BNY MELLON
INVESTMENT MANAGEMENT

BNY Mellon Euroland Bond Fund

EURO A (ISIN: IE0032722260)

a sub-fund of BNY Mellon Global Funds, plc. This Fund is managed by BNY Mellon Fund Management (Luxembourg) S.A.

Objectives and Investment Policy

OBJECTIVE

To provide total return that exceeds the Benchmark (against which it will measure its performance) through investment primarily, meaning at least 90% of its assets, in a portfolio of fixed income bonds and other debt securities issued by corporations or any government, government agency, supranational or public international organisations or in derivatives.

POLICY

The Fund will:

- invest in the Euroland region (i.e. countries which have the euro as their currency);
- invest in bonds and similar debt investments denominated in euro. For those investments not denominated in euro, the Fund will use techniques to try to eliminate the effects of changes in the exchange rate between the euro and other currencies (i.e. hedging). This aims to protect the Fund against losses caused by currency movements between the Fund base currency, euro, and the currency of the underlying assets of the Fund;
- invest in bonds and similar debt investments issued by governments, companies and other entities;
- invest in bonds with high and low credit ratings (i.e. investment grade and sub-investment grade bonds with a rating of AAA to B as rated by Standard and Poor's or similar rating agency); and

- limit investment in other collective investment schemes to 10%.

The Fund may:

- invest up to 30% in derivatives (financial instruments whose value is derived from other assets) to help achieve the Fund's investment objective. The Fund will also use derivatives with the aim of risk or cost reduction or to generate additional capital or income;

Benchmark: The Fund will measure its performance against Bloomberg Barclays Euro Aggregate Bond TR Index (the "Benchmark").

The Fund is actively managed, which means the Investment Manager has absolute discretion to invest outside the Benchmark subject to the investment objective and policies disclosed in the Prospectus. While the majority of the Fund's holdings are expected to be constituents of, and have similar weightings to, the Benchmark, the investment strategy does not restrict the extent to which the Investment Manager may deviate from the Benchmark.

OTHER INFORMATION

Treatment of income: net income from investments will be retained within the Fund and reflected in the value of your shares.

Dealing: you can buy and sell your shares in the Fund between 9:00 and 17:00 (Irish time) on each business day in Ireland. Instructions received before 17:00 will receive the price quoted on that day. The minimum initial investment for this share class is EUR 5,000.

Risk and Reward Profile

We have calculated the risk and reward category, as shown above, using a method of calculation derived from EU rules. It is based on the rate at which the value of the Fund has moved up and down in the past (i.e. volatility) and is not a guide to the future risk and reward category of the Fund. The category shown is not a target or guarantee and may shift over time. Even the lowest category 1 does not mean a risk-free investment.

This Fund is in category 3 because its historical value has shown moderately low volatility. With a Fund of category 3, you have a moderately low risk of losing money but your chance for gains is also moderately low.

THE FOLLOWING RISKS MAY NOT BE FULLY CAPTURED BY THE RISK AND REWARD INDICATOR:

- **Objective/Performance Risk:** There is no guarantee that the Fund will achieve its objectives.
- **Geographic Concentration Risk:** Where the Fund invests significantly in a single market, this may have a material impact on the value of the Fund.

- **Derivatives Risk:** Derivatives are highly sensitive to changes in the value of the asset from which their value is derived. A small movement in the value of the underlying asset can cause a large movement in the value of the derivative. This can increase the sizes of losses and gains, causing the value of your investment to fluctuate. When using derivatives, the Fund can lose significantly more than the amount it has invested in derivatives.
- **Changes in Interest Rates & Inflation Risk:** Investments in bonds/money market securities are affected by interest rates and inflation trends which may negatively affect the value of the Fund.
- **Credit Ratings and Unrated Securities Risk:** Bonds with a low credit rating or unrated bonds have a greater risk of default. These investments may negatively affect the value of the Fund.
- **Credit Risk:** The issuer of a security held by the Fund may not pay income or repay capital to the Fund when due.
- **Emerging Markets Risk:** Emerging Markets have additional risks due to less-developed market practices.
- **Counterparty Risk:** The insolvency of any institutions providing services such as custody of assets or acting as a counterparty to derivatives or other contractual arrangements, may expose the Fund to financial loss.

A complete description of risk factors is set out in the Prospectus in the section entitled "Risk Factors".
