baillie Gifford Worldwide Diversified Return Euro Fund, Baillie Gifford Worldwide European Growth Fund, Baillie Gifford Worldwide Systematic Long Term Growth Fund, Baillie Gifford Worldwide European High Yield Bond Fund, Baillie Gifford Worldwide Global Strategic Bond Fund and Baillie Gifford Worldwide Sustainable Emerging Markets Bond Fund have been prepared on a basis other than going concern.

Conclusions relating to going concern

With the exception of Baillie Gifford Worldwide Diversified Return Euro Fund, Baillie Gifford Worldwide European Growth Fund, Baillie Gifford Worldwide Systematic Long Term Growth Fund, Baillie Gifford Worldwide UK Equity Alpha Fund, Baillie Gifford Worldwide European High Yield Bond Fund, Baillie Gifford Worldwide Global Strategic Bond Fund and Baillie Gifford Worldwide Sustainable Emerging Markets Bond Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, based on the work we have performed, we have not identified any material uncertainties relating to events or conditions that, individually or collectively, may cast significant doubt on the Company's and Funds' ability to continue as a going concern for a period of at least twelve months from the date on which the financial statements are authorised for isome

With the exception of Baillie Gifford Worldwide Diversified Return Euro Fund, Baillie Gifford Worldwide European Growth Fund, Baillie Gifford Worldwide Systematic Long Term Growth Fund and Baillie Gifford Worldwide UK Equity Alpha Fund, Baillie Gifford Worldwide European High Yield Bond Fund, Baillie Gifford Worldwide Global Strategic Bond Fund and Baillie Gifford Worldwide Sustainable Emerging Markets Bond Fund where a basis of accounting other than going concern has been adopted as set out in the Emphasis of matter - financial statements prepared on a basis other than going concern above, in auditing the financial statements, we have concluded that the directors' use of the going concern basis of accounting in the preparation of the financial statements is appropriate.

However, because not all future events or conditions can be predicted, this conclusion is not a guarantee as to the Company's and Funds' ability to continue as a going concern.

Our responsibilities and the responsibilities of the directors with respect to going concern are described in the relevant sections of this report.

Reporting on other information

The other information comprises all of the information in the annual report and audited financial statements other than the financial statements and our auditors' report thereon. The directors are responsible for the other information. Our opinion on the financial statements does not cover the other information and, accordingly, we do not express an audit opinion or, except to the extent otherwise explicitly stated in this report, any form of assurance thereon. In connection with our audit of the financial statements, our responsibility is to read the other information and, in doing so, consider whether the other information is materially inconsistent with the financial statements or our knowledge obtained in the audit, or otherwise appears to be materially misstated. If we identify an apparent material inconsistency or material misstatement, we are required to perform procedures to conclude whether there is a material misstatement of the financial statements or a material misstatement of the other information. If, based on the work we have performed, we conclude that there is a material misstatement of this other information, we are required to report that fact. We have nothing to report based on these responsibilities.

With respect to the Directors' Report, we also considered whether the disclosures required by the Companies Act 2014 have been included.

Based on the responsibilities described above and our work undertaken in the course of the audit, ISAs (Ireland) and the Companies Act 2014 require us to also report certain opinions and matters as described below:

- · In our opinion, based on the work undertaken in the course of the audit, the information given in the Directors' Report for the year ended 30 September 2023 is consistent with the financial statements and has been prepared in accordance with applicable legal requirements.
- · Based on our knowledge and understanding of the Company and its environment obtained in the course of the audit, we have not identified any material misstatements in the Directors' Report.

Responsibilities for the financial statements and the audit

Responsibilities of the directors for the financial statements

As explained more fully in the Statement of Directors' Responsibilities set out on page 13, the directors are responsible for the preparation of the financial statements in accordance with the applicable framework and for being satisfied that they give a true and fair view.

The directors are also responsible for such internal control as they determine is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, the directors are responsible for assessing the Company's and Funds' ability to continue as going concerns, disclosing as applicable, matters related to going concern and using the going concern basis of accounting unless the directors either intend to liquidate the Company or to cease operations, or have no realistic alternative but to do so.

Auditors' responsibilities for the audit of the financial statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs (Ireland) will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

Our audit testing might include testing complete populations of certain transactions and balances, possibly using data auditing techniques. However, it typically involves selecting a limited number of items for testing, rather than testing complete populations. We will often seek to target particular items for testing based on their size or risk characteristics. In other cases, we will use audit sampling to enable us to draw a conclusion about the population from which the sample is selected.

A further description of our responsibilities for the audit of the financial statements is located on the IAASA website at:

https://www.iaasa.ie/getmedia/b2389013-1cf6-458b-9b8f-a98202dc9c3a/Description of auditors responsibilities for audit.pdf.

This description forms part of our auditors' report.

Use of this report

This report, including the opinions, has been prepared for and only for the Company's members as a body in accordance with section 391 of the Companies Act 2014 and for no other purpose. We do not, in giving these opinions, accept or assume responsibility for any other purpose or to any other person to whom this report is shown or into whose hands it may come save where expressly agreed by our prior consent in writing.

Other required reporting

Companies Act 2014 opinions on other matters

- We have obtained all the information and explanations which we consider necessary for the purposes of our audit.
- In our opinion the accounting records of the Company were sufficient to permit the financial statements to be readily and properly audited.
- The financial statements are in agreement with the accounting records.

Companies Act 2014 exception reporting

Directors' remuneration and transactions

Under the Companies Act 2014 we are required to report to you if, in our opinion, the disclosures of directors' remuneration and transactions specified by sections 305 to 312 of that Act have not been made. We have no exceptions to report arising from this responsibility.

Man Lowth

STATEMENT OF FINANCIAL POSITION (CONTINUED) AS AT 30 SEPTEMBER 2023

¹Fund ceased operations on 15 March 2023.

²Fund commenced operations on 1 October 2021 and ceased operations on 12 July 2023.

³Fund commenced operations on 10 May 2022.

⁴Fund commenced operations on 31 March 2022.

Fund connected operations on 15 May 2023.
Fund ceased operations on 16 May 2023.
Fund ceased operations on 25 November 2022.

⁷Fund commenced operations on 12 December 2022.

^Includes purification of income amounting to \$57.66 (30 September 2022: \$52.86).

*The Aggregate Financial Statements have been adjusted to account for cross investments between Funds. Details for any cross investments between Funds are included in Note 12 of the Notes to the Audited Financial Statements.

1. Statement of Accounting Policies

The significant accounting policies and estimation techniques adopted by Baillie Gifford Worldwide Funds plc (the "Company") are as follows:

The Company is comprised of thirty sub-funds (each a "Fund", together the "Funds"), twenty four of which are funded; Baillie Gifford Worldwide Asia ex Japan Fund (the "Asia ex Japan Fund"), Baillie Gifford Worldwide China A Shares Growth Fund (the "China A Shares Growth Fund"), Baillie Gifford Worldwide China Fund (the "China Fund"), Baillie Gifford Worldwide Discovery Fund (the "Discovery Fund"), Baillie Gifford Worldwide Diversified Return US Dollar Fund (the "Diversified Return US Dollar Fund"), Baillie Gifford Worldwide Diversified Return Yen Fund (the "Diversified Return Yen Fund"), Baillie Gifford Worldwide Emerging Markets All Cap Fund (the "Emerging Markets All Cap Fund"), Baillie Gifford Worldwide Emerging Markets Leading Companies Fund (the "Emerging Markets Leading Companies Fund"), Baillie Gifford Worldwide European High Yield Bond Fund (the "European High Yield Bond Fund"), Baillie Gifford Worldwide Global Alpha Choice Fund (the "Global Alpha Choice Fund"), Baillie Gifford Worldwide Global Alpha Fund (the "Global Alpha Fund"), Baillie Gifford Worldwide Global Income Growth Fund (the "Global Income Growth Fund"), Baillie Gifford Worldwide Global Stewardship Fund (the "Global Stewardship Fund"), Baillie Gifford Worldwide Global Strategic Bond Fund (the "Global Strategic Bond Fund"), Baillie Gifford Worldwide Health Innovation Fund (the "Health Innovation Fund"), Baillie Gifford Worldwide Islamic Global Equities Fund (the "Islamic Global Equities Fund"), Baillie Gifford Worldwide Japanese Fund (the "Japanese Fund"), Baillie Gifford Worldwide Long Term Global Growth Fund (the "Long Term Global Growth Fund"), Baillie Gifford Worldwide Pan-European Fund (the "Pan-European Fund"), Baillie Gifford Worldwide Positive Change Fund (the "Positive Change Fund"), Baillie Gifford Worldwide Responsible Global Equity Income Fund (the "Responsible Global Equity Income Fund"), Baillie Gifford Worldwide Sustainable Emerging Markets Bond Fund (the "Sustainable Emerging Markets Bond Fund"), Baillie Gifford Worldwide US Equity Alpha Fund (the "US Equity Alpha Fund") and Baillie Gifford Worldwide US Equity Growth Fund (the "US Equity Growth Fund"), two of which are unfunded; Baillie Gifford Worldwide Emerging Markets ex China Equities Fund (the "Emerging Markets ex China Equities Fund") and Baillie Gifford Worldwide Global Developed Equities Fund (the "Global Developed Equities Fund") and four of which are terminated; Baillie Gifford Worldwide Diversified Return Euro Fund (the "Diversified Return Euro Fund"), Baillie Gifford Worldwide European Growth Fund (the "European Growth Fund"), Baillie Gifford Worldwide Systematic Long Term Growth Fund (the "Systematic Long Term Growth Fund") and Baillie Gifford Worldwide UK Equity Alpha Fund (the "UK Equity Alpha Fund"). At the start of the reporting year, the Company also had three other Funds: Baillie Gifford Worldwide US Concentrated Growth Fund, Baillie Gifford Worldwide Diversified Return Australian Dollar Fund and Baillie Gifford Worldwide Diversified Return Canadian Dollar Fund. On the application of the Company, which was made before the start of the year, the regulatory approval of each of these Funds was withdrawn by the Central Bank during the reporting year.

a) Basis of Preparation of Financial Statements

The financial statements for the year ended 30 September 2023 have been prepared in accordance with accounting standards generally accepted in Ireland, including FRS 102 "The Financial Reporting Standard applicable in the United Kingdom and Republic of Ireland" ("FRS 102"), Irish statute comprising the Companies Act 2014, as amended, the UCITS Regulations, as amended and the Central Bank (Supervision and Enforcement) Act 2013 (Section 48(1)) (Undertakings for Collective Investment in Transferable Securities) Regulations 2019 (the "CBI UCITS Regulations"). Accounting standards generally accepted in Ireland in preparing financial statements giving a true and fair view are those published by the Institute of Chartered Accountants in Ireland and issued by the Financial Reporting Council ("FRC").

The financial statements have been prepared under the historical cost convention, as modified by the revaluation of financial assets and financial liabilities (including derivative financial instruments) at fair value through profit or loss.

The financial statements have been prepared on a going concern basis which assumes that the Company will be in operational existence for the foreseeable future. The Diversified Return Euro Fund was liquidated on 15 March 2023, European Growth Fund was liquidated on 12 July 2023, Systematic Long Term Growth Fund was liquidated on 16 May 2023 and UK Equity Alpha Fund was liquidated on 25 November 2022 and are no longer considered a going concern. The European High Yield Bond Fund, the Global Strategic Bond Fund and the Sustainable Emerging Markets Bond Fund will be liquidated after year end and are also no longer considered a going concern.

The format and certain wording of the financial statements have been adapted from those contained in the Companies Act 2014, as amended and FRS 102 so that, in the opinion of the Directors, they more appropriately reflect the Company's business as an investment fund.

The Company meets the criteria to avail of the exemption available to certain investment funds under FRS 102 not to prepare a statement of cash flow.

b) Financial Assets and Liabilities at Fair Value through Profit or Loss

The Net Asset Values of the Funds are calculated by the administrator each dealing day at the valuation point which is 10.00 a.m. Irish time. For the financial reporting purposes, the Net Asset Values have been stated to close of business. Dealing takes place on each business day unless otherwise determined by the Directors.

The fair value of underlying funds is based on the unaudited Net Asset Value per share advised by the administrator of the underlying funds at the close of business on the dealing day.

In accordance with the prospectus, listed investments are stated at the latest mid-market price at the valuation point, or if unavailable, the probable realisation value on the principal exchange or market for such investments on the valuation day for the purpose of calculating the Net Asset Value for subscriptions and redemptions and for various fee calculations.

Fair value measurement and recognition

On initial application of FRS 102, in accounting for its financial instruments at fair value through profit or loss a reporting entity is required to apply either:

- The full provisions of section 11 "Basis Financial Instruments" and section 12 "Other Financial Instruments" of FRS 102; or
- The recognition and measurement provisions of IAS 39 Financial Instruments: Recognition and Measurement and only the disclosure requirements of Sections 11 and 12 of FRS 102; or
- The recognition and measurement provisions of IFRS 9 Financial Instruments and/or IAS 39 (as amended following the publication of IFRS 9) and only the disclosure requirements of Sections 11 and 12 of FRS 102.

The Company has chosen to implement the recognition and measurement provisions of IAS 39 and only disclosure requirements of Sections 11 and 12 of FRS 102.

1. Statement of Accounting Policies (continued)

b) Financial Assets and Liabilities at Fair Value through Profit or Loss (continued)

Fair value measurement and recognition (continued)

In accordance with FRS 102 and for reporting purposes, the Company has classified all its investments as financial assets designated at fair value through profit or loss. Investments are initially recognised at the fair value of the consideration given, with transaction costs for such investments being recognised directly in the Statement of Comprehensive Income. Investments are subsequently remeasured at fair value at the period end as described below.

Listed Securities

Securities listed on a recognised stock exchange or traded on any other organised market are valued at the latest mid-market price on the relevant market at the valuation point on the relevant dealing day.

Unlisted Securities

The fair value of any instrument that is not listed or dealt with on a market shall be the probable realisation value of the investment estimated with care and in good faith by the Directors in consultation with Baillie Gifford Overseas Limited (the "Investment Manager") or by a competent person, firm or corporation appointed for such purpose by Brown Brothers Harriman Trustee Services (Ireland) Limited (the "Depositary").

Recognition and Derecognition

The Company recognises financial assets and financial liabilities when all significant rights and access to the benefits from the assets and the exposure to the risks inherent in those benefits are transferred to the Company.

Investment transactions are accounted for on a trade date plus one business day basis. For financial reporting purposes, investment transactions are accounted for on a trade date basis.

The Company derecognises financial assets and financial liabilities when all such benefits and risks are transferred from the Company.

Realised and Unrealised Gains and Losses on Investments

Realised gains and losses on disposal of investments are calculated using the First In First Out ("FIFO") method and are recognised in the Statement of Comprehensive Income. Realised and unrealised gains and losses on investments arising during the year are dealt with in the Statement of Comprehensive Income.

Subsequent Measurement

Subsequent to initial recognition, all financial assets and financial liabilities at fair value through profit or loss are measured at fair value. Gains and losses arising from changes in the fair value of the "Financial Assets or Financial Liabilities at Fair Value through Profit or Loss" category are presented in the Statement of Comprehensive Income within "Net Gain/(Loss) on Financial Assets/Liabilities at Fair Value through Profit or Loss".

Offsetting

Financial assets and liabilities are offset and the net amount reported in the Statement of Financial Position where there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or revalue the assets and settle the liability simultaneously.

c) Cash

Cash is valued at its fair value, together with interest accrued, where applicable, to the valuation point on the relevant dealing day.

d) Forward Foreign Currency Contracts

Each Fund may invest in currency forwards in line with its investment objective and policy. All forward foreign currency contracts are fair valued using forward exchange rates prevailing at the relevant valuation date for the remaining period to maturity and any resulting unrealised gains are recorded as assets and unrealised losses as liabilities in the Statement of Financial Position. Realised gains and losses are recorded in the Statement of Comprehensive Income at the time the forward foreign exchange currency contracts settle. In relation to class specific forward foreign currency contracts the realised and unrealised gains and losses and transaction costs are allocated solely to those Share Classes.

e) Futures Contracts

Upon entering into a futures contract, a Fund is required to deposit with its futures broker, an amount of cash in accordance with the initial margin requirements of the broker or exchange. Futures contracts are valued using quoted daily settlement prices established by the exchange on which they trade. The Fund and the broker agree to exchange an amount of cash equal to the daily fluctuations in the value of the futures contract ("variation margin"). For open futures, changes in the value of the contract as unrealised gains or losses by "marking-to-market" the value of the contract at the balance sheet date. When the contract is closed, the difference between the proceeds (or cost) of the closing transactions and the original transaction is recorded as a realised gain or loss in the Statement of Comprehensive Income.

f) Swaps

Swap agreements are privately negotiated agreements between a Fund and a counterparty to exchange or swap investment cash flows, assets, foreign currencies or market-linked returns at specified future intervals. In connection with these agreements, securities or cash may be identified as collateral in accordance with the terms of the respective swap agreements to provide assets of value and recourse in the event of default or bankruptcy/insolvency.

Centrally cleared swaps are valued at the price determined by the relevant exchange or clearinghouse. In the event that market quotations are not readily available or deemed unreliable, certain swap agreements may be valued, pursuant to guidelines established by the Investment Manager, with reference to other securities or indices. In the event that market quotes are not readily available, and the swap cannot be valued pursuant to one of the valuation methods, the value of the swap will be determined in good faith by the Investment Manager.

1. Statement of Accounting Policies (continued)

g) Swaps (continued)

Currency Swaps

Currency swaps involve the exchange of the two parties' respective commitments to pay or receive fluctuations with respect to a notional amount of two different currencies.

Interest and Inflation Rate Swaps

A Fund may enter into interest and inflation rate swap contracts which are arrangements between two parties to exchange cash flows based on a notional principal amount, to manage a Fund's exposure to interest and inflation rates. Interest and inflation rate swap contracts are marked-to-market daily based in some cases on quotations from counterparties and in other cases from pricing services and the change in value, if any, is recorded as an unrealised gain or loss. Payments made or received are recorded as part of realised gains and losses.

h) Foreign Exchange Translation

Functional and Presentation Currency

Items included in the Company's financial statements are measured using the currency of the primary economic environment in which it operates (the 'functional currency'). The functional currency of UK Equity Alpha Fund is Great British Pound ('GBP'), the functional currency of Asia ex Japan Fund, China Fund, Discovery Fund, Diversified Return US Dollar Fund, Emerging Markets All Cap Fund, Emerging Markets Leading Companies Fund, Global Income Growth Fund, Global Stewardship Fund, Global Strategic Bond Fund, Health Innovation Fund, Islamic Global Equities Fund, Long Term Global Growth Fund, Positive Change Fund, Responsible Global Equity Income Fund, Sustainable Emerging Markets Bond Fund, Systematic Long Term Growth Fund, US Equity Alpha Fund and US Equity Growth Fund is US dollar ('USD'), the functional currency of Diversified Return Euro Fund, European Growth Fund, European High Yield Bond Fund, Global Alpha Choice Fund, Global Alpha Fund and Pan-European Fund is Euro ('EUR'), the functional currency of Diversified Return Yen Fund and Japanese Fund is Japanese yen ('JPY') and the functional currency of China A Shares Growth Fund is Chinese Yuan Renminbi ('CNH').

Transactions and Balances

Assets and liabilities denominated in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the balance sheet date. Transactions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions. Gains and losses on foreign exchange transactions are recognised in the Statement of Comprehensive Income in determining the results for the year. Proceeds from subscriptions and amounts paid for redemptions in currencies other than the functional currency are translated into the functional currency at the exchange rates ruling at the dates of the transactions.

h) Expenses

All expenses are recognised in the Statement of Comprehensive Income on an accrual basis, with the exception of transaction costs which are expensed when incurred.

i) Income Recognition

Interest income is recognised in the Statement of Comprehensive Income using the effective interest method. Dividend income is recognised in the Statement of Comprehensive Income on the dates upon which the relevant security is listed as "ex-dividend", to the extent that the information thereon is reasonably available to each Fund. Dividend and interest income are shown gross of any non-recoverable withholding taxes which are disclosed separately in the Statement of Comprehensive Income and net of any tax credits.

Dividend income on the Islamic Global Equities Fund is purified on a quarterly basis and any purified income will be paid to charity on an annual basis. Details of the purification along with the Fund's accounts are audited by the Sharia Supervisory Board.

j) Redeemable Participating Shares

Redeemable Participating Shares provide the Shareholders with the right to redeem their Shares for cash equal to their proportionate share of the Net Asset Value of the relevant Fund and accordingly are classified as liabilities. The liability to Shareholders is presented in the Statement of Financial Position as "Net Assets Attributable to Holders of Redeemable Participating Shares (for Shareholder dealing purposes)" and is based on the residual assets of the Fund after deducting all other liabilities. The Company may, at the discretion of the Directors, apply a dilution adjustment where there are net redemptions in order to cover the cost of dealing (as described below).

k) Dilution Adjustment

In calculating the Net Asset Value per Share, the Company may, at its discretion, on any dealing day when there are net subscriptions or net redemptions adjust the Net Asset Value per Share by applying a dilution adjustment to cover actual dealing costs and to preserve the value of the underlying assets of the relevant Fund. The purpose of the dilution adjustment is to protect existing Shareholders from bearing the costs of subscriptions, redemptions or conversions and it is not operated with the intention of deriving a profit for the Company, the Investment Manager or any other party.

l) Equalisation

The Company may operate grouping for equalisation. Where this is the case, each Class of Shares will operate its own equalisation account. Shares purchased during the current accounting period will contain in their purchase price an amount called equalisation which represents a proportion of the net income of the relevant Fund that has accrued up to the date of purchase. The amount of equalisation will be averaged across all the Shareholders of Shares purchased during the current accounting period and refunded to them as part of their first distribution and will be treated as a return of capital for tax purposes. Being capital it is not liable to income tax but must be deducted from the cost of the Shares for capital gains tax purposes. There was no equalisation during the year ended 30 September 2023 (30 September 2022: Nil).

1. Statement of Accounting Policies (continued)

m) Collateral and Broker Margin Accounts

Cash collateral which is pledged to the broker and/or counterparty is recorded as an asset to the Fund and included under "Receivable from Broker Margin Accounts" on the Statement of Financial Position and is valued at its fair value.

Cash received as collateral is recorded as an asset on the Statement of Financial Position under "Receivable from Broker Margin Accounts" and is valued at its fair value and is disclosed in Note 8. Cash collateral held is unrestricted and held in a segregated account in the relevant Fund's name. A related liability to repay the collateral is recorded as a liability on the Statement of Financial Position under "Cash Collateral Payable", and is also valued at its fair value and disclosed in Note 9.

Securities collateral which is pledged to the broker and/or counterparty is recorded as an asset to the Fund and included under "Financial Assets at Fair Value through Profit or Loss Pledged as Collateral", and is also valued at its fair value and disclosed in Note 9.

Variation margin payable on futures is recorded as a liability to the Fund and included under "Payable on Broker Margin Accounts" on the Statement of Financial Position.

All types of collateral are treated in line with the reporting requirements of FRS 102.

n) Distribution Policy

The distributions on the distributing Shares are recognised in the Statement of Comprehensive Income as finance costs when they are appropriately authorised and no longer at the discretion of the Company.

o) Transaction Costs

Transaction costs are the costs incurred in the acquisition, issue or disposal of financial assets and liabilities. Transaction costs include fees and commissions paid to agents, advisers, brokers and dealers, levies by regulatory agencies and securities exchanges, and transfer taxes and duties. Transaction costs do not include debt premiums or discounts, financing costs or internal administrative or holding costs. Transaction costs are recognised on the Statement of Comprehensive Income as "Transaction Fees" under "Expenses".

p) Transfers between levels of the fair value hierarchy

Transfers between levels of the fair value hierarchy are deemed to have occurred at the end of the reporting period.

q) Exchange-Traded Notes

Certain funds may invest in exchange-traded notes ("ETNs"), which are senior, unsecured, unsubordinated debt securities whose returns are linked to the performance of a particular market benchmark or strategy minus applicable fees. ETNs are traded on an exchange during normal trading hours. However, investors may also hold the ETN until maturity, for which the issuer pays the investor a cash amount equal to the principal amount, subject to the day's market benchmark or strategy factor.

ETNs do not make periodic coupon payments or provide principal protection. ETNs are subject to credit risk and the value of the ETN may drop due to a downgrade in the issuer's credit rating, despite the underlying market benchmark or strategy remaining unchanged. When a Fund invests in ETNs, it will bear its proportionate share of any fees and expenses borne by the ETN. A Fund's decision to sell its ETN holdings may be limited by the availability of a secondary market. There may be times when an ETN share trades at a premium or discount to its market benchmark or strategy.

2. Cash

All cash at bank balances at the year end were held with Brown Brothers Harriman & Co. ('BBH').

The short-term credit rating for BBH for the year ended 30 September 2023 is F1+ (30 September 2022: F1+) which is the highest short-term credit rating, as rated by Fitch. This indicates the strongest intrinsic capacity for timely payment of financial commitments.

3. Share Capital

The share capital of the Company shall at all times equal the Net Asset Value of the Company. The Directors are empowered to issue up to 500 billion Shares of no par value in the Company at the Net Asset Value per Share on such terms as they may think fit. There are no rights of preemption upon the issue of shares in the Company. The Company had issued Subscriber Shares to the value of EUR300,000 and has redeemed all but two of these Shares. The Subscriber Shares do not participate in the assets of any Fund. The Company at all times has a minimum issued share capital to the value of EUR300,000.

Each of the Shares entitles the Shareholder to participate equally on a pro rata basis in the dividends and net assets of a Fund attributable to the relevant class in respect of which they are issued, save in the case of dividends declared prior to becoming a Shareholder. The Subscriber Shares' entitlement is limited to the amount subscribed and accrued interest thereon.

The management fee is calculated and accrued daily and paid quarterly in arrears. In addition, the Investment Manager is entitled to be reimbursed its reasonable disbursements and out-of-pocket expenses incurred for the benefit of the Company.

The Investment Manager earned a fee of USD40,658,426 for the year ended 30 September 2023 (30 September 2022: USD46,255,137), of which USD10,761,913 was outstanding at 30 September 2023 (30 September 2022: USD8,743,065).

The Investment Manager has agreed to reimburse the Company for certain other expenses incurred. During the year ended 30 September 2023, the Investment Manager charged fees amounting to USD40,658,426 (30 September 2022: USD46,255,137) of which USD1,881,900 (30 September 2022: USD1,843,777) was reimbursed to the Company from the management fee.

^{*}Class B Shares are offered at the discretion of the Investment Manager at a reduced rate for a period of 36 months. The investment management fee payable by the Company to the Investment Manager in respect of the relevant Class B Shares shall be charged at a reduced annual rate, up until the Class B Shares reduced fee expiry date.

^{**}Class C Shares are only available to persons to whom the Investment Manager, associates of the Investment Manager or persons to whom the Investment Manager, or one of its associates, provides services under an investment management agreement or other agreement.

^{***}Class D, E and L Shares are only available to certain persons at the discretion of the Company, the Investment Manager or one of its affiliates.

4. Fees and expenses (continued)

Depositary Fees

The Depositary receives, out of the assets of each Fund, a trustee fee accrued daily and payable monthly in arrears of 0.015% per annum of the Net Asset Value of each Fund.

The Depositary also receives from each Fund a custodial fee of up to 0.50% of the value of the assets held, depending on the market in question and subject to the overall custodial fee not exceeding 0.50% of the Net Asset Value of each Fund. Such fees accrue daily and are paid monthly in arrears. The Depositary is also entitled to be reimbursed for transaction charges and all sub-custodian charges out of the relevant Fund's assets as they are incurred by the relevant sub-custodians. All such charges are at normal commercial rates. The Depositary is also entitled to reimbursement of all reasonable and properly incurred out-of-pocket expenses incurred for the benefit of the Company.

The Depositary earned a fee of USD2,785,604 for the year ended 30 September 2023 (30 September 2022: USD3,292,363), of which USD232,883 was outstanding at 30 September 2023 (30 September 2022: USD464,870).

Administrator's Fees

The Administrator shall receive, out of the assets of each Fund, an administration fee accrued daily and payable monthly in arrears of up to 0.04% per annum of the Net Asset Value of each Fund.

The Administrator is also entitled to reimbursement of all reasonable and properly incurred out-of-pocket expenses incurred for the benefit of the Company.

The Administrator earned a fee of USD4,273,932 for the year ended 30 September 2023 (30 September 2022: USD4,757,154) of which USD375,161 was outstanding at 30 September 2023 (30 September 2022: USD744,924).

Directors' Fees

The Directors shall be entitled to such remuneration in relation to the performance of their duties as the Directors may from time to time determine. The Company's remuneration policy applies to certain identified staff whose professional activities have a material impact on the risk profile of the Company. As at the year end, the Company did not have any employees and the Company's remuneration policy applies only to members of the Company's management body (i.e. the Board of Directors). The two Directors not affiliated with the Investment Manager receive a fixed annual fee of EUR45,000 which compensates these Directors for their tasks, expertise and responsibilities. The Investment Manager (or an affiliate) provides individuals to act as Directors of the Company. These individuals are not remunerated by the Company for their role as directors and are not paid any fees for their services as Directors. In addition, they are not paid by the Investment Manager (or affiliate) for the performance of this role. Should any of these individuals leave the Investment Manager (or affiliate), they may be replaced by another employee of the Investment Manager (or affiliate) in accordance with the requirements of the Central Bank of Ireland.

The Directors are also entitled to reimbursement of all reasonable and properly incurred out-of-pocket expenses incurred for the benefit of the Company. Directors' fees, reimbursements and insurance for the year ended 30 September 2023 were USD156,820 (30 September 2022: USD217,580) of which USD10,376 was outstanding at 30 September 2023 (30 September 2022: USD20,345).

Auditors' Remuneration

Remuneration (excluding VAT) for work carried out for the Company by its statutory audit firm, PricewaterhouseCoopers, for the years ended 30 September 2023 and 30 September 2022 is as follows:

	Total	Total
	Year Ended	Year Ended
	30 September 2023	30 September 2022
	EUR	EUR
Audit of financial statements	283,870	272,085
Tax advisory services*	0	81,394
	283,870	353,479

^{*}Tax advisory fees for the Company are included in Legal and Professional Fees on the Statement of Comprehensive Income.

5. Other Fees

The Company also pays out of the assets of the Funds, fees in respect of the publication and circulation of details of the Net Asset Value per Share, stamp duties, taxes, brokerage, the fees and expenses of tax, legal and other professional advisers and registration fees.

6. Dividends

It is the present intention that the Company will declare dividends annually in respect of distributing Classes of Shares of each Fund (other than European High Yield Bond Fund, Global Income Growth Fund, Global Strategic Bond Fund, Responsible Global Equity Income Fund, Sustainable Emerging Markets Bond Fund and UK Equity Alpha Fund) on 1 October in each year (or in the event that 1 October in any year does not fall on a Business Day, the Business Day following that date) and will pay dividends on or around 30 November in each year from net income (i.e. income less expenses). Payment will be made to all Shareholders who held Shares at the record date of 30 September in the relevant year (or in the event that 30 September in any year does not fall on a Business Day, the Business Day preceding that date).

6. Dividends (continued)

In relation to European High Yield Bond Fund, Global Income Growth Fund, Global Strategic Bond Fund, Responsible Global Equity Income Fund and Sustainable Emerging Markets Bond Fund, it is proposed that the Company will declare dividends quarterly, in respect of distributing Classes of Shares of the Funds, on 1 January, 1 April, 1 July and 1 October in each year (or in the event that any of these dates in any year does not fall on a Business Day, the Business Day following that date) and will pay dividends on or around 28 February, 31 May, 31 August and 30 November in each year. In relation to the Global Strategic Bond Fund, dividends will be paid from net income (i.e. income less expenses). In relation to the European High Yield Bond Fund, the Global Income Growth Fund and the Responsible Global Equity Income Fund dividends may be paid from income and/or capital. Shareholders should be aware that paying dividends from capital may lower the capital value of their investment. Payment will be made to all Shareholders who held Shares at the relevant record date of 31 December, 31 March, 30 June and 30 September in the relevant year (or in the event that any of these dates in any year does not fall on a Business Day, the Business Day preceding that date).

In relation to the UK Equity Alpha Fund¹, it is proposed that the Company will declare dividends semi-annually, in respect of income bearing Classes of Shares of the Fund, on 31 May and 30 November in each year (or in the event that any of these dates in any year does not fall on a Business Day, the Business Day following that date) and will pay dividends on or around 31 July and 30 September in each year. Payment will be made to all shareholders who held shares at the relevant record date of 31 March and 30 September in the relevant year (or in the event that either of these dates in any year does not fall on a business day, the business day preceding that date).

The following dividends were declared for the years ended 30 September 2023 and 30 September 2022:

¹ Fund commenced operations on 31 March 2022	•	

10. Risk Disclosures

General Risk Management Process

The management of financial instruments and associated risks is fundamental to the management of the Company's business. The Company's risk management process ("RMP") is managed by Baillie Gifford Investment Management (Europe) Limited (the "Manager") who is responsible for adhering to the provisions set out in the RMP. This is organised by the Manager by ensuring distinct separation of responsibility between portfolio managers, dealers and investment administration personnel. The Manager has delegated the discretionary investment management function in respect of the Funds to the Investment Manager. In addition, the directors of the Manager have appointed a Designated Person to accept responsibility for the day-to-day monitoring and control of the risk management in respect of the Company. Through the delegation arrangements in place, the board of directors of the Manager has sub-delegated risk management for trading, global distribution out with Europe, and other investment operation activities to the Investment Manager and a number of specified committees to ensure that reasonable care is taken to organise and support the affairs of the Manager. The Depositary independently reviews the Company's controls and procedures on a periodic basis as part of its oversight role when enquiring into the conduct of the Company.

The board of directors of the Manager receive regular reporting to ensure effective risk management of the Funds, and the reporting of information back to the Company's board of directors to enable them to fulfil their responsibilities as directors. This covers all control assessments, emerging risks, incidents, Investment Risk trends and insights as well as regulatory developments and monitoring outcomes. There is an ongoing exchange of risk related information across the Manager's and Group (Risk and Compliance) functions and full access to relevant Committee papers and/or meeting minutes to supplement oversight responsibilities.

Risks specific to each Fund are managed by the relevant fund manager. In addition, these teams are supported by a series of committees which are responsible for oversight and monitoring of the RMP. These committees within the wider BG Group, are discussed below.

Group Risk Committee ('GRC')

As a sub-committee of the Management Committee, the GRC is comprised of four members of the Management Committee, and Partners and Heads of Departments from appropriate areas and is responsible for all aspects of risk policy and control. The committee's responsibility and authority covers the entire Baillie Gifford Group of companies and joint ventures. The GRC meets quarterly to monitor and control the risk profile of the firm and key business risks. The committee considers reports from other committees that assess the nature and extent of risks within the firm.

10. Risk Disclosures (continued)

General Risk Management Process (continued)

Operational Risk Committee ('ORC')

The ORC is responsible for ensuring that operational risks are identified and managed in accordance with risk appetite and limits approved by the Management Committee and policies, procedures and practices defined in the Operational Risk Framework. The Committee meets quarterly to perform its risk oversight role.

Equity Investment Risk Committee and Multi Asset & Fixed Income Investment Risk Committee

The Investment Risk Committees are responsible for providing oversight of Baillie Gifford's investment risk framework across their relevant strategies. This is achieved through ensuring that the investment risk and liquidity frameworks for each strategy are regularly reviewed and remain appropriate, and by monitoring breaches of the guidelines. The committee meets quarterly and on an ad hoc basis at the discretion of the Chair.

Counterparty Committee ('CC')

The CC meets quarterly and is responsible for the appointment, removal and ongoing monitoring of counterparty relationships including deposit takers, custodian banks, brokers, clearing brokers, FX providers and derivative counterparties. The committee's responsibility also includes review and approval of relevant policies and counterparty limits.

Compliance Committee ('ComC')

The ComC meets quarterly and is responsible for all aspects of regulatory risk policy and control for the Baillie Gifford Group. The Committee reviews the global activities of the Compliance function within the Group, and the adequacy of the Group's policies and procedures, to ensure compliance with the Group's relevant regulatory obligations in each jurisdiction where it conduct business. This includes responsibility for oversight of the firm's conflicts management framework. The ComC has also established an Anti-Financial Crime Group and has delegated responsibility for the oversight of financial crime (excluding market conduct and market abuse) to this Group.

Management Committee

The Management Committee comprises the Joint Managing Partner and a number of other partners, and is chaired by another senior partner. The committee meets twice per quarter and is responsible for the operational management of the firm including strategy, business planning, governance, apportionment of responsibilities, financial reporting, capital and remuneration. The Management Committee also considers reports from other committees, including the Audit Committee, the Remuneration Committee, the Group Risk Committee, and functions including Business Risk, Compliance and Internal Audit.

Information Security Oversight Group ('ISOG')

The ISOG is responsible for ensuring that the Firm has an effective information security strategy and that systems and controls are robust and proportionate. The ISOG meets quarterly.

Funds Risks

Asset allocation is determined by the Manager who ensures that the distribution of each Fund's assets is appropriate in terms of the investment objective and policy. Divergence from the target asset allocation is strictly controlled and the portfolio is closely monitored in terms of risk.

Derivatives are used in keeping with the investment objective and policy of each Fund, with the intention of protecting or enhancing the return on each Fund. The strategies used include active currency management, bond curve strategies, interest rate strategies, asset allocation and market spread strategies; in addition, derivatives are used for the purposes of efficient portfolio management. The Manager makes use of these strategies as and when it considers it appropriate to do so. Derivative investments (which may be exchange-traded and/or over the counter) are undertaken on a covered basis and the types of asset which underlie the derivative contract are appropriate for the context of the Fund investing primarily in market traded securities. The Investment Manager's use of derivatives is constrained to a level that the risk and exposure, as measured by the Fund's tracking error and Value at Risk, is within prescribed limits.

Managing Risks

In pursuing their investment objectives, the Funds hold significant numbers of financial instruments. The main risks arising from the Funds' financial instruments are market price, foreign currency, interest rate, credit and liquidity risks. The approach to these is set out below.

Market Price Risk

Market price risk arises mainly from uncertainty about future prices of the financial instruments held. It represents the potential loss a Fund might suffer through holding market positions in the face of price movements.

The Company attempts to manage market price risk through its investment policies as specified in the Company's prospectus and by evaluating the Investment Manager's risk management capabilities as a criterion for appointment. The Investment Manager has its own methodology for monitoring and managing market risk with respect to the assets managed by it, which is tailored to the Investment Manager's own specific investment style and approach to risk management. The Company monitors the Investment Manager's adherence to the applicable investment policies through various reports, telephone conference calls and face-to-face meetings.

The following sensitivity analysis assumes a change in the market price of investments, while holding all other variables constant and in practice this is unlikely to occur and changes in some of the variables may be correlated. The Investment Manager deems the percentage used appropriate for the Company's analysis.

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Asia ex Japan Fund by approximately 10% or USD5,268,228 (30 September 2022: USD4,496,973).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of China A Shares Growth Fund by approximately 10% or CNH31,165,955 (30 September 2022: CNH1,072,567).

10. Risk Disclosures (continued)

Managing Risks (continued)

Market Price Risk (continued)

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of China Fund by approximately 10% or USD419,002 (30 September 2022; USD60,250).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Discovery Fund by approximately 10% or USD24,523,521 (30 September 2022: USD26,288,250).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Emerging Markets All Cap Fund by approximately 10% or USD2,258,125 (30 September 2022; USD6,520,006).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Emerging Markets Leading Companies Fund by approximately 10% or USD30,630,443 (30 September 2022: USD30,305,263).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of European Growth Fund by approximately 10% or EUR0 (30 September 2022: EUR122,256).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Global Alpha Choice Fund by approximately 10% or EUR38,621,570 (30 September 2022: EUR41,390,081).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Global Alpha Fund by approximately 10% or EUR104,813,766 (30 September 2022: EUR115,199,264).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Global Income Growth Fund by approximately 10% or USD5,237,021 (30 September 2022: USD3,932,121).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Global Stewardship Fund by approximately 10% or USD7,076,187 (30 September 2022: USD14,189,164).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Health Innovation Fund by approximately 10% or USD18,863,777 (30 September 2022: USD24,124,984).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Islamic Global Equities Fund by approximately 10% or USD102,231 (30 September 2022: USD91,941).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Japanese Fund by approximately 10% or JPY3,345,996,599 (30 September 2022: JPY5,947,844,079).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Long Term Global Growth Fund by approximately 10% or USD319,785,386 (30 September 2022: USD183,140,537).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Pan-European Fund by approximately 10% or EUR10,339,043 (30 September 2022: EUR10,015,753).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Positive Change Fund by approximately 10% or USD192,536,321 (30 September 2022: USD188,707,242).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Responsible Global Equity Income Fund by approximately 10% or USD43,849,683 (30 September 2022: USD24,604,339).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of Systematic Long Term Growth Fund by approximately 10% or USD0 (30 September 2022: USD473,736).

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of UK Equity Alpha Fund by approximately 10% or GBP0 (30 September 2022; GBP123,792).

Managing Risks (continued)

Market Price Risk (continued)

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of US Alpha Growth Fund by approximately 10% or USD147,422.

A 10% increase or decrease in the market price of Net Financial Assets at 30 September 2023, with all other variables held constant, would have increased or decreased the Net Assets Attributable to Holders of Redeemable Participating Shares of US Equity Growth Fund by approximately 10% or USD29,356,997 (30 September 2022: USD23,931,054).

Value at Risk ("VaR")

The Asia ex Japan Fund, China A Shares Growth Fund, China Fund, Discovery Fund, Emerging Markets All Cap Fund, Emerging Markets Leading Companies Fund, European Growth Fund, Global Alpha Choice Fund, Global Alpha Fund, Global Income Growth Fund, Global Stewardship Fund, Health Innovation Fund, Islamic Global Equities Fund, Japanese Fund, Long Term Global Growth Fund, Pan-European Fund, Positive Change Fund, Responsible Global Equity Income Fund, Systematic Long Term Growth Fund, UK Equity Alpha Fund, US Equity Alpha Fund and US Equity Growth Fund use the commitment approach. The standard commitment approach means that the Fund converts each financial derivative instrument, if any, into the market value of an equivalent position in the underlying asset of that derivative taking into account the current value of the underlying assets, the counterparty risks, future market movements and the time available to liquidate the positions.

The market risk of the Diversified Return US Dollar Fund, Diversified Return Yen Fund, European High Yield Bond Fun, Global Strategic Bond Fund and Sustainable Emerging Markets Bond Fund's financial asset and liability positions is monitored by the Investment Manager using VaR analysis. VaR analysis attempts to reflect the interdependencies between risk variables, unlike a traditional sensitivity analysis. VaR represents the potential losses from adverse changes in market factors for a specified time period and confidence level.

Model assumptions:

¹Fund ceased operations on 15 March 2023

The VaR noted above indicates the VaR of the financial instruments, measured as the potential 1-month loss in value from adverse changes in equity prices, interest rates, inflation and foreign currency exchange rates, with a 99% confidence level.

In combination with a snapshot of the portfolio and benchmark constituents at a given point in time, the risk model uses 180 weeks of historic data to formulate a prediction of risk over a desired time period. In the case of VaR numbers, the risk model produces a 1-month prediction of 99% VaR. The decay factor for exponential smoothing of the historic market data refers to how the risk model uses more recent data in its historic data window compared to older data. Using a positive decay factor would mean that the risk model is placing more importance on more recent data than on older data in formulating its prediction of risk – this would result in the risk model being more short-term in nature, and increasingly geared to short term recent events. The decay factor used in the risk model for calculating VaR numbers is nil. This means that each of the 180 weeks of historic data used by the risk model are treated with equal importance in the model's calculation of predicted risk. This means that the risk model's prediction of risk will be influenced by the average variances and covariances of portfolio and benchmark constituents over the past 3 ½ years.

The objectives and limitations of the VaR methodology are as follows; the risk model uses statistical factor techniques to measure the effects of these risk variables on the value of the Fund. The VaR model is designed to measure market risk in a normal market environment. The use of VaR has limitations because it is based on historical correlations and volatilities in market prices and assumes that future price movements will follow a statistical distribution. Due to the fact that VaR relies significantly on historical data to provide information and may not clearly predict the future changes and modifications of the risk factors, the probability of large market moves may be underestimated if changes in risk factors fail to align with the given distribution assumption.

VaR may also be under or over-estimated due to the assumption placed on risk factors and the relationship between such factors for specific instruments.

Even though positions may change throughout the day, the VaR only represents the risk of the portfolios at the close of each business day, and it does not account for any losses that may occur beyond the 99% confidence level. In practice, the actual trading results will differ from the VaR calculation and, in particular, the calculation does not provide a meaningful indication of profits and losses in stressed market conditions. To determine the reliability of the VaR models, actual outcomes are monitored regularly to test the validity of the assumptions and the parameters used in the VaR calculation. Market risk positions are also subject to regular stress tests to ensure that the Fund would withstand an extreme market event.

The average level of leverage, calculated as the sum of the notionals of the derivatives use, employed for the funds during the years ended 30 September 2023 and 30 September 2022, is represented in the table below.

	Leverage			
Fund Name	30 September 2023	30 September 2022		
Diversified Return Euro Fund ¹	-	239%		
Diversified Return US Dollar Fund	204%	210%		
Diversified Return Yen Fund	285%	267%		
European High Yield Bond Fund	136%	132%		
Global Strategic Bond Fund	172%	162%		
Sustainable Emerging Markets Bond Fund ²	219%	212%		

¹Fund ceased operations on 15 March 2023.

²Fund commenced operations on 31 March 2022

Foreign Currency Risk

The Investment Manager has identified three principal areas where foreign currency risk could impact the Funds which are movements in exchange rates affecting the value of investments, short term timing differences and income received.

With the exception of European High Yield Bond Fund, Global Strategic Bond Fund, UK Equity Alpha Fund and US Equity Growth Fund, a substantial proportion of the net assets of each Fund are denominated in currencies other than the base currency of the Fund, with the effect that the Statement of Financial Position and the Statement of Comprehensive Income can be significantly affected by currency movements.

The Funds may be subject to short term exposure to exchange rate movements, for instance where the date of an investment purchase and the date when the settlement occurs are different. To reduce this risk the Investment Manager will normally execute a foreign currency contract on the transaction date wherever practicable.

²Fund commenced operations on 31 March 2022

10. Risk Disclosures (continued)

Managing Risks (continued)

Foreign Currency Risk (continued)

The Funds receive income in currencies other than their base currency and hence movements in exchange rates can affect the value of this income. To minimise this risk, arrangements are in place to convert all income receipts to the base currencies on, or shortly after, the date of receipt. The tables below sets out each Fund total exposure to foreign currency risk at 30 September 2023 and 30 September 2022.

10. Risk Disclosures (continued)

Managing Risks (continued)

Foreign Currency Risk (continued)

The sensitivity analysis in the above tables assumes a change in the foreign exchange rate while holding all other variables constant. In practice this is unlikely to occur, and changes in some of the variables may be correlated. The Investment Manager deems the percentage used appropriate for the Company's analysis.

Interest Rate Risk

The Company attempts to manage interest rate risk through its investment policies and investment restrictions as specified in the Company's prospectus.

The majority of the financial assets held by the Asia ex Japan Fund, China A Shares Growth Fund, China Fund, Discovery Fund, Emerging Markets All Cap Fund, Emerging Markets Leading Companies Fund, European Growth Fund, Global Alpha Choice Fund, Global Alpha Fund, Global Income Growth Fund, Global Stewardship Fund, Health Innovation Fund, Islamic Global Equities Fund, Japanese Fund, Long Term Global Growth Fund, Pan-European Fund, Positive Change Fund, Responsible Global Equity Income Fund, Systematic Long Term Growth Fund, UK Equity Alpha Fund, US Equity Alpha Fund and US Equity Growth Fund are equities and other investments which neither pay interest nor have a maturity date. Therefore, these Funds' direct exposure to interest rate risk is not considered to be significant.

The European High Yield Bond Fund, Global Strategic Bond Fund and Sustainable Emerging Markets Bond Fund invest primarily in fixed income instruments. A substantial proportion of Diversified Return Euro Fund's investments, Diversified Return US Dollar Fund's investments and Diversified Return Yen Fund's investments are also fixed income securities. Therefore these Funds are exposed to the risks associated with the effects of fluctuations in the prevailing levels of market interest rates on its financial position and cash flows. The Company uses the VaR model as noted previously in the "Value at Risk" section to assist in the monitoring of interest rate risk for these Funds.

30 September 2023

The Funds exposure to interest rate risk is summarised in the table below:

Credit Risk

Credit risk is the risk that the counterparty to a transaction or an issuer of a financial instrument will cause a financial loss to a Fund by failing to repay an obligation which may have arisen by the Fund; such transactions include purchasing debt instruments, placing deposits or entering into derivative contracts. Credit risk is generally more significant for those Funds that invest primarily in debt instruments or that use over the counter derivative contracts to a material degree.

255,745

135,103,466

135,359,211

The maximum exposure to credit risk of cash balances held at 30 September 2023 and 30 September 2022 are detailed on the Statement of Financial Position. As at 30 September 2023 the cash balances were held at Brown Brothers Harriman ("BBH") which has a short-term credit rating of F1+ (30 September 2022: F1+), as rated by Fitch. This indicates the strongest intrinsic capacity for timely payment of financial

As at 30 September 2023, the maximum exposure of a Fund to debt instruments is the fair value of the debt instruments as listed in the Statement of Investments for that Fund.

²Fund commenced operations on 31 March 2022.

10. Risk Disclosures (continued)

Managing Risks (continued)

Credit Risk (continued)

Virtually all broker transactions in listed securities are settled upon delivery to the Depositary. The risk of default is considered minimal as delivery of securities sold is only made once the Depositary has received payment from the broker. Payment to a broker is made on a purchase once the securities have been received by the Depositary. The trade will fail if either party fails to meet its obligation. All counterparties to all derivatives held at 30 September 2023 are listed in the Statement of Investments. The Company's maximum risk of loss for derivative contracts may exceed the amounts recognised on the Statement of Financial Position.

The short-term credit ratings as rated by Fitch for counterparties are given below.

	30 September 2023	30 September 2022

¹Credit rating for State Street Bank is represented by S&P rating.

For cash accounts, funds deposited are liabilities of the banks, creating a debtor-creditor relationship between the bank and the Company. Cash accounts opened on the books of Brown Brothers Harriman ("BBH") are obligations of BBH while cash accounts opened on the books of a third-party cash correspondent bank, sub-custodian or a broker (collectively, "agency accounts") are obligations of the agent. For safekeeping of security assets, BBH's policy under European Union Directive 2014/91/EU (known as "UCITS V Directive") is to maintain segregated client security accounts on its books and on the books of its sub-custodians. While BBH is responsible for exercising reasonable care and diligence in the administration of agency cash accounts, it is not liable for their repayment in the event that the sub-custodian, by reason of its bankruptcy, insolvency or otherwise, fails to make repayment.

BBH performs both initial and ongoing due diligence on the sub-custodians in its global custody network. Such reviews include an assessment of the sub-custodian's financial strength and general reputation and standing and, at a minimum, meet the due diligence requirements established by applicable law.

Regular financial analysis of all sub-custodians is carried out by BBH's risk and credit group and is focused on the sub-custodian bank's capital adequacy, asset quality, earnings, liquidity and credit ratings as key indicators, amongst others. These reviews form part of BBH's routine assessment of a sub-custodian's financial strength and standing. These reviews are not audits.

Diversified Return Euro Fund, Diversified Return US Dollar Fund, Diversified Return Yen Fund, European High Yield Bond Fund, Global Strategic Bond Fund and Sustainable Emerging Markets Bond Fund invest in debt instruments that may receive a credit rating from an international rating agency, or if unrated, may be assigned a credit rating using an approach which is consistent with that used by rating agencies. As of 30 September 2023 and 30 September 2022, the exposures by credit rating of fixed income securities for the Diversified Return Euro Fund, Diversified Return Yen Fund, European High Yield Bond Fund, Global Strategic Bond Fund and Sustainable Emerging Markets Bond Fund are detailed below.

¹Fund ceased operations on 15 March 2023.

Liquidity Risk

Liquidity risk is the risk that a Fund will encounter difficulty in meeting obligations associated with financial liabilities. Such obligations may arise from daily cash redemptions or from derivative contracts such as futures and swaps.

The Funds' assets mainly consist of readily realisable securities. This enables the payment of any investor redemptions without unbalancing the portfolio.

To manage liquidity risk, in extraordinary situations as specified in the Company's prospectus, the Company reserves the right to limit the amount of shares that may be redeemed by an individual Shareholder and/or temporarily suspend the redemption of shares. A suspension of redemptions may be made at any time prior to the payment of the redemption monies and the removal of the details of the relevant shares from the register of Shareholders. Any such suspension shall be notified immediately to the Central Bank. Where possible, all reasonable steps will be taken to bring a period of suspension to an end as soon as possible.

In accordance with the Company's policy, the Manager monitors the Funds' liquidity position on a daily basis.

²Fund commenced operations on 31 March 2022.

Managing Risks (continued)

Liquidity Risk (continued)

The tables below provide an analysis of each Fund's financial liabilities into relevant maturity groupings based on the period remaining at the balance sheet date to the contractual maturity date as at 30 September 2023 and 30 September 2022. Other Derivatives Payable are classified as having a maturity of less than one month as these derivative types may be settled prior to their contractual maturity dates. Forward Currency Contracts are classified according to their contractual maturity dates. The Forward Foreign Currency Contracts Payables and Receivables are remeasured using the spot rate as at year end.

¹Fund ceased operations on 15 March 2023.

Other Risk

The Manager monitors both the creditworthiness of counterparties to financial derivative transactions and the extent to which the counterparty risk is diversified.

All counterparties with whom the Funds held derivatives as at 30 September 2023 and 30 September 2022 have a high short-term credit rating as indicated under the Credit Risk section. This indicates a strong intrinsic capacity for timely payment of financial commitments, as rated by Fitch.

The aim is to strike a balance between spreading counterparty risk amongst a number of institutions and keeping costs low by achieving economies of scale. Settlement risk is minimised as virtually all transactions are settled on a delivery against payment basis.

Umbrella Structure of the Company and Cross-Liability Risk

Each Fund will be responsible for paying its fees and expenses regardless of the level of its profitability. The Company is an umbrella fund with segregated liability between Funds and under Irish law the Company generally will not be liable as a whole to third parties and there generally will not be the potential for cross-liability between Funds. Notwithstanding the foregoing, there can be no assurance that, should an action be brought against the Company in the courts of another jurisdiction, the segregated nature of the Funds would necessarily be upheld.

²Fund commenced operations on 1 October 2021 and ceased operations on 12 July 2023.

³Fund commenced operations on 10 May 2022.

⁴Fund commenced operations on 31 March 2022.

⁵Fund ceased operations on 16 May 2023

⁶Fund ceased operations on 25 November 2022.

⁷Fund commenced operations on 12 December 2022.

10. Risk Disclosures (continued)

Fair Value Estimation

FRS 102 on "Fair Value: Disclosure" requires disclosure relating to the fair value hierarchy in which fair value measurements are categorised for assets and liabilities. The disclosures are based on a three-level fair value hierarchy for the inputs used in valuation techniques to measure fair value.

The Funds have classified fair value measurements using a fair value hierarchy that reflects the significance of the inputs used in making the measurements.

- (i) Level 1: The unadjusted quoted price in an active market for identical assets or liabilities that the entity can access at the measurement date.
- (ii) Level 2: Inputs other than quoted prices included within Level 1 that are observable (i.e. developed using market data) for the asset or liability, either directly or indirectly.
- (iii) Level 3: Inputs are unobservable (i.e. for which market data is unavailable) for the asset or liability.

The level in the fair value hierarchy within which the fair value measurement is categorised in its entirety is determined on the basis of the lowest level input that is significant to the fair value measurement in its entirety. For this purpose, the significance of an input is assessed against the fair value measurement in its entirety. If a fair value measurement uses observable inputs that require significant adjustment based on unobservable inputs, that measurement is a Level 3 measurement. Assessing the significance of a particular input to the fair value measurement in its entirety requires judgement, considering factors specific to the financial asset or liability.

The determination of what constitutes "observable" requires significant judgement by the Directors in consultation with the Investment Manager. The Directors consider observable data to be that market data that is readily available, regularly distributed or updated, reliable and verifiable, not proprietary, and provided by independent sources that are actively involved in the relevant market.

The tables below provide an analysis within the fair value hierarchy of the Fund's financial assets and liabilities measured at fair value as at both 30 September 2023 and 30 September 2022.

^{*}In February 2022, following the Russian invasion of Ukraine, the Russian stocks were suspended and initially the Fair Value committee advised to value using a haircut of the last price determined by the movement of two Russian ETFs in the market. On 3 March 2022, it was determined by the Fair Value committee that nil was a more appropriate valuation due to significant drops in the stocks that had been trading in the days after the invasion as well as expected liquidity concerns upon the markets reopening. This has been reviewed on a daily basis by the Fair Value committee and at year end they have determined the nil value to continues to be appropriate. Magnit PJSC announced that they would repurchase up to 10% of blocked shares from foreign shareholders at a 50% discount to the local line. On 17 August 2023, the fair value pricing group had attained comfort that the receipt of the tender proceeds was certain enough to recognise the value in the fund and the price of \$4.91 was applied.

^{*}In February 2022, following the Russian invasion of Ukraine, the Russian stocks were suspended and initially the Fair Value committee advised to value using a haircut of the last price determined by the movement of two Russian ETFs in the market. On 3 March 2022, it was determined by the Fair Value committee that nil was a more appropriate valuation due to significant drops in the stocks that had been trading in the days after the invasion as well as expected liquidity concerns upon the markets reopening. This has been reviewed on a daily basis by the Fair Value committee and at year end they have determined the nil value to continues to be appropriate.

^{*}Xebec Adsorption was delisted at the period end. When Xebec was initially suspended, the fair value committee advised to price at last available. A subsequent decision was made to value at zero as it was expected that the stock would delist. The stock was delisted in November 2022 and continues to be valued at zero.

Total Financial Assets	4,736,357		1,007	4,737,364

^{*}Xebec Adsorption was suspended on the 30 September 2022 due to the company seeking creditor protection. The Fair Value Committee advised to value the stock at the last traded price. The Fair Value committee continue to monitor the company post year end and expect it to be delisted. Grace Technology was delisted in February 2022 as the company failed to file their quarterly report by the extended deadline. The Private Companies Valuation Group was monitoring the situation and in December 2022 it was agreed by the Private Companies Valuation Group to write down the value to zero and apply this to the 30 September year end value, as the condition that caused the write down existed at year end.

¹Fund ceased operations on 15 March 2023.

13. Soft Commissions

Baillie Gifford Investment Management (Europe) Limited has appointed Baillie Gifford Overseas Limited as the Investment Manager. The Investment Manager is the entity responsible for trading and has traded with brokers using execution-only commission rates. The execution-only commission includes the costs of access to each global market, the broker's ability to source liquidity, the use of alternative trading venues, the provision of risk capital, the capabilities of individual sales traders, and the provision of proprietary technology for trading programmes and algorithms. The Investment Manager pays directly for research services under separate agreements with the brokers.

There were no soft commission arrangements for the Funds entered into during the year ended 30 September 2023 (30 September 2022: Nil).

14. Efficient Portfolio Management

The Company may employ techniques and instruments relating to transferable securities and/or other financial instruments in which it invests for investment purposes or hedging. Techniques and instruments utilised for the purpose of efficient portfolio management may only be used in accordance with the investment objective of the Company. Any technique or instrument must be one which is reasonably believed by the Investment Manager to be economically appropriate to the efficient portfolio management of the Company.

No efficient portfolio management techniques were used by the Funds during the year ended 30 September 2023 (30 September 2022: none). There was no revenue or fees derived from efficient portfolio management during the year ended 30 September 2023 (30 September 2022: none).

15. Net Asset Value per Redeemable Participating Share

Trade Date Adjustment

For Shareholder dealing purposes, transactions are accounted for on a trade date plus 1 business day basis. For financial reporting purposes, transactions are accounted for on a trade date basis. Any differences due to activity on trade date are shown as "Trade Date adjustment" on the Statement of Financial Position.

16. Significant Events during the year

The regulatory approval of the US Concentrated Growth Fund was withdrawn from the Central Bank on 11 October 2022, following the application of the Company, which was made before the start of the reporting year.

An updated prospectus was noted by the Central Bank on 14 October 2022 which related principally to the below changes:

- The addition of two new Funds: the US Equity Alpha Fund and the Global Developed Equities Fund;
- The removal of references to the US Concentrated Growth Fund, as well as two other Funds, the Diversified Return Canadian Dollar Fund and the Diversified Return Australian Dollar Fund, as the applications for revocation of the approval of these two other funds, which were made by the Company to the Central Bank before the start of the reporting year;

²Fund commenced operations on 1 October 2021 and ceased operations on 12 July 2023.

³Fund commenced operations on 10 May 2022.

⁴Fund commenced operations on 31 March 2022.

⁵Fund ceased operations on 16 May 2023.

⁶Fund ceased operations on 25 November 2022.

⁷Fund commenced operations on 12 December 2022.

16. Significant Events during the year (continued)

- Updates to the investment policies for the following Funds in order to reflect their re-classification pursuant to Article 8 of Regulation (EU) 2019/2088 ("SFDR"). With the exception of the Emerging Markets ex China Equities Fund, these changes were approved by the shareholders at an extraordinary general meeting of each of the relevant Funds held on 3 October 2022. The Emerging Markets ex China Equities Fund had no shareholders as at the date of these updates and so no extraordinary general meeting was held:
 - the China A Shares Growth Fund
 - the China Fund
 - the Emerging Markets All Cap Fund
 - · the Emerging Markets ex China Equities Fund
 - the Emerging Markets Leading Companies Fund
 - the Global Alpha Fund
 - the Japanese Fund
 - · the Long Term Global Growth Fund
 - the US Equity Growth Fund
- Additional disclosures relating to exclusions of certain investments (such as investment in the production or distribution of armaments, thermal coal and/or sale of tobacco) to a number of existing Funds classified pursuant to Article 8 and Article 9 of SFDR;
- Other minor amendments to the investment policies of the Funds, including to provide for investments by certain of the Funds in shares listed on the ChiNext Market and STAR Board. Except in the case of the Funds listed above as being re-classified pursuant to Article 8 of SFDR and in the case of the Positive Change Fund, the changes to the investment policies were not material and the shareholders of the Funds were notified in advance of these changes taking effect;
- Amendments to the target narratives of a number of Funds;
- An amendment to the selling restriction for Australia;
- Amendments for the reduced management fee from 0.36% to 0.24% for an initial period of 24 months in respect of the Baillie Gifford Worldwide China A Shares Growth Fund;
- Minor amendments to the Sustainable and Responsible Investment and Impact Risk disclosure; and
- Removal of the Moscow Exchange MICEX-RTS from the list of regulated markets as listed at schedule II of the prospectus.

The UK Equity Alpha Fund ceased operations and all remaining shares in the Fund were redeemed on 25 November 2022.

An updated prospectus was noted by the Central Bank on 25 November 2022 which related to the inclusion of the template pre-contractual disclosures required under Commission Delegated Regulation (EU) 2022/1288 of 6 April 2022 supplementing SFDR (the "SFDR Level 2 RTS") and other changes related to SFDR, the SFDR Level 2 RTS and Regulation (EU) 2020/852 the "Taxonomy Regulation".

The US Equity Alpha Fund launched on 12 December 2022.

The regulatory approval of each of the Diversified Return Canadian Dollar Fund and the Diversified Return Australian Dollar Fund was withdrawn from the Central Bank on 22 December 2022, following the application of the Company, which was made before the start of the reporting year.

The Diversified Return Euro Fund ceased operations on 15 March 2023.

An updated prospectus was noted by the Central Bank on 16 March 2023, which related to updated disclosure requirements principally relating to nuclear energy and fossil gas required by the SFDR Level 2 RTS and other changes related to SFDR, the SFDR Level 2 RTS and the Taxonomy Regulation.

The Systematic Long Term Growth Fund ceased operations on 16 May 2023.

The European Growth Fund ceased operations on 12 July 2023.

There were no other significant events affecting the Company during the year.

17. Events since the year end

Effective 20 October 2023, transition of the Discovery Fund from being classified as fund to which Article 6 applies to Article 8 under SFDR.

Effective 20 October 2023, the Diversified Return US Dollar Fund changed its name to Baillie Gifford Worldwide Diversified Return Fund, the Global Income Growth Fund changed its name to Baillie Gifford Worldwide Global Dividend Growth Fund, the Global Stewardship Fund changed its name to Baillie Gifford Worldwide Sustainable Growth Fund, the Responsible Global Equity Income Fund changed its name to Baillie Gifford Worldwide Responsible Global Dividend Growth Fund.

17. Events since the year end (continued)

Effective 1 December 2023, the Arthur Cox LLP appointment as the Legal Adviser of the Company was terminated.

Effective 1 December 2023, the Bradwell Limited appointment as the Company Secretary was terminated.

Effective 1 December 2023, Dillon Eustace LLP was appointed as the Legal Adviser of the Company.

Effective 1 December 2023, Tudor Trust Limited was appointed as the Company Secretary.

Updates to the investment objective and policy sections of the Sustainable Growth Fund.

The Directors have decided to terminate the Baillie Gifford Worldwide European High Yield Bond Fund and the Baillie Gifford Worldwide Global Strategic Bond Fund and as a result the Company will seek to realise all the assets of the Funds and all shares of the Funds shall be repurchased by the Company on 28 February 2024.

In addition, the Directors have decided to terminate the Baillie Gifford Worldwide Sustainable Emerging Markets Bond Fund and as a result the Company will seek to realise all the assets of the Fund and all shares of the Fund shall be repurchased by the Company on 22 April 2024.

There were no other significant events affecting the Company since the year end.

18. Approval of Financial Statements

The report and audited financial statements were approved by the Board of Directors on 25 January 2024.

STATEMENT OF CHANGES IN INVESTMENTS (UNAUDITED) FOR THE YEAR ENDED 30 SEPTEMBER 2023 ASIA EX JAPAN FUND

In accordance with the UCITS Regulations, a statement of changes in the composition of the Portfolio during the reporting period is provided to ensure that Shareholders can identify changes in the investments held by the Company. These statements present the aggregate purchases and sales of transferable securities exceeding one percent of the total value of purchases and sales for the period. At a minimum the largest 20 purchases and sales must be given or if less than 20, all investments will be shown.

REMUNERATION REPORT (UNAUDITED)

UCITS V Remuneration

In line with the requirements of the UCITS Regulations, Baillie Gifford Investment Management (Europe) Limited (the "Manager") has adopted a remuneration policy which is consistent with the principles outlined in the ESMA guidelines on sound remuneration policies under the UCITS Directive (the "Remuneration Guidelines"). The remuneration policy is appropriate to the Manager's size, internal organisation and the nature, scope and complexity of its activities. The remuneration policy and its implementation is reviewed at least annually in accordance with Regulation 24(B) (c) and (d) of the UCITS Regulations.

The Manager's remuneration policy applies to certain identified staff whose professional activities have a material impact on the risk profile of the Manager.

The remuneration policy was amended to take account of the issue of Remuneration Guidelines in October 2016, and in particular the requirements in relation to delegated management functions, but no other material changes have been made to the remuneration policy since its adoption.

The Manager has delegated investment management to Baillie Gifford Overseas Limited (the "Investment Manager"). No remuneration has been paid to staff of the Investment Manager by the Manager. The Manager and Investment Manager pay remuneration to their staff in accordance with their own remuneration policy. The Manager has requested and the Investment Manager has provided confirmation that, being subject to CRD III and BIPRU remuneration rules, they have a remuneration policy in place that is consistent with the Remuneration Guidelines and that is equally as effective as the requirements under the UCITS Directive. The disclosure relating to the Investment Manager's remuneration policy can be viewed here:

https://www.bailliegifford.com/en/uk/about-us/literature-library/legal/baillie-gifford-group-remuneration-disclosure/.

SECURITIES FINANCING TRANSACTION REGULATION (UNAUDITED)

There were no securities financing transactions or total return swaps used by any of the Funds for the years ended 30 September 2023 and 30 September 2022.

SUSTAINABLE FINANCE DISCLOSURE REGULATION (UNAUDITED)

Funds promoting environmental and/or social characteristics (classified pursuant to Article 8 of SFDR) and funds that have sustainable investment as their objective (classified pursuant to Article 9 of SFDR) are required to include in periodic reports information on the extent to which environmental and/or social characteristics have been met or the overall sustainability impact by means of relevant sustainability indicators. This information should be disclosed using the prescribed templates included within the SFDR Delegated Regulation. To meet this requirement, periodic reporting templates have been prepared for Funds that have been classified pursuant to Articles 8 or 9 of SFDR during the reference period covering 1 October 2022 to 30 September 2023.

Quantitative information has been calculated at appropriate intervals using the average month-end value of investments during the reference period. For the purpose of SFDR reporting and calculating quantitative information, investments also include assets that are not used to attain the promoted environmental and/or social characteristics or sustainable investment objective such as those used for liquidity purposes (e.g. cash and cash equivalents). Quantitative information may not necessarily fully reconcile due to rounding when the underlying investments are added together to arrive at a single number, although the difference will be immaterial (i.e. 0.1%). Reference periods used for SFDR reporting will normally cover the same period as the financial statements, with the exception of instances wherein a fund transitioned to be classified pursuant to Article 8 or 9 of SFDR, or a new fund was launched during the reference period, in which case the reference period would be shorter than 12 months.

Fund classification under the SFDR is evolving and requires a detailed understanding of how sustainability objectives interact with investment returns. It is possible that other Funds not currently classified pursuant to Articles 8 or 9 of the SFDR may be re-classified as such in future amendments to the Prospectus. Binding commitments reported on are based on information disclosed in the Prospectus that was current during the reference period. Commitments that have been added after the reference period are also clearly identified and have been disclosed to ensure consistency between the periodic reporting templates and the current pre-contractual templates appended to the Prospectus (dated 20 October 2023). EU Taxonomy alignment reporting within the periodic reporting templates is not based on commitments made in pre-contractual disclosures. As such, disclosure has been made irrespective of if the Fund intended to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy. Any such investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research. Reporting of sustainable investments other than EU Taxonomy is based on commitments made in pre-contractual disclosures.

Additional information on voting and engagement activities is available on the Manager's website.

ESMA's Supervisory Briefing on sustainability risks and disclosure in the area of investment management states that: 'National Competent Authorities could reasonably expect that products disclosing under Article 9 of SFDR would disclose the Principal Adverse Impacts of investment decisions referred to in Article 7 of SFDR, even though it is not mandatory, due to the requirements of 'Do No Significant Harm' disclosures for sustainable investments in the SFDR Delegated Regulation which require the disclosure of how the indicators for adverse impacts in Annex I of the SFDR Delegated Regulation have been taken into account and because Article 9 SFDR products should only make sustainable investments.' As such, we have also disclosed the Principal Adverse Impacts of investment decisions for Baillie Gifford Worldwide Positive Change Fund.

Periodic reporting templates have not been produced for Baillie Gifford Worldwide Global Developed Equities Fund, and Baillie Gifford Worldwide Emerging Markets Ex China Equities Fund. These funds have not been launched and therefore there are no values to be reported on. The Baillie Gifford Worldwide Discovery fund was classified pursuant to Article 8 of SFDR, effective 20 October 2023 and so a periodic reporting template has not been produced for this fund.

Historical comparison is only presented in instances where a previous report has already been produced for a fund. If no historical comparison is presented, the fund only started disclosing under Article 8 or 9 during the reference period.

socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

How did the sustainability indicators perform and compare to previous periods?

All holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Sustainability
indicators measure
how the
environmental or
social characteristics
promoted by the
financial product are

attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, (c) by excluding holdings that derive: (i) more than 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) more than 30% of annual revenues from the mining and/or sale of thermal coal; or (iii) more than 5% of annual revenues from the production of tobacco.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 14 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
Shenzhen Inovance 'A'	Manufacturing	China	6.5
CATL 'A'	Manufacturing	China	6.4
Kweichow Moutai 'A'	Manufacturing	China	5.5

SG Micro 'A'	Manufacturing	China	2.6
WuXi AppTec 'A' - Stock Connect	Human Health and Social Work	China	2.6

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

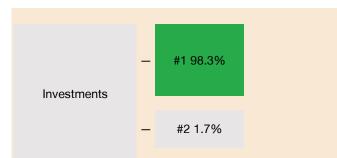

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

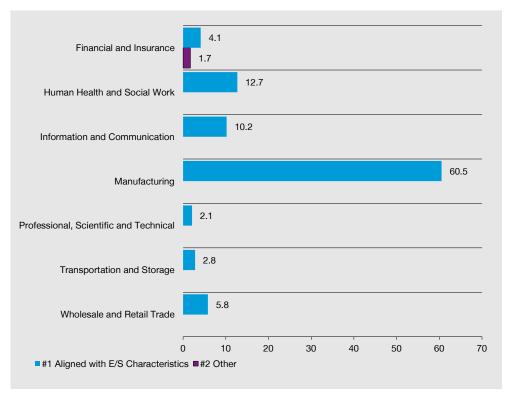

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 98.3% in Chinese equities (directly although it may have also invested indirectly through eligible collective investment schemes) that are aligned with the same characteristics. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Financial and Insurance	Activities auxiliary to financial services and insurance activities Insurance, reinsurance and pension funding, except compulsory social security
Human Health and Social Work	Human health activities
Information and Communication	Publishing activities
Manufacturing	Manufacture of beverages Manufacture of chemicals and chemical products Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of fabricated metal products, except machinery and equipment Manufacture of food products Manufacture of furniture Manufacture of machinery and equipment n.e.c. Other manufacturing
Professional, Scientific and Technical	Architectural and engineering activities; technical testing and analysis
Transportation and Storage	Postal and courier activities
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

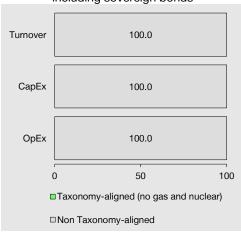

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

There were no sustainable investments in the portfolio with an environmental objective aligned with the EU Taxonomy during the reference period.

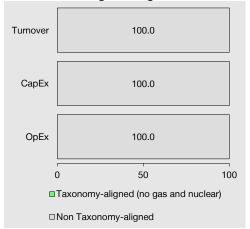

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹ ?					
Yes X No	In fossil gas	In nuclear energy			

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-alignment of investments including sovereign bonds

Taxonomy-alignment of investments excluding sovereign bonds

This graph represents 100% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed with the aim of providing above average returns mostly comprising of capital growth over the long term. The assessment of sustainability was integrated into the Investment Manager's stock research framework and the Investment Manager considered management and stakeholder alignment. The Fund used norms-based evaluation, business activity-based exclusions and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.
- 4. Manage greenhouse gas emissions intensity as measured by the Fund's Weighted Average Carbon Intensity ('WACI') and an aim for this to be lower than MSCI China All Share Index (the 'Index').

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform and compare to previous periods?

One of the third-party providers the Investment Manager uses to evaluate compliance with the UNGC classify Tencent Holdings and Zijin Mining Group as non-compliant with the UNGC.

Through its own research, the Investment Manager classifies Tencent Holdings as watchlist against the UNGC and therefore compliant with the Investment Manager's UNGC Policy. However, additional engagement and monitoring has been undertaken and the company remains under review.

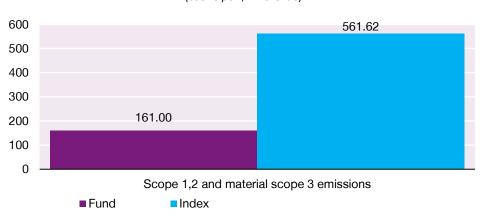

Through its own research, the Investment Manager classifies Zijin Mining Group as non-compliant. Zijin Mining Group is therefore subject to a formal engagement process as outlined in the Investment Manager's UNGC policy. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2023
Compliance with UNGC Policy*	98.5
Is WACI below index?	Yes
Compliance with sector- based exclusions*	98.5
Holdings voted in line with Voting and Engagement Guidelines*	98.5

*All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator

Weighted Average Carbon Intensity

(tCO2e per \$M revenue)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, (c) by excluding holdings that derive: (i) more than 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) more than 30% of annual revenues from the mining and/or sale of thermal coal; or (iii) more than 5% of annual revenues from the production of tobacco.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 14 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
Tencent	Information and Communication	China	8.4

Guangzhou Kingmed 'A'	Human Health and Social Work	China	1.9

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

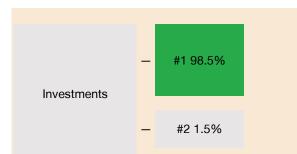

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

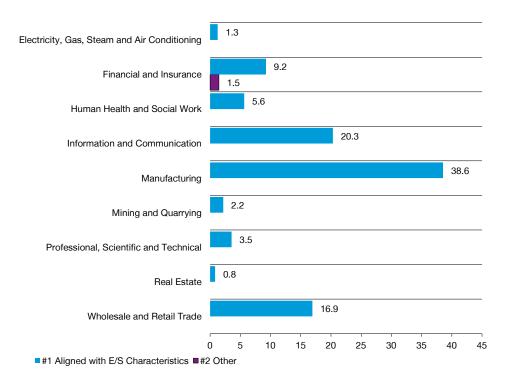

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 98.5% in Chinese equities (directly although it may have also invested indirectly through eligible collective investment schemes) that are aligned with the same characteristics. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Electricity, Gas, Steam and Air Conditioning	Electricity, gas, steam and air conditioning supply
Financial and Insurance	Activities auxiliary to financial services and insurance activities Financial service activities, except insurance and pension funding Insurance, reinsurance and pension funding, except compulsory social security

Manufacturing	Manufacture of beverages Manufacture of chemicals and chemical products Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of fabricated metal products, except machinery and equipment Manufacture of machinery and equipment n.e.c. Manufacture of motor vehicles, trailers and semitrailers Manufacture of wearing apparel Other manufacturing
Mining and Quarrying	Mining of metal ores
Professional, Scientific and Technical	Architectural and engineering activities; technical testing and analysis Scientific research and development
Real Estate	Real estate activities
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

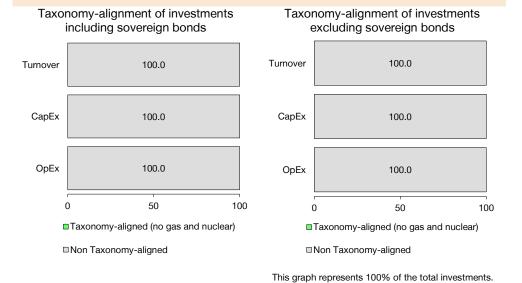

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

There were no sustainable investments in the portfolio with an environmental objective aligned with the EU Taxonomy during the reference period.

	e financial product inves I activities complying wi	t in fossil gas and/or nuclear energy th the EU Taxonomy¹?
X N	In fossil gas	In nuclear energy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed with the aim of providing above average returns mostly comprising of capital growth over the long term. The assessment of sustainability was integrated into the Investment Manager's stock research framework and the Investment Manager considered management and stakeholder alignment. The Fund used norms-based evaluation, business activity-based exclusions and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund was assessed in relation to the following environmental and/or social characteristics as described in the prospectus:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.
- 4. Manage greenhouse gas emissions intensity as measured by the Fund's Weighted Average Carbon Intensity ('WACI') and an aim for this to be lower than MSCI Emerging Markets Index (the 'Index').

A number of holdings were identified by third party providers as being non-compliant with the UNGC, however they remained compliant with the Investment Manager's policy (avaliable on request) and therefore did not impact the attainment of the environmental and/or social characteristics outlined above. Therefore, there were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform and compare to previous periods?

One of the third-party providers the Investment Manager uses to evaluate compliance with the UNGC classify Tencent Holdings, Tencent Music Entertainment, Baidu.com and Zijin Mining Group as non-compliant with the UNGC.

Through its own research, the Investment Manager classifies Tencent Holdings, Tencent Music Entertainment and Baidu.com as watchlist against the UNGC and therefore compliant with the Investment Manager's UNGC Policy. However, additional engagement and monitoring has been undertaken and the company remains under review. Through its own research, the Investment Manager classifies Zijin Mining Group as noncompliant. Zijin Mining Group is therefore subject to a formal engagement process as outlined in the Investment Manager's UNGC policy.

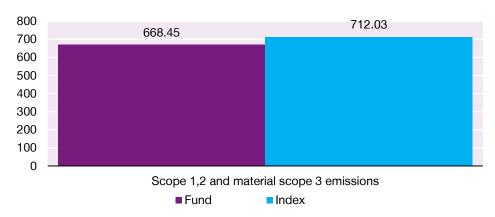

The Russian holdings in the fund, Norilsk Nickel and Sberbank of Russia are also assessed as non-compliant with the Investment Manager's United Nations Global Compact Policy. Norisk Nickel was subject to a formal engagment process prior to Russia's invasion of Ukraine. Sberbank became non-compliant following Russia's invasion of Ukraine. The Investment Manager intends to exit the Sberbank of Russia and Norilsk Nickel holdings as soon as market conditions allow, and in the meantime has written down the value of assets on internal records. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2023
Compliance with UNGC Policy*	98.8
Is WACI below index?	Yes
Compliance with sector- based exclusions*	98.8
Holdings voted in line with Voting and Engagement Guidelines*	98.8

^{*}All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

Weighted Average Carbon Intensity

(tCO2e per \$M revenue)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, (c) by excluding holdings that derive (i) more than 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) more than 30% of annual revenues from the mining and/or sale of thermal coal; or (iii) more than 5% of annual revenues from the production of tobacco.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 20 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets

If each and/or derivetives are within the to	n investments during the reference neri	ad that are not museomted in the	table above

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

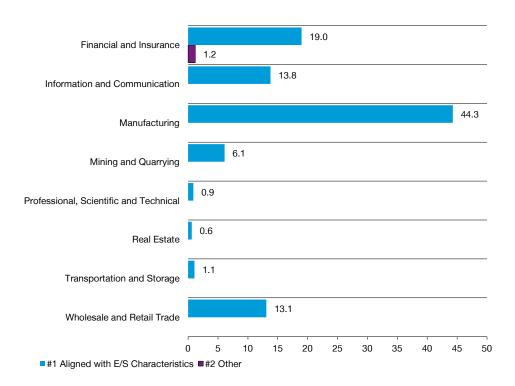

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 98.8% in emerging markets equities (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. The Fund did not commit to making sustainable investments and any taxonomy-alignment will be reported in the relevant section and not reflected in the asset allocation below. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Financial and Insurance	Activities auxiliary to financial services and insurance activities
	Financial service activities, except insurance and pension funding
	Insurance, reinsurance and pension funding, except compulsory social security
Information and Communication	Computer programming, consultancy and related activities Information service activities
Manufacturing	Manufacture of beverages Manufacture of chemicals and chemical products Manufacture of coke and refined petroleum products Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of machinery and equipment n.e.c. Manufacture of motor vehicles, trailers and semitrailers Manufacture of other nonmetallic mineral products Manufacture of wearing apparel
Mining and Quarrying	Extraction of crude petroleum and natural gas Mining of metal ores
Professional, Scientific and Technical	Scientific research and development
Real Estate	Real estate activities
Transportation and Storage	Air transport
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

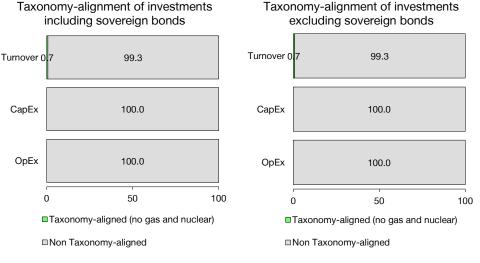

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 0.7% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

			vest in fossil gas and/or nuclear energ g with the EU Taxonomy¹?	ţу
X	Yes No	In fossil gas	In nuclear energy	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 20 Oct 2022 to 30 Sep 2023	0.0	0.0

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed with the aim of providing above average returns mostly comprising of capital growth over the long term. The assessment of sustainability was integrated into the Investment Manager's stock research framework and the Investment Manager considered management and stakeholder alignment. The Fund used norms-based evaluation, business activity-based exclusions and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance which is applied to all holdings in the fund.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed with the aim of providing above average returns mostly comprising of capital growth over the long term. The assessment of sustainability was integrated into the Investment Manager's stock research framework and the Investment Manager considered management and stakeholder alignment. The Fund used norms-based evaluation, business activity-based exclusions and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance which is applied to all foldings in the fund.

economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.							

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability
indicators measure
how the
environmental or
social characteristics
promoted by the
financial product are

attained.

How did the sustainability indicators perform and compare to previous periods?

All holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2022	To Sep 2023
Compliance with UNGC Policy*	97.9	73.5
Compliance with sector- based exclusions*	97.9	73.5
Holdings voted in line with Voting and Engagement Guidelines*	97.9	73.5

*All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

30% of the Fund was invested in economic activities that contribute to either an environmental and/or social objective (sustainable investments) during the reference period. These economic activities contributed to such objectives as they: (a) generated a certain level of revenues, either through products and/or services, that are aligned with the broader sustainable objectives of society as currently best defined by the United Nations Sustainable Development Goals ('SDGs'), some which can be mapped on a high-level basis against the six environmental objectives outlined in the EU Taxonomy and/or (b) are reducing absolute greenhouse gas emissions, either through their products and/or services or business practices, to seek to achieve the long-term global warming objectives of the Paris Climate Agreement. Reduction of greenhouse gas emissions aligns with the climate mitigation objective in the EU Taxonomy. The Fund did not commit to invest in economic activities that qualify as environmentally sustainable under the six environmental objectives of the EU Taxonomy but did make sustainable investments that at a high-level contribute to these specific environmental objectives, which are disclosed below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

How were the indicators for adverse impacts on sustainability factors taken into account?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager assessed holdings using a norms-based evaluation and the Fund complied with the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document. As such, in the Investment Manager's opinion, all holdings operated in accordance with the principles set out in the United Nations Global Compact for Business and related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that derive more than 10% of annual revenues from: (i) the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) adult entertainment; (iii) Fossil Fuel extraction and production; (iv) the provision of gambling services; and (v) the sale of tobacco. The Investment Manager also excludes companies that derive more than 5% of annual revenues from the production of tobacco.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets	
Prosus N.V.	Information and Communication	Netherlands	4.3	
Richemont	Manufacturing	Switzerland	3.5	
Ryanair ADR	Transportation and Storage	Ireland	3.2	
Topicus.Com Inc	Information and Communication	Netherlands	3.2	
Kering	Manufacturing	France	2.8	
Avanza Bank Holding	Financial and Insurance	Sweden	2.8	
ASML	Manufacturing	Netherlands	2.7	
Atlas Copco B	Manufacturing	Sweden	2.6	
IMCD Group NV	Wholesale and Retail Trade	Netherlands	2.5	
Adyen NV	Financial and Insurance	Netherlands	2.5	
Schibsted B	Information and Communication	Norway	2.4	
Nexans	Manufacturing	France	2.4	
DSV	Transportation and Storage	Denmark	2.1	
Zalando SE	Wholesale and Retail Trade	Germany	2.1	
Allegro.eu	Wholesale and Retail Trade	Poland	2.1	

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

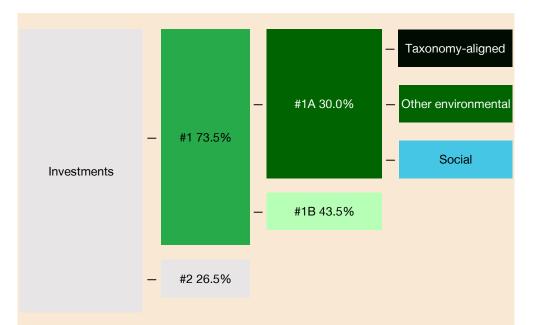

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 73.5% in European equities (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. This included 30.0% investment in sustainable investments with environmental or social objectives. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

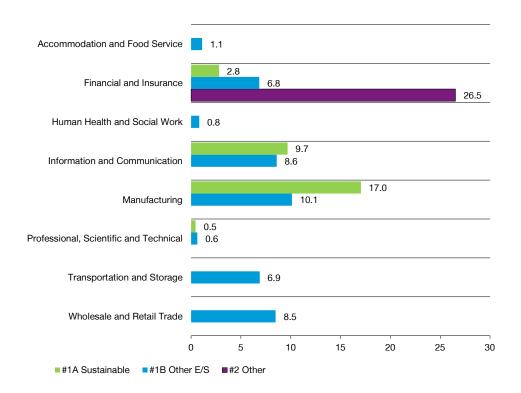

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

EU Taxonomy Objective	%
Climate change mitigation	24.7
Climate change adaptation	0.0

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Accommodation and Food Service	Food and beverage service activities
Financial and Insurance	Activities auxiliary to financial services and insurance activities Financial service activities, except insurance and pension funding
Human Health and Social Work	Human health activities
Information and Communication	Computer programming, consultancy and related activities Information service activities Publishing activities
Manufacturing	Manufacture of beverages Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of machinery and equipment n.e.c. Manufacture of other nonmetallic mineral products Manufacture of rubber and plastic products Manufacture of wearing apparel Other manufacturing
Professional, Scientific and Technical	Architectural and engineering activities; technical testing and analysis Scientific research and development
Transportation and Storage	Air transport Warehousing and support activities for transportation
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale and retail trade and repair of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

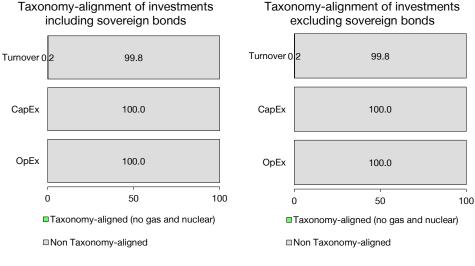

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 0.2% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research. An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

		nancial product i ctivities complyin		l gas and/or nucl J Taxonomy¹?	ear energy
x	Yes No	In fossil gas	5	In nuclear energ	У

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Including Sovereign Bonds			Excluding Sovereign Bonds		
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
21 Dec 2021 to 30 Sep 2022	0.3	0.0	0.0	0.3	0.0	0.0

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 24.6% during the reference period. As such, the Fund has exceeded the minimum commitment in investments with an environmental objective not aligned with the EU Taxonomy as outlined in the pre-contractual document. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 5.2% during the reference period. As such, together with the actual share of sustainable investments with an environmental objective not aligned with the EU Taxonomy, the Fund has exceeded the total minimum proportion of sustainable investments commitment as outlined in the pre-contractual document.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed with the aim of providing above average returns mostly comprising of capital growth and dividend income over the long term. The assessment of sustainability was integrated into the Investment Manager's stock research framework and the Investment Manager considered management and stakeholder alignment and the company's broader contribution to society. The Fund used norms-based evaluation, business activity-based exclusions and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments included in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Managed greenhouse gas emissions intensity as measured by the Fund's Weighted Average Carbon Intensity ('WACI') and an aim for this to be lower than the ICE BofA European Currency High Yield Constrained Index (hedged to euro) (the 'Index').
- 4. Sustainability-related characteristics achieved through the inclusion of investments deemed compatible with a sustainable economy following a qualitative evaluation.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform and compare to previous periods?

One of the third-party providers the Investment Manager uses to evaluate compliance with the UNGC classify Teva Pharmaceutical Industries Limited and Volkswagen AG as non-compliant with the UNGC. Through its own research, the Investment Manager classifies Teva Pharmaceutical Industries as compliant with the UNGC and Volkswagen AG as watchlist against the UNGC and therefore compliant with the Investment Manager's UNGC Policy. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

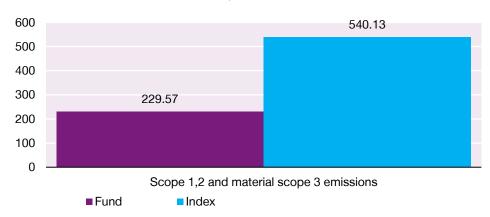

Indicator	To Sep 2022	To Sep 2023
Compliance with UNGC Policy*	96.9	95.8
Is WACI below index?	Yes**	Yes
Compliance with sector- based exclusions*	96.9	95.8
Holdings qualitatively assessed to be compatible with a sustainable economy*	96.9	95.8

^{*}All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

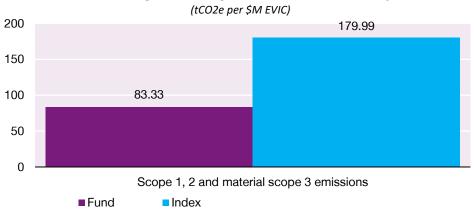

^{**}For reference period to September 2022, the sustainability indicator used was Weighted Average Greenhouse Gas Intensity (WAGGI). For reference period to September 2023, this has changed to Weighted Average Carbon Intensity (WACI).

2023 Weighted Average Carbon Intensity

(tCO2e per \$M revenue)

2022 Weighted Average Greenhouse Gas Intensity

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

17.5% of the Fund was invested in economic activities that contribute to either an environmental and/or social objective (sustainable investments) during the reference period. These economic activities contributed to such objectives as they: (a) generated a certain level of revenues, either through products and/or services, that are aligned with the broader sustainable objectives of society as currently best defined by the United Nations Sustainable Development Goals ('SDGs'), some of which can be mapped on a high-level basis against the six environmental objectives outlined in the EU Taxonomy and/or (b) are reducing absolute greenhouse gas emissions, either through their products and/or services or business practices, to seek to achieve the long-term global warming objectives of the Paris Climate Agreement. Reduction of greenhouse gas emissions aligns with the climate mitigation objective in the EU Taxonomy. The Fund did not commit to invest in economic activities that qualify as environmentally sustainable under the six environmental objectives of the EU Taxonomy but did make sustainable investments that at a high-level contribute to these specific environmental objectives, which are disclosed below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

How were the indicators for adverse impacts on sustainability factors taken into account?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) dialogue and engagement and (b) collaborative activities.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager assessed holdings using a norms-based evaluation and the Fund complied with the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document. As such, in the Investment Manager's opinion, all holdings operated in accordance with the principles set out in the United Nations Global Compact for Business and related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, (c) by excluding holdings that generate more than: (i) 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) 10% of annual revenues from (a) the extraction and/or production of oil and/or gas, and/or (b) the mining of thermal coal; (iii) 30% of annual revenues from the sale of thermal coal; or (iv) 5% of annual revenues from the production of tobacco, and (d) by managing weighted average carbon intensity with an aim for this to be lower than the Index.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
Progroup Ag 3% 2026	Manufacturing	Germany	2.3
EDF 6% 2026 Perp	Electricity, Gas, Steam and Air Conditioning	France	2.2
LeasePlan 7.375% 2024 Perp AT1	Financial and Insurance	Netherlands	2.2
SPCM 2.625% 2029	Manufacturing	France	2.1
Ziggo 2.875% 2030	Information and Communication	Netherlands	2.1
Birkenstock 5.25% 2029	Manufacturing	Luxembourg	1.9
James Hardie 3.625% 2026	Manufacturing	Ireland	1.9
Grifols 3.875% 2028	Professional, Scientific and Technical	Spain	1.9

Cellnex Telecom 2% 2033	Construction	Spain	1.6
Canpack 2.375% 2027	Manufacturing	Poland	1.6
Victoria 3.625% 2026	Manufacturing	UK	1.5
Belden 3.375% 2031	Manufacturing	United States	1.5

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

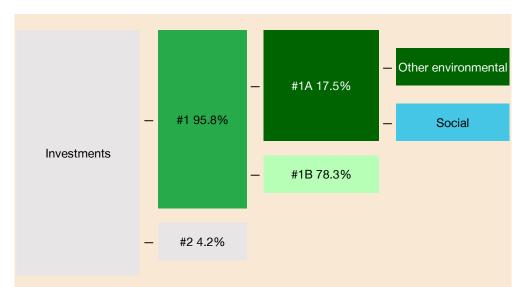

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 95.8% in below investment grade corporate bonds which are denominated in euro or in any other European currency (directly although it may have also invested indirectly through eligible collective investment schemes) that are aligned with the same characteristics. This included 17.5% investment in sustainable investments with environmental or social objectives. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. In the reference period 21 Dec 2021 to 30 Sep 2022, US T-bills were classified as #1, these are now classified as #2 as they are used for liquidity and/or efficient portfolio management purposes. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

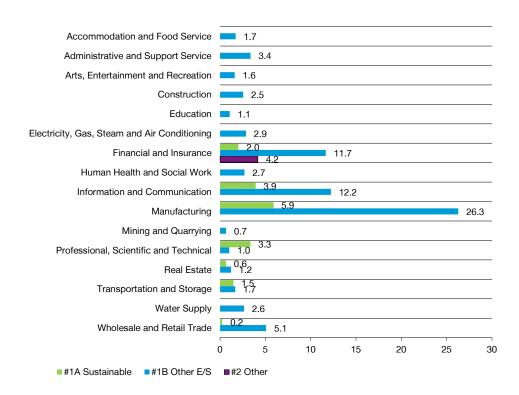

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

EU Taxonomy Objective	%
Climate change mitigation	14.0
Climate change adaptation	0.0

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Accommodation and Food Service	Accommodation
	Food and beverage service activities
Administrative and Support Service	Employment activities
	Office administrative, office support and other business
	support activities
	Rental and leasing activities
Arts, Entertainment and Recreation	Gambling and betting activities
	Sports activities and amusement and recreation activities
Construction	Civil engineering
Education	Education
Electricity, Gas, Steam and Air Conditioning	Electricity, gas, steam and air conditioning supply
Financial and Insurance	Activities auxiliary to financial services and insurance
	activities
	Financial service activities, except insurance and pension
	funding
	Insurance, reinsurance and pension funding, except compulsory social security
Human Health and Social Work	Human health activities
Information and Communication	Information service activities
	Motion picture, video and television programme production,
	sound recording and music publishing activities
	Telecommunications
Manufacturing	Manufacture of basic pharmaceutical products and
	pharmaceutical preparations
	Manufacture of chemicals and chemical products
	Manufacture of coke and refined petroleum products
	Manufacture of computer, electronic and optical products
	Manufacture of electrical equipment Manufacture of fabricated metal products, except machinery
	and equipment
	Manufacture of food products
	Manufacture of machinery and equipment n.e.c.
	Manufacture of motor vehicles, trailers and semitrailers
	Manufacture of other nonmetallic mineral products
	Manufacture of paper and paper products Manufacture of rubber and plastic products
	Manufacture of wearing apparel
	Manufacture of wood and of products of wood and cork,
	except furniture; manufacture of articles of straw and
	plaiting materials
	Other manufacturing
Mining and Quarrying	Mining of metal ores
Professional, Scientific and Technical	Activities of head offices; management consultancy activities Scientific research and development
Real Estate	Real estate activities
Transportation and Storage	Postal and courier activities
	Warehousing and support activities for transportation
Water Supply	Waste collection, treatment and disposal activities; materials
	recovery
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

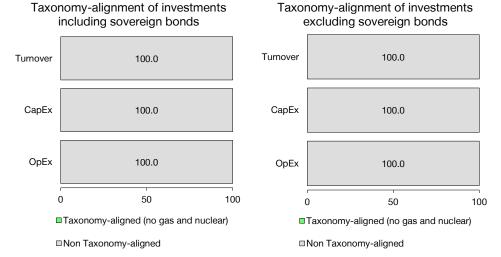

There were no sustainable investments in the portfolio with an environmental objective aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes
In fossil gas
In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Including Sovereign Bonds			Excluding Sovereign Bonds		
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
21 Dec 2021 to 30 Sep 2022	0.0	0.0	0.0	0.0	0.0	0.0

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 14.0% during the reference period. As such, the Fund has exceeded the minimum commitment in investments with an environmental objective not aligned with the EU Taxonomy as outlined in the pre-contractual document. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 3.5% during the reference period. As such, together with the actual share of sustainable investments with an environmental objective not aligned with the EU Taxonomy, the Fund has exceeded the total minimum proportion of sustainable investments commitment as outlined in the pre-contractual document.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk or US T-bills). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested primarily in below investment grade corporate bonds denominated in euro or in any other European currency. The Fund aimed to promote certain sustainability-related characteristics and contribute to the objectives of the Paris Climate Agreement through a sustainable and low-carbon portfolio, measured by using the WACI of the portfolio. The Fund used positive screening through qualitative evaluation of contribution towards sustainability dimension, norms-based evaluation, and business activity-based exclusions to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual document.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

not lay down a list of socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.					

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.
- 4. Managed greenhouse gas emissions intensity as measured by the Fund's Weighted Average Greenhouse Gas Intensity ('WAGGI') and an aim for this to be lower than MSCI ACWI EU Paris Aligned Requirements Index (the 'Index').
- 5. Contribution towards transition to a low carbon future through a qualitative assessment.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform and compare to previous periods?

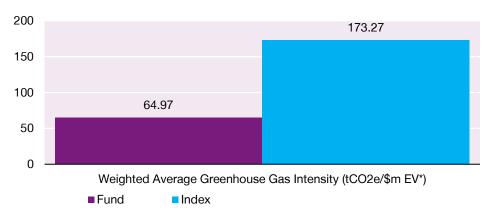

The following holding is non-compliant with the Investment Manager's United Nations Global Compact Policy following Russia's invasion of Ukraine: Sberbank of Russia. The Investment Manager intends to sell the Sberbank of Russia holding as soon as market conditions allow, and in the meantime has written down the value of the asset on internal records. All other holdings were in compliance with the sustainability indicators for the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2022	To Sep 2023
Compliance with UNGC Policy*	98.6	98.4
Is WAGGI below index?	Yes	Yes
Compliance with sector- based exclusions*	98.6	98.4
Holdings voted in line with Voting and Engagement Guidelines*	98.6	98.4
Holdings qualitatively assessed to play a role in the transition to a low carbon future*	98.6	98.4

^{*}All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

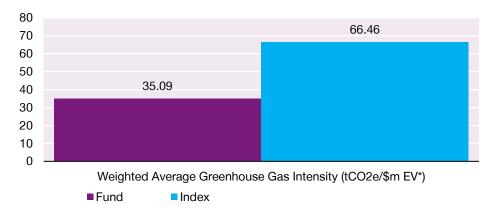

2023 Weighted Average Greenhouse Gas Intensity

(tCO2e per \$M EV)

2022 Weighted Average Greenhouse Gas Intensity

(tCO2e per \$M EV)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

43.4% of the Fund was invested in economic activities that contribute to either an environmental and/or social objective (sustainable investments) during the reference period. These economic activities contributed to such objectives as they: (a) generated a certain level of revenues, either through products and/or services, that are aligned with the broader sustainable objectives of society as currently best defined by the United Nations Sustainable Development Goals ('SDGs'), some which can be mapped on a high-level basis against the six environmental objectives outlined in the EU Taxonomy and/or (b) are reducing absolute greenhouse gas emissions, either through their products and/or services or business practices, to seek to achieve the long-term global warming objectives of the Paris Climate Agreement. Reduction of greenhouse gas emissions aligns with the climate mitigation objective in the EU Taxonomy. The Fund did not commit to invest in economic activities that qualify as environmentally sustainable under the six environmental objectives of the EU Taxonomy but did make sustainable investments that at a high-level contribute to these specific environmental objectives, which are disclosed below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

How were the indicators for adverse impacts on sustainability factors taken into account?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager assessed holdings using a norms-based evaluation and the Fund complied with the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document. As such, in the Investment Manager's opinion, all holdings operated in accordance with the principles set out in the United Nations Global Compact for Business and related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that derive more than 10% of their annual revenues from: (i) the production and/or distribution of alcohol; (ii) the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (iii) the production and/or distribution of adult entertainment; (iv) the provision of gambling services; or (v) the retail sale of tobacco. The Investment Manager also excludes companies that derive more than 5% of annual revenues from the production of tobacco.

The Investment Manager employs an additional assessment to ensure that the Fund invests in a way which , in the Investment Manager's opinion is, in alignment with the Paris Climate Agreement by excluding carbon intensive companies that do not, or will not, play a role in the transition to a low-carbon future. This assessment includes: (a) a quantitative screening to exclude (i) companies that generate more than 10% of revenues from the extraction and/or the production of thermal coal, oil and/or gas; and (ii) companies that generate more than 50% of revenues from services provided to thermal coal, oil and/or gas extraction and/or the production; and (b) qualitative screening to identify those companies that, in the Investment Manager's opinion, will not play a role in the transition to a low carbon future.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
Elevance Health Inc	Financial and Insurance	United States	4.2
Microsoft	Information and Communication	United States	4.0
Prosus N.V.	Information and Communication	Netherlands	3.5
Moody's	Information and Communication	United States	3.4
Amazon.com	Wholesale and Retail Trade	United States	2.8
Alphabet Inc Class C	Information and Communication	United States	2.7
Service Corp.Intl.	Other Service	United States	2.5
Mastercard	Financial and Insurance	United States	2.5
AIA Group	Financial and Insurance	Hong Kong	2.2
AJ Gallagher & Co	Financial and Insurance	United States	2.1
Olympus	Manufacturing	Japan	1.8
Prudential	Financial and Insurance	UK	1.8
Meta Platforms Inc	Information and Communication	United States	1.7
Alnylam Pharmaceuticals	Professional, Scientific and Technical	United States	1.7
TSMC	Manufacturing	Taiwan	1.6

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

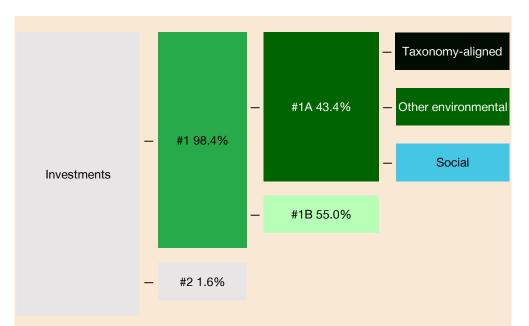

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 98.4% in global equities (directly although it may have also invested indirectly through eligible collective investment schemes) that are aligned with the same characteristics. This included 43.4% investment in sustainable investments with environmental or social objectives. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental and/or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

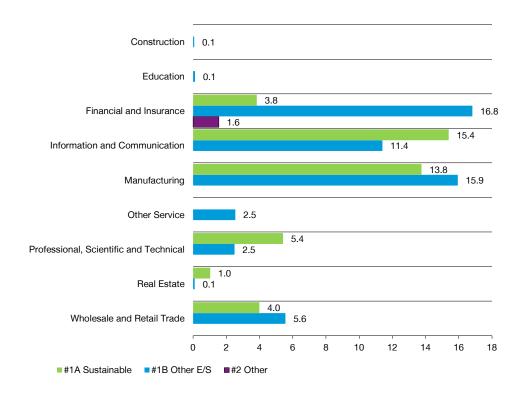

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

EU Taxonomy Objective	%
Climate change mitigation	32.4
Climate change adaptation	0.5

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Construction	Construction of buildings
Education	Education
Financial and Insurance	Activities auxiliary to financial services and insurance activities Financial service activities, except insurance and pension funding Insurance, reinsurance and pension funding, except compulsory social security
Information and Communication	Information service activities Publishing activities
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations Manufacture of chemicals and chemical products Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of fabricated metal products, except machinery and equipment Manufacture of machinery and equipment n.e.c. Manufacture of motor vehicles, trailers and semitrailers Manufacture of other nonmetallic mineral products Manufacture of rubber and plastic products Manufacture of wearing apparel Other manufacturing
Other Service	Other personal service activities
Professional, Scientific and Technical	Advertising and market research Scientific research and development
Real Estate	Real estate activities
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

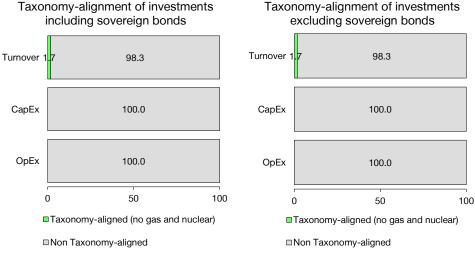

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 1.7% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research. An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

				t invest in fossil gas and/or nuclear energy ring with the EU Taxonomy¹?			
X	Yes No	In t	fossil gas		In nuclea	r energy	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0	0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Including Sovereign Bonds			Excluding Sovereign Bonds		
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
01 Oct 2021 to 30 Sep 2022	2.4	0.0	0.0	2.4	0.0	0.0

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 31.2% during the reference period. As such, the Fund has exceeded the minimum commitment in investments with an environmental objective not aligned with the EU Taxonomy as outlined in the pre-contractual document. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 10.5% during the reference period. As such, together with the actual share of sustainable investments with an environmental objective not aligned with the EU Taxonomy, the Fund has exceeded the total minimum proportion of sustainable investments commitment as outlined in the pre-contractual document.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested in global equities which are listed, traded or dealt on Regulated Markets while considering environmental, social and governance factors. When researching companies for potential inclusion in the portfolio, the Investment Manager used a research framework to consider how environmental, social or governance factors may affect the sustainability of a company's profit growth. The Fund used norms-based evaluation, business activity-based exclusions (both quantitatively and qualitatively) and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform and compare to previous periods?

One of the third-party providers the Investment Manager uses to evaluate compliance with the UNGC classify BHP Group Limited as non-compliant with the UNGC. Through its own research, the Investment Manager classifies BHP Group Limited as watchlist against the UNGC and therefore compliant with the Investment Manager's UNGC Policy. However, additional engagement and monitoring has been undertaken and the company remains under review.

The following holding is non-compliant with the Investment Manager's United Nations Global Compact Policy following Russia's invasion of Ukraine: Sberbank of Russia. The Investment Manager intends to sell the Sberbank of Russia holding as soon as market conditions allow, and in the meantime has written down the value of the asset on internal records. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2023
Compliance with UNGC Policy*	98.9
Compliance with sector- based exclusions*	98.9
Holdings voted in line with Voting and Engagement Guidelines*	98.9

*All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that derive: (i) more than 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) more than 5% of annual revenues from the production of tobacco; (iii) more than 10% of annual revenues or reserves in Arctic exploration or development (; (iv) more than 10% of annual revenues from the production oil sands or tar sands; or (v) more than 20% of annual revenues from the production and/or distribution of, electricity generation from, or construction of, thermal coal and directly associated facilities.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 20 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
Elevance Health Inc	Financial and Insurance	United States	3.6
Microsoft	Information and Communication	United States	3.2
Prosus N.V.	Information and Communication	Netherlands	3.1
Martin Marietta Materials	Manufacturing	United States	3.1
Moody's	Information and Communication	United States	2.9
Reliance Inds. GDR	Manufacturing	India	2.5
Amazon.com	Wholesale and Retail Trade	United States	2.4

Pernod Ricard SA	Manufacturing	France	1.8
AJ Gallagher & Co	Financial and Insurance	United States	1.8
AIA Group	Financial and Insurance	Hong Kong	1.7

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

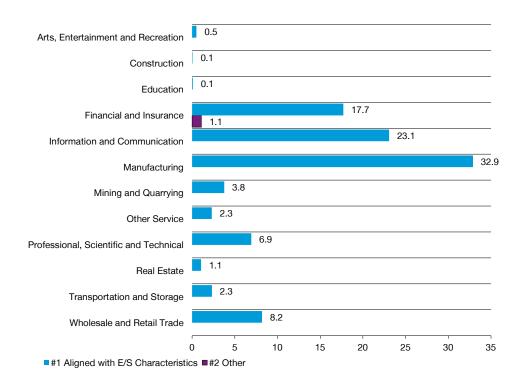

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 98.9% in global equities (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Arts, Entertainment and Recreation	Gambling and betting activities
Construction	Construction of buildings
Education	Education
Financial and Insurance	Activities auxiliary to financial services and insurance activities Financial service activities, except insurance and pension funding Insurance, reinsurance and pension funding, except compulsory social security
Information and Communication	Information service activities Publishing activities
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations Manufacture of beverages Manufacture of chemicals and chemical products Manufacture of coke and refined petroleum products Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of fabricated metal products, except machinery and equipment Manufacture of machinery and equipment n.e.c. Manufacture of motor vehicles, trailers and semitrailers Manufacture of other nonmetallic mineral products Manufacture of rubber and plastic products Manufacture of wearing apparel Other manufacturing
Mining and Quarrying	Extraction of crude petroleum and natural gas Mining of metal ores
Other Service	Other personal service activities
Professional, Scientific and Technical	Advertising and market research Scientific research and development
Real Estate	Real estate activities
Transportation and Storage	Air transport
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

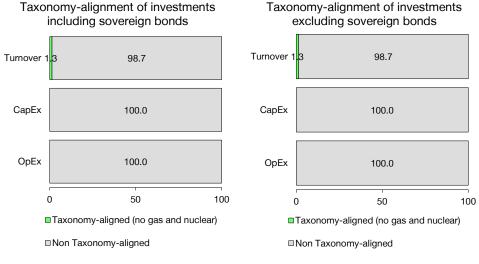

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 1.3% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

			st in fossil gas and/or nuclear energy ith the EU Taxonomy¹?
X	Yes No	In fossil gas	In nuclear energy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 20 Oct 2022 to 30 Sep 2023	0.0	0.0

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested in global equities which are listed, traded or dealt on Regulated Markets while considering environmental, social and governance factors. When researching companies for potential inclusion in the portfolio, the Investment Manager used a research framework to consider how environmental, social or governance factors may affect the sustainability of a company's profit growth. The Fund used norms-based evaluation, business activity-based exclusions (both quantitatively and qualitatively) and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of		It made sustainable investments with a social objective:%		 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did not make any sustainable investments
socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.
- 4. Positive contribution towards long-term interests of all stakeholders and broader society.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

How did the sustainability indicators perform and compare to previous periods?

One of the third-party providers the Investment Manager uses to evaluate compliance with the United Nations Global Compact moved Tencent Holdings and Baidu.com to non-compliant. Upon undertaking further research, the Fund sold out of these holdings during the reference period.

None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2022	To Sep 2023
Compliance with UNGC Policy*	98.9	99.0
Compliance with sector- based exclusions*	98.9	99.0
Holdings voted in line with Voting and Engagement Guidelines*	98.9	99.0
Holdings qualitatively assessed to meet the long-term interests of all stakeholders and broader society*	98.9	99.0

*All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

36.1% of the Fund was invested in economic activities that contribute to either an environmental and/or social objective (sustainable investments) during the reference period. These economic activities contributed to such objectives as they: (a) generated a certain level of revenues, either through products and/or services, that are aligned with the broader sustainable objectives of society as currently best defined by the United Nations Sustainable Development Goals ('SDGs'), some which can be mapped on a high-level basis against the six

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

environmental objectives outlined in the EU Taxonomy and/or (b) are reducing absolute greenhouse gas emissions, either through their products and/or services or business practices, to seek to achieve the long-term global warming objectives of the Paris Climate Agreement. Reduction of greenhouse gas emissions aligns with the climate mitigation objective in the EU Taxonomy. The Fund did not commit to invest in economic activities that qualify as environmentally sustainable under the six environmental objectives of the EU Taxonomy but did make sustainable investments that at a high-level contribute to these specific environmental objectives, which are disclosed below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

How were the indicators for adverse impacts on sustainability factors taken into account?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager assessed holdings using a norms-based evaluation and the Fund complied with the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document. As such, in the Investment Manager's opinion, all holdings operated in accordance with the principles set out in the United Nations Global Compact for Business and related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that derive more than 10% of their annual revenues from: (i) the production and/or distribution of alcohol; (ii) the production and/or distribution of support systems and services for production of military weapon systems and components, and provision of support systems and services for production of distribution of adult entertainment; (iv) Fossil Fuel extraction and production; (v) the provision of gambling services; or (iv) the retail sale of tobacco. The Investment Manager also excludes companies that derive more than 5% of their annual revenues from the production of tobacco.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

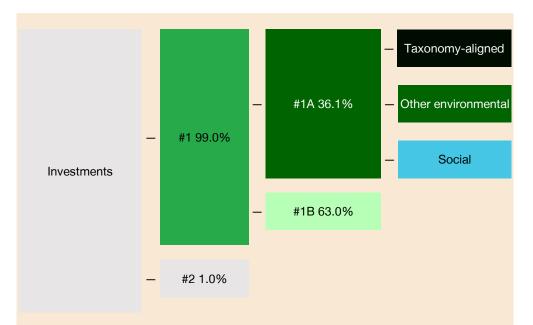

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it primarily invested at least 99.0% in global equities (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. This included 36.1% investment in sustainable investments with environmental and/or social objectives. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental and/or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

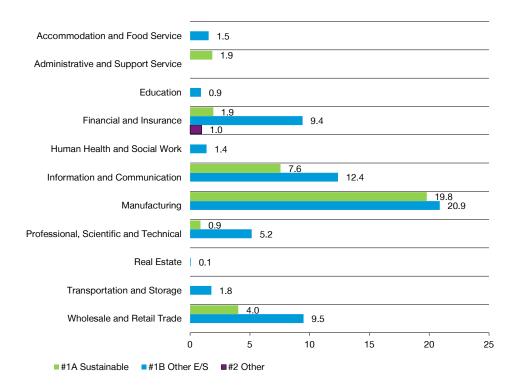

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

EU Taxonomy Objective	%
Climate change mitigation	23.2

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

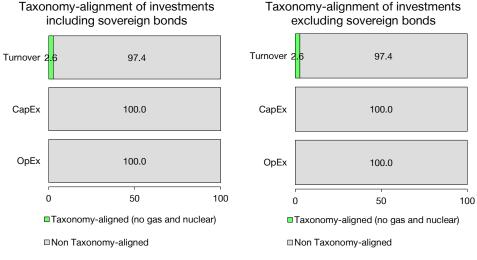

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 2.6% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research. An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes
In fossil gas
In nuclear energy

X No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

	Including S	overeign B	onds	Excluding Sovereign Bonds		
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
01 Oct 2021 to Sep 30, 2022	4.7	0.0	0.0	4.7	0.0	0.0

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 23.3% during the reference period. As such, the Fund has exceeded the minimum commitment in investments with an environmental objective not aligned with the EU Taxonomy as outlined in the pre-contractual document. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 10.2% during the reference period. As such, together with the actual share of sustainable investments with an environmental objective not aligned with the EU Taxonomy, the Fund has exceeded the total minimum proportion of sustainable investments commitment as outlined in the pre-contractual document.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested in equity securities with the aim of providing above average returns over the long term by investing in companies which demonstrate long term growth prospects and good stewardship. The assessment of sustainability and good stewardship was significantly integrated into the Investment Manager's stock research framework. The Fund used positive screening through the Investment Manager's inclusion framework, norms-based evaluation, business activity-based exclusions and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Managed greenhouse gas emissions intensity as measured by the Fund's Weighted Average Carbon Intensity ('WACI') and an aim for this to be lower than the composite index comprised of an allocation of 70% ICE BofA Global Corporate Index and 30% BofA Global High Yield Index (hedged to USD) (the 'Index').
- 4. Sustainability-related characteristics achieved through the inclusion of investments deemed compatible with a sustainable economy following a qualitative evaluation.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform and compare to previous periods?

One of the third-party providers the Investment Manager uses to evaluate compliance with the UNGC classify Volkswagen AG as non-compliant with the UNGC. Through its own research, the Investment Manager classifies Volkswagen AG as watchlist against the UNGC and therefore compliant with the Investment Manager's UNGC Policy. However, additional engagement and monitoring has been undertaken and the company remains under review. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

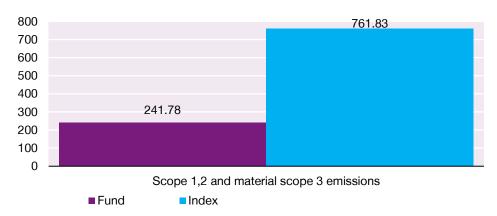

Indicator	To Sep 2022	To Sep 2023

^{**} For reference period to September 2022, the sustainability indicator used was Weighted Average Greenhouse Gas Intensity (WAGI). For reference period to September 2023, this has changed to Weighted Average Carbon Intensity (WACI)

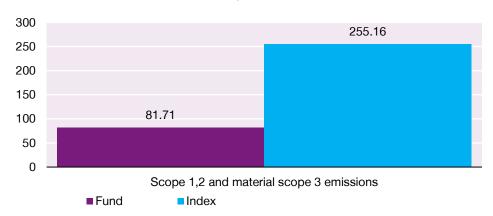

2023 Weighted Average Carbon Intensity

(tCO2e per \$M revenue)

2022 Weighted Average Greenhouse Gas Intensity

(tCO2e per \$M EVIC)

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

19.4% of the Fund was invested in economic activities that contribute to either an environmental and/or social objective (sustainable investments) during the reference period. These economic activities contributed to such objectives as they: (a) generated a certain level of revenues, either through products and/or services, that are aligned with the broader sustainable objectives of society as currently best defined by the United Nations Sustainable Development Goals ('SDGs'), some which can be mapped on a high-level basis against the six environmental objectives outlined in the EU Taxonomy and/or (b) are reducing absolute greenhouse gas emissions, either through their products and/or services or business practices, to seek to achieve the long-term global warming objectives of the Paris Climate Agreement. Reduction of greenhouse gas emissions aligns with the climate mitigation objective in the EU Taxonomy. The Fund did not commit to invest in economic activities that qualify as environmentally sustainable under the six environmental objectives of the EU Taxonomy but did make sustainable investments that at a high-level contribute to these specific environmental objectives, which are disclosed below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

How were the indicators for adverse impacts on sustainability factors taken into account?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) dialogue and engagement and (b) collaborative activities.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager assessed holdings using a norms-based evaluation and the Fund complied with the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document. As such, in the Investment Manager's opinion, all holdings operated in accordance with the principles set out in the United Nations Global Compact for Business and related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, (c) by excluding holdings that generate more than: (i) 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) 10% of annual revenues from (a) the extraction and/or production of oil and/or gas, and/or (b) the mining of thermal coal; (iii) 30% of annual revenues from the sale of thermal coal; or (iv) 5% of annual revenues from the production of tobacco, and (d) by managing weighted average carbon intensity with an aim for this to be lower than the Index.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
Citigroup 4.412% 2031	Financial and Insurance	United States	2.0
J.P. Morgan 6.4% 2038	Financial and Insurance	United States	2.0
Investec 2.625% 2026-32 T2	Financial and Insurance	UK	1.9
EIB 4.875% 2036	Extraterritorial Organisations and Bodies	International	1.9
KFW 0.375% 2025	Financial and Insurance	Germany	1.8
MetLife 3.5% 2026	Financial and Insurance	United States	1.7
Helvetia Hdg 2.75% 2031-41 T2	Financial and Insurance	Luxembourg	1.7
Alcoa 4.125% 2029 (144A)	Manufacturing	Netherlands	1.6
Temasek 5.375% 2039 (RegS)	Financial and Insurance	Singapore	1.5
Marks and Spencer 7.125% 2037 (144A)	Wholesale and Retail Trade	UK	1.5
LeasePlan 7.375% 2024 Perp AT1	Financial and Insurance	Netherlands	1.4
EDF 6% 2026 Perp	Electricity, Gas, Steam and Air Conditioning	France	1.4
Telereal 3.5625% 2031/36 (A3)	Real Estate	UK	1.4
Berkshire Hathaway 2.85% 2050	Financial and Insurance	United States	1.4
Pershing Square Holdings 1.375% 2027	Financial and Insurance	Channel Islands, IoM	1.4

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

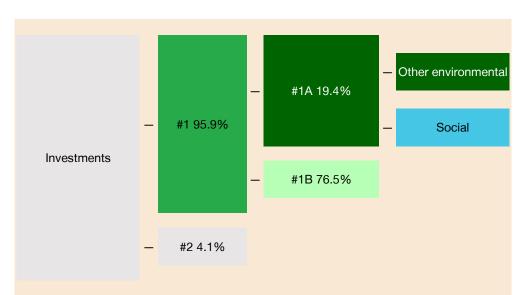

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 95.9% in fixed and floating global corporate bonds (directly although it may have also invested indirectly through eligible collective investment schemes) that are aligned with the same characteristics. This included 19.4% investment in sustainable investments with environmental or social objectives. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. In the reference period 21 Dec 2021 to 30 Sep 2022, US T-bills were classified as #1, these are now classified as #2 as they are used for liquidity and/or efficient portfolio management purposes. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

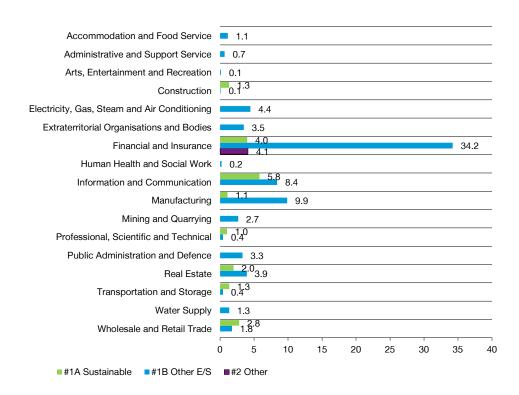

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

EU Taxonomy Objective	%
Climate change mitigation	14.9
Climate change adaptation	0.7

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Accommodation and Food Service	Accommodation
	Food and beverage service activities
Administrative and Support Service	Rental and leasing activities
Arts, Entertainment and Recreation	Gambling and betting activities
Construction	Civil engineering Construction of buildings
Electricity, Gas, Steam and Air Conditioning	Electricity, gas, steam and air conditioning supply
Extraterritorial Organisations and Bodies	Activities of extraterritorial organisations and bodies
Financial and Insurance	Activities auxiliary to financial services and insurance activities
	Financial service activities, except insurance and pension funding
	Insurance, reinsurance and pension funding, except compulsory social security
Human Health and Social Work	Human health activities
Information and Communication	Computer programming, consultancy and related activities Information service activities
	Motion picture, video and television programme production, sound recording and music publishing activities
	Programming and broadcasting activities Publishing activities
	Telecommunications
Manufacturing	Manufacture of basic metals Manufacture of basic pharmaceutical products and pharmaceutical preparations Manufacture of chemicals and chemical products Manufacture of coke and refined petroleum products Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of fabricated metal products, except machinery and equipment Manufacture of machinery and equipment n.e.c. Manufacture of motor vehicles, trailers and semitrailers Manufacture of rubber and plastic products Manufacture of wood and of products of wood and cork, except furniture; manufacture of articles of straw and plaiting materials Other manufacturing
Mining and Quarrying	Mining of metal ores Other mining and quarrying
Professional, Scientific and Technical	Advertising and market research Legal and accounting activities Scientific research and development
Public Administration and Defence	Public administration and defence; compulsory social security
Real Estate	Real estate activities
Transportation and Storage	Postal and courier activities Warehousing and support activities for transportation
Water Supply	Water collection, treatment and supply
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles
	, , , , , , , , , , , , , , , , , , , ,

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

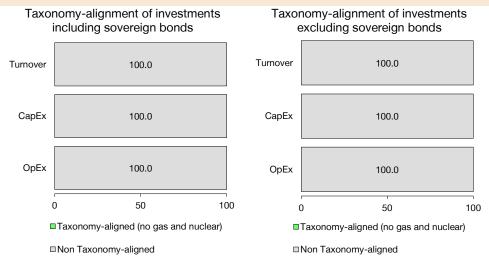

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

There were no sustainable investments in the portfolio with an environmental objective aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹ ?					
Yes In fossil gas X No	In nuclear energy				

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Including Sovereign Bonds			Excluding Sovereign Bonds		
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
21 Dec 2021 to Sep 30, 2022	0.0	0.0	0.0	0.0	0.0	0.0

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 15.7% during the reference period. As such, the Fund has exceeded the minimum commitment in investments with an environmental objective not aligned with the EU Taxonomy as outlined in the pre-contractual document. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 3.7% during the reference period. As such, together with the actual share of sustainable investments with an environmental objective not aligned with the EU Taxonomy, the Fund has exceeded the total minimum proportion of sustainable investments commitment as outlined in the pre-contractual document.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk or US T-bills). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested primarily in fixed and floating global corporate bonds of any rating, including below investment grade. The Fund aimed to promote certain sustainability-related characteristics and contribute to the objectives of the Paris Climate Agreement through a sustainable and low-carbon portfolio, measured by using the WACI of the portfolio. The Fund used positive screening through qualitative evaluation of contribution towards sustainability dimension, norms-based evaluation, and business activity-based exclusions to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual document.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

Environmental and/or social characteristics

	Does	this financial product have a sustaina	able ir	nvestment objective?
investment means an investment in an	••	Yes	••	X No
economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.		It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 65.2% of sustainable investments with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of		It made sustainable investments with a social objective:%		with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy X with a social objective It promoted E/S characteristics, but did not make any sustainable investments
socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.
- 3. Meaningful Improvements in health outcomes for primarily large segments of the population assessed qualitatively through the Investment Manager's proprietary research framework.
- 4. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

How did the sustainability indicators perform and compare to previous periods?

All holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2022	To Sep 2023
Compliance with UNGC Policy*	99.2	99.2
Compliance with sector- based exclusions*	N/A	99.2
Holdings voted in line with Voting and Engagement Guidelines*	99.2	99.2
Holdings qualitatively assessed to meet the social and governance criteria*	99.2	99.2

*All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

65.2% of the Fund was invested in economic activities that contribute to a social objective (sustainable investments) during the reference period. These economic activities contributed to such objectives as they generated a certain level of revenues, either through products and/or services, that are aligned with the broader sustainable objectives of society as currently best defined by the United Nations Sustainable Development Goals ('SDGs'). The Fund did not commit to invest in economic activities that qualify as environmentally sustainable under the six environmental objectives of the EU Taxonomy.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

How were the indicators for adverse impacts on sustainability factors taken into account?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager assessed holdings using a norms-based evaluation and the Fund complied with the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document. As such, in the Investment Manager's opinion, all holdings operated in accordance with the principles set out in the United Nations Global Compact for Business and related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts in line with the investment managers Principle Adverse Impacts Due Diligence Policy that is avaliable on the Investment Manager's website. The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that derive: (i) more than 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) more than 30% of annual revenues from the mining and/or sale of thermal coal; or (iii) more than 5% of annual revenues from the production of tobacco.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
argenx	Professional, Scientific and Technical	Netherlands	7.4
Genmab	Professional, Scientific and Technical	Denmark	7.2

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 99.2% in global equities of companies involved in the healthcare industry (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. This included 65.2% investment in sustainable investments with environmental or social objectives. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

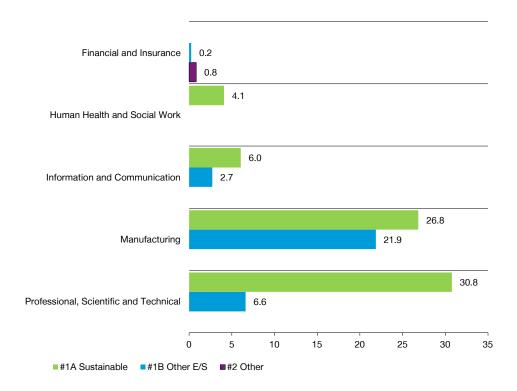

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Financial and Insurance	Activities auxiliary to financial services and insurance activities Insurance, reinsurance and pension funding, except compulsory social security
Human Health and Social Work	Human health activities
Information and Communication	Information service activities Publishing activities
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations Manufacture of computer, electronic and optical products Other manufacturing
Professional, Scientific and Technical	Scientific research and development

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

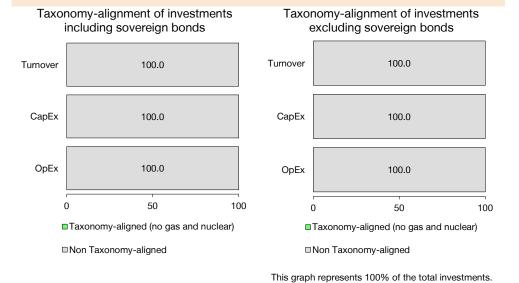

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

There were no sustainable investments in the portfolio with an environmental objective aligned with the EU Taxonomy during the reference period.

			t in fossil gas and/or nuclear energy th the EU Taxonomy¹?
	Yes No	In fossil gas	In nuclear energy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Including S	overeign B	onds	Excluding	Sovereign B	onds
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
21 Dec 2021 to Sep 30, 2022	0.0	0.0	0.0	0.0	0.0	0.0

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 65.2% during the reference period. As such, the Fund has exceeded the total minimum proportion of sustainable investments commitment as outlined in the pre-contractual document.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and focused on investing in global equities selected from companies involved in the healthcare industry and which are innovative in areas such as diagnostics, treatment and prevention and contribute to solving a problem for the healthcare system in a method that cares about its patients. The consideration of sustainable investment factors was integral to the Fund's investment process, both before investment and through ongoing monitoring, in the form of ESG focused investment research and targeted company engagement. The Fund used positive screening through the Investment Manager's targeted questions embedded in its proprietary research framework, norms-based evaluation and active ownership to determine whether a company is managed and behaving responsibly and to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

Baillie Gifford Worldwide Islamic Global Equities Fund 213800ENJXSH22ELRU14

Environmental and/or social characteristics

	Does	this financial product have a sustaina	able ii	nvestment objective?
investment means an investment in an	••	Yes	••	X No
economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.		It made sustainable investments with an environmental objective:% in economic activities that qualify as environmentally sustainable under the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy	X	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of 50.0% of sustainable investments X with an environmental objective in economic activities that qualify as environmentally sustainable under the EU Taxonomy
The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities. That Regulation does not lay down a list of		It made sustainable investments with a social objective:%		 with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did not make any sustainable investments
socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.
- 4. Positive societal contribution assessed qualitatively.
- 5. Promotion of the welfare of humankind and prevention of harm through adherence to Sharia principles.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability
indicators measure
how the
environmental or
social characteristics
promoted by the
financial product are

attained.

How did the sustainability indicators perform and compare to previous periods? All holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2022	To Sep 2023
Compliance with UNGC Policy*	99.1	96.8
Compliance with sector- based exclusions*	99.1	96.8
Holdings voted in line with Voting and Engagement Guidelines*	99.1	96.8
Holdings qualitatively assessed to deliver positive societal contribution*	99.1	96.8
Holdings qualitatively assessed to promote the welfare of humankind and prevention of harm through adherence to Sharia principles*	99.1	96.8

^{*}All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

What were the objectives of the sustainable investments that the financial

product partially made and how did the sustainable investment contribute to such objectives?

50% of the Fund was invested in economic activities that contribute to either an environmental and/or social objective (sustainable investments) during the reference period. These economic activities contributed to such objectives as they: (a) generated a certain level of revenues, either through products and/or services, that are aligned with the broader sustainable objectives of society as currently best defined by the United Nations Sustainable Development Goals ('SDGs'), some which can be mapped on a high-level basis against the six environmental objectives outlined in the EU Taxonomy and/or (b) are reducing absolute greenhouse gas emissions, either through their products and/or services or business practices, to seek to achieve the long-term global warming objectives of the Paris Climate Agreement. Reduction of greenhouse gas emissions aligns with the climate mitigation objective in the EU Taxonomy. The Fund did not commit to invest in economic activities that qualify as environmentally sustainable under the six environmental objectives of the EU Taxonomy but did make sustainable investments that at a high-level contribute to these specific environmental objectives, which are disclosed below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

How were the indicators for adverse impacts on sustainability factors taken into account?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager assessed holdings using a norms-based evaluation and the Fund complied with the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document. As such, in the Investment Manager's opinion, all holdings operated in accordance with the principles set out in the United Nations Global Compact for Business and related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by not making investments which were, in its judgement and/or in the judgement of the Sharia Supervisory Board, inconsistent with Sharia principles. The Investment Manager was responsible for ascertaining the compliance of the Fund's operations in accordance with the Sharia Compliance Systems.

The Fund also excluded companies that derive more than more than 30% of annual revenues from the mining and/or sale of thermal coal.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 Oct 2022 to 30 Sep 2023

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

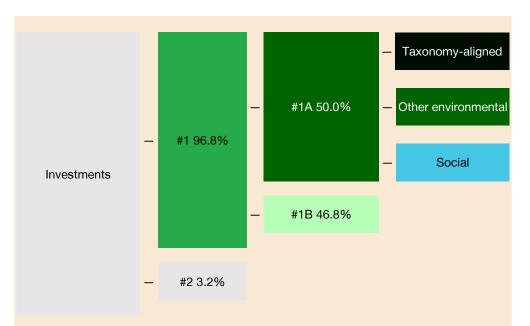

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 96.8% in global equities (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. This included 50.0% investment in sustainable investments with environmental or social objectives. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

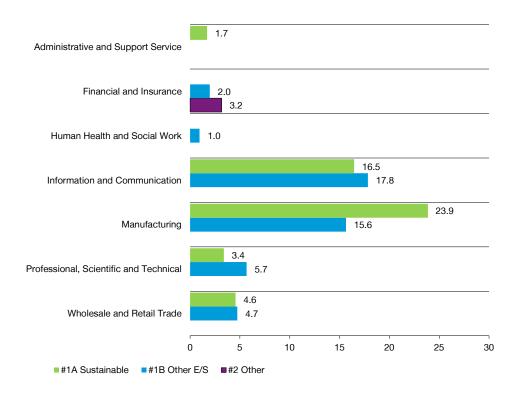

- **#1 Aligned with E/S characteristics** includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

EU Taxonomy Objective	%
Climate change mitigation	27.2
Climate change adaptation	0.0

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Administrative and Support Service	Employment activities
Financial and Insurance	Activities auxiliary to financial services and insurance activities
Human Health and Social Work	Human health activities
Information and Communication	Information service activities Publishing activities
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations Manufacture of chemicals and chemical products Manufacture of coke and refined petroleum products Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of machinery and equipment n.e.c. Manufacture of motor vehicles, trailers and semitrailers Manufacture of other nonmetallic mineral products Other manufacturing
Professional, Scientific and Technical	Advertising and market research Scientific research and development
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

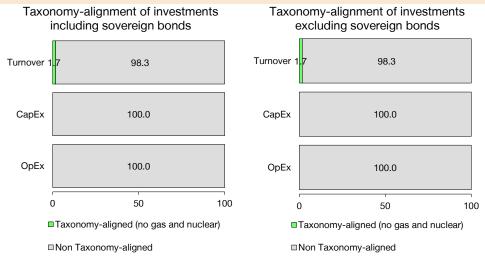

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 1.7% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research. An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes
In fossil gas
In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Including S	overeign B	onds	Excluding	Sovereign B	onds
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
10 May 2022 to Sep 30, 2022	3.3	0.0	0.0	3.3	0.0	0.0

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 25.5% during the reference period. As such, the Fund has exceeded the minimum commitment in investments with an environmental objective not aligned with the EU Taxonomy as outlined in the pre-contractual document. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 22.8% during the reference period. As such, together with the actual share of sustainable investments with an environmental objective not aligned with the EU Taxonomy, the Fund has exceeded the total minimum proportion of sustainable investments commitment as outlined in the pre-contractual document.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested in global equities with specific focus on companies that have a purpose to deliver positive societal contribution. The assessment of compliance with Sharia was integrated into the Investment Manager's stock research framework in which the Investment Manager considered whether a company is capable of investment under Sharia principles. The assessment of sustainability and societal contribution was significantly integrated into the Investment Manager's stock research framework in which the Investment Manager considered the likely positive legacy of the company for the industry it opeates in and for the society more broadly. The Fund used positive screening through the Investment Manager's qualitative assessment of societal contribution, norms-based evaluation, business activity-based exclusions and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the precontractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform and compare to previous periods? All holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2023
Compliance with UNGC Policy*	99.3
Compliance with sector- based exclusions*	99.3
Holdings voted in line with Voting and Engagement Guidelines*	99.3

*All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that derive more than: (i) 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) more than 5% of annual revenues from the production of tobacco; (iii) more than 20% of annual revenues from the production and/or distribution of, electricity generation from, or construction of, thermal coal and directly associated facilities; (iv) more than 10% of annual revenues or reserves in Arctic exploration or development; or (v) more than 10% of annual revenues from the production of oil sands or tar sands.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 14 Oct 2022 to 30 Sep 2023

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

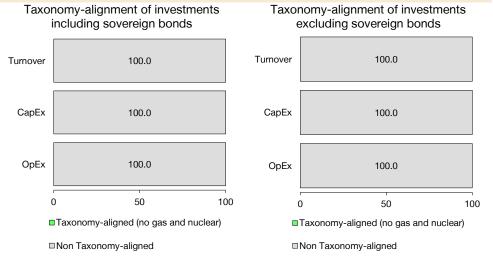

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

There were no sustainable investments in the portfolio with an environmental objective aligned with the EU Taxonomy during the reference period.

			t in fossil gas and/or nuclear energy th the EU Taxonomy¹?
X	Yes No	In fossil gas	In nuclear energy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested in equities which are listed, traded or dealt on Regulated Markets while considering environmental, social and governance factors. When researching companies for potential inclusion in the portfolio, the Investment Manager used a research framework to consider how environmental, social or governance factors may affect the sustainability of a company's profit growth. The Fund used norms-based evaluation, business activity-based exclusions (both quantitatively and qualitatively) and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

aligned with the						
Taxonomy or not.						

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.
- 4. Managed greenhouse gas emissions intensity as measured by the Fund's Weighted Average Carbon Intensity ('WACI') and for this to be lower than MSCI ACWI Index (the 'Index').

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

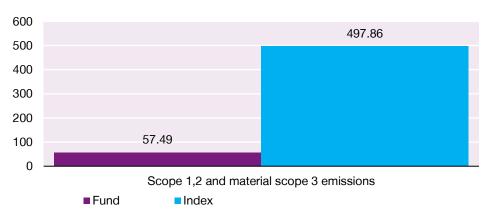

One of the third-party providers the Investment Manager uses to evaluate compliance with the UNGC classify Tencent Holdings as non-compliant with the UNGC. Through its own research, the Investment Manager classifies Tencent Holdings as watchlist against the UNGC and therefore compliant with the Investment Manager's UNGC Policy. However additional engagement and monitoring has been undertaken and the company remains under review. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2023
Compliance with UNGC Policy*	97.9
Is WACI below index?	Yes
Compliance with sector- based exclusions*	97.9
Holdings voted in line with Voting and Engagement Guidelines*	97.9

*All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

Weighted Average Carbon Intensity

(tCO2e per \$M revenue)

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that derive: (i) more than 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) more than 5% of annual revenues from production of tobacco; (iii) more than 20% of annual revenues from the production and/or distribution of, electricity generation from, or construction of, thermal coal and directly associated facilities; (iii) more than 10% of annual revenues or reserves in Arctic exploration or development; or (v) more than 10% of annual revenues from the production of oil sands or tar sands.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 14 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
NVIDIA	Manufacturing	United States	6.5
Amazon.com	Wholesale and Retail Trade	United States	5.7
Tesla Inc	Manufacturing	United States	4.9
ASML	Manufacturing	Netherlands	4.8
PDD Holdings Inc	Wholesale and Retail Trade	China	4.5
Kering	Manufacturing	France	4.4
Moderna Inc	Professional, Scientific and Technical	United States	4.3
Dexcom Inc	Manufacturing	United States	4.2
Meituan	Information and Communication	China	3.6
Netflix Inc	Information and Communication	United States	3.3
Atlassian Corp Plc	Information and Communication	United States	3.3
Intuitive Surgical	Manufacturing	United States	3.2
The Trade Desk	Professional, Scientific and Technical	United States	3.2
Adyen NV	Financial and Insurance	Netherlands	3.1
Hermes International	Manufacturing	France	2.9

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

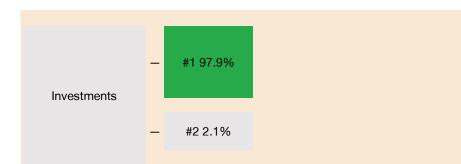

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

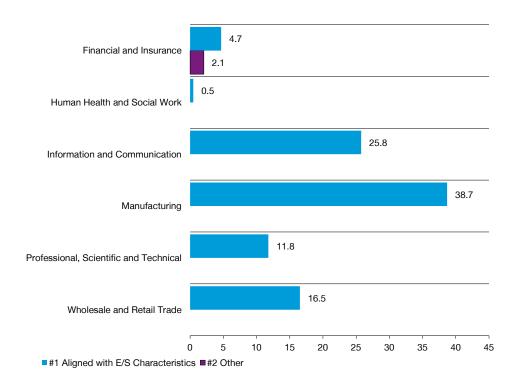

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 97.9% in global equities (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Financial and Insurance	Activities auxiliary to financial services and insurance activities Financial service activities, except insurance and pension funding
Human Health and Social Work	Human health activities
Information and Communication	Information service activities Publishing activities
Manufacturing	Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of machinery and equipment n.e.c. Manufacture of motor vehicles, trailers and semitrailers Manufacture of other transport equipment Manufacture of wearing apparel Other manufacturing
Professional, Scientific and Technical	Advertising and market research Scientific research and development
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale and retail trade and repair of motor vehicles and motorcycles
Human Health and Social Work	Human health activities
Information and Communication	Information service activities Publishing activities
Manufacturing	Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of machinery and equipment n.e.c. Manufacture of motor vehicles, trailers and semitrailers Manufacture of other transport equipment Manufacture of wearing apparel Other manufacturing
Professional, Scientific and Technical	Advertising and market research Scientific research and development
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale and retail trade and repair of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

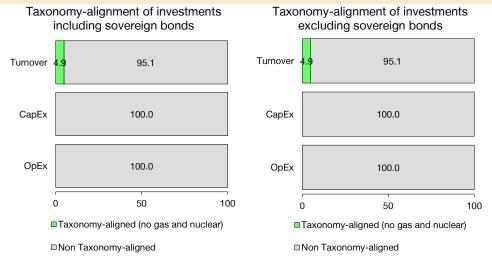

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 4.9% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes
In fossil gas
In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested in global equities which are listed, traded or dealt on Regulated Markets while considering environmental, social and governance factors. When researching companies for potential inclusion in the portfolio, the Investment Manager used a research framework to consider how environmental, social or governance factors may affect the sustainability of a company's profit growth. The Fund used norms-based evaluation, business activity-based exclusions (both quantitatively and qualitatively) and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.					

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability
indicators measure
how the
environmental or
social characteristics
promoted by the
financial product are

attained.

How did the sustainability indicators perform and compare to previous periods? All holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2022	To Sep 2023
Compliance with UNGC Policy*	98.8	99.4
Compliance with sector- based exclusions*	98.8	99.4
Holdings voted in line with Voting and Engagement Guidelines*	98.8	99.4

*All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

40.1% of the Fund was invested in economic activities that contribute to either an environmental and/or social objective (sustainable investments) during the reference period. These economic activities contributed to such objectives as they: (a) generated a certain level of revenues, either through products and/or services, that are aligned with the broader sustainable objectives of society as currently best defined by the United Nations Sustainable Development Goals ('SDGs'), some which can be mapped on a high-level basis against the six environmental objectives outlined in the EU Taxonomy and/or (b) are reducing absolute greenhouse gas emissions, either through their products and/or services or business practices, to seek to achieve the long-term global warming objectives of the Paris Climate Agreement. Reduction of greenhouse gas emissions aligns with the climate mitigation objective in the EU Taxonomy. The Fund did not commit to invest in economic activities that qualify as environmentally sustainable under the six environmental objectives of the EU Taxonomy but did make sustainable investments that at a high-level contribute to these specific environmental objectives, which are disclosed below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

How were the indicators for adverse impacts on sustainability factors taken into account?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager assessed holdings using a norms-based evaluation and the Fund complied with the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document. As such, in the Investment Manager's opinion, all holdings operated in accordance with the principles set out in the United Nations Global Compact for Business and related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that derive more than 10% of annual revenues from: (i) the production and/or distribution of alcohol; (ii) the production and/or distribution of support systems and services for production of military weapon systems and components, and provision of support systems and services for production of distribution of adult entertainment; (iv) Fossil Fuel extraction and production; (v) the provision of gambling services; or (iv) the retail sale of tobacco. The Investment Manager also excludes companies that derive more than 5% of annual revenues from the production of tobacco.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
Prosus N.V.	Information and Communication	Netherlands	5.0

Adyen NV	Financial and Insurance	Netherlands	2.5
Allegro.eu	Wholesale and Retail Trade	Poland	2.5

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

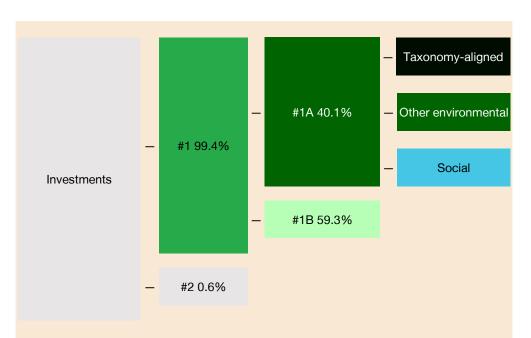

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 99.4% in European equities (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. This included 40.1% investment in sustainable investments with environmental or social objectives. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

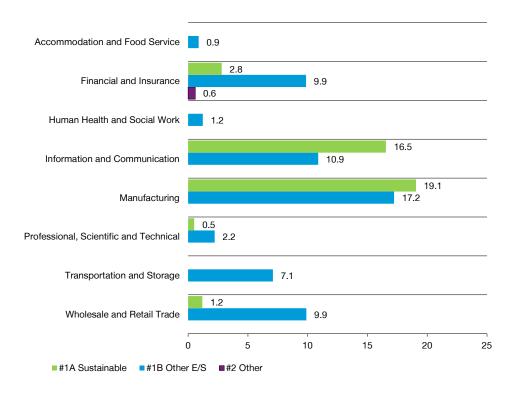

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2** Other includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

EU Taxonomy Objective	%
Climate change mitigation	34.9
Climate change adaptation	0.0

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Accommodation and Food Service	Food and beverage service activities
Financial and Insurance	Activities auxiliary to financial services and insurance activities Financial service activities, except insurance and pension funding
Human Health and Social Work	Human health activities
Information and Communication	Computer programming, consultancy and related activities Information service activities Publishing activities
Manufacturing	Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of leather and related products Manufacture of machinery and equipment n.e.c. Manufacture of other nonmetallic mineral products Manufacture of rubber and plastic products Manufacture of wearing apparel Other manufacturing
Professional, Scientific and Technical	Architectural and engineering activities; technical testing and analysis Scientific research and development
Transportation and Storage	Air transport Warehousing and support activities for transportation
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale and retail trade and repair of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

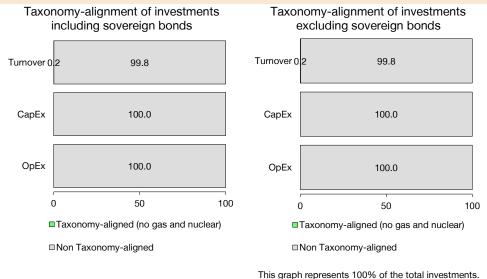

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 0.2% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research. An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

				gas and/or J Taxonomy	nuclear ener _i ¹?	ЗУ
X	Yes No	In fo	ssil gas	In nuclear e	nergy	

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Including S	overeign B	onds	Excluding	Sovereign B	onds
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
01 Oct 2021 to 30 Sep 2022	0.3	0.0	0.0	0.3	0.0	0.0

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 34.7% during the reference period. As such, the Fund has exceeded the minimum commitment in investments with an environmental objective not aligned with the EU Taxonomy as outlined in the pre-contractual document. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 5.2% during the reference period. As such, together with the actual share of sustainable investments with an environmental objective not aligned with the EU Taxonomy, the Fund has exceeded the total minimum proportion of sustainable investments commitment as outlined in the pre-contractual document.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed with the aim of providing above average returns mostly comprising of capital growth and dividend income over the long term. The assessment of sustainability was integrated into the Investment Manager's stock research framework and the Investment Manager considered management and stakeholder alignment and the company's broader contribution to society. The Fund used norms-based evaluation, business activity-based exclusions and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments included in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

Baillie Gifford

Baillie Gifford Worldwide Positive Change Fund

Principle Adverse Sustainability Impacts Statement. October 01, 2022 to September 30, 2023

Summary

Baillie Gifford considers principle adverse impacts of its investment decisions on sustainability factors and has adopted the Principal Adverse Impacts Due Diligence Policy to set its approach on the consideration of material or likely to be material principal adverse impacts.

Each investment strategy may take a different approach to reach the same goal of properly assessing and weighing up Environmental, Social and Governance (ESG) matters within its investment process. Financially material ESG issues, including the potential adverse impact of a holding, are routinely considered throughout the investment process.

In identifying additional indicators for principal adverse impacts, financial market participants are encouraged to consider the scope, severity, probability of occurrence and potentially irremediable character on sustainability factors. As additional indicators, we have identified (i) investments in companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement and (ii) number of identified cases of severe human rights issues and incidents. These additional indicators were chosen as they are aligned with issues that are considered material to the long-term growth potential of investments. Furthermore, these two additions are associated with two (climate action failure and livelihood crises) of the top ten Global Risks by likelihood and impact according to the World Economic Forum Global Risk Report for 2021. As these additional indicators are only relevant for corporates, strategies that invest in other asset classes may choose to identify additional indicators for sovereigns and real estate.

Engaging with and monitoring investments we make on behalf of clients is an integral element of our investment process and core to how we discharge our stewardship responsibilities. Investment teams and ESG analysts are involved in this process. Further details of Baillie Gifford's approach to engagement is outlined in our ESG Principles and Guidelines document available in the About Us section of our website.

We utilise the UN Global Compact to identify potential concerns at our investee companies. We also consider our holdings against related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights. Our Climate Report details our plans and commitments as they relate to climate change. These plans and commitments are based on our support for the Paris Agreement's ambition to limit global warming to well below 2°C and ideally 1.5°C. The 1.5°C target was reinforced in the 2021 Glasgow Climate Pact and reflected in the UK's 2050 net zero emissions target, which we also support.

The assessment of adverse impacts will be made based on third-party data and our own research. The third-party data used to quantify adverse impacts through various indicators is based on either backward-looking analysis or estimates (e.g. use of proxy data and/or assumptions). As such, the quality and reliability of these indicators will be dependent on companies disclosing this information. Data availability varies not only per asset class (i.e. equity versus corporate debt) but also per market (e.g. developed market versus emerging market). Whilst we expect data availability to increase in the near to medium-term for certain asset classes/markets (corporate debt, private equity and emerging markets) through various initiatives that would harmonise the disclosure of sustainability-related information (including these adverse impact indicators), for certain asset classes (e.g. currencies, derivatives) we expect these to be resolved in the longer term. Where there is no impact disclosed, this is either because a particular indicator is not relevant based on investments held in the Fund or data is not available. If it is due to the latter, then this will be reflected as 0.0 within the data coverage section. Summed values may not add up exactly to their component parts due to rounding.

Product Level commitment to reduce or mitigate Principal Adverse Impacts

Positive Change is a global equity strategy with two equally important objectives: delivering attractive investment returns and delivering a positive social and/or environmental impact. The strategy aims to achieve this by investing in companies that we believe have enduring competitive advantages and will grow their earnings faster than the market average and are providing solutions to global challenges through their products and services. Our investment approach is based upon 'bottom-up' stock selection. We pick companies based on their fundamental investment and impact attractions, irrespective of their location. More information on our philosophy, process, performance and other insights can be found on our website.

The Positive Change strategy commits to full transparency in reporting against the Principal Adverse Sustainability Impact Indicators (PASI). It commits to understanding and monitoring how each portfolio company approaches these important areas and, where we deem them to be a material detractor from the financial and sustainability performance, to making efforts to

encourage companies to reduce or mitigate their negative contributions through our stewardship activities. This may be through engagements with companies, and/or through our proxy voting decisions and investment decisions.

The Fund considered principal adverse impacts in line with the Investment Manager's Principle Adverse Impacts Due Diligence Policy that is available on the investment managers website and complied with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document. Subsequent to the reference period, the following exclusions were introduced which contribute to the consideration of principle adverse impacts: (a) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) holdings that derive (i) more than 10% of annual revenues from the production and/or distribution of armaments; (ii) more than 30% of annual revenues from the production of thermal coal; and (c) more than 5% of annual revenues from the production of tobacco. These exclusions are reflected in the pre-contractual template appended to the current Prospectus.

As a concentrated portfolio of companies whose products and services are playing a positive role in addressing social and/or environmental challenges, we believe that focusing our efforts on creating change at the company level, rather than setting portfolio absolute or relative targets on reductions across the PASI indicators, is the best way to effect real-world positive change. We therefore make no commitment to quantitative absolute or relative reductions in the portfolio-level indicators provided in this report. One exception is the proportion of companies that have set emissions reduction targets aligned with the Paris Agreement. We expect 75% of portfolio companies to have these targets by 2026 in line with the Positive Change strategy's Net Zero Asset Managers Initiative (NZAMI) commitment, further details of which can be found on our website. We believe this to be an appropriate approach for a concentrated portfolio of 25-50 holdings with an active approach to investment and stewardship. As a result, the explanations and actions described against the PASI indicators below relate to individual companies in the Positive Change portfolio.

Our primary method of identifying and investigating how companies are contributing to PASI indicators and wider ESG issues is through our proprietary pre-buy investment and impact analysis and ongoing monitoring of portfolio companies. Our robust impact analysis framework considers three pillars: Product Impact, Intent and Business Practices (ESG). Analysis of the potential for negative social or environmental impact, unintended or otherwise, is included in each of these sections but we focus most closely on the list of PASI indicators in our Business Practices (ESG) analysis. Further detail on our approach to analysis can be found in our Philosophy & Process document on our website.

We also have several processes which support our ongoing monitoring of portfolio companies using both proprietary and third-party information, including pre-trade flags and restrictions, annual audits and this document. The data contained within this report is included in the pack for portfolio review meetings which take place every 8 weeks. Each year, we publish two reports which further detail our work on understanding and mitigating adverse impacts of portfolio companies, including:

- An annual Impact Report, which includes a section on the negative contribution of portfolio companies mapped to Sustainable Development Goal targets; and,
- An annual ESG and Engagement Report 'Positive Conversations', which highlights ESG research undertaken and summarises all company engagements conducted within the year

Indicators applicable to investments in investee companies

Climate and Other Environmental Related Indicators

Greenhouse Gas Emissions

GHG Emissions		Impact	Impact
		(2022)	(2023)
Scope 1 GHG emissions		7,241.3	8,660.5
Scope 2 GHG emissions		8,407.9	9,553.8
Scope 3 GHG emissions	2	211,037.5	237,184.0
Total GHG Emissions	2	226,686.6	255,398.2
Actions taken, actions planned and targets set for the next reference period:	Our approach to mitigating climate change.		
	Baillie Gifford considers a wide range of factors that investment performance. As part of this, we believe	•	•

advantage will accrue to the climate-prepared. Companies readying themselves for the challenge by reducing emissions in their value chains will have the best chance of providing sustainable long-term investment returns for our clients.

Positive Change's second objective: to deliver a positive social and/or environmental impact naturally includes climate change, which as noted in 2017 at the inception of the strategy, is the greatest challenge of our time. As such, many of our portfolio companies are helping to decarbonise the economy and help societies adapt to climate change. We consider companies' approach to climate mitigation in our investment and impact research and, where relevant, it is considered as a factor in investment decisions.

In addition to our investment activities, we believe that we, as investors on behalf of our client, can make an important contribution to solving climate change through our engagement and support for investee companies. This takes the form of regular meetings with the management teams, investor relations and the sustainability teams of companies in the portfolio which we deem to be priorities for climate related engagement, such as the heaviest emitters and the laggards in reporting.

The basis for our engagement prioritisation is our climate audit which, supported by Baillie Gifford's central climate team, we conduct on an annual basis, assessing the approach to climate mitigation across all portfolio companies. This forms the basis of our engagement prioritisation. We also consider climate impacts in our proxy voting and, where we deem appropriate after having considered each proposal on merit, will support climate proposals at company general meetings.

We commit to transparent reporting on our approach to climate change, detailing all of our climate engagements with companies, and disclosing our assessments of climate risk. Every year we report the portfolio carbon emissions against the MSCI ACWI Index, which is the benchmark for our investment performance, as well as the MSCI ACWI Climate Change ParisAligned Index, which more accurately reflects where emissions need to be to meet the Paris Agreement. This can be found in our ESG and Engagement report 'Positive Conversations'.

Perhaps most importantly however, we will continue to look beyond just a company's ESG business practices (including carbon footprint) and focus on companies that are providing game-changing positive solutions that address the challenges of climate change, such as renewable energy, carbon capture, and a circular economy. We will support and encourage these companies to quantify the positive impact that they are providing.

Carbon Footprint	Impact (2022)	Impact (2023)
Carbon Footprint	95.1	113.4
Actions taken, actions planned and targets set for the next reference period:	During the period the changes to The Partnership for Carbon Accour Financials (PCAF) methodology saw the phase in of new sectors for inclusion in Scope 3 Material emissions. This resulted in an increase carbon footprint of the portfolio.	
GHG intensity of investoe companies	Also, see above 'Our approach to mitigating climate change' and 'NZ Commitments'.	ZAMI

GHG intensity of investee companies	Impact	Impact
	(2022)	(2023)
Scope 1+2 Intensity (t/USD million sales)	41.6	33.5

Biodiversity

Activities negatively affecting biodiversity-sensitive	Impact Imp	act
areas	(2022) (20	23)
Share of investments in investee companies with	0.0	0.0
sites/operations located in or near to biodiversity-		
sensitive areas where activities of those investee		
companies negatively affect those areas		
Actions taken, actions planned and targets set for	Baillie Gifford has developed a proprietary portfolio biodiversity audit	
the next reference period:	which we conduct for the Positive Change strategy on at least an annua	ıl
	basis. We then take a risk-based approach to conducting further analysis	is
	and engagement with companies that we feel are most exposed to	
	biodiversity impacts and related risks. Our holdings exposed to agricultu	ure
	and mineral supply chains have been prioritised for engagement.	

Water

Emissions to water	Impact Imp (2022) (20	act (23)
Tonnes of emissions to water generated by investee companies per million EUR invested, expressed as a weighted average		8.0
Actions taken, actions planned and targets set for the next reference period:	Each year we conduct a water audit of all portfolio companies which examines company reporting on water withdrawal, usage and exposure water stressed regions. This is also a relevant topic in our climate risk assessments, which we conduct at a portfolio level twice a year, and annually for our TCFD report. We have prioritised companies with exposure to areas of water scarcity and semiconductor manufacturing for further engagement.	

Waste

Hazardous waste and radioactive waste ratio	Impact Impac (2022) (2023
Tonnes of hazardous waste and radioactive waste	0.0 0.
generated by investee companies per million EUR	
invested, expressed as a weighted average	
Actions taken, actions planned and targets set for the next reference period:	The Positive Change strategy has a very low hazardous waste intensity when compared with the MSCI ACWI benchmark, but also a much higher proportion of companies reporting on their hazardous waste. The amount of hazardous waste varies dramatically by sector. While we have engaged on hazardous waste in the past for relevant sectors and companies, it is not currently an engagement priority.

Social and Employee, Respect for Human Rights, Anti-Corruption and Bribery Matters

Social and Employee Matters

Violations of UN Global Compact principles and Organisation for Economic Cooperation and Development (OECD) Guidelines for Multinational Enterprises	Impact Impac (2022) (2023
Share of investments in investee companies that have been involved in violations of the UNGC principles or OECD Guidelines for Multinational Enterprises	0.0 0.
Actions taken, actions planned and targets set for the next reference period:	This factor is routinely monitored centrally at Bailie Gifford. As per Baillie Gifford's Stewardship Approach, we expect all holdings to operate in accordance with the principles and standards set out in the United Nations Global Compact (UNGC). There have been no reported violations. One company in the portfolio is on the MSCI UNGC Watchlist and we continue to engage and evaluate accordingly. If we identify any violations in the future, we commit to engaging with companies to understand the situation and encourage redress where appropriate. As long-term, bottom-up, active investors, divestment is the last resort, following significant engagement efforts.

Lack of processes and compliance mechanisms to monitor compliance with UN Global Compact		Impact (2022)	Impact (2023)
principles and OECD Guidelines for Multinational		()	(====)
Enterprises			
Share of investments in investee companies without policies to monitor compliance with the UNGC principles or OECD Guidelines for Multinational Enterprises or grievance /complaints handling mechanisms to address violations of the UNGC principles or OECD Guidelines for Multinational Enterprises		69.8	71.9
Actions taken, actions planned and targets set for the next reference period:	A high proportion of our portfolio has no process monitoring compliance with the UNGC. We assess non-compliance for multinational enterprises in their supply chains. In 2021 we conducted a sociathe supplier management, codes of conduct and diligence of all portfolio companies.	ss the greatest ne portfolio to s al audit which a	risk of it within assessed

Unadjusted gender pay gap	Impact Impac
	(2022) (2023)
Average unadjusted gender pay gap of investee	-0.2 5.
companies	
Actions taken, actions planned and targets set for the next reference period:	While the average gender pay gap of companies in the Positive Change portfolio is substantially below the MSCI ACWI benchmark, the coverage for this metric is very limited. During the period the unadjusted gender pay gap of the portfolio has increased. However, this is due to the decrease in the provision of data at portfolio companies, leaving data available for only one company in the portfolio.
	We will continue to encourage gender pay assessments and reporting, although we are cognisant that such reporting is only mandatory in certain jurisdictions (e.g. UK, California).

Board gender diversity	Impact Impac (2022) (2023
Average ratio of female to male board members in investee companies, expressed as a percentage of all board members	30.8 33.5
Actions taken, actions planned and targets set for the next reference period:	We believe that gender diversity is one of several characteristics that can lead to better decision making on company boards, although its financial materiality varies by the size of company and stage of growth, as well as the business it conducts. However, we also recognise that gender diversity at a senior level is important for inclusivity and for creating a more inclusive society in the future. Again, our portfolio compares favourably to the MSCI ACWI Benchmark, but there is still a long way to go. In our socia audit we identified several companies where board gender diversity could be improved and we will continue to consider this in our conversations with the board and our proxy voting, encouraging more gender diversity.

Exposure to controversial weapons (anti-personnel	Impact	Impact
mines, cluster munitions, chemical weapons, and	(2022)	(2023)
biological weapons)		
Share of investments in investee companies involved	0.0	0.0
in the manufacture or selling of controversial		
weapons		
Actions taken, actions planned and targets set for the next reference period:	We will continue to monitor and screen out companies directly excontroversial weapons and, where appropriate, seek to understart downstream involvement of portfolio companies. We do not expensive intentional exposure to this area because of the Positive Chimpact objective and because of Baillie Gifford's firm-wide level on investing in controversial weapons. In September 2023, one had Daikin Industries, was linked to controversial weapons by our serprovider due to the production of smoke bombs containing white phosphorus. Following further research, we took the decision to the holding. Whilst our research indicated that the intended use of weapon was not for controversial purposes, we felt that the holding longer aligned with the philosophy of the strategy.	nd any ect to ange restriction olding, vice e sell out of of the

Emissions

Investments in companies without carbon emission reduction targets	Impact Impac (2022) (2023
Share of investments in investee companies without carbon emission reduction initiatives aimed at aligning with the Paris Agreement	24.8 35.6
Actions taken, actions planned and targets set for the next reference period:	Under our NZAMI commitments for the Positive Change strategy we expect 75% of portfolio companies to have appropriate net zero aligned targets by 2026 and 90% of portfolio companies to have appropriate net zero aligned targets by 2030. For further information on our NZAMI targets please see above 'Our approach to mitigating climate change' and 'NZAM Commitments'.

Human Rights

Number of identified cases of severe human rights	Impact Imp	act
issues and incidents	(2022) (20	23)
Number of cases of severe human rights issues and	0.0	0.0
incidents connected to investee companies on a		
weighted average basis		
Actions taken, actions planned and targets set for the next reference period:	We are not aware of any recent cases of severe human rights issues or incidents connected to portfolio companies. However, we are vigilant to such incidents taking place and will continue to encourage companies to continuously improve their monitoring and enforcement of internationally recognised human rights within their own operations and their supply chain. We will prioritise research and engagement with companies that have mineral supply chains and operations in jurisdictions with poor human rights regulation and governance.	0

Appendix 1 - Data Coverage

The following coverage statistics are for the current reporting period.

Baillie Gifford relies on a third party data provider (MSCI) for sufficient coverage, estimation and collation of accurate reporting by companies themselves. However we recognise that coverage of different metrics may vary and may in turn impact the data disclosed in this report. Therefore, we have included coverage figures for each metric that is used in this report in an effort to provide transparency of the data that is being used and how it impacts the overall reporting at portfolio level. We have also identified where we view the data coverage as Good, Medium or Poor and the actions we are taking to improve coverage and data quality (see below).

Coverage relative to Eligible Assets	Category	Explanation
>80%	Good	At present we view this as satisfactory coverage but expect coverage levels to continue to improve
20% - 80%	Medium	We review metrics in this group with an expectation that those at the higher end of the scale will continue to improve. For those at the lower end of the scale, we may seek to improve disclosure through corporate engagement but recognise different disclosure regimes exist globally and recognise the pace of improvement will vary across different jurisdictions.
<20%	Poor	We view this level of coverage as unsatisfactory but acknowledge that for these metrics, coverage is poor in general. As above, we may seek to engage with investee companies to encourage better disclosure.

The figure for Coverage below has been calculated based on percentage of total AUM. However the Category (Good, Medium or Poor) has been determined based on Coverage as a percentage of Eligible Assets. For example, if the figures for Coverage and Eligible Assets are the same, this means we have data for all the assets which are eligible to report that metric and therefore the Category will be considered Good.

Over the course of 2023, we are continuing to engage in work to improve our data processing capacity. This will allow us to take on additional third party sources of data to enhance the scope of our coverage. We do this while bearing in mind that methodologies differ between third parties and increased coverage may not always lead to higher quality data, but that the landscape continues to evolve and mature.

To what extent was the sustainable investment objective of this financial product met?

The Fund contributed towards a more sustainable and inclusive world by investing primarily in the equities of companies whose products and/or services made a positive social and/or environmental impact in the Fund's four impact themes, each of which represent key global challenges: (i) social inclusion and education, (ii) environment and resource needs, (iii) healthcare and quality of life and (iv) base of the pyramid (i.e. addressing the needs of the poorest four billion people in the world). The impact analysis was carried out using a framework that is based upon assessing three factors: (i) intent, (ii) product impact and (iii) business practices.

Through the product impact analysis, all companies in the Fund's portfolio met the sustainable investment objective of the financial product, because their products and/or services address a global environmental and/or social challenge. As part of the assessment of product impact, the contribution that the companies' products and/or services made to the United Nations Sustainable Development Goals (SDGs) was mapped using the 169 targets that underpin the SDGs. The SDGs are made up of 17 goals, some of which can be mapped on a high-level basis against the six environmental objectives outlined in the EU Taxonomy. The Fund did not invest in line with a predetermined environmental theme, and there was no commitment as to which specific environmental objectives in the EU Taxonomy the Fund would contribute to. However, these specific environmental objectives are disclosed below. No specific index has been designated as a reference benchmark for the purpose of attaining the sustainable investment objective.

Sustainability indicators measure how the sustainable objectives of the financial product are attained.

How did the sustainability indicators perform and compare to previous periods?

All holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party. However, third party assurance is provided over impact reporting produced in relation to the Positive Change investment strategy.

Indicator	To Sep 2022	To Sep 2023
Compliance with UNGC Policy*	98.9	99.1
Compliance with sector- based exclusions*	98.9	99.1
Holdings voted in line with Voting and Engagement Guidelines*	98.9	99.1
Holdings qualitatively assessed to meet the impact criteria*	98.9	99.1
Holdings qualitatively assessed to have a linkage with the SDGs*	98.9	99.1

^{*}All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments not cause significant harm to any sustainable investment objective?

How were the indicators for adverse impacts on sustainability factors taken into account?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator.

The Fund considered principal adverse impacts on a qualitative basis primarily through the following exclusions: (a) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) holdings that derive: (i) more than 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) more than 30% of annual revenues from the mining and/or sale of thermal coal; or (iii) more than 5% of annual revenues from the production of tobacco.

When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager assessed holdings using a norms-based evaluation. As such, in the Investment Manager's opinion, all holdings operated in accordance with the principles set out in the United Nations Global Compact for Business and related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights during the reference period.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts in line with the Investment Manager's Principle Adverse Impacts Due Diligence Policy that is available on the Investment Manager's website and complied with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document. Principle adverse impacts that are not mitigated through qualitative exclusions, are identified and if needed addressed through our controversies monitoring and stewardship activities which include research, engagement, and proxy voting.

The Fund considered principal adverse impacts on a qualitative basis primarily through the following exclusions: (a) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) holdings that derive: (i) more than 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) more than 30% of annual revenues from the mining and/or sale of thermal coal; or (iii) more than 5% of annual revenues from the production of tobacco.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
MercadoLibre	Wholesale and Retail Trade	Brazil	7.2
ASML	Manufacturing	Netherlands	6.6
TSMC	Manufacturing	Taiwan	5.2
Deere & Co	Manufacturing	United States	5.2
Dexcom Inc	Manufacturing	United States	5.0
Moderna Inc	Professional, Scientific and Technical	United States	5.0
Shopify 'A'	Information and Communication	Canada	4.8
Bank Rakyat Indonesia	Financial and Insurance	Indonesia	4.4
Alnylam Pharmaceuticals	Professional, Scientific and Technical	United States	4.3
Xylem	Manufacturing	United States	3.7
Tesla Inc	Manufacturing	United States	3.7
Orsted	Electricity, Gas, Steam and Air Conditioning	Denmark	3.4
HDFC Corp	Financial and Insurance	India	3.1
Illumina	Manufacturing	United States	3.1
Umicore	Manufacturing	Belgium	2.9

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that is used to attain the sustainable investment objective. We believe that excluding investments that are not used to attain the sustainable investment objective leads to greater transparency.

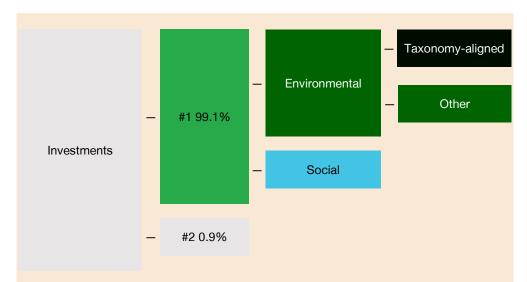

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

In order to meet the sustainable investment objective promoted by the Fund, it invested at least 99.1% of its total assets in equity securities of companies (directly although it may have also invested indirectly through eligible collective investment schemes) whose products and/or services made a positive social and/or environmental impact in the Fund's four impact themes, each of which represent key global challenges. This included 9.7% invested in sustainable investments with an environmental objective aligned with the EU Taxonomy. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

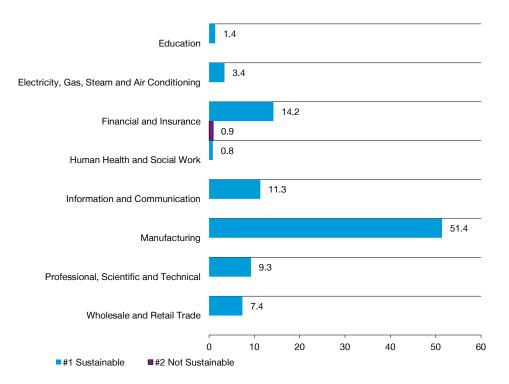

#1 Sustainable covers sustainable investments with environmental or social objectives.

#2 Not sustainable includes investments which do not qualify as sustainable investments

EU Taxonomy Objective	%
Climate change mitigation	29.6
Climate change adaptation	3.7

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	Nace Sub-Sector
Education	Education
Electricity, Gas, Steam and Air Conditioning	Electricity, gas, steam and air conditioning supply
Financial and Insurance	Activities auxiliary to financial services and insurance activities Financial service activities, except insurance and pension funding Insurance, reinsurance and pension funding, except compulsory social security
Human Health and Social Work	Human health activities
Information and Communication	Computer programming, consultancy and related activities Information service activities Publishing activities Telecommunications
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations Manufacture of chemicals and chemical products Manufacture of computer, electronic and optical products Manufacture of machinery and equipment n.e.c. Manufacture of motor vehicles, trailers and semitrailers Other manufacturing
Professional, Scientific and Technical	Scientific research and development
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For **nuclear energy**, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- turnover reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

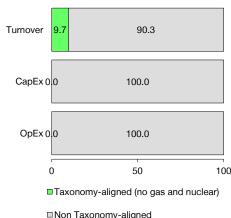

9.7% of the Fund was EU Taxonomy-aligned during the reference period. As such, the Fund has exceeded the minimum commitment in investments with an environmental objective aligned with the EU Taxonomy as outlined in the pre-contractual document. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research. An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

	Yes		
		In fossil gas	In nuclear energy
Χ	No		

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomyalignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

Taxonomy-alignment of investments including sovereign bonds

Taxonomy-alignment of investments excluding sovereign bonds

This graph represents 100% of the total investments.

- For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures
- What was the share of investments in transitional and enabling activities?

Enabling activities

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under (EU) 2020/852.

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0	0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Including Sovereign Bonds			Excluding Sovereign Bonds		
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
01 Oct 2021 to Sep 30, 2022	13.3	0.0	0.0	13.3	0.0	0.0

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 23.6% during the reference period. As such, the Fund has exceeded the minimum commitment in investments with an environmental objective not aligned with the EU Taxonomy as outlined in the pre-contractual document. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 65.8% during the reference period. As such, the Fund has exceeded the minimum commitment in investments with a social objective as outlined in the precontractual document.

What investments were included under "not sustainable", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under #2 Not sustainable were primarily cash and cash equivalents used for liquidity purposes. This has been classified as Financial and Insurance Sector. As such, these investments did not affect the attainment of the sustainable investment objective of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focused on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to attain the sustainable investment objective during the reference period?

The Fund was actively managed and focuses on investing in equities of companies whose products and/or services make a positive social and/or environmental impact. The Fund employed an impact strategy as it contributed towards a more sustainable and inclusive world alongside capital growth over the long term.

The Fund included norms-based evaluation, business activity-based exclusions and active ownership to attain the sustainable investment objective. These are implemented on a continuous basis through ongoing compliance with and monitoring of the binding commitments outlined in the pre-contractual document.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.
- 4. Managed greenhouse gas emissions intensity as measured by the Fund's Weighted Average Carbon Intensity ('WACI') and an aim for this to be lower than MSCI ACWI Index (the 'Index').
- 5. Enhanced sustainability characteristics through forward-looking qualitative assessment.

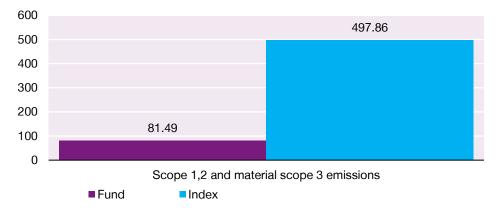

How did the sustainability indicators perform and compare to previous periods? All holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2022	To Sep 2023
Compliance with UNGC Policy*	99.5	99.6
Is WACI below index?	N/A	Yes
Compliance with sector- based exclusions*	99.5	99.6
Holdings voted in line with Voting and Engagement Guidelines*	99.5	99.6
Holdings qualitatively assessed to meet the Impact, Ambition and Trust framework*	99.5	99.6

^{*}All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

Weighted Average Carbon Intensity

(tCO2e per \$M revenue)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

What were the objectives of the sustainable investments that the financial product partially made and how did the sustainable investment contribute to such objectives?

39.9% of the Fund was invested in economic activities that contribute to either an environmental and/or social objective (sustainable investments) during the reference period. These economic activities contributed to such objectives as they: (a) generated a certain level of revenues, either through products and/or services, that are aligned with the broader sustainable objectives of society as currently best defined by the United Nations Sustainable Development Goals ('SDGs'), some which can be mapped on a high-level basis against the six environmental objectives outlined in the EU Taxonomy and/or (b) are reducing absolute greenhouse gas emissions, either through their products and/or services or business practices, to seek to achieve the long-term global warming objectives of the Paris Climate Agreement. Reduction of greenhouse gas emissions aligns with the climate mitigation objective in the EU Taxonomy. The Fund did not commit to invest in economic activities that qualify as environmentally sustainable under the six environmental objectives of the EU Taxonomy but did make sustainable investments that at a high-level contribute to these specific environmental objectives, which are disclosed below.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

How did the sustainable investments that the financial product partially made not cause significant harm to any environmental or social sustainable investment objective?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

How were the indicators for adverse impacts on sustainability factors taken into account?

At the time of investment and during the reference period, mandatory indicators for adverse impacts in Table 1 of Annex I of the SFDR Regulatory Technical Standards ('SFDR RTS') and opt-in indicators for adverse impacts selected by the Investment Manager in Tables 2 and 3 of Annex I of SFDR RTS deemed to indicate the presence of a principal adverse impact were assessed and excluded or monitored depending on the principal adverse impact indicator. When not explicitly excluded from inclusion in the Fund's portfolio, principal adverse impacts were monitored through stewardship activities which includes the following non-exhaustive actions to mitigate or reduce principal adverse impacts: (a) voting (b) dialogue and engagement and (c) collaborative activities.

Were sustainable investments aligned with the OECD Guidelines for Multinational Enterprises and the UN Guiding Principles on Business and Human Rights? Details:

The Investment Manager assessed holdings using a norms-based evaluation and the Fund complied with the Investment Manager's policy on assessing breaches of United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document. As such, in the Investment Manager's opinion, all holdings operated in accordance with the principles set out in the United Nations Global Compact for Business and related standards, including the Organisation for Economic Co-operation and Development (OECD) Guidelines for Multinational Enterprises and the United Nations Guiding Principles on Business and Human Rights during the reference period.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that derive more than 10% of annual revenues from: (i) the production and/or distribution of alcohol; (ii) the production and/or distribution of support systems and services for production of military weapon systems and components, and provision of support systems and services for production of distribution of adult entertainment; (iv) Fossil Fuel extraction and production; (v) the provision of gambling services; or (vi) the retail sale of tobacco. The Investment Manager also excludes companies that derive more than 5% of annual revenues from the production of tobacco.

The fund additionally considered principle adverse impacts by managing greenhouse gas emissions intensity as measured by the Fund's WACI with an aim for this to be lower than the Index.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 01 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
Novo Nordisk	Manufacturing	Denmark	5.0
Microsoft	Information and Communication	United States	4.0
Watsco Inc	Wholesale and Retail Trade	United States	3.6
Fastenal	Wholesale and Retail Trade	United States	3.6
Procter & Gamble	Manufacturing	United States	3.5
UPS	Transportation and Storage	United States	3.3
Pepsico	Manufacturing	United States	3.3
TSMC	Manufacturing	Taiwan	3.1
Schneider Electric SE	Manufacturing	France	3.0
Apple	Manufacturing	United States	2.9
Roche	Manufacturing	Switzerland	2.8
Analog Devices	Manufacturing	United States	2.7
Sonic Healthcare	Human Health and Social Work	Australia	2.7
Nestle	Manufacturing	Switzerland	2.6
Deutsche Boerse	Financial and Insurance	Germany	2.5

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

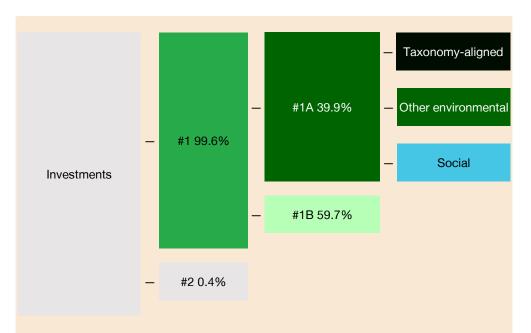

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 99.6% in global equities (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. This included 39.9% investment in sustainable investments with environmental or social objectives. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

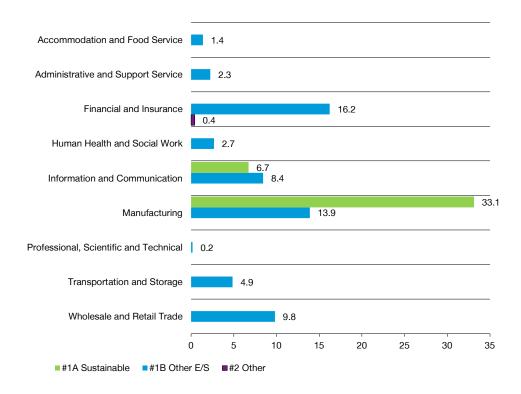

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

The category **#1 Aligned with E/S characteristics** covers:

- The sub-category **#1A Sustainable** covers environmentally and socially sustainable investments.
- The sub-category **#1B Other E/S characteristics** covers investments aligned with the environmental or social characteristics that do not qualify as sustainable investments.

EU Taxonomy Objective	%
Climate change mitigation	26.1
Climate change adaptation	0.0

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Accommodation and Food Service	Food and beverage service activities
Administrative and Support Service	Office administrative, office support and other business support activities
Financial and Insurance	Activities auxiliary to financial services and insurance activities Financial service activities, except insurance and pension funding Insurance, reinsurance and pension funding, except compulsory social security
Human Health and Social Work	Human health activities
Information and Communication	Information service activities Publishing activities
Manufacturing	Manufacture of basic pharmaceutical products and pharmaceutical preparations Manufacture of beverages Manufacture of chemicals and chemical products Manufacture of computer, electronic and optical products Manufacture of electrical equipment Manufacture of food products Manufacture of machinery and equipment n.e.c. Manufacture of paper and paper products Manufacture of wearing apparel Other manufacturing
Professional, Scientific and Technical	Architectural and engineering activities; technical testing and analysis
Transportation and Storage	Land transport and transport via pipelines Postal and courier activities Warehousing and support activities for transportation
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale and retail trade and repair of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

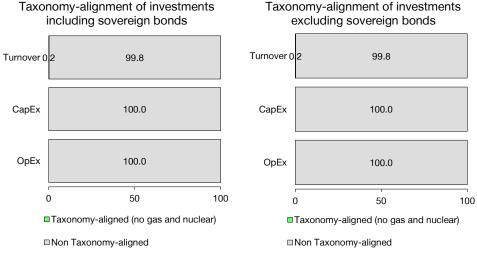

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 0.2% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research. An explanation of the reasons for investing in sustainable investments other than those with an environmental objective aligned with the EU Taxonomy is detailed in a separate section below.

			t in fossil gas and/or nuclear energy th the EU Taxonomy¹?
X	Yes No	In fossil gas	In nuclear energy

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Including	Sovereign	Bonds	Excluding	Sovereign	Bonds
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
01 Oct 2021 to Sep 30, 2022	0.2	0.0	0.0	0.2	0.0	0.0

are sustainable investments with an environmental objective that do not take into account the criteria for environmentally sustainable economic activities under (EU) 2020/852.

What was the share of sustainable investments with an environmental objective not aligned with the EU Taxonomy?

The share of sustainable investments with an environmental objective not aligned with the EU Taxonomy was 25.9% during the reference period. As such, the Fund has exceeded the minimum commitment in investments with an environmental objective not aligned with the EU Taxonomy as outlined in the pre-contractual document. Economic activities that are not aligned with the EU Taxonomy are not necessarily environmentally harmful or unsustainable. In addition, not all economic activities are covered by the EU Taxonomy as it is not possible to develop criteria for all sectors where activities could conceivably make a substantial contribution to the environment.

What was the share of socially sustainable investments?

The share of sustainable investments with a social objective was 13.8% during the reference period. As such, together with the actual share of sustainable investments with an environmental objective not aligned with the EU Taxonomy, the Fund has exceeded the total minimum proportion of sustainable investments commitment as outlined in the pre-contractual document.

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested in global equities which were listed, traded or dealt on Regulated Markets with the aim of providing above average returns comprising capital growth and dividend income over the long term by investing in companies which are managed and behave responsibly. The assessment of sustainability was significantly integrated into the Investment Manager's stock research framework. The Fund used positive screening through the Investment Manager's proprietary IAT framework, norms-based evaluation, business activity-based exclusions and active ownership to determine whether a company is managed and behaving responsibly and to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

Environmental and/or social characteristics

	Does this financial product have a susta	tainable investment objective?
investment means an investment in an	• Yes	• X No
economic activity that contributes to an environmental or social objective, provided that the investment does not significantly harm any environmental or social objective and that the investee companies follow good governance practices.	It made sustainable investments with an environmental objective:% in economic activities that qualify environmentally sustainable unde the EU Taxonomy in economic activities that do not qualify as environmentally sustainable under the EU Taxonor	It promoted Environmental/Social (E/S) characteristics and while it did not have as its objective a sustainable investment, it had a proportion of % of sustainable investments with an environmental objective in economic activities that qualify as
The EU Taxonomy is a classification system laid down in Regulation (EU) 2020/852, establishing a list of environmentally sustainable economic activities . That Regulation does not lay down a list of	It made sustainable investments with a social objective:%	with an environmental objective in economic activities that do not qualify as environmentally sustainable under the EU Taxonomy with a social objective It promoted E/S characteristics, but did not make any sustainable investments
socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.		

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

Government bonds

- 1. Minimum environmental and social standards achieved through exclusion of governments that (i) are subject to UN sanctions (ii) are included in OECD blacklist and/or (iii) have not ratified the Paris Climate Agreement.
- 2. Sustainable outcomes through investment in sovereigns that have been qualitatively assessed as being sustainable or on a sustainable trajectory.

Corporate bonds

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Sustainable outcomes through investment in corporates that have been qualitatively assessed are creating a sustainable future.

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

How did the sustainability indicators perform and compare to previous periods?

One of the third-party providers the Investment Manager uses to evaluate compliance with the United Nations Global Compact classified OCP Morocco as non-compliant. Upon undertaking further research and following an engagement plan, the Fund has since sold out of this holding. All other holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

^{*}All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding companies with any of the following revenue breakdowns: (i) 10% or more of revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) 5% or more of annual revenues from the production of tobacco; or (iii) 10% or more of annual revenues from the mining and/or sale of thermal coal. The Investment Manager also excludes companies which are operating in breach of UN sanctions.

The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 14 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
Indonesia 5.25% 17/01/2042 (USD)	Public Administration and Defence	Indonesia	3.5
Romania 2% 28/01/2032 (EUR)	Public Administration and Defence	Romania	3.4
Uzbekistan 5.375% 20/02/2029 (USD)	Public Administration and Defence	Uzbekistan	2.8
Dominican Republic 6% 19/07/2028 (USD)	Public Administration and Defence	Other Caribbean	2.7
Peru 5.4% 12/08/2034	Public Administration and Defence	Peru	2.6
Oman 6.5% 08/03/2047 (USD)	Public Administration and Defence	Oman	2.5
Angola 9.375% 08/05/2048 (USD)	Public Administration and Defence	Other African	2.4
North Macedonia 3.675% 03/06/2026 (EUR)	Public Administration and Defence	North Macedonia	2.3
Peru 8.75% 21/11/2033 (USD)	Public Administration and Defence	Peru	2.2
Oman 7.375% 28/10/2032 (USD)	Public Administration and Defence	Oman	2.2
Mexico 5.75% 12/10/2110 (USD)	Public Administration and Defence	Mexico	2.1
Romania 1.75% 13/07/2030 (EUR)	Public Administration and Defence	Romania	2.1
Mexico 4.75% 08/03/2044 (USD)	Public Administration and Defence	Mexico	2.0
Ukraine Float 01/08/2041 (USD)	Public Administration and Defence	Ukraine	2.0
Indonesia 4.35% 11/01/2048 (USD)	Public Administration and Defence	Indonesia	2.0

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

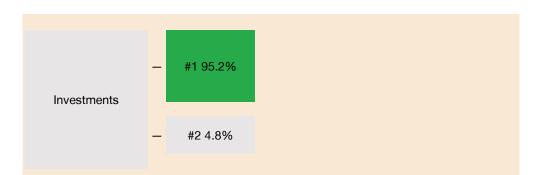

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

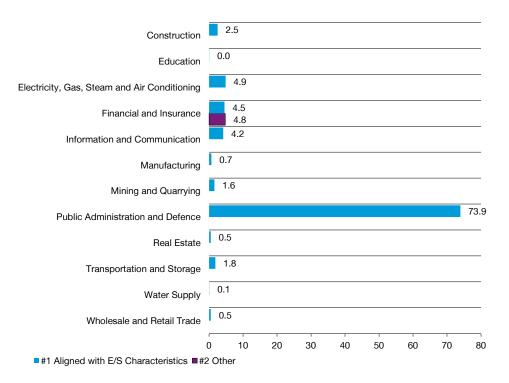

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested 95.2% in bonds issued by sovereigns and corporates that are aligned with the same characteristics. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Construction	Civil engineering
Education	Education
Electricity, Gas, Steam and Air Conditioning	Electricity, gas, steam and air conditioning supply
Financial and Insurance	Activities auxiliary to financial services and insurance activities
	Financial service activities, except insurance and pension funding
	Insurance, reinsurance and pension funding, except compulsory social security
Information and Communication	Programming and broadcasting activities Telecommunications
Manufacturing	Manufacture of chemicals and chemical products
Mining and Quarrying	Other mining and quarrying
Public Administration and Defence	Public administration and defence; compulsory social security
Real Estate	Real estate activities
Transportation and Storage	Warehousing and support activities for transportation
Water Supply	Water collection, treatment and supply
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

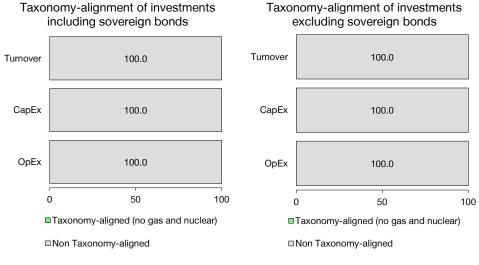

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

There were no sustainable investments in the portfolio with an environmental objective aligned with the EU Taxonomy during the reference period.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy ¹ ?					
Y	In fossil gas	In nuclear energy			

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

How did the percentage of investments that were aligned with the EU Taxonomy compare with previous reference periods?

	Including Sovereign Bonds			Excluding Sovereign Bonds		
Reporting Period	Turnover	CapEx	Opex	Turnover	CapEx	Opex
31 Mar 2022 to Sep 30, 2022	0.0	0.0	0.0	0.0	0.0	0.0

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and promoted environmental and social characteristics through investing in (i) at least 60% of the Fund's Net Asset Value in bonds issued by sovereign issuers in Emerging Market Countries which were identified as being sustainable or on a sustainable trajectory in seeking to deploy capital productively to achieve sustainable outcomes and (ii) up to 40% of the Fund's Net Asset Value in bonds issued by corporates domiciled, or operating, in Emerging Market Countries, where the Investment Manager believed these corporates were creating a sustainable future. The Fund used positive screening through the Investment Manager's proprietary ESG framework, norms-based evaluation, business activity-based exclusions and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual document.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All corporates held in the Fund passed these tests.

socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.							

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.
- 4. Managed greenhouse gas emissions intensity as measured by the Fund's Weighted Average Carbon Intensity ('WACI') was lower than MSCI Emerging Markets Index (the 'Index').

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

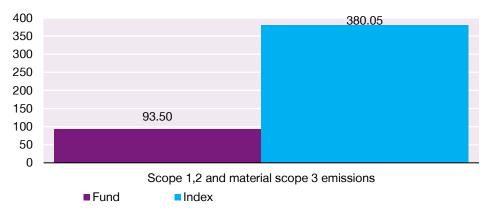

How did the sustainability indicators perform and compare to previous periods? All holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2023
Compliance with UNGC Policy*	99.2
Is WACI below index?	Yes
Compliance with sector- based exclusions*	99.2
Holdings voted in line with Voting and Engagement Guidelines*	99.2

*All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

Weighted Average Carbon Intensity

(tCO2e per \$M revenue)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that generate more than (i) more than 10% of annual revenues from the production and/or distribution of armaments; (ii) more than 30% of annual revenues from the production or distribution of thermal coal; and (iii) more than 5% of annual revenues from the production of tobacco from the Fund's holdings The above considerations mitigated principal adverse impacts, some of which are associated with principal adverse impact indicators in Table 1 of Annex I of SFDR Regulatory Technical Standards, and were supplemented by controversies monitoring, voting and engagement policies.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 14 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

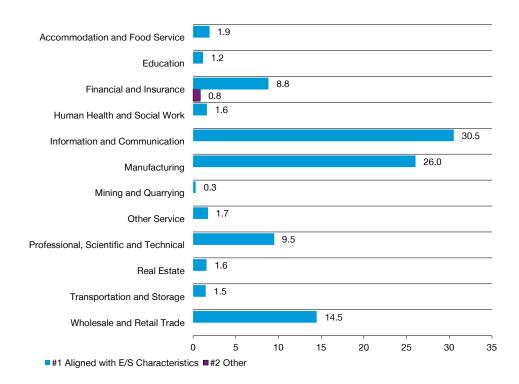

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 99.2% in equity securities which are listed on U.S. markets (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector
Accommodation and Food Service	Food and beverage service activities
Education	Education
Financial and Insurance	Activities auxiliary to financial services and insurance activities Financial service activities, except insurance and pension funding Insurance, reinsurance and pension funding, except compulsory social security
Human Health and Social Work	Human health activities

Manufacturing	Manufacture of chemicals and chemical products Manufacture of computer, electronic and optical products Manufacture of food products Manufacture of leather and related products Manufacture of machinery and equipment n.e.c. Manufacture of motor vehicles, trailers and semitrailers Manufacture of other nonmetallic mineral products Manufacture of rubber and plastic products Manufacture of wearing apparel Other manufacturing
Mining and Quarrying	Extraction of crude petroleum and natural gas
Other Service	Other personal service activities
Professional, Scientific and Technical	Advertising and market research Legal and accounting activities Scientific research and development
Real Estate	Real estate activities
Transportation and Storage	Postal and courier activities
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale and retail trade and repair of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

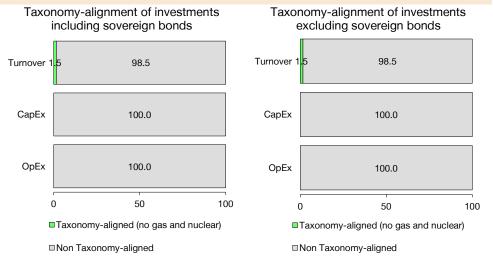

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 1.5% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes
In fossil gas
In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested in equities which are listed, traded or dealt on Regulated Markets while considering environmental, social and governance factors. When researching companies for potential inclusion in the portfolio, the Investment Manager used a research framework to consider how environmental, social or governance factors may affect the sustainability of a company's profit growth. The Fund used norms-based evaluation, business activity-based exclusions (both quantitatively and qualitatively) and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.

socially sustainable economic activities. Sustainable investments with an environmental objective might be aligned with the Taxonomy or not.				

To what extent were the environmental and/or social characteristics promoted by this financial product met?

The Fund met the following environmental and/or social characteristics:

- 1. Responsible business practices in accordance with the United Nations Global Compact Principles for Business ('UNGC').
- 2. Minimum environmental and/or social standards achieved through the exclusion of business activities that the Investment Manager has deemed to be harmful to the environment and society respectively.
- 3. Active consideration of environmental and/or social issues through proxy voting applied in line with the Investment Manager's ESG Principles and Guidelines document.
- 4. Managed greenhouse gas emissions intensity as measured by the Fund's Weighted Average Carbon Intensity ('WACI') is lower than S&P 500 Index (the 'Index')

There were no exceptions noted in the attainment of the environmental and/or social characteristics promoted by the Fund during the reference period. No specific index has been designated as a reference benchmark for the purpose of attaining the environmental and/or social characteristics promoted by the Fund.

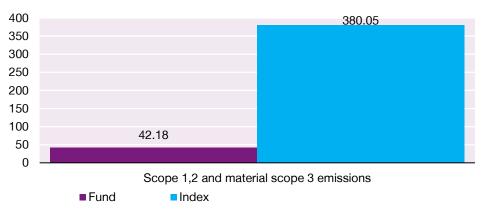

How did the sustainability indicators perform and compare to previous periods? All holdings were in compliance with the sustainability indicators during the period. None of the sustainability indicators have been subject to an assurance provided by an auditor or a review by a third party.

Indicator	To Sep 2023
Compliance with UNGC Policy*	98.6
Is WACI below index?	Yes
Compliance with sector- based exclusions*	98.6
Holdings voted in line with Voting and Engagement Guidelines*	98.6

*All holdings are in compliance with this indicator. The percentage above is an expression of the total portfolio less the portion of assets (such as cash or derivatives) which cannot count towards a positive assessment against the indicator.

Weighted Average Carbon Intensity

(tCO2e per \$M revenue)

Sustainability indicators measure how the environmental or social characteristics promoted by the financial product are attained.

Principal adverse impacts are the most significant negative impacts of investment decisions on sustainability factors relating to environmental, social and employee matters, respect for human rights, anti- corruption and anti- bribery matters.

The EU Taxonomy sets out a "do not significant harm" principle by which Taxonomyaligned investments should not significantly harm EU Taxonomy objectives and is accompanied by specific Union criteria.

The "do no significant harm" principle applies only to those investments underlying the financial product that take into account the Union criteria for environmentally sustainable economic activities. The investments underlying the remaining portion of this financial product do not take into account the Union criteria for environmentally sustainable economic activities.

Any other sustainable investments must also not significantly harm any environmental or social objectives.

How did this financial product consider principal adverse impacts on sustainability factors?

The Fund considered principal adverse impacts on a qualitative basis primarily through (a) compliance with the Investment Manager's controversial weapons exclusion policy as outlined in the Investment Manager's ESG Principles and Guidelines document, (b) compliance with the Investment Manager's policy on assessing breaches of the United Nations Global Compact Principles for Business as outlined in the Investment Manager's ESG Principles and Guidelines document, and (c) by excluding holdings that derive more than (i) 10% of annual revenues from the production and/or distribution of military weapon systems and components, and provision of support systems and services for production of military weapon systems and components; (ii) 30% of annual revenues from the mining and/or sale of thermal coal; or (iii) 5% of annual revenues from the production of tobacco.

What were the top investments of this financial product?

The list includes the investments constituting the greatest proportion of investments of the financial product during the reference period which is: 14 Oct 2022 to 30 Sep 2023

Largest Investments	Sector	Country	% Assets
The Trade Desk	Professional, Scientific and Technical	United States	7.8
Shopify 'A'	Information and Communication	Canada	7.0
Tesla Inc	Manufacturing	United States	6.2
Moderna Inc	Professional, Scientific and Technical	United States	5.9
Amazon.com	Wholesale and Retail Trade	United States	5.7
NVIDIA	Manufacturing	United States	5.4
CoStar Group	Information and Communication	United States	4.0
Netflix Inc	Information and Communication	United States	4.0
Watsco Inc	Wholesale and Retail Trade	United States	3.3
Alnylam Pharmaceuticals	Professional, Scientific and Technical	United States	3.2
Workday Inc	Information and Communication	United States	3.0
Cloudflare Inc	Information and Communication	United States	2.8
Doordash Inc	Information and Communication	United States	2.5
Duolingo Inc	Information and Communication	United States	2.3
Snowflake Inc	Information and Communication	United States	2.1

If cash and/or derivatives are within the top investments during the reference period, they are not presented in the table above and have been replaced by a holding that promotes environmental and/or social characteristics. We believe that excluding investments that are not used to promote environmental and/or social characteristics leads to greater transparency.

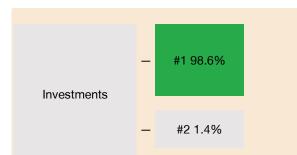

Asset allocation describes the share of investments in specific assets.

What was the proportion of sustainability-related investments?

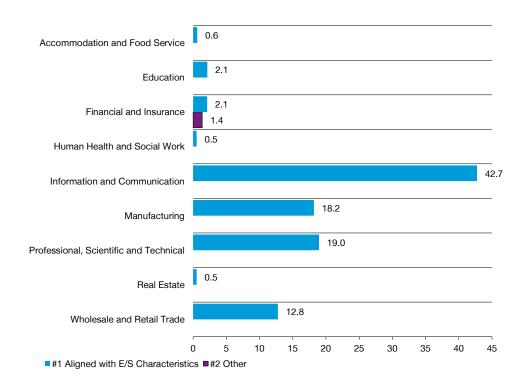

What was the asset allocation?

In order to meet the environmental and/or social characteristics promoted by the Fund, it invested at least 96.8% in equity securities which are listed on U.S. markets (directly although it may also invest indirectly through eligible collective investment schemes) that are aligned with the same characteristics. The remaining proportion of the investments was used for liquidity and/or efficient portfolio management purposes and did not incorporate any of the environmental and/or social characteristics promoted by the Fund. Any minimum environmental or social safeguards regarding the remaining proportion of the investments is covered in a specific section below.

- **#1** Aligned with E/S characteristics includes the investments of the financial product used to attain the environmental or social characteristics promoted by the financial product.
- **#2 Other** includes the remaining investments of the financial product which are neither aligned with the environmental or social characteristics, nor are qualified as sustainable investments.

In which economic sectors were the investments made?

A breakdown of the sub-sectors the Fund is exposed to, including any sub-sectors of the economy that derive revenues from exploration, mining, extraction, production, processing, storage, refining or distribution, including transportation, storage and trade of fossil fuels, is provided below

NACE Sector	NACE Sub-Sector		
Accommodation and Food Service	Food and beverage service activities		
Education	Education		
Financial and Insurance	Activities auxiliary to financial services and insurance activities Financial service activities, except insurance and pension funding Insurance, reinsurance and pension funding, except compulsory social security		
Human Health and Social Work	Human health activities		
Information and Communication	Information service activities Publishing activities		
Manufacturing	Manufacture of computer, electronic and optical products Manufacture of motor vehicles, trailers and semitrailers		
Professional, Scientific and Technical	Advertising and market research Scientific research and development		
Real Estate	Real estate activities		
Wholesale and Retail Trade	Retail trade, except of motor vehicles and motorcycles Wholesale and retail trade and repair of motor vehicles and motorcycles Wholesale trade, except of motor vehicles and motorcycles		

To comply with the EU Taxonomy, the criteria for fossil gas include limitations on emissions and switching to fully renewable power or low-carbon fuels by the end of 2035. For nuclear energy, the criteria include comprehensive safety and waste management rules.

Taxonomy-aligned activities are expressed as a share of:

- **turnover** reflects the "greenness" of investee companies today.
- capital expenditure (CapEx) shows the green investments made by investee companies, relevant for a transition to a green economy.
- operational expenditure (OpEx) reflects the green operational activities of investee companies.

To what minimum extent were sustainable investments with an environmental objective aligned with the EU Taxonomy?

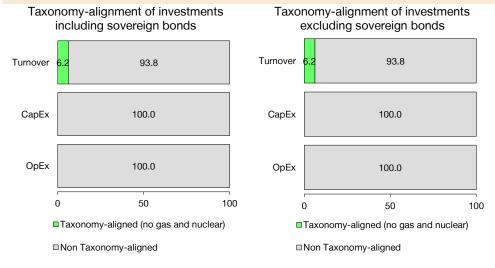

Taxonomy alignment reporting is not based on commitments made in precontractual disclosures. As such, whilst the Fund did not intend to allocate a minimum level of sustainable investments with an environmental objective aligned with the EU Taxonomy, 6.2% of the Fund was EU Taxonomy-aligned during the reference period. These investments' compliance with the requirements laid down under the EU Taxonomy have not been subject to an assurance or review provided by an auditor or third party. Alignment has been obtained through a combination of third-party data and investment research.

Did the financial product invest in fossil gas and/or nuclear energy related activities complying with the EU Taxonomy¹?

Yes
In fossil gas
In nuclear energy

No

The graphs below show in green the percentage of investments that were aligned with the EU Taxonomy. As there is no appropriate methodology to determine the taxonomy-alignment of sovereign bonds*, the first graph shows the Taxonomy alignment in relation to all the investments of the financial product including sovereign bonds, while the second graph shows the Taxonomy alignment only in relation to the investments of the financial product other than sovereign bonds.

This graph represents 100% of the total investments.

* For the purpose of these graphs, 'sovereign bonds' consist of all sovereign exposures

¹ Fossil gas and/or nuclear related activities will only comply with the EU Taxonomy where they contribute to limiting climate change ("climate change mitigation") and do not significantly harm any EU Taxonomy objective - see explanatory note in the left hand margin. The full criteria for fossil gas and nuclear energy economic activities that comply with the EU Taxonomy are laid down in Commission Delegated Regulation (EU) 2022/1214.

Enabling activities directly enable other activities to make a substantial contribution to an environmental objective.

Transitional activities are activities for which low-carbon alternatives are not yet available and among others have greenhouse gas emission levels corresponding to the best performance.

What was the share of investments in transitional and enabling activities?

Reporting Period	% Transitional	% Enabling
From 01 Oct 2022 to 30 Sep 2023	0.0	0.0

What investments were included under "other", what was their purpose and were there any minimum environmental or social safeguards?

The investments included under "#2 Other" were primarily cash and cash equivalents used for liquidity purposes, but may have also included investments used for efficient portfolio management purposes (e.g. currency forwards to reduce currency risk). As such, these investments did not affect the promoted environmental and/or social characteristics of the Fund. The assessment of counterparties and issuers for cash management (including cash and cash equivalents) focuses on creditworthiness of these parties, which can be impacted by sustainability risks.

What actions have been taken to meet the environmental and/or social characteristics during the reference period?

The Fund was actively managed and invested in equities which are listed, traded or dealt on Regulated Markets while considering environmental, social and governance factors. When researching companies for potential inclusion in the portfolio, the Investment Manager used a research framework to consider how environmental, social or governance factors may affect the sustainability of a company's profit growth. The Fund used norms-based evaluation, business activity-based exclusions (both quantitatively and qualitatively) and active ownership to support the attainment of the promoted environmental and/or social characteristics and these were implemented on a continuous basis through ongoing compliance with, and monitoring of, the binding commitments outlined in the pre-contractual documents.

SFDR requires that products promoting environmental and/or social characteristics do not invest in companies which do not follow good governance practices. As such, the Investment Manager has a policy to apply good governance tests on areas covering sound management structures, employee relations, remuneration of staff and tax compliance. All companies held in the Fund passed these tests.
