

KEY INVESTOR INFORMATION

This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Global Multi-Asset Income Fund

A sub-fund of BlackRock Global Funds

Class C2 USD

ISIN: LU1005242950

Management Company: BlackRock (Luxembourg) S.A.

Objectives and Investment Policy

- ▶ The Fund aims to generate an above average level of income on your investment as well as maintain long term capital growth.
- ▶ The Fund invests globally in the full range of assets in which a UCITS fund may invest, including equity securities (e.g. shares), fixed income securities (such as bonds), funds, cash, deposits and money market instruments (i.e. debt securities with short term maturities).
- ▶ The asset classes and the extent to which the Fund is invested in these may vary without limit depending on market conditions and other factors at the investment adviser's (IA) discretion.
- ▶ The Fund's investments may be issued by governments, government agencies, companies and supranationals (e.g. the International Bank for Reconstruction and Development). These may include securities with a relatively low credit rating or which are unrated.
- ▶ The assets held by the Fund may be denominated in a wide variety of currencies.
- ▶ The Fund distributes income gross of expenses.
- ▶ For the purpose of managing currency exposure, the IA may use investment techniques (which may include the use of financial derivative instruments (FDIs)) to protect the value of the Fund, in

- ▶ whole or part, or enable the Fund to profit from changes in currency exchange rates against the base currency of the Fund.
- ▶ The IA may use FDIs to reduce risk within the Fund's portfolio, reduce investment costs and generate additional income. The Fund may, via FDIs, generate varying amounts of market leverage (i.e. where the Fund gains market exposure in excess of the value of its assets).
- ▶ Recommendation: This Fund may not be appropriate for short-term investment.
- ▶ Your shares will be non-distributing (i.e. dividend income will be included in their value).
- ▶ Your shares will be denominated in US Dollar, the Fund's base currency.
- ▶ You can buy and sell your shares daily. The minimum initial investment for this share class is US\$5,000 or currency equivalent.

Risk and Reward Profile

- ▶ The risk indicator was calculated incorporating simulated historical data and may not be a reliable indication of the future risk profile of the Fund.
- ▶ The risk category shown is not guaranteed and may change over time.
- ▶ The lowest category does not mean risk free.
- ▶ The Fund is rated four due to the nature of its investments which include the risks listed below. These factors may impact the value of the Fund's investments or expose the Fund to losses.
 - Credit risk, changes to interest rates and/or issuer defaults will have a significant impact on the performance of fixed income securities. Potential or actual credit rating downgrades may increase the level of risk.

- The value of equities and equity-related securities can be affected by daily stock market movements. Other influential factors include political, economic news, company earnings and significant corporate events.
- Derivatives are highly sensitive to changes in the value of the asset on which they are based and can increase the size of losses and gains, resulting in greater fluctuations in the value of the Fund. The impact to the Fund can be greater where derivatives are used in an extensive or complex way.
- Currency Risk: The Fund invests in other currencies. Changes in exchange rates will therefore affect the value of the investment.
- ▶ Particular risks not adequately captured by the risk indicator include:
 - Counterparty Risk: The insolvency of any institutions providing services such as safekeeping of assets or acting as counterparty to derivatives or other instruments, may expose the Fund to financial loss.
 - Credit Risk: The issuer of a financial asset held within the Fund may not pay income or repay capital to the Fund when due.
 - Liquidity Risk: Lower liquidity means there are insufficient buyers or sellers to allow the Fund to sell or buy investments readily.

Charges

The charges are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less. Please refer to your financial advisor or the distributor for the actual entry and exit charges.

* Contingent deferred sales charge payable on exit. Charge will not apply if you hold your shares for more than one year. Subject to a further charge of up to 2% paid into the Fund where the Manager suspects excessive trading by an investor.

The ongoing charges figure is based on expenses for the twelve month period ending 31 December 2015. This figure may vary from year to year. It excludes portfolio trade-related costs, except costs paid to the custodian and any entry/exit charge paid to an underlying collective investment scheme (if any).

** To the extent the Fund undertakes securities lending to reduce costs, the Fund will receive 62.5% of the associated revenue generated and the

remaining 37.5% will be received by BlackRock as the securities lending agent. As securities lending revenue sharing does not increase the costs of running the Fund, this has been excluded from the ongoing charges.

| One-off charges taken before or after you invest | |
|--|--------|
| Entry Charge | None |
| Exit Charge | 1.00%* |

This is the maximum that might be taken out of your money before it is invested or before proceeds of your investments are paid out.

| Charges taken from the Fund over each year | |
|--|---------|
| Ongoing Charges | 2.98%** |
| Charges taken from the Fund under certain conditions | |
| Performance Fee | None |

Past Performance

Past performance is not a guide to future performance.

The chart shows the Fund's annual performance in USD for each full calendar year over the period displayed in the chart. It is expressed as a percentage change of the Fund's net asset value at each year-end. The Fund was launched in 2012. The share class was launched in 2013.

Performance is shown after deduction of ongoing charges. Any entry/exit charges are excluded from the calculation.

Historic performance to 31 December 2015
