

Be aware of currency risk. If you select a foreign currency share class, you will be exposed to currency risk, receive payments in a different currency to your local currency and your final return will depend on the exchange rate between these two currencies. This risk is not considered in the indicator shown above.

Investments in the fund are subject to general investment risks, such as market, counterparty and liquidity risks. Any specific risks to this fund are detailed in the prospectus.

This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted. The unfavourable, moderate and favourable scenarios shown are illustrations using the worst, average and best performance of the fund over the last 10 years. Markets could develop very differently in the future.

| Recommended holding period: | | 5 years | |
|-----------------------------|--|--------------------------|---------------------------|
| Example Investment: | | 10,000 CHF | |
| | | If you exit after 1 year | If you exit after 5 years |
| Scenarios | | | |
| Minimum | There is no minimum guaranteed return if you exit before 5 years. You could lose some or all of your investment. | | |
| Stress | What you might get back after costs | 8,020 CHF | 7,150 CHF |
| | Average return each year | -19.81% | -6.50% |
| Unfavourable | What you might get back after costs | 8,190 CHF | 8,240 CHF |
| | Average return each year | -18.13% | -3.81% |
| Moderate | What you might get back after costs | 10,040 CHF | 10,830 CHF |
| | Average return each year | 0.37% | 1.61% |
| Favourable | What you might get back after costs | 11,440 CHF | 12,340 CHF |
| | Average return each year | 14.41% | 4.30% |

The stress scenario shows what you might get back in extreme market circumstances.

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

Unfavourable scenario: this type of scenario occurred for an investment between September 2021 and September 2022.

Moderate scenario: this type of scenario occurred for an investment between July 2019 and July 2020.

Favourable scenario: this type of scenario occurred for an investment between January 2015 and January 2016.

What happens if Capital International Management Company Sàrl is unable to pay out?

For your protection, the fund's assets are held in safekeeping by its depositary, J.P. Morgan SE, Luxembourg Branch (the 'Depositary'). In the event of the Depositary's insolvency, the fund may suffer a financial loss. However, this risk is mitigated to some extent by the fact the Depositary is required by law and regulation to segregate its own assets from the assets of the fund. If the fund is terminated or wound up, the assets will be liquidated and you shall receive a share of any proceeds, but you may lose part or all of your investment. Your investment is not covered by the Luxembourg compensation scheme.

What are the costs?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and they will affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest and how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.

We have assumed:

- In the first year you would get back the amount that you invested (0% annual return). For the other holding periods we have assumed the product performs as shown in the moderate scenario.
- CHF 10 000.00 is invested.

| | If you exit after 1 year | If you exit after 5 years |
|------------------------|--------------------------|---------------------------|
| Total costs | 119 CHF | 596 CHF |
| Annual cost impact (*) | 1.2% | 1.2% each year |

(*) This illustrates how costs reduce your return each year over the holding period. For example it shows that if you exit at the recommended holding period your average return per year is projected to be 2.4% before costs and 1.2% after costs.

Composition of costs

| One-off costs upon entry or exit | | If you exit after 1 year |
|---|--|--------------------------|
| Entry costs | This includes distribution costs of 5.25%. This is the most you will be charged. The person selling you the product will inform you of the actual charge. | Up to 525 CHF |
| Exit costs | We do not charge an exit fee for this product, but the person selling you the product may do so. | 0 CHF |
| Ongoing costs taken each year | | |
| Management fees and other administrative or operating costs | 0.6% of the value of your investment per year. This is an estimate based on actual costs over the last year. | 62 CHF |
| Transaction costs | 0.6% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the underlying investments for the product. The actual amount will vary depending on how much we buy and sell. | 58 CHF |
| Incidental costs taken under specific conditions | | |
| Performance fees | There is no performance fee for this product. | 0 CHF |

Different costs apply depending on the investment amount. This illustrates costs in relation to the notional value of the PRIIP.

How long should I hold it and can I take money out early?

This fund has been created for long term investment and the recommended minimum holding period is 5 years. There will be no penalty should you choose to redeem your investment at any time prior to this. Details of the procedure for doing so can be found in the fund's prospectus. Investors are advised to make an assessment on their specific investment aims and appetite for risk.
