Manufacturer's website: www.carmignac.com

Date of production of the KID: 16/02/2023

WHAT IS THIS PRODUCT?

Type: Carmignac Portfolio Patrimoine Europe is a segregated sub-fund of Carmignac Portfolio SICAV, an investment company with variable capital regulated by Luxembourg law and qualifying as UCITS pursuant to Directive 2009/65/CE.

Objectives: The sub-fund objective is to outperform its Reference Indicator over a recommended minimum investment period of 3 years. The reference indicator comprises 40% STOXX Europe 600 (SXXR Index), 40% BofA Merrill Lynch All Maturity All Euro Government Index (ECAS Index) and 20% ESTER capitalised. It is rebalanced each quarter. The search for performance involves flexible, discretionary management on equity, fixed income, credit, as well as to a lesser extent foreign exchange markets, and the manager's expectations of how economic, corporate, and market conditions will evolve. The sub-fund may adopt a defensive strategy if the markets are expected to perform negatively.

This sub-fund mainly invests in bonds issued in European countries or currency, and also invests in equities from European countries including Turkey and Russia. (i) Up to 50% of the net assets are exposed to equities and other securities giving or capable of giving direct or indirect access to the capital or voting rights of companies. At least 25% of the net assets shall be invested in equities, either in small, mid and/or large caps, (ii) Between 40% and 100% are invested in debt instruments including money market instruments, treasury bills, government and/or corporate fixed and/or floating rate bonds and inflation-linked bonds. Net exposure to currencies other than Euro, including emerging market currencies, generated through direct investments in securities or through derivatives, may differ from that of the reference indicator and/or portfolio of securities alone. The sub-fund uses them for exposure, relative value or hedging purposes.

The sub-fund may use derivative instruments for hedging, exposure or arbitrage purposes, such as options (vanilla, barrier, binary), futures and forwards, swaps (including performance swaps), credit (up to 30% of net assets) and CFDs (contracts for difference) on one or more underlyings. In relation to the markets in which the sub-fund invests, the manager invests in futures traded on regulated, organised or OTC European and international markets. The overall modified duration of the fixed income portfolio is between -4 and +10. Modified duration is defined as the change in portfolio capital (as %) for a change in interest rates of 100 basis points. Up to 15 % of the net assets may be invested in contingent convertible bonds ("CoCos"). CoCos are regulated subordinated debt instruments that are complex, but consistent in nature. Please refer to the prospectus for more information. The sub-fund may invest up to 10% of its net assets in UCIS.

This sub-fund is an actively managed UCITS. The investment manager has discretion over the composition of its portfolio, subject to the stated investment objectives and policy. The sub-

fund's investment universe is at least partly derived from the Reference indicator. The sub-fund's investment strategy is not dependent on the Reference indicator; therefore, the sub-fund's holdings and the weightings may substantially deviate from the composition of the Reference indicator. There is no limit set on the level of such deviation.

The sub-fund promotes environmental/social characteristics in accordance with Article 8 of the Sustainable Finance Disclosure Regulation ('SFDR') through best-in-universe and best-effort approaches, and an active engagement policy. Extra-financial analysis leads to a reduction of at least 20% of the sub-fund's investment universe via a negative filter excluding companies whose extra financial ratings reflect high risks. In addition, the sub-fund invests at least 10% of its net assets in sustainable investments within the meaning of SFDR. The sustainable investment definition used by the sub-fund uses the United Nations Sustainable Development Goals ('SDGs') framework. This framework is one of several that can be used to illustrate positive results; others may yield different results. The sustainability risk of the sub-fund may differ from that of its reference indicator.

Term: The SICAV was launched on 30/06/1999 for unlimited period. The sub-fund was launched on 29/12/2017.

Intended retail investor: This sub-fund is intended for private and institutional investors wishing to diversify their investments while benefiting from market opportunities through reactive asset management over a recommended investment period of more than 3 years, due to the sub-fund's exposure to the bond market, and to a lesser extent to the equity market.

The appropriate amount to invest in this fund depends on the personal situation of the investor, their knowledge of investment products and experience, their personal wealth, their cash requirements now and in the future, and their degree of risk aversion.

Investments may be redeemed each business day on request. Subscription, redemption or conversion requests are centralised on each NAV calculation and publication day before 18:00 CET/ CEST and are executed on the next business day using the previous day's NAV

The Depositary of the sub-fund is BNP Paribas Securities Services, Luxembourg branch.

This is an accumulation share.

The fund prospectus and latest key information document, as well as the latest annual report are available on the website www.carmignac.com, directly from the manufacturer or on the website www.fundinfo.com. Information on past performance for the last 10 years, where this data is available, and calculations of monthly past performance scenarios are available on the website www.carmignac.com.

WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk indicator: the summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets or because we are not able to pay you.

Risks to which the sub-fund may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- Counterparty risk: the sub-fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations, especially in the case of derivatives traded OTC

- Liquidity risk: the markets in which the sub-fund participates may be subject to temporary illiquidity. These market distortions could have an impact on the pricing conditions under which the sub-fund may have to liquidate, initiate or modify its positions.

1	2	3	4	5	6	7
---	---	---	---	---	---	---

← Lower risk Higher risk →

The length of the recommended holding period is 3 years.

If the sub-fund is denominated in a currency other than the applicable currency of the legal tender of the Member State where the PRIIP is being marketed, the return the retail investor

gets, when expressed in the currency of the Member State where the PRIIP is being marketed, may change depending on currency fluctuations.

This product does not include any protection from future market performance so you could lose some or all of your investment.

We have classified this product as 3 out of 7, which is a medium-low risk class. This rates the potential losses from future performance at a medium-low level, and poor market conditions are unlikely to impact the capacity of the fund to pay you.

PERFORMANCE SCENARIOS

The figures shown include all the costs of the product itself, but may not include all the costs that you pay to your advisor or distributor. The figures do not take into account your personal tax situation, which may also affect how much you get back.

What you will get from this product depends on future market performance. Market developments in the future are uncertain and cannot be accurately predicted.

The unfavourable, moderate, and favourable scenarios shown are illustrations using the worst, average, and best performance of the product over the last 10 years. Markets could develop very differently in the future.

Recommended holding period:		3 years	
Example Investment:		10 000 EUR	
		If you exit after 1 year	If you exit after 3 years
Scenarios			
Minimum	There is no minimum guaranteed return. You could lose some or all of your investment.		
Stress	What you might get back after costs	8 630 EUR	7 710 EUR
	Average return each year	-13.70%	-8.30%
Unfavourable	What you might get back after costs	8 680 EUR	8 910 EUR
	Average return each year	-13.20%	-3.77%
Moderate	What you might get back after costs	10 360 EUR	11 070 EUR
	Average return each year	3.60%	3.45%
Favourable	What you might get back after costs	11 430 EUR	12 250 EUR
	Average return each year	14.30%	7.00%

This table shows the money you could get back over 3 years, under different scenarios, assuming that you invest EUR 10 000,00.

The scenarios shown illustrate how your investment could perform. You can compare them with the scenarios of other products.

The scenarios presented are an estimate of future performance based on evidence from the past on how the value of this investment varies, and are not an exact indicator. What you get will vary depending on how the market performs and how long you keep the investment/product.

The stress scenario shows what you might get back in extreme market circumstances, and it does not take into account the situation where we are not able to pay you.

Your maximum loss would be that you will lose all your investment.

The figures shown include all costs of the product itself, but not necessarily all charges due to your advisor or distributor. These figures do not take into account your personal tax situation, which may also affect the amounts you receive.

- The unfavourable scenario occurred for an investment between December 2021 and December 2022.
- The moderate scenario occurred for an investment between December 2014 and December 2017.
- The favourable scenario occurred for an investment between December 2018 and December 2021.

WHAT HAPPENS IF CARMIGNAC GESTION LUXEMBOURG IS UNABLE TO PAY OUT?

For your protection, the assets of the fund are held with a separate entity, the custodian, so that the fund's ability to pay would not be affected by the insolvency of the management company. In the event of failure of the latter, the assets of the product held by the depositary will not be affected. In the event of default by the depositary, the risk of financial loss of the product is mitigated due to the legal segregation of the assets of the depositary from those of the product.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest 10 000,00 EUR. The figures are estimates and may change in the future.

The Reduction in Yield (RIY) shows what impact the total costs you pay will have on the investment return you might get. The total costs take into account one-off, ongoing and incidental costs.

Cost over time

	If you exit after 1 year	If you exit after 3 years
Total costs	196 EUR	664 EUR
Annual cost impact (*)	2.0%	2.0% each year

The table below shows:

- the impact each year of the different types of costs on the investment return you might get at the end of the recommended holding period;
- the meaning of the different cost categories.

Composition of costs

One-off costs upon entry or exit		If you exit after 1 year
Entry costs	We do not charge an entry fee.	0 EUR
Exit costs	We do not charge an exit fee for this product.	0 EUR
Ongoing costs taken each year		
Management fees and other administrative or operating costs	1,38% of the value of your investment per year. This estimate is based on actual costs over the past year.	138 EUR
Transaction costs	0,58% of the value of your investment per year. This is an estimate of the costs incurred when we buy and sell the investments underlying the product. The actual amount varies depending on the quantity we buy and sell.	58 EUR
Incidental costs taken under specific conditions		
Performance fees	There is no performance fee for this product.	0 EUR

HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

Due to the sub-fund's exposure to the bond market, and to a lesser extent to the equity market, the recommended investment period is over 3 years. However, you can redeem your investment without incurring any penalties at any point during this period, or stay invested for longer. Redemptions are possible daily. In exceptional circumstances, your right to request the redemption of your investment may be suspended.

HOW CAN I COMPLAIN?

If you have any complaints about the product, the conduct of the manufacturer or the person that advised on or sold this product, you can contact the initiator by e-mail to complaints@carmignac.com, by letter to 7 Rue de la Chapelle, 1325 Luxembourg, Luxembourg or by phone calling the number (+352) 46 70 60 1.

In all cases, you must clearly state your contact details (name, address, telephone number and email address) and give a brief explanation of your complaint. More information is available on our website www.carmignac.com.

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.
