

KEY INVESTOR INFORMATION

This document provides you with key investor information about this fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this fund. You are advised to read it so you can make an informed decision about whether to invest.

Candriam Equities L Risk Arbitrage Opportunities, a sub-fund of the SICAV Candriam Equities L

Class C - Capitalisation shares: LU2223682944

Competent authority: CSSF (Commission de Surveillance du Secteur Financier)
Management company: Candriam

OBJECTIVES AND INVESTMENT POLICY

Principal assets traded:

- Shares of companies in developed countries and/or emerging countries, of any capitalisation;
- Futures, options and swaps on regulated or over-the-counter markets;
- Money market instruments, bonds and other debt securities issued by all types of issuers whose short-term rating is at least A-2 on acquisition (or equivalent) by one of the rating agencies or with a credit quality deemed equivalent by the management company;
- Deposits or cash.

Investment strategy:

The fund seeks capital growth by investing in the principal assets traded and generating an absolute return greater than the capitalised €STR with an average volatility target of 4% to 6% under normal market conditions. However, the volatility may be higher, especially in abnormal market conditions

The management team makes discretionary investment choices based on economic/financial analyses.

The fund will seek to benefit from the use of arbitrage strategies, known as "special situations" mainly concerning equities issued by issuers located in developed countries.

The fund is mainly invested in securities contained in financial transactions in the form of a cash tender offer and/or exchange tender offer and/or declared merger. In this segment, the strategy consists of buying or selling financial instruments issued by companies involved in a cash tender offer, exchange tender offer or merger transaction in order to benefit from the transaction.

As a transaction that can have an impact on all asset classes, the management team may benefit from it via financial instruments other than equities.

The main risk incurred here is the failure to complete the transaction.

To a lesser extent, other special situations may be present such as demergers, changes in share ownership, changes in capital structure, sales of assets, management and strategy changes, company listings, etc. the list is not exhaustive: any event likely to create discontinuity in the price of an asset is a special situation.

For the investment of its cash, portfolio management is based on a prudent portfolio fund strategy mainly via bonds and money market instruments.

The fund may use derivative products both for investment and hedging purposes (hedging against unfavourable future financial events).

Benchmark: Euro Short-Term Rate (€STR) Capitalised

The fund is actively managed and the investment process implies referring to a benchmark index.

Definition of the index:

The index reflects the wholesale euro unsecured overnight borrowing costs of banks located in the euro area.

Use of the index:

- for the purpose of performance comparisons,
- for the purpose of calculating performance fees for certain share classes.

Redemption of shares: On request, every day, in Luxembourg.

Allocation of income: Reinvestment.

Recommendation: This fund may not be suitable for investors who plan to withdraw their capital within 3 years.

RISK AND REWARD PROFILE

- The risk level shown reflects the fund's historical volatility, completed where applicable by that of its reference framework. The volatility indicates the extent to which the value of the fund may fluctuate upwards or downwards.
- The historical data may not be a reliable indication for the future.
- The indicated category may vary over time.
- The lowest category does not mean "risk-free".
- There is no guarantee or mechanism to protect the capital.

The investor needs to be aware of the following significant risks which are not necessarily adequately taken into account by the indicator:

• **Arbitrage risk:** The fund may use the technique consisting in taking advantage of price differences (recorded or anticipated) between two securities/sectors/markets/currencies. If such arbitrage

transactions perform unfavourably (a rise in selling transactions and/or fall in buying transactions), the net asset value of the fund may fall.

• **Risk related to financial derivative instruments:** their use implies risk associated with the underlying assets and can accentuate downward movements via the resulting leverage effect. Hedging strategies using derivatives may not be perfect. Some derivatives may be difficult to value under exceptional markets circumstances.

• **High leverage risk:** the use of potentially high leverage may result in significant volatility, and the fund may suffer increased losses depending on this level of leverage.

• **Liquidity risk:** the fund may invest in securities and/or market segments that may be less liquid, in particular in certain market circumstances, with the result that securities cannot be liquidated quickly at reasonable prices.

• **Sustainability risk:** refers to any event or situation in the environmental, social or governance domain that could affect the performance and/or the reputation of the issuers in the portfolio. The sustainability risk may be specific to the issuer, depending on its activities and practices, but it may also be due to external factors.

CHARGES

ONE-OFF CHARGES TAKEN BEFORE OR AFTER YOU INVEST	
Entry charge	3.50%
Exit charge	N/A
Switch Charge	N/A
CHARGES TAKEN FROM THE FUND OVER A YEAR	
Ongoing charges	1.84%
CHARGES TAKEN FROM THE FUND UNDER CERTAIN SPECIFIC CONDITIONS	
Performance fee	0.27% - (The percentage represents the amount of the performance fee billed for the last financial year and corresponding to 20% per year of all returns achieved by the fund over and above the reference value set for this fee, i.e. the €STR floored at 0. The performance fee is subject to a high water mark. From 01/01/2022, implementation of an outperformance fee of 20% calculated using the Permanent High Water Mark method based on the outperformance of the NAV in relation to the benchmark index, i.e. Capitalised €STR (Euro Short Term Rate) floored at 0 and the conditions of which are set out in the prospectus.

The charges you pay are used to pay the costs of running the fund, including the costs of selling and distributing its shares. These charges reduce the potential growth of your investment.

Entry and exit charges:

The charges shown are maximum figures. In some cases, you might pay less.

You can find out the actual amounts from your financial adviser or distributor.

Ongoing charges:

The stated figure is based on the expenses for the previous financial year ended December 2021 and may vary from year to year.

It does not include a performance fee or the portfolio transaction costs, except those billed by the custodian bank and the cases where entry/exit charges are paid by the fund when buying or selling units in another fund.

More details on charges are found in the relevant sections of the prospectus accessible via www.candriam.com.
