What is this product?

Type

This is an open ended UCITS fund.

Term

There is no maturity date of the fund.

Investment objective

The fund aims to provide capital growth in excess of the ICE BofA 3 Month US Treasury Bill Index + 2.5% before fees have been deducted* over a 3 to 5 year period by investing in bonds worldwide. The fund will invest in bonds issued by governments and companies worldwide, including emerging market countries, which help to advance the United Nations Sustainable Development Goal of taking action to combat climate change and which the investment manager deems to be sustainable investments. *For the target return after fees for each share class please visit the Schroder webpage <https://www.schroders.com/en/lu/private-investor/investing-withus/historical-ongoing-charges/>.

The fund is actively managed and invests its assets in (i) sustainable investments, which are investments that are expected to contribute towards combating climate change; and (ii) investments that the investment manager deems to be neutral under its sustainability criteria.

The fund invests at least two-thirds of its assets in bonds denominated in various currencies and issued by governments, government agencies, supra-nationals and companies worldwide, including emerging market countries. The fund will increase its exposure to emerging markets over time. At the fund's launch, the exposure to emerging markets will be at least of 50% of its net assets and this exposure will increase progressively with the intention to reach at least 67% of its net assets after three years. The fund may invest up to 50% of its assets in bonds that have a below investment grade credit rating (as measured by Standard & Poor's or any equivalent grade of other credit rating agencies for rated bonds and implied Schroders ratings for non-rated bonds).

The fund may invest in mainland China through the Qualified Foreign Investor ("QFI") scheme or regulated markets (including the Chinese Interbank Bond Market (CIBM) via Bond Connect or CIBM Direct).

The fund may also invest up to one third of its assets directly or indirectly in other securities (including other asset classes), countries, regions, industries or currencies, investment funds, warrants and money market investments, and hold cash.

The fund does not directly invest in certain activities, industries or groups of issuers above the limits listed under "Sustainability-Related Disclosure"

on the fund's webpage, <https://www.schroders.com/en/lu/private-investor/gfc>

The fund invests in companies that do not cause significant environmental or social harm and have good governance practices, as determined by the investment manager's rating criteria.

The investment manager may also engage with companies held by the fund to challenge identified areas of weakness on sustainability issues. More details on the investment manager's approach to sustainability are available in the prospectus and on the webpage <https://www.schroders.com/en/lu/private-investor/strategiccapabilities/sustainability/disclosures>.

The fund may use derivatives with the aim of achieving investment gains, reducing risk or managing the fund more efficiently.

The fund is valued with reference to the net asset value of the underlying assets.

Benchmark: The fund's performance should be assessed against its target benchmark, being to provide capital growth in excess of the ICE BofA 3 Month US Treasury Bill Index + 2.5% over a 3 to 5 year period. The investment manager invests on a discretionary basis and there are no restrictions on the extent to which the fund's portfolio and performance may deviate from the target benchmark. The benchmark(s) does/do not take into account the environmental and social characteristics or sustainable objective (as relevant) of the fund. Please see appendix III of the fund's prospectus for further details.

Dealing Frequency: You may redeem your investment upon demand. This fund deals daily.

Distribution Policy: This share class accumulates income received from the fund's investments, meaning it is kept in the fund and its value is reflected in the price of the share class.

Depositary: J.P. Morgan SE

Intended retail investor

The fund is intended for retail investors (i) with basic investment knowledge; (ii) who understand the basics of buying and selling shares in stock market listed companies and the way these shares are valued; (iii) who can accept large short-term losses; and (iv) wanting growth over [the longer term] but with easy access to their cash. This investment should form part of a varied investment portfolio. This product is suitable for general sale to retail and professional investors through all distribution channels with or without professional advice.

What are the risks and what could I get in return?

Risks

The risk indicator assumes you keep the product for 3 years.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the market or because we are not able to pay you.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product and suitable benchmark over the last 10 years. The scenarios shown are illustrations based on results from the past and on certain assumptions.

Recommended holding period:		3 years	
Example Investment:		USD 10000	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.

	Average return each year	15.4%	7.5%

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

The stress scenario shows what you might get back in extreme market circumstances.

The maximum loss you could incur would be the full value of your investment

We have classified this product as 2 out of 7, which is a low risk class.

The fund is in this category because it seeks to provide rewards whilst limiting price volatility.

Liquidity risk: In difficult market conditions, the fund may not be able to sell a security for full value or at all. This could affect performance and could cause the fund to defer or suspend redemptions of its shares, meaning investors may not be able to have immediate access to their holdings.

Credit risk: A decline in the financial health of an issuer could cause the value of its bonds to fall or become worthless.

You can find more information about the other risks in the prospectus at: <https://api.schroders.com/document-store/SISF-Prospectus-LUEN.pdf>

The Unfavourable scenario occurred for an investment between 08 2021 to 04 2023

The Moderate scenario was simulated based on the appropriate benchmark used for an investment between 02 2014 to 02 2017

The Favourable scenario was simulated based on the appropriate benchmark used for an investment between 08 2018 to 08 2021

What happens if Schroder Investment Management (Europe) S.A. is unable to pay out?

For your protection the company's assets are held with a separate company, a depository, so the fund's ability to pay out would not be affected by the insolvency of Schroder Investment Management (Europe) S.A.. If the fund is terminated or wound up, the assets will be liquidated and you will receive an appropriate share of any proceeds but you may lose part or all of your investment. You are not covered by the Luxembourg compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product and how well the product does. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0 % annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario
- USD 10 000,00 is invested

	If you exit after 1 year	If you exit after 3 years
Total costs	USD 89	USD 314
Annual cost impact (*)	0.9%	0.9% each year

*This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 6,3 % before costs and 5,4 % after costs.
