Risks and Rewards

The indicator above is not a measure of the risk of capital loss, but a measure of the Fund's price movement over time, the higher the number the greater the price movement both up and down. It is based on historical data and is not a reliable indication of the future risk profile of the Fund. The risk category shown is not guaranteed and may change over time. The lowest category does not mean a risk-free investment. The Fund is classified in the category indicated above due to past movements in the Fund's price. There is no capital guarantee. The value of investments and the income from them may go down as well as up and investors may not get back the amount they invest.

- Changes in exchange rates between the currency of the Fund and the currencies in which the assets of the Fund are valued

can have the effect of increasing or decreasing the value of the Fund and any income generated.

- Latin American countries may face more political, economic or structural challenges than developed countries. Coupled with less developed regulation, this means your money is at greater risk.
- Region specific funds have a narrower focus than those which invest broadly across markets and are therefore considered to be more risky.
- The Fund can hold smaller company shares which can be more difficult to buy and sell as they may trade infrequently, in small volumes and their share prices may fluctuate more than those of larger companies.
