Baring High Yield Bond Fund Class A GBP Hedged Income

ISIN: (IE0033156484) a sub fund of Baring Global Umbrella Fund

The Fund is a Unit Trust. Baring International Fund Managers (Ireland) Limited are the Managers of the Fund.

Objective & Investment Policy

Objective: To provide a high level of income.

Investment Policy: To invest in non investment grade bonds (which are loans that pay a rate of interest for a set period of time) issued by governments and companies of member states of the Organisation for Economic Co-operation and Development (OECD) and of any emerging market countries.

The bonds will be non investment grade securities (rated between BB+ and B-) as determined by Standard & Poor's or another international ratings agency (or the manager where no agency rating is provided). Up to 10% of its value can be held in bonds rated lower than B-. Bonds are rated to indicate the probability that the issuer will repay the loan. Investment grade bonds are considered to have a lower risk of the issuer not repaying the loan.

The Fund may invest in derivatives (such as futures, options and swaps) which are linked to the rise and fall of other assets. The Fund may use these derivatives to generate additional capital or income for the Fund and also to protect against currency movements.

The Fund may invest in emerging markets (e.g. China, Hungary and Malaysia) which are countries whose economies are still developing.

This share class is a different currency to the base currency of the Fund. The Fund's Manager will aim to remove the impact of changes in exchange rates between the two currencies by hedging (a currency transaction which can protect against exchange rate movements).

Distribution Policy: Any income generated will be automatically reinvested in more units/shares of the same class unless payment is specifically requested.

Dealing Frequency: Normally 12 noon (Irish time) Monday to Friday unless it is an Irish or UK public holiday.

Minimum recommended holding term: This Fund may not be appropriate for investors who plan to withdraw their money within 5 years.

For full details on the Objective, Investment Policy and the Distribution Policy please refer to the prospectus.

Risks and Rewards

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time, the higher the number the greater the price movement both up and down. It is based on historical data and is not a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk-free investment. The Fund is classified in the category indicated above due to past movements in the Fund's price. There is no capital guarantee. The value of investments and the income from them may go down as well as up and investors may not get back the amount they invest.

- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued can have the effect of increasing or decreasing the value of the Fund and any income generated.

- There may be cases where the organisation from which we buy an asset (usually a financial institution such as a bank) fails to carry out its obligations, which could cause losses to the Fund.
- The rating of a bond is subject to change. There is no guarantee that a bond issuer will pay the interest due or repay the loan which would result in a loss of income to the fund, along with its initial investment. Bond values are likely to fall if interest rates rise.
- Derivative instruments can make a profit or a loss. The use of derivatives can increase the amount by which the Fund's value rises and falls.
- Emerging markets or less developed countries may face more political, economic or structural challenges than developed countries. Coupled with less developed regulation, this means your money is at greater risk.
