STRATEGY

IDENTIFICATION

MANAGEMENT OBJECTIVE

The management objective of the Fund is to allow unitholders to benefit:

Over a recommended investment horizon of 3 years, from a variable synthetic exposure to a quantitative strategy (hereinafter the "Strategy") consisting of purchasing positions on different asset classes (equities, interest rates, commodities via futures indices, real estate and currency).

A sliding protection mechanism described below in respect of which the net asset value will be, on each Fund valuation day, at least equal to the highest value between (i) 90% of the net asset value observed on the last working day of the previous month and (ii) 99% of the level of protection offered during the previous month.

BENCHMARK INDEX

Because of its management objective and the strategy pursued, the Fund cannot be compared to any benchmark.

INVESTMENT STRATEGY

1. Strategy employed

In order to achieve its management objective, the Fund will enter into an OTC swap agreement allowing it to benefit from a variable synthetic exposure to the performance of the Strategy and the sliding protection mechanism as described below:

Sliding protection mechanism

The Fund benefits from a sliding protection mechanism. The level of protection is re-evaluated every month. Thus, on each Fund valuation date, the net asset value shall be at least equal to the current month's level of protection revalued as the highest value between (i) 90% of the net asset value observed on the last working day of the previous month and (ii) 99% of the level of protection offered in the previous month.

Calculation example:

- Last month's level of protection: €950
- Net asset value observed on last working day of previous month: €1,025

Current month's protection level = maximum (99%* EUR 950; 90%* EUR 1,025) = EUR 940.5.

Variable exposure mechanism to the Strategy

The investment strategy put in place, through the futures financial instrument, consists of a variable synthetic exposure to the Strategy's performance. Exposure to the Strategy will be determined by the application of a quantitative algorithm. It will vary between 0 and 100% and will evolve daily depending on one hand on the changes to the Strategy's performance and on the other hand on the levels of protection acquired under the sliding protection mechanism as detailed above.

Description of the "Strategy"

The Strategy offers an exposure to the development of the two portfolios: a risky portfolio and a defensive portfolio (see below).

The investment universe consists of five asset classes: equities, interest rates, commodities (through futures indices), real estate and currency. Asset class selection is performed through a filter process and has been designed to maximise portfolio diversification. The process of selecting the underlying assets within each asset class is based on criteria of geographic diversification, liquidity and transparency.

In a non-limiting way, this process leads to the selection of the following underlying factors, all different in terms of asset class and geographic area:

- developed country equity market (eurozone, US, Japan etc.)
- equity markets emerging countries
- commodity market through futures indices
- currency market
- interest rate market (OECD countries)
- real estate equity market

In addition, a volatility control mechanism will be applied to the Strategy. This volatility control mechanism will consist of a dynamic allocation between the universe comprising the two portfolios and an investment in monetary instruments in order to keep the Strategy's short-term volatility below 10% at an annualised rate. Volatility is a risk indicator. The lower it is, the less risky the Fund is considered to be. However, the volatility criterion does not capture all of the specific risks of the underlying indices.

Exposure to the Strategy may be achieved through a strategy index developed by BNP Paribas that is eligible for the Fund in accordance with the regulations in force.

The investment strategy uses a quantitative allocation mechanism that is readjusted monthly according to a determined algorithm.

Description of portfolios

Risky portfolio

The risky portfolio universe includes the following asset classes: equities, commodities (via futures indices), real estate and currency. The strategy put in place within the risky portfolio offers a long exposure to these asset classes.

The composition of the risky portfolio will be determined each month by application of an algorithm. The objective of the algorithm is to find the weights that will be assigned to each underlying asset of the portfolio universe in order to maximise the expected return under volatility constraints (the maximum level of volatility is set at 10%).

In application of an algorithm, an automatic reallocation is carried out every month between the different underlying assets. Optimal diversification will be sought through the application of a systematic optimisation model of the yield/risk couple based on historically observed levels (performance, volatility, correlation). The objective of the algorithm is to find the weights that will be assigned to each index in order to maximise the expected return under the constraint of volatility (the maximum level of volatility is set at 10%).

Lastly, the short-term volatility of the risky portfolio is checked daily in order to maintain it at a maximum annualised rate of around 10%.

The strategy put in place within the risky portfolio aims to take advantage of the risk premiums offered by each of the underlying markets. The source of performance is based on the search for optimal diversification and allocation within the portfolio. Through these different underlying markets, the Fund will indirectly have access to several complementary and different markets mentioned above.

Defensive portfolio

The universe of the defensive portfolio includes exposure to interest rates (OECD countries).

The composition of the defensive portfolio will be determined daily through quantitative indicators. These indicators are based on the term structure of the rate curves to identify prospects for long exposure on each of the instruments considered.

Similarly, and in the same way as the risky portfolio, the control of short-term volatility is carried out daily in order to maintain it at a maximum annualised rate of around 4%.

On the one hand, there are the replication and enforcement costs defined by underlying assets and which by their nature and the nature of the strategy vary over time, and on the other hand, the costs resulting from the management of the volatility control mechanism of the Strategy and the management of the sliding protection mechanism by the counterparty of the futures financial instrument. These costs initially estimated at 1% will reduce the Fund's performance.

Exposure to the Strategy may also be reviewed in response to events of a fiscal, regulatory or other nature affecting the ability to be exposed to the various underlying strategies.

In addition to the swap contract used to expose the Fund to the quantitative strategy, and in order to achieve its management objective, the Fund may use effective portfolio management techniques such as temporary sales or purchases of securities. The Fund may also invest in financial instruments (equities, bonds etc.) whose yield will be exchanged against a monetary rate via the conclusion of swap contracts.

In this way, the Fund may be exposed to money market returns (through the above-mentioned temporary sales or purchases of securities or swap contracts), which will be supplemented by the strategy's performance, generated via the swap contract used to expose it to the quantitative strategy, from which management fees will be deducted.

The Management Company reserves the right to stop exposing the Fund to the strategy in place in favour of exposing it to money market instruments, if the market conditions so warrant and particularly in the event of market disruption, and to re-expose the Fund to the strategy when market conditions are deemed to be more appropriate.

<u>Information relating to the SFDR and EU Taxonomy Regulations:</u>

Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector (the SFDR) sets out the rules regarding transparency and the provision of sustainability-related information.

The Fund does not promote environmental and/or social and governance characteristics, nor does it have a sustainable investment objective within the meaning of Articles 8 and 9 of the SFDR Regulation.

The Fund's management objective is to offer unitholders variable synthetic exposure to a quantitative strategy associated with a sliding protection mechanism. In order to achieve this objective, the investment process will not take into account the sustainability risks or the main negative impacts on sustainability factors.

The investments underlying this financial product do not take into account the European Union's criteria for environmentally sustainable economic activities.

Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on establishing a framework for promoting sustainable investments and amending the SFDR (Taxonomy Regulation) aims to establish criteria to determine whether an economic activity is environmentally sustainable.

The European Taxonomy Regulation is a classification system that establishes a list of economic activities that are environmentally sustainable.

Economic activities that are not recognised by the Taxonomy Regulation are not necessarily harmful to the environment or unsustainable. Furthermore, other activities that contribute substantially to the environmental and social objectives are not yet necessarily part of the Taxonomy Regulation.

The Fund's investments do not take into account the criteria of the European Union in terms of environmentally sustainable economic activities as established by the Taxonomy Regulation.

2. Asset classes to be included in the composition of the assets

The Fund may invest in the following assets:

Assets (excluding embedded derivatives)

The Fund will be invested in financial instruments (equities, bonds, debt securities, UCIs etc.) and/or money market instruments.

Equities

Within the limits set by the regulations, the Fund may be invested in capital securities and similar securities (shares, ADRs, GDRs, certificates and/or others, shares of closed-end funds etc.):

- Issued by listed and/or unlisted companies (up to a limit of 10% of the Fund's net assets) on regulated markets.
- Issued in euro or in other currencies.
- of all nationalities;
- issued by large-, mid- or small-cap companies;
- regardless of business sector.

Direct investments in the securities mentioned above will be systematically hedged through the use of total return swaps or other derivative financial instruments with the same characteristics so as to avoid exposing the Fund to additional equity risk. Such investments are made within the scope of the Fund's investment strategy.

Debt securities and money market instruments

The Fund may be invested in money market instruments (such as in particular, French annual interest treasury bills (BTANs), French fixed-rate treasury bills (BTFs) with a residual duration of less than 1 year, ECPs, CDNs (negotiable certificates of deposit) etc.) denominated in euro and/or in one of the currencies of OECD member states. These instruments comprise securities acquired outright or under reverse repurchase agreements.

INTEREST RATE SENSITIVITY RANGE	From 0 to 0.5
CURRENCY OF SECURITIES	All currencies*
LEVEL OF CURRENCY RISK	None**
RANGE OF EXPOSURES CORRESPONDING TO THE GEOGRAPHIC AREA OF THE SECURITIES' ISSUERS	Eurozone countries: 0% to 100% of net assets Non-eurozone countries: 0% to 10% of net assets

^{*} The Fund is primarily invested in euro.

Within the limits set by the regulations, the Fund may be invested in bonds of any kind: fixed-rate bonds, variable-rate bonds, indexed bonds (inflation, CMRs, CMSs). These instruments consist primarily of securities that have been acquired outright or purchased under repurchase agreements and had a minimum rating of A-3 (Standard & Poor's) or P-3 (Moody's) at purchase or, failing this, a long-term investment-grade rating or an internal rating assigned by the Management Company that meets equivalent criteria.

If the rating of issuers of securities held by the portfolio is downgraded, the Management Company may, in the interests of the unitholders, sell the securities issued by said downgraded issuers.

Debt securities and money market instruments may represent up to 100% of the Fund's net assets (maximum of 100% of net assets exposed to private debt). Investments outside the eurozone may account for up to 10% of the Fund's net assets.

Units or shares of UCIs

As part of its money market management, the Fund may invest up to 10% of its net assets in units or shares of UCITS or investment funds (AIFs).

These UCITS and investment funds (AIFs) include:

- UCITS under French or foreign law;
- French investment funds (AIFs) or investment funds (AIFs) established in other European Union member states or investment funds established on the basis of a foreign law that meet the criteria set out in Article R. 214-13 of the French Monetary and Financial Code.

The UCIs mentioned above may be managed by the Management Company or by companies affiliated to it within the meaning of Article L. 233-16 of the French Commercial Code.

Derivatives

The Fund may trade in regulated, French or foreign or over-the-counter forward financial instruments.

Transactions are carried out in accordance with the regulatory provisions, the overall risk related to financial futures and/or financial contracts that do not exceed the total value of the portfolio.

The forward financial instruments used to allow the Fund to gain exposure to the investment strategy with a view to achieving its management objective or to hedge certain risks include the following:

- single over-the-counter short-term options;
- purchase options on the strategy index;
- financial flow exchange transactions that may relate to the strategy index;

^{**} Assets denominated in a currency other than the euro are matched with one or more currency swaps in order to systematically hedge them against currency risk.

Where swap contracts are concerned, the Fund may enter into over-the-counter financial contracts (swaps), including total return swaps that exchange the performance of the Fund's assets against a fixed or variable rate, and one or more swaps that exchange a fixed or variable rate, as required, against the performance of the investment strategy.

Maximum proportion of assets under management that may be the subject of a total return swap: 120% of net assets.

Proportion of assets under management expected to be the subject of a total return swap: 100% of net assets.

These financial instruments will be entered into with counterparties selected by the Management Company in line with its best execution and best selection policy, from among those institutions with their registered office located in an OECD or European Union member state referred to in Article R. 214-19 of the French Monetary and Financial Code, and who are rated as good quality issuers. These counterparties may be companies related or affiliated to the Management Company.

Securities with embedded derivatives

The Fund does not plan to use securities with embedded derivatives (warrants, Credit Linked Notes, EMTNs etc.). Any warrants or rights obtained following transactions affecting the securities in the portfolio are authorised; however, the Fund does not intend to directly acquire this type of asset.

Deposits

The Fund reserves the right to make deposits during the life of the Fund as part of its cash investments, up to a limit of 10% of its net assets.

Cash borrowings

Within the context of its cash management, the Fund may temporarily borrow cash, up to a limit of 10% of its net assets.

Temporary purchases and sales of securities:

Types of transactions used: For the purposes of managing the Fund efficiently, the Management Company reserves the right to carry out temporary purchases and sales of securities, in particular: repurchase agreements, reverse repurchase agreements against cash, lending/borrowing of debt securities, capital securities and money market instruments, in accordance with the provisions of Article R. 214-18 of the French Monetary and Financial Code.

Types of transactions: all of which must be limited to achieving the management objective: All transactions are conducted so as to achieve the management objective or to optimise cash management and to comply at all times with constraints relating to the nature of the securities held.

Maximum proportion of assets under management that may be subject to such transactions or contracts: up to 100% of the Fund's assets.

Proportion of assets under management expected to be the subject of such transactions or contracts: nil.

Potential leverage related to temporary purchases and sales of securities: no.

Remuneration: see the "Fees and Costs" section below.

All transactions will be conducted under market conditions and any income generated will be paid in full to the Fund.

These transactions will be entered into in line with the Management Company's best execution policy, and will be entered into with counterparties selected by the Management Company from among those institutions whose registered office is located in an OECD or European Union member state referred to in Article R. 214-19 of the French Monetary and Financial Code, with a good quality issuer rating. These transactions may be conducted with companies affiliated to the BNP Paribas Group.

Information about contracts constituting collateral

To achieve its management objective, the Fund may obtain or grant the collateral referred to in Article L. 211-38 of the French Monetary and Financial Code in accordance with the Management Company's risk policy. These guarantees may be sovereign debt bonds issued by the states listed below and rated higher than AA or its equivalent by at least one of the following rating agencies: S&P, Moody's and Fitch. The

States concerned are: Austria, Canada, France, Germany, Luxembourg, Netherlands, Great Britain, United States of America, Australia, Switzerland, Norway and Sweden.

As collateral, the Fund may receive up to 100% of its net assets in securities issued or guaranteed by a member state of the OECD in accordance with the Management Company's risk policy. Therefore, the Fund may be fully guaranteed by securities issued or guaranteed by a single eligible OECD member state.

Only collateral received in cash may be reinvested in accordance with the regulations in force. Cash received may therefore be held on deposit, invested in high-quality government bonds, used in reverse repurchase transactions or invested in short-term money market UCITS.

The collateral received must be sufficiently diversified. Securities received from a single issuer may not exceed 20% of net assets. Notwithstanding the following, the Fund may receive up to 100% of its net assets, securities issued or guaranteed by an OECD member state as collateral in accordance with the Management Company's risk policy. Therefore, the Fund may be fully guaranteed by securities issued or guaranteed by a single eligible OECD member state.

In addition to the collateral outlined above, the Management Company provides collateral on the Fund's assets (financial securities and cash) in favour of the depositary in respect of its financial obligations to the depositary.

TOTAL RISK

The method used by the Management Company to calculate the total risk of the UCI it manages is the commitment method.

RISK PROFILE

Your money will be invested primarily in financial instruments selected by the Management Company. These instruments will be subject to market fluctuations and risks.

Due to its structure, the Fund will be subject to the main risks described below:

Risk of capital loss

Due to the sliding protection mechanism, the net asset value of the Fund may not decrease daily by more than 10% from the net asset value observed on the last working day of the previous month and not by more than 99% from the level of protection offered in the previous month. Thus, if the level of the Fund's net asset value decreases, the levels of protection acquired will also fall. There is therefore a risk that holders will lose almost all of their capital after a long holding period.

Model risk related to the Strategy

The selection and allocation model for each of the Strategy's risky and defensive portfolios is based on criteria for calculating returns and risks based on historically observed levels. So there is a risk that the model will not be efficient, and there is no guarantee that past market situations will recur in the future. The application of the model does not guarantee future results. Thus, through the model put in place, trend reversals should lead to a counter-performance of the Fund.

Risk related to changes in the underlying assets

Given the structure of the Fund, its valuation will depend on the development of the underlying components of the Strategy. As the Strategy is structurally purchasing these underlying assets, a decrease of one or more underlying assets will result in a decrease in the Fund's net asset value. But establishing a volatility control mechanism will diminish the impact of a downward overexposure of the basket of indices.

On the one hand, there are the replication and enforcement costs defined by underlying assets and which by their nature and the nature of the strategy vary over time, and on the other hand, the costs resulting from the management of the volatility control mechanism of the Strategy and the management of the sliding protection mechanism by the counterparty of the futures financial instrument. These costs initially estimated at about 1% will reduce the performance of the Fund.

Risk associated with a commodity futures index

The Strategy's portfolio may consist of commodity futures indices, so the Fund is exposed to liquidity risk specific to the trading of these financial instruments that may adversely affect the performance of the Fund.

Changes in the components of commodity futures indices may differ significantly from those in the markets of traditional financial instruments (equities and bonds).

In fact, changes in the price of commodities futures are strongly linked to the current and future production levels of the underlying asset, and even to estimated natural reserves, specifically in the case of energy products. Climatic and geopolitical factors can also affect the levels of supply and demand of the underlying asset in question or, in other words, may change the latter's expected rarity on the market. These factors specifically and directly influence commodity prices, explaining the lack of correlation between commodity markets and traditional markets.

Emerging country investment risk

The Fund's exposure to emerging markets may imply a greater risk of potential loss and thus of a decrease in the net asset value of the Fund than an investment or exposure in developed markets, particularly as a result of greater market volatility, a smaller volume of negotiations of the assets concerned, possible economic and/or political instability, risks of market closures or government restrictions on foreign investment, and, more broadly, conditions for operating and monitoring markets that can deviate from the standards prevailing in international market places.

Interest rate risk

The Fund is exposed to the interest rate market (OECD countries). The Fund's net asset value may decline if the algorithm fails to properly anticipate interest rate fluctuations in the countries concerned.

Risk related to the lack of rating of the underlying assets

Investors are urged to note the fact that the Fund's net asset value is determined every business day of the Paris, London, New York and Hong Kong Stock Exchange, with the exception of statutory holidays, on the basis of the closing prices of the underlying indices recognised on that date. If, for timing reasons, the place of listing of one of the underlying is closed at a net asset value date, the valuation of the forward financial instrument at that date will be based on a level estimated by the counterparty and deemed appropriate by the Management Company. This level may be conservative and therefore may lead to a risk of a decrease in net asset value.

Counterparty risk

Counterparty risk refers to losses incurred by the Fund as a result of over-the-counter transactions concluded with a counterparty if that counterparty defaults. This risk exists primarily for futures contracts (including total return swaps), repurchase agreements etc. that the Fund may enter into with BNP Paribas or any other counterparty. However, counterparty risk is limited by the implementation of a guarantee granted to the Fund in accordance with the regulations in force.

Risk of conflicts of interest

The Fund is exposed to the risk of conflicts of interest, particularly when making temporary sales or purchases of securities with counterparties linked to the group to which the Management Company belongs.

Risks associated with collateral management

Management of collateral received in connection with securities-financing transactions and over-the-counter forward financial instruments (including total return swaps) may involve certain specific risks such as operational risks or custody risk. As such, these transactions may have a negative effect on the Fund's net asset value.

Legal risk

The use of temporary purchases and sales of securities and/or forward financial instruments (including total return swaps [TRS]) may result in a legal risk related to the execution of contracts.

Sustainability risk

Unmanaged or unmitigated sustainability risks can impact returns on financial products. For example, if an environmental, social or governance event or situation were to occur, it could have an actual or potential negative impact on the value of an investment. The occurrence of such an event or situation can also lead to a change in the Fund's investment strategy, which can involve the exclusion of securities of certain issuers. More specifically, the negative effects of sustainability risks can affect issuers by means of a series of mechanisms, including: 1) a decrease in revenues; 2) higher costs; 3) damages or depreciation of asset value; 5) higher cost of capital; and 5) regulatory fines or risks. Owing to the nature of sustainability risks and specific issues such as climate change, the likelihood that sustainability risks will have an impact on returns on financial products is likely to increase in the longer term.

RECOMMENDED MINIMUM INVESTMENT HORIZON

3 years.

MANAGEMENT REPORT

STATUTORY AUDITOR

PRICEWATERHOUSECOOPERS

INVESTMENT POLICY

The Fund's investment strategy is to provide unitholders with (i) a variable synthetic exposure to a quantitative strategy over a recommended 3-year investment horizon (hereinafter the "Strategy") composed of long positions on different asset classes and (ii) a sliding protection mechanism described below under which the net asset value is, each day of the Fund's assessment, at least equal to the higher value between 90% of the net asset value observed on the last working day of the previous month and 99% of the level of protection offered during the previous month.

The "Strategy" offers an exposure to the development of two portfolios: a risky portfolio and a defensive portfolio:

- The risky portfolio universe includes the following asset classes: equities including real-estate stocks, commodities (via futures indices), and currencies. The composition of the risky portfolio is determined each month by application of an algorithm.
- The universe of the defensive portfolio includes exposure to interest rates (OECD countries). The composition of the defensive portfolio is determined daily through quantitative indicators.

Moreover, the short-term volatility of the Strategy is checked on a daily basis with the aim of maintaining it at an annualised rate of below 10%.

Exposure to the "Strategy" is determined by applying a quantitative algorithm. It varies between 0 and 100% and evolves daily depending, on the one hand, on changes to the performance of the Strategy and, on the other hand, on the protection levels acquired under the sliding protection mechanism.

In order to achieve its management objective, the Fund is fully invested in an OTC forward financial instrument, which allows it to benefit from a variable synthetic exposure to the performance of the Strategy and to the sliding protection mechanism.

The Protected Trend Fund (formerly "BNP Paribas Protected Fund Trend") was created on 30 September 2011, with an original net asset value of EUR 1,000. The minimum subscription requirement is 1,000 units, with the exception of the Management Company, the liquidity contributor and BNPP Participations.

Transparency in promoting environmental or social characteristics and sustainable investments

I - BNP Paribas Asset Management approach

BNP Paribas Asset Management's current general approach to incorporating environmental, social and governance (ESG) criteria is detailed on our website: As an investor – BNPP AM Global EN site (bnpparibas-am.com)

II - Investment strategy of the Fund

As part of the investment strategy implemented, the Fund does not promote environmental and/or social and governance characteristics, nor does it have a sustainable investment objective within the meaning of Articles 8 and 9 of the SFDR.

The Fund/SICAV's investments do not take into account the European Union criteria for environmentally sustainable economic activities as set out by the Taxonomy Regulation.

INFORMATION ON THE MANAGEMENT COMPANY'S REMUNERATION POLICY

Qualitative aspects of remuneration

Information regarding the remuneration policy applicable to the 2022 financial year is available on request from the Management Company: BNP PARIBAS ASSET MANAGEMENT France – TSA 47000 – 75318 Paris Cedex 09, France. Detailed information regarding the Management Company's remuneration policy is also available online at https://www.bnpparibas-am.com/en/remuneration-policy/.

Quantitative aspects of remuneration

Quantitative information regarding remuneration is outlined below, as required by Article 22 of the AIFM directive (Directive 2011/61/EU of 8 June 2011) and by Article 69-3 of the UCITS V directive (Directive 2014/91/EU of 23 July 2014), in a format that complies with the recommendations of the AFG (Association Française de Gestion – French asset management association)¹.

¹ Note: The above remuneration amounts cannot be reconciled directly with the accounting data for the year because they reflect the sums awarded based on the number of employees at the end of the annual variable remuneration campaign, in May 2022. Therefore, for example, these amounts include all the variable remuneration awarded during this campaign, regardless of whether or not it was deferred, and regardless of whether or not the employees ultimately remained at the company.

Aggregated remuneration of employees of BNP PARIBAS ASSET MANAGEMENT France ("BNPP AM France") (Article 22-2-e of the AIFM Directive and Article 69-3 (a) of the UCITS V Directive):

	Number of employees	Total remuneration (€k) (fixed + variable)	Of which total variable remuneration (€k)
All employees of BNPP AM France ²	978	133,825	50,406

Aggregated remuneration of employees of BNPP AM France whose activity has a significant impact on the risk profile and who are therefore "Identified Staff" (Article 22-2-f of the AIFM Directive and Article 69-3 (b) of the UCITS V Directive):

Business sector	Number of employees	Total remuneration (€k)
Identified Staff employed by BNPP AM France:	176	42,857
including Alternative Investment Fund managers/UCITS managers/managers of European discretionary funds	154	34,914

Other information:

> Number of AIFs and UCITS managed by BNPP AM France:

	Number of funds (31/12/2022)	Assets under management (€ billion) as at 31/12/2022
UCITS	188	79
Alternative Investment Funds	315	45

- In 2022, carried interest of €6.6k was paid to BNPP AM France staff employed as at 31 December 2022.
- An independent central audit of the overall BNP Paribas Asset Management remuneration policy and its implementation in 2021 was conducted between June and September 2022, under the supervision of the remuneration committee of BNP Paribas Asset Management Holding Group and its Board of Directors. Following this audit, which covered BNP Paribas Asset Management entities holding an AIFM and/or UCITS licence, the policy was awarded a "Satisfactory" grade (the best out of four possible grades) in recognition of the robustness of the current system, particularly in its key stages: identification of Identified Staff, consistency of the performance—remuneration link, application of mandatory deferral rules, and implementation of indexation and deferral mechanisms. A recommendation (not a warning) was made in 2022 to members of management teams who do not directly manage the portfolios themselves in order to improve some of the documentation and controls of the selection of index baskets.
- Additional information regarding the way in which variable remuneration is determined and deferred remuneration instruments can be found in the remuneration policy, which has been published on the company's website.

² In addition to these employees and the corresponding amounts, the following should be noted:

^{- 5} employees of the Austrian branch, one of whom has the status of "Identified Staff" and whose total fixed remuneration and total variable remuneration in 2021 amounted to €916k and €370k respectively;

²³ employees of the German branch, one of whom has the status of "Identified Staff" and whose total fixed remuneration and total variable remuneration in 2021 amounted to €5,026k and €1,867k respectively;

⁵³ employees of the Italian branch, two of whom have the status of "Identified Staff" and whose total fixed remuneration and total variable remuneration in 2021 amounted to €6,171k and €1,910k respectively;

^{- 74} employees of the Dutch branch, 10 of whom have the status of "Identified Staff" and whose total fixed remuneration and total variable remuneration in 2021 amounted to €10,668k and €2,902k respectively.

³ The list of Identified Staff is determined in light of the review conducted at year end.

STATUTORY AUDITOR'S REPORT ON THE ANNUAL FINANCIAL STATEMENTS Financial year ended 30 December 2022

STATUTORY AUDITOR'S REPORT ON THE ANNUAL FINANCIAL STATEMENTS Financial year ended 30 December 2022

PROTECTED TREND FUND

UCITS ESTABLISHED IN THE FORM OF A MUTUAL FUND Governed by the French Monetary and Financial Code

Management Company
BNP PARIBAS ASSET MANAGEMENT France
1 boulevard Haussmann
75009 Paris, France

Opinion

In performing the task entrusted to us by the Management Company, we have audited the annual financial statements of the UCITS established as the PROTECTED TREND FUND mutual fund for the financial year ended 30 December 2022, as attached to this report.

We certify that the annual financial statements are, in accordance with French accounting rules and principles, accurate and consistent and give a true and fair view of the performance of the past financial year, as well as the financial position and the assets and liabilities of the UCITS established as a mutual fund, at the end of this financial year.

Basis of opinion

Audit terms of reference

We have conducted our audit in accordance with the standards of professional practice applicable in France. We believe that the evidence gathered is sufficient and appropriate to justify our opinion. Our responsibilities pursuant to these standards are set out in the "Statutory Auditor's responsibilities regarding the audit of the annual financial statements" section of this report.

Independence

We carried out our audit in accordance with the rules of independence laid down in the French Commercial Code and the Code of Ethics for Statutory Auditors, for the period from 1 January 2022, to the date of issue of our report.

PricewaterhouseCoopers Audit, 63, rue de Villiers, 92208 Neuilly-sur-Seine Cedex, France Tel.: +33 (0)1 56 57 58 59, Fax: +33 (0)1 56 57 58 60, www.pwc.fr

.....

Justification of assessments

In accordance with the provisions of Articles L. 823-9 and R.823-7 of the French Commercial Code relating to the justification of our assessments, we bring to your attention the following assessments, which, in our professional opinion, were the most significant for the audit of the financial year's annual financial statements.

The assessments were made as part of our audit of the annual financial statements, taken as a whole, and therefore contributed to the formation of the opinion expressed in the first part of this report. We have no comment to make on any individual aspect of these annual financial statements.

1. Over-the-counter financial agreements:

The over-the-counter financial agreements held in the portfolio are valued in accordance with the methods described in the note on accounting methods and rules. Prices are calculated by the counterparties to the agreements and validated by the Management Company using financial models. Applied mathematical models are based on external data and market assumptions. Based on the elements leading to the determination of the valuations made, we have conducted an assessment of the approach implemented by the Management Company.

2. Other financial instruments in the portfolio:

The assessments we performed related to the appropriateness of the accounting principles adopted and to the reasonableness of the significant estimates used.

Specific verifications

In accordance with the standards of professional practice applicable in France, we have also conducted the specific verifications required by the legal and regulatory provisions.

We have no observations to make concerning the fairness and the consistency with the annual financial statements of the data provided in the Management Company's management report.

Information resulting from other legal and regulatory obligations

The review of compliance with legal and regulatory provisions calls for the following observations on our part, mentioned in our Statement on Asset Composition of 30 June 2022:

The fund did not comply with the diversification rules set out in AMF position 2013-06 between 17 May 2022 and 3 June 2022. For example, on 31 May 2022, the fund received four French government bonds as collateral, representing 53.41% of the net assets.

However, AMF position 2013-06 stipulates: collateral should be sufficiently diversified in terms of country, markets and issuers. The criterion of sufficient diversification with respect to issuer concentration is considered to be respected if the UCITS receives from a counterparty of efficient portfolio management and over-the-counter financial derivative transactions a basket of collateral with a maximum exposure to a given issuer of 20% of its net asset value.

The situation was regularised on 4 June 2022.

Responsibilities of the Management Company relating to the annual financial statements

It is the Management Company's responsibility to prepare annual financial statements that give a true and fair view, in accordance with French accounting rules and principles, and to implement the internal controls it deems necessary for the preparation of annual financial statements that do not include any material misstatement, whether due to fraud or error.

When preparing the annual financial statements, it is the Management Company's responsibility to assess the Fund's ability to continue as a going concern, to present in said financial statements, where applicable, the necessary information relating to its viability as a going concern and to apply the going concern accounting policy, unless it intends to wind up the Fund or to cease trading.

The annual financial statements have been prepared by the Management Company.

Statutory Auditor's responsibilities regarding the audit of the annual financial statements

Audit objective and methodology

It is our responsibility to draw up a report on the annual financial statements. Our aim is to obtain reasonable assurance that the annual financial statements, taken as a whole, are free of material misstatement. Reasonable assurance corresponds to a high level of assurance, but does not guarantee that an audit performed in accordance with the standards of professional practice can systematically detect any material misstatement. Misstatements may arise from fraud or error and are considered material where it can reasonably be expected that, taken individually or together, they may influence the economic decisions made by users of the annual financial statements that are based upon such misstatements.

As specified in Article L. 823-10-1 of the French Commercial Code, our task is to certify the financial statements and not to guarantee the viability or quality of management of the Fund.

As part of an audit performed in accordance with the standards of professional practice applicable in France, the Statutory Auditor exercises its professional judgement throughout this audit. In addition:

it identifies and assesses the risks that the annual financial statements may contain material misstatements, whether due to fraud or error, sets out and implements the audit procedures intended to counter these risks, and collates the items that it deems sufficient and appropriate to justify its opinion. The risk of non-detection of a material misstatement due to fraud is higher than that of non-detection of a material misstatement due to an error, since fraud may involve collusion, forgery, deliberate omissions, misrepresentation or the circumvention of internal control processes.

PricewaterhouseCoopers Audit, 63, rue de Villiers, 92208 Neuilly-sur-Seine Cedex, France Tel.: +33 (0)1 56 57 58 59, Fax: +33 (0)1 56 57 58 60, www.pwc.fr

.....

- it takes note of the internal control processes relevant to the audit so as to set out audit procedures that are appropriate to the circumstances, and not to express an opinion on the effectiveness of the internal control processes;
- it assesses the appropriateness of the accounting policies used and the reasonableness of the accounting estimates made by the Management Company, as well as the information provided in their regard in the annual financial statements;
- it assesses the appropriateness of the application by the Management Company of the going concern accounting policy and, based on the evidence gathered, whether or not there is significant uncertainty relating to events or circumstances that may affect the Fund's ability to continue as a going concern. This assessment is based on the evidence gathered up to the date of its report, on the understanding that subsequent events or circumstances may affect its viability as a going concern. If it concludes that there is significant uncertainty, it draws the attention of readers of the report to the information provided in the annual financial statements about this uncertainty or, if this information is not provided or is not relevant, it issues certification with reservations or a refusal to certify;
- it appraises the overall presentation of the annual financial statements and assesses whether said statements reflect the underlying transactions and events such that they provide a true and fair view thereof.

In accordance with the law, we would like to inform you that we were unable to issue this report within the regulatory deadlines due to the delayed receipt of certain documents necessary for the completion of our work.

Accounting principles and policies

The annual financial statements are presented in the form provided for by ANC Regulation No. 2014-01 of 14 January 2014, as amended.

The accounting currency is the euro.

All transferable securities held in the portfolio are recognised at historical cost, excluding charges.

Securities, futures and options held in the portfolio denominated in a foreign currency are converted into the accounting currency based on the exchange rates in Paris on the valuation day.

The portfolio's value is appraised whenever the net asset value is calculated and at the end of the accounting period using the following methods:

Transferable securities

Listed securities: at stock market value, including accrued coupons (at the day's closing price).

However, transferable securities for which the price is not established on the valuation day or which are quoted by contributors and for which the price has been adjusted, and securities that are not traded on a regulated market, are valued under the responsibility of the Management Company (or the Board of Directors for an open-ended investment company (société d'investissement à capital variable – SICAV)), at their likely trading value. Prices are adjusted by the Management Company based on its knowledge of the issuers and/or markets.

UCIs: at their last known net asset value or, if unavailable, at their last estimated value. The net asset values of the securities of foreign undertakings for collective investment valued on a monthly basis are confirmed by the fund administrators. Valuations are updated weekly based on the estimates issued by the administrators of these UCIs and validated by the fund manager.

Negotiable debt securities and equivalent securities that are not traded in high volumes are valued using an actuarial method at a rate applicable to issues of equivalent securities, to which a variance representative of the intrinsic features of the issuer is assigned, if appropriate. In the absence of sensitivity, securities with a residual term of three months are valued at the most recent rate until maturity; for those acquired for periods of less than three months, the interest is calculated on a straight-line basis.

Temporary purchases and sales of securities:

- Securities lending: the receivable representing the securities lent is valued at the securities' market value.
- Securities borrowing: the borrowed securities and the corresponding debt are valued at the securities' market value.
- Collateral: With regard to securities received as collateral when lending securities, the UCI has chosen to include these securities in the balance sheet using the value of the debt corresponding to the obligation to return these securities.
- Repurchase agreements with a residual term of three months or less: individualisation of the receivable based on the contract price. In this case, the remuneration is calculated on a straight-line basis.
- Long-term repurchase agreements: These are recorded and valued at their nominal amount, even if their maturity date extends beyond three months. Any associated accrued interest is added to this amount. However, some contracts provide special terms in the event of requests for early repayment in order to take into account the impact of the increase in the counterparty's financing curve. Accrued interest may then be reduced by this impact, with no applicable floor. The impact is in proportion to the residual maturity of the agreement and the difference between the contractual margin and the market margin for the same maturity date.
- Repurchase agreements with a residual maturity of three months or less: stock market value. The debt valued on the basis of the contractual value is recorded as a balance sheet liability. In this case, the remuneration is calculated on a straight-line basis.

Forward financial instruments and options

Options: the day's closing price or, failing this, the last known price.

Over-the-counter options: These options are valued at their market value, based on prices reported by the counterparties. These valuations are subject to controls by the Management Company.

The off-balance sheet valuation is calculated as an underlying equivalent based on the delta and the price of the underlying asset and, where appropriate, the exchange rate.

Term deposits: These are recorded and valued at their nominal amount, even if their maturity date extends beyond three months. Any associated accrued interest is added to this amount. However, some contracts provide special terms in the event of requests for early repayment in order to take into account the impact of the increase in the counterparty's financing curve. Accrued interest may then be reduced by this impact, but cannot be negative. Term deposits are valued at least at their nominal value.

Interest rate swaps:

- for swaps with a maturity of less than three months, interest is calculated on a straight-line basis.
- swaps with a maturity of more than three months are revalued at market value.

Synthetic products (a security linked to a swap) are recognised as a whole. Interest accrued on swaps forming part of these products is valued on a straight-line basis.

Asset swaps and synthetic products are valued on the basis of their market value. The valuation of asset swaps is based on the valuation of hedged securities, less the impact of changes in credit spreads. This impact is valued using the average of the spreads reported monthly by four counterparties, adjusted by a margin that depends on the rating of the issuer.

The off-balance sheet commitment for swaps corresponds to their nominal value.

Structured swaps (swaps with optional components): These swaps are valued at their market value, based on prices reported by the counterparties. These valuations are subject to controls by the Management Company.

The off-balance sheet commitment of these swaps corresponds to their nominal value.

The index swaps valuation, calculated by the OTC Pricing & Services team, is used to calculate the net asset value after checking its consistency with the counterparty's valuation if this is received within the deadlines. If this is unavailable or inconsistent, OTC Pricing & Services approaches the counterparty to identify and resolve the problems.

The off-balance sheet commitment of these swaps corresponds to their nominal value.

Financial management fees

- Maximum 1.25% (incl. tax)

Administrative fees external to the Management Company

- Maximum 0.35% (incl. tax)

Fees are calculated on the basis of the net assets. These fees, not including transaction fees, will be charged directly to the Fund's profit and loss account.

These fees cover all of the costs invoiced directly to the UCI, except for transaction fees. Transaction costs include intermediary fees

okerage, stock market taxes etc.) as well as transaction fees, if any, that may be charged by the depositary and the Management Compa particular.	ny

Guarantee

BNP Paribas grants to the Fund, for a renewable period of one year, protection under which BNP Paribas guarantees to the Fund that for each Fund valuation day, the net asset value shall be at least equal to the highest value between (i) 90% of the net asset value observed on the last working day of the previous month and (ii) 99% of the level of protection offered in the previous month (the "Protection"). The initial Protection level enjoyed by the Fund corresponds to 90% of the net asset value at the launch of the Fund, i.e. €900.

Any modification of the Protection, other than the annual renewal carried out under identical conditions, shall be subject to the prior approval of the Autorité des marchés financiers (French financial markets authority – AMF), and the Management Company shall inform the unitholders thereof under the conditions laid down in the regulations in force.

Facility providing the Protection: BNP Paribas

Governance methods: The Management Company will provide the Protection on behalf of the Fund. In the event that, on each date of determination of the net asset value, the net assets of the Fund would not be sufficient to ensure that the net asset value is greater than or equal to the protected level as described above, BNP Paribas will pay to the Fund, at the first request of the Management Company, the necessary complement.

Protection shall be given in consideration of the tax and regulatory provisions in force at the date of signature. The Protection may be subject to change in the event of a change in the aforementioned provisions leading the Fund to bear a direct or indirect financial burden of a fiscal or other nature.

Change in net assets

ADDITIONAL INFORMATION FOR INVESTORS IN THE FEDERAL REPUBLIC OF GERMANY

Facilities in the Federal Republic of Germany according to section 306a (1) of the Investment Code:

The prospectus, the key information documents, the management regulations and the annual and semiannual reports may be obtained, free of charge, in hardcopy form at BNP Paribas Asset Management France S.A.S, 9 rue du Port, 92000 Nanterre, France, (LIST.AMGPECIBSALESSUPPORT@bnpparibas.com), during normal opening hours.

Applications for the redemptions and conversion of shares may be sent to BNP Paribas 9, rue du Débarcadère, 93500 Pantin.

All payments to investors, including redemption proceeds and potential distributions may, upon request, be paid through BNP Paribas 9, rue du Débarcadère, 93500 Pantin.

The issue, redemption and conversion prices, the net asset value as well as any notices to investors are also available from BNP Paribas Asset Management France S.A.S, 9 rue du Port, 92000 Nanterre, France.

Information and access to procedures and arrangements referred to in Article 15 of Directive 2009/65/EC relating to investors' exercise of their rights can be obtained from BNP Paribas Asset Management France S.A.S, 9 rue du Port, 92000 Nanterre, France, (LIST.AMGPECIBSALESSUPPORT@bnpparibas.com phone number: +33 1 58 97 00 00).

In addition, the issue and redemption prices are published on www.bnpparibas-am.de.

No units of EU UCITS will be issued as printed individual certificates.

In addition, communications to investors in the Federal Republic of Germany will be made available by means of a durable medium (section 167 of the Investment Code) in the following cases:

- suspension of the redemption of the units,
- termination of the management of the fund or its liquidation,
- any amendments to the company rules which are inconstant with the previous investment principles, which affect material investor rights or which relate to remuneration and reimbursement of expenses that may be paid or made out of the asset pool,
- merger of the fund with one or more other funds and
- the change of the fund into a feeder fund or the modification of a master fund.
