Carmignac Portfolio Commodities Unit E (ISIN: LU0705572823)

a sub-fund of the Carmignac Portfolio SICAV

The fund manager of this UCITS is Carmignac Gestion Luxembourg, Carmignac Gestion Group.

Objectives and investment policy

The key features of the UCITS are as follows:

- ▶ The sub-fund aims to outperform its benchmark over a period exceeding five years and to seize the best opportunities available around the world using an active, discretionary investment strategy.
- ▶ The benchmark is a combination of the following MSCI ex-dividend indices: 45% MSCI ACWF Oil and Gas, 5% MSCI ACWF Energy Equipment, 40% MSCI ACWF Metal and Mining, 5% MSCI ACWF Paper and Forest, 5% MSCI ACWF Food. It is rebalanced annually.
- ▶ The sub-fund is an international equity fund invested across the whole of the natural resources sector (energy, precious metals, base metals, agricultural commodities and wood). Companies in which the sub-fund invests operate in the commodities, mining, production, enrichment and/or processing sectors. They may also be companies specialised in energy production, services and equipment. The Fund invests in financial markets all over the world.
- ▶ This is an accumulation fund.

Other information:

- ▶ The sub-fund will also use listed or over-the-counter derivatives for the purpose of hedging and/or generating exposure to equity and currency risk. Such transactions will be carried out provided that they do not exceed 100% of the sub-fund's net assets.
- ▶ The sub-fund may invest up to 10% of its net assets in units or shares of UCIs.
- ▶ This sub-fund may not be suitable for investors planning to withdraw their investment within five years.
- ▶ Investments may be redeemed each business day on request. Subscription and redemption requests are centralised on each NAV calculation and publication day before 18:00 CET/CEST and are executed on the next business day using the previous day's NAV.

Risk and reward profile

This indicator represents the annual historical volatility of the UCITS over a 5-year period. Its aim is to help investors understand the uncertainty attached to gains and losses that may have an impact on their investment.

- ▶ Historical data used to calculate this indicator may not be a reliable indication of the future risk profile of the UCITS.
- ▶ The risk category of this UCITS is not guaranteed and may change over time.
- ▶ Category 1 does not mean the investment is risk-free.
- ▶ Exposure to commodity markets explains the UCITS' classification in this category.
- ▶ The Fund's capital is not guaranteed.

Risks to which the UCITS may be exposed and which could lead to a fall in the net asset value to which the indicator gives too little consideration:

- ▶ Counterparty risk: The Fund may suffer losses if a counterparty defaults and is unable to meet its contractual obligations.
- ▶ For more information on risks, please refer to the prospectus of the UCITS.
