This document provides you with key investor information about this sub-fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this sub-fund. You are advised to read it so you can make an informed decision about whether to invest.

Carmignac Portfolio Patrimoine Europe

Unit A EUR Acc (ISIN: LU1744628287)
a sub-fund of the Carmignac Portfolio SICAV

Carmignac Gestion Luxembourg is the management company of this UCITS.

Objectives and investment policy

The key features of the sub-fund are as follows:

- The sub-fund objective is to outperform its Reference Indicator over a recommended minimum investment period of 3 years. The search for performance involves flexible, discretionary management on equity, fixed income, credit, as well as to a lesser extent foreign exchange markets, and the manager's expectations of how economic, corporate, and market conditions will evolve. The sub-fund may adopt a defensive strategy if the markets are expected to perform negatively.
- This Sub-Fund is an actively managed UCITS. The investment manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy. The Sub-Fund's investment universe is at least partly derived from the Reference indicator. The Sub-Fund's investment strategy is not dependent on the Reference indicator; therefore, the Sub-Fund's holdings and the weightings may substantially deviate from the composition of the Reference indicator. There is no limit set on the level of such deviation. The reference indicator comprises 50% STOXX Europe 600 (SXXR Index) and 50% BofA Merrill Lynch All Maturity All Euro Government Index (ECAS Index). It is rebalanced each quarter.
- This Sub-Fund mainly invests in bonds issued in European countries or currency, and also invests in equities from European countries including Turkey and Russia.
- Up to 50% of the net assets are exposed to equities and other securities giving or capable of giving direct or indirect access to the capital or voting rights of companies. At least 25% of the net assets shall be invested in equities, either in small, mid and/or large caps.
- Between 50% and 100% are invested in debt instruments including money market instruments, treasury bills, government and/or corporate fixed and/or floating rate bonds and inflation-linked bonds.
- Net exposure to currencies other than Euro, including emerging market currencies, generated through direct investments in securities or through derivatives, may differ from that of the reference indicator and/or portfolio of securities alone. The sub-fund uses them for exposure, relative value or hedging purposes.
- The sub-fund seeks to invest sustainably for long-term growth and implements a socially responsible investment approach within the equity portion of the portfolio.
- The manager may use Relative Value strategies as performance drivers, looking to take advantage of the relative value between different instruments. Short positions may also be taken through derivatives.

Other information:

- The sub-fund may use derivative instruments for hedging, exposure or arbitrage purposes, such as options (vanilla, barrier, binary), futures and forwards, swaps (including performance

swaps), credit (up to 30% of net assets) and CFDs (contracts for difference) on one or more underlyings. In relation to the markets in which the sub-fund invests, the manager invests in futures traded on regulated, organised or OTC European and international markets.

- The overall modified duration of the fixed income portfolio is between -4 and +10. Modified duration is defined as the change in portfolio capital (as %) for a change in interest rates of 100 basis points.
- Up to 15 % of the net assets may be invested in contingent convertible bonds ("CoCos"). CoCos are regulated subordinated debt instruments that are complex, but consistent in nature. Please refer to the prospectus for more information.
- The sub-fund may invest up to 10% of its net assets in UCIS.
- This sub-fund may not be suitable for investors planning to withdraw their investment within three years.
- Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 18:00 CET/CEST and are executed on the next business day using the previous day's NAV.
- This unit is an accumulation unit.

This indicator represents the annual historical volatility of the sub-fund over a 5-year period. Its aim is to help investors understand the uncertainty attached to gains and losses that may have an impact on their investment.

- Historical data used to calculate this indicator may not be a reliable indication of the future risk profile of the sub-fund.
- The risk category of this sub-fund is not guaranteed and may change over time.
- Category 1 does not mean the investment is risk-free.
- The sub-fund is placed in category 4 owing to its exposure to the equity markets and interest rate, credit and currency risks.
- The sub-fund's capital is not guaranteed.

Risks to which the sub-fund may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC.
- For more information on risks, please refer to the prospectus of the sub-fund.

Charges

The charges paid are used to cover the costs of running the sub-fund, including the costs of marketing and distributing units. These charges reduce the potential growth of the investment.
